August 5, 1962

Dear Members of the Board of Education:

Chicago CORE calls upon you to "see to it that Chicago schools will be fully integrated and equal" when they open in September. Judge Julius J. Hoffman, in dismissing from the Federal Court the Zuber desegregation suit against you, is quoted in the Aug. 1, 1962, Sun-Times, as expressing confidence that Dr. Willis will see to it that this equality and integration are effected. CORE cannot share his optimism.

We ask you to act now, without waiting for the 20th day enrollment figures in September. Unless drastic measures are taken at your two August meetings, Chicago schools will open, as they closed in June, crowded, unequal, segregated, expensive. All four conditions have been caused by Dr. Willis' proposals adopted by your Board. They are quite unnecessary otherwise, as can be deduced from the enclosed graph.

Dr. Willis' Report 70420-H at your July 11 meeting revealed that the new facilities expected to open in September, minus the replacements, will be insufficient to accommodate the expected increase of 29,200 pupils and students.

Last fall, a report by Dr. Willis, dated Nov. 22, 1961, showed glaring disparities in elementary enrollments as compared with capacities, with the high enrollments mainly in the Negro areas. Many white area schools were under-utilized.

Shortly after, Dr. Willis reported suspiciously low capacities and uneven use of high school buildings, according to which the high schools lack about 20,000 seats. (See enclosed letter).

An expensive high school building program is planned for the immediate future. It was incorporated in the 1962 budget passed by the aldermen and neither corrected nor vetoed by Mayor Daley who must be aware that it is useless to keep the city taxes down if the Board of Education taxes are allowed to rise unchecked.

Buses would equalize the elementary school enrollment inexpensively and in the direction of integration. The inadequate 150 mobile classrooms were placed in Negro areas at an expense at least ten times that of buses.

A second way to improve education economically is to take the elementary pupils out of the high school buildings and the high school students out of the elementary buildings, use both fully, and redistrict.

If you do not at once correct the underlying philosophy by which decisions are made and rescind the decisions of the July 11 meeting creating high school branches in elementary school buildings, the 20th day enrollment figures in September will be taken as the basis for the 1963 budget and we shall continue for another year of inferior education.

Dr. Willis has never proposed to you a plan to equalize and integrate Chicago schools. Goaded by you, he reluctantly acquiesced in possible, limited use of buses at the parents' expense and only if schools become crowded to the point of double shift and there is empty space in a school not far away. He segregates high school students in branches, mainly of one race.

Chicago CORE asks you to instruct Dr. Willis to bring you a plan now to equalize and integrate the Chicago public schools. We ask you to announce and begin to effectuate such a plan before school opens.

Sincerely yours,

Samuel E. Riley, Chairman
CHICAGO CORE

August 3, 1962

Claire M. Roddewig, President
Board of Education
228 N. LaSalle St. (1)

Dear Mr. Roddewig,

Our organization requests the basis on which the capacity of the high schools is determined. The difference between the highest and lowest capacities is almost 50,000. Lavish use of high school space, the establishment of unnecessary branches in elementary schools, might lead to a parents' and taxpayers' revolt. You recall the reluctance of the southwest parents at the July 11 meeting to subject their children to the limitations of a Branch in Hubbard Elementary School as compared with the full program at Bogan or Lindblom?

Would you kindly explain to us, for example, how Dr. Willis determined the capacity of Harrison High School last fall to be 2,254 for an 8-period day?

In the 1929-30 Directory of Chicago Public Schools, Harrison is reported to have had 112 rooms. In 1940, with a branch in Jungman Elementary School, its enrollment was 4496. In 1950, with no branch, it enrolled 2848. Strayer gave its capacity as 3805; Dr. Hunt as 3241.

1950

Yet in 1962, Because of a projected enrollment of 2850, the actual enrollment without a branch, Dr. Willis recommended, and your Board passed at its last meeting, to establish a branch of Harrison at Froebel Elementary School. The parents of that area, exhausted and fatalistic after their long battle to save Froebel from being torn down, failed to protest. In 1950, Harrison could accommodate 2850 without a branch. In 1962, Dr. Willis regards 2850 as 600 over capacity. If, as the students say, the lunchroom is crowded, why not use one or more of the mobiles? The branch in Froebel will be almost entirely of one race. The boundary line of the branch follows the racial line at 16th Street.

At the July 11 meeting, you also passed, on Dr. Willis' recommendation, to establish a branch of Marshall High School at Orr Elementary School in the Humboldt Park area. Dr. Willis, last fall, gave the capacity of Marshall as 3534. The projected enrollment is 3595, only 61 over his extremely low capacity figure. ( Capacity given by Strayer, 4608; by Dr. Hunt, 4047). However, 40 of Marshall's high school rooms (total number given by 1931-2 Directory, 113) are used for elementary pupils. Here you have the curious spectacle of a high school being filled with elementary pupils and then establishing a branch in an elementary school for its high school students.

In both cases, there was a substantial increase in racial segregation. Practically all of the white Freshmen will be removed from Marshall High School. The high school unit in Orr Elementary School, composed of students from Austin High School and the northern part of Marshall's district, will be almost entirely white.

In the case of Marshall and Harrison High Schools, there is a difference of more than 2500 between the capacities of Strayer and those of Dr. Willis.

We should appreciate very much your letting us know the capacities of the high schools and the method of figuring them.

Sincerely yours,

Attention Faith Rich,
Schools Chairman

## WANTED: More Negro Apprentices at Washburne

While a person can make much progress in industry without having gone through a formal apprenticeship, studies show that apprenticeship is a significant aid to advancement both in pay and in responsibility. With automation the advantages are expected to increase.

The Comptroller of a large national organization with headquarters in Chicago went to considerable trouble to assist his son to enter upon a typographer's apprenticeship. A University of Wisconsin study of 340 men who had completed apprenticeships during 1940-1 found that "nearly 35 per cent had moved to management level positions during the first five years of their status as skilled workers." The writer of this Wisconsin doctoral dissertation had himself been an apprentice.

Yet the estimated number of Negro apprentices in May, 1961, in 12 trades of Chicago's publicly supported Washburne Trade School made up only 1% of those trades' 1960 enrollment of over 2600.

| TRADE | 1960 Apprentice Enrollment* | Estimated Negro** | Trade | 1960 Appr. Enrollment** | Estimated Negro** |

Total.....2682 Negro....26

The under-representation of Negroes among apprentices is not peculiar to Chicago. Apprentices, Skilled Craftsmen and the Negro: An Analysis, New York State Commission against Discrimination, 270 Broadway, New York City, New York, 1960, page 15; "Currently, about 2 per cent of the appriximately 15,000 registered apprentices in New York State are Negro."

---

*Leaflet issued by Washburne Trade School, 3233 West 31st Street, Chicago 23, Ill.
** In May, 1961

Why are there so few Negroes among apprentices? Is it because Negro young people want to go to college? And despise the blue-collar jobs? Is it because they cannot live on the low pay at the beginning of the apprenticeships? Or because they lack friends and relatives in the trades to tell them about the openings and help them get accepted? Or because the poor schooling in de facto segregated schools prevents them from qualifying? Or does racial discrimination keep them out altogether either because the contractors will not hire them or their names disappear into waiting lists of the Joint Apprenticeship Committees and fail to come forth?

All these are causes. The numerous and complex factors which account for the small number of Negroes in the skilled trades are well described in three studies. Harry Kursh, Apprenticeships in America, W.W. Norton & Company, Inc., New York, 1958, is subtitled "A Guide to Golden Opportunities in Industry for Students, Parents, Teachers, Guidance Counselors, and Leaders in Education, Labor and Industry." Its Chapter 8 "The Negro and Apprenticeships" has two subheadings: "The Penalty against the Nation" and"What the Negro Apprentice Should Do." The University of Wisconsin study of the 340 skilled workers was found on pages 33-34 of this book.

The Negro Wage-Earner and Apprenticeship Training Programs, A Critical Analysis with Recommendations, Labor Department, National Association for the Advancement of Colored People, 20 West 40th Street, New York 18, New York, February 25, 1960, is available free on request.

Also free is the above-mentioned study of the New York State Commission against Discrimination. This is a scholarly analysis covering the history and significance of apprenticeship in the United States as well as in New York State.

John A. Lapp, The Washburne Trade School, Fred Klein Company, Chicago, 1941, expresses no recognition of any racial problems but is informative for

the establishment and early history of the various apprentice trade courses in the public schools.

A study which is important as showing the future needs in the various trades is Vocational and Technical Education in Illinois, Tomorrow's Challenge, Bureau of Vocational Research, College of Education, University of Illinois, Urbana, 1960.

The present paper is a practical application of this background information to the problem of enabling more Negroes to become apprentices at Washburne Trade School.

Apprentices enter Washburne Trade School as a rule through the joint apprenticeship committees of the union and the industry, although they may also come directly to the school from the employer. The school assumes no responsibility for the selection of apprentices.

Therefore the first step is to locate the source of apprenticeship information in the particular industry.

| TRADE | APPRENTICESHIP COMMITTEE OR OTHER INFORMANT | |
|---|---|---|
| Carpenters | Mr. Charles A. Thompson, 12 E. Erie St. (11) | Su-7-3076 |
| Electricians | Mr. Ralph Thompson, 228 N. LaSalle St. (1) | St-2-5616 |
| Plumbers | Mr. Lamb, 1340 W. Washington (7) | Ha-7-1028 |
| Machinists | IAM Lodge 113, 5247 W. Madison (44) | Ma-6-1127 |
| Sheet Metal | Mr. Kaberlein, 3350 W. Jackson Blvd. (24) | Ne-8-7800 |
| Pipefitters | Mr. Bielke, 228 N. LaSalle St. (1) | Fr-2-6280 |
| Painters & Decorators | Mr. Vyt A. Lubert, 430 N. Michigan, Rm. 810 | Wh-4-4578 |
| | Home | 586- 2151 |
| Lathers | Mr. James Hamilton, 3233 W. 31st St. (23) | Cl-4-8127 |
| Plasterers | Mr. Hughes, 330 South Marshfield (2) | Se-3-5590 |
| Patternmakers | Mr. Gotham, 105 W. Adams (3) | St-2-9510 x 48 |
| Sprinkler Fitters | Mr. Charles Schwab, 910 W. Monroe St. (7) | Mo-6-0663 |
| Typographers | Mr. Frank O'Connor, 12 E. Grand Avenue (11) | Mi-2-2790 |

From the information given by these sources comes the following tabular overview of the various trades on page 4.

First there must be Negroes seeking apprenticeships. Most of the informants state that there have been few or no Negro applicants. Those who apply often have no idea of the length of the apprenticeship, the starting pay, the

requirement of a high school diploma. When the waiting list and these other requirements are brought to the attention of the applicant he usually does not return.

Since the Negro young person does not as a rule have friends or relatives in the trade, he would be likely to hear of opportunities for apprenticeship only through his school. An interview of a recent graduate of Washburne revealed that he had become an apprentice through prior work in the high school print shop and referral by the school. A source of Negro electrician apprentices is a shop employing Negro electricians who have recently been admitted to the union. In some trades there are a few Negro contractors who employ apprentices. For the most part, however, it appears that the best chance for the Negro to be hired and apprenticed is in a large shop. Large shops are almost certain to be white-owned.

Unfortunately, most schools do not mention apprenticeship in their literature. They speak of college or a job after high school. If the upper grades and high schools, general and vocational, would include apprenticeship in their materials and counseling programs, the first barrier to Negro apprenticeship would be removed.

In the foregoing tabular overview of the 12 skilled trades under consideration the first step varies. In some the first step is to get a job; in others the Joint Apprenticeship Council or Committee sends out the would-be apprentice to a trial period on a job. In most of the trades in which the first step is to get an application from the Joint Apprenticeship Committee, it is best to be able to mention a prospective employer. Whenever the first step is to get a job, the problem is where. Most trades have between 500 and several thousand shops or contractors. Yet of these perhaps only 100 or 150 hire any appren-

tices. How is the young person to know which of the names in the Telephone Red Book might hire him?

If the Washburne Trade School would publish a list of the contractors or shops placing apprentices with them annually in the Proceedings of the Board of Education and make these lists available to high school counselors, the problem of knowing where to start would be greatly simplified.

The waiting list of the Joint Apprenticeship Committee may be another barrier for Negro apprentices. The waiting list may be a bona fide list arranged in order of apparent competence after tests and interviews, or it may be merely a device to discourage unwanted applicants. In the latter case, anyone who applies may be put on the list and then those with "pull" may be selected from it and sent to jobs.

In view of the possible lack of standardized, objective procedures, subject to review, on the part of some Apprenticeship Committees, it would seem advisable for Negro applicants to consult the Chicago Urban League before and after filing applications.

In only one trade, the Lathers, was the requirement of sponsorship by one who had been a journeyman member of the Chicago local union for at least five years found. In most trades, the apprenticeship was theoretically open to everyone on the basis of ability. In a number of trades it was said that the tendency for sons and other relatives of members to fill the apprenticeships was declining.

The problem of qualifying was thought to be the bottleneck for Negro apprentices in the typographers. It is now said to be relatively easy to get hired as miscellaneous help in a shop. But only a few of these are chosen and qualify for the six-year typographer's apprenticeship. A substantial percentage of these apprentices are college graduates and almost half have at least some

years of college training. It is preferred that the apprentice shall have taken in high school algebra, plane, and, hopefully, solid, geometry, as well as many English courses. On the other hand, a few apprentices have not graduated from high school. They must, however, attend night school and produce a high school diploma or its equivalent at an appropriate point in the apprenticeship. A factor favorable to Negroes in this trade is the absence of an age limit. It was recalled that one apprentice had started at 40.

In a number of trades high school shop work, courses in blue print reading, and mechanical drawing were favorable points.

Only one union informant reported the continuous presence of Negroes in the union and among its officers over the years both in Chicago and in the south. This is the Plasterers' Union. It is interesting to note that this is the only trade among the 12 studied in which the estimated percentage of Negro apprentices is relatively high - 10%. It was stated that the union had had a clause in its by-laws for over 30 years - it was not known when it was adopted - providing that anyone practicing racial discrimination must come before the Executive Board.

It is shocking to find the number of Negro apprentices at Washburne so small with none at all in 7 of the 12 trades studied. To change this situation, the remedies already suggested might be tried, namely information placed before the upper grade and high school students by school brochures and counselors, the lists of the contractors sending apprentices to Washburne Trade School to be made public, the Negroes seeking apprenticeships to consult the Chicago Urban League.

A further step which might open up many practical possibilities would be to interview the Negro apprentices now at Washburne as well as a number of the white apprentices.

# Hearts and Minds

"To separate [children in grade and high schools] . . . from others of similar age and qualification solely because of their race generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way unlikely ever to be undone . . . . We conclude that in the field of public education the doctrine of 'separate but equal' has no place. Separate educational facilities are inherently unequal."

The United States Supreme Court,
May 17, 1954

Published by

**TEACHERS FOR INTEGRATED SCHOOLS**

**May 17, 1962**

Ten Cents

"Does segregation of children in public schools solely on the basis of race, even though the physical facilities and other 'tangible' factors may be equal, deprive the children of the minority group of equal educational opportunities? We believe that it does."

U. S. Supreme Court,

May 17, 1954

Fellow citizens:

The following pages describe the extent and effect of school segregation. We have been specific and balanced in our presentation, but we have not ignored the facts.

We are speaking of your city's school system, your city's school children, and your city's future citizens. Find out from us, the teachers whom you have asked to educate your city's children, the truth about our segregated schools. Read this pamphlet, and then, as an informed citizen, write to your Mayor and ask him to correct the situation. Let others read your pamphlet and encourage them to express themselves to the Mayor. He can and will do whatever you demand of him if it is for the good of your city. Integrated schools are a necessity if Chicago is to survive as one of the great cities of the world.

DEAR MAYOR DALEY:

Chicago's public schools are segregated. We know because we teach in them.

Segregation harms children, both Negro and white. That is why we are against it.

The city's children need everyone's help—yours especially.

If while reading this pamphlet you detect in it an undertone of impatience, you are right. We teachers are impatient with excuses and evasions. We are disturbed at the failure by school authorities thus far even to admit a problem exists.

Chicago's reputation for good schools is being destroyed. Integration can help restore that reputation.

Without a strong school system, Chicago's future will be bleak. The world of automation and technical skills is here and Chicago is still supplying citizens trained for the horse-and-buggy age of hard physical labor. Who will care to move here or stay on? Industry will not.

As mayor, you have recently recognized this fact in an eloquent way. In your statement of March 28, 1962, commenting on finding employment for the city's large Negro population, you said:

> *The problems of the lower economic group result from their being deprived of what they were entitled to—a better education. We mean to see to it that they have these opportunities.*

Exactly!

ures to save the city's children from the evils of segregated schools. Now is the time to plan immediate measures to save the city's children from the evils of segre gation.

Respectfully yours,

*Teachers for Integrated Schools*

## CHILDREN OF THE GHETTO

A ghetto is a living space in which certain people are forced to stay as though an iron gate kept them there. Chicago's Negro people live in a ghetto — virtually 825,000 of them.

Children are the ghetto's gravest victims. They live in cramped quarters; they play in crowded areas; they are systematically shortchanged in the schools. They are deprived of the most basic human rights: hope for the future and a confidence in their own capacity. What a heavy price for young people to pay!

Children of the ghetto make up more than 40 per cent of all public elementary school pupils in Chicago and 30 per cent of all high school students. By 1970, Negro children will make up more than half of all public school students. Continued segregation in the schools will blight the entire school system.

Segregated in neighborhood and school, the child of the ghetto is a stranger to white children. Both white and Negro children grow up isolated from one another. The Negro child quickly learns that he is underprivileged but that the white child will receive the privileges of childhood. The white child comes to think of the Negro child as strange and unworthy. Negro children may be led to consider themselves inferior; white children may be led to consider themselves superior. Both views are unreal and unhealthy. Such attitudes can prove the death of a good education and a progressive community.

Segregated schools are ghetto schools. Ghetto schools mock the promise of American democracy.

## GHETTO SCHOOLS ARE SHORT-SHIFT SCHOOLS

Roughly every sixth Negro child is in a "second-shift" elementary school. Such students attend school four hours a day as contrasted with all other students who attend school five hours. Thus, spread over an entire

school year the double-shift student loses one-fifth of his educational opportunity. *Over one year, it is equivalent to his being kept home for forty of the two-hundred school days.* Some students never get off second shift losing one-fifth of their entire elementary school career. Is it any wonder that children of the ghetto are often poorly educated?

Unfortunately for the children, double shifts appear very economical. Each of the shifts is packed full with overcrowded classes. School facilities are used over eight hours for two sets of students instead of five hours for one set. Per-student costs are very low. Another saving comes in the form of teacher salary costs. These are low in double-shift schools for two reasons. One, such schools have many substitutes who are paid considerably less than regular salaries. Two, in many double-shift schools, a regularly-assigned teacher will teach the first shift at his regular salary but teach the second shift for substitute pay.

Short-shift classes seem to be a permanent part of the ghetto system. At times, public pressure leads to a reduction in the number of second-shifts. Too often, this is not a real improvement. For example, during January, 1962, the number of short-shift classes at one elementary school was reduced. As a result, class size increased in a number of full-time rooms from 41 and 42 pupils to 47 pupils. Nothing was gained. Some teachers, frustrated at the already high class-size, became cynical about such "improvements."

In fall, 1962, only 4 percent of the children on short shifts were in all-white schools. The rest of the children were in ghetto and some few integrated schools.

Every child suffers from short shifts, even students from comfortable neighborhoods in which population has expanded rapidly. For the latter, however, their home atmosphere is a powerful factor in helping them overcome the handicap of short-shifts. For many Negro students, however, difficult home conditions preclude much

help from the family. They need more help from the school. But they get less.

At one double-shift ghetto school, three students recently wrote essays containing the following sentences:

1. "Some of the children in our school go in the mornings; some in the afternoon, and the lucky ones go all day."
2. "Some of the people in one school are more advanced than others. If we had more rooms and more teachers, ALL of the children in our school would be ten times as advanced as they are now."
3. "If I could change anything about school, I would have no crowded schools in all the world. You need plenty of space, so you are not cramped, to really learn."

Their teachers comment that they are eager to learn, and that they know they are not receiving equal treatment. What a terrible waste of young people!

## CROWDING OUT LEARNING

Sheer numbers can suffocate learning. In a ghetto school, 40 to 50 students are often stuffed into a single room. If they were angels, they would sit quietly. But they are children, often deprived children. Some have neither slept well nor eaten well. They are deeply confused by school. Receiving no special attention in school. they become resentful. Teachers tend to be reduced to custodians whose greatest accomplishment is physical order and quiet.

Some teachers in such conditions despair and leave at the first opportunity. They are not escaping from this or that race, however. They are rebelling at wretched learning and teaching conditions.

Many teachers stay on and try their best. We are proud of these colleagues. Their devotion is in the best tradition of our profession. Devotion, unfortunately, cannot thin out classes to manageable size.

Overstuffed classrooms are a reality not to be hidden by arithmetical operations. As bad as official figures of crowding are, you can be certain the actual situation is worse. There is only one sure way of measuring the degree of overcrowding—by counting the number of children in the classroom in relation to the number of classroom teachers. Too many special teachers and master teachers are used by principals as clerks and substitutes. On school records, however, they are counted as net additions to the teaching force. Counsellors who never teach a class are nonetheless counted as teachers, furthering the illusion of plenty amidst scarcity. For many years, organizations of Chicago teachers have called for a more straightforward way of measuring the student-teacher ratio.

The size of a class should be determined by the needs of the students. Children of the ghetto desperately need individual attention from their teacher. They need continued attention, but they do not receive it. To do so we would have to reduce class size from 50 students per class to about 15 per class.

Chronic overcrowding is bad not only because it is uncomfortable. It is bad because it condemns the overcrowded child to an inferior education. Overcrowding is the single greatest obstacle to educating the Negro child.

## SCHOOLS NEED REGULAR TEACHERS

One of every four Chicago public school teachers is a substitute. But many ghetto schools are staffed predominantly by substitutes. In some schools, nearly three-fourths of the staff are substitutes.

On an average day during September-November, 1961, nearly 13,000 students were, in effect, on a no-education basis: On that day some 333 classrooms were without any teacher at all. Most of these teacherless students were in ghetto schools. For reasons of safety, if not of education, many of the students were assigned as

temporary additions to already overcrowded classrooms —thus diluting even the best teacher's efforts. (Such additional students are added a few minutes after the regular teacher arrives at school. She has made no plans for them and their presence probably upsets the plans she made for her regular students.) Others of these teacherless students are "put under the charge" of selected eighth-grade students who manage brilliantly, considering their youth. But it remains a travesty on that part of the School Code of the State of Illinois which guarantees every child in the state "a good common school education."

## GHETTO STUDENTS ARE SHORTCHANGED

Negro-segregated schools are systematically deprived of equal per student money appropriations in the Board of Education budget. In the 1961 school budget, an uncontraverted Urban League report shows, numerous inequalities were enforced. Per pupil expenditures on Negro schools totalled one-fifth less than on white schools.

Teachers' salaries per pupil for Negro schools are 15 percent lower than for white schools. This reflects the lower salaries of substitutes and the free use of eighth-grade students as teachers. The disparity is even greater with regard to operating expenditures other than teachers' salaries: Negro schools receive one-third less per pupil than do white schools.

A Board of Education dollar spent in a Negro school buys only bare necessities; one spent in a white school buys necessities and extras. Few Negro schools, for example, are permitted to use rooms for anything but classes. Many white schools, on the other hand, use rooms for libraries, counselling rooms, home mechanics, and the like. The result is the same: children in Negro schools receive an impoverished rather than an enriched education. The "extras" that make for a good school are withheld from them.

## GHETTO SCHOOLS EDUCATE POORLY

Even if there were no school segregation, the quality of education would need to be improved. Segregation makes this need more urgent, especially in ghetto schools. Once a school becomes a ghetto school, it is as though a signal were given to lower educational standards.

Textbooks are basic tools of schooling. In ghetto schools, too little care is given to supplying textbooks which are of the appropriate grade level. Fourth-grade pupils may end up with third grade books because these happen to be available. Until very recently, children on double-shifts were not permitted to take their textbooks home; they were needed on the next shift. Due to parental complaints, this policy is only now beginning to change.

Academic standards are cheapened in ghetto schools. Less and less work is asked of students. Less and less is accomplished; instruction is watered down. A graduate of a ghetto school is expected to know less than a graduate of a non-ghetto school. He does. Why aren't poor students failed or held back? First, because this would further crowd the crowded lower grades. Second, because super-crowding would force school authorities to undertake remedial measures to educate children in small groups. Such expensive steps are avoided now by pretending that acceptable progress occurs even under segregated overcrowding.

Poor schooling snowballs into still poorer schooling. A child is placed in a overcrowded first-grade room. By the time he gets to an overcrowded second grade, he is less prepared than ever. And so on. By the time he reaches eighth grade, his inadequate education has prepared him for little more than failure. Only, he won't be failed. In January, 1962, for example, an attempt was made at a South Side elementary school to graduate all children over 14 years, regardless of schol-

arship and even grade placement. Sixth and seventh grade students graduated. They are now problems of the high school in their neighborhood.

The failure of ghetto schooling is evident in the city junior colleges. There, hundreds of graduates of Chicago high schools are found to have insufficient training even in reading and writing. A set of sub-college courses is offered in an attempt to bring these students up to standard. Be it noted that (1) very few of these students are graduates of high schools outside Chicago, and (2) the problem is present among others but in an extreme degree with ghetto students. In the pre-college remedial classes of one junior college branch were found three students who had been valedictorians of their high school graduating classes. One can only wonder at the extremely low academic standards of ghetto high schools which elevated sub-standard readers and writers to an artificially high status of valedictorian. How poorly educated must the non-valedictorians be!

The end-result of school segregation is educationally-handicapped citizens who are ill-equipped to function adequately in our community. The educational handicaps are primary obstacles in the way of earning a living. Being handicapped, they drain rather than contribute to community resources.

## DISTURBING RESULTS

The state labor director observes: "The educational base has not been sufficient to offer many young Negroes the opportunity to get better paying and higher skilled jobs." The executive director of the Mayor's Commission on Human Relations is reported as commenting on "the gap between the requirements of modern jobs and the deficiencies in Negro education and training." A Chicago specialist in problems of Negro employment "is disturbed by the evidence in inferior education" and "is especially incensed because the schools promote students whether they learn or not."

Ghetto schools cannot succeed in educating youngsters except to live as failures in a ghetto. We do not wish to be party to such a heartless and undemocratic outcome. Nor can we believe the people of Chicago do.

## DISCIPLINE IN GHETTO SCHOOLS

Discipline standards in ghetto schools reveal a lack of personal regard for students. In one ghetto high school, students are even required to sign their names before they go to the toilet. They know that similar rules do not exist throughout the school system. In another ghetto high school, students are "kicked out" without sufficient regard by administrators to the consequences. In ghetto elementary schools, extreme behavior problems are permitted to remain as disrupters in regular classes. Waiting lists for the centrally-located social adjustment schools are impossibly long. Meanwhile much more could be done to open additional social adjustment centers in the neighborhoods.

Discipline becomes a problem when the educational needs of children are not being met. Primitive methods and a crack-down approach will not solve the educational problems of ghetto children. However, special schools and special classes should be reserved for special behavior problems. Normal children everywhere need a calm, quiet classroom.

## EQUAL OPPORTUNITY FOR PRINCIPALS AND TEACHERS

An unwritten rule in the school system is: Never assign a Negro principal to a white school. Thus, while numerous principalships change hands every year, and while retirements are followed by new assignments, racial considerations are used to stop any of these changes from placing a qualified Negro principal into a white school. **There are no exceptions.** The probability that this results from pure chance rather than discrimination is infinitesimally tiny.

The policy of staff segregation controls almost to the same degree in the case of teachers. Hundreds of schools in the city have no Negro teachers. Thus is lost a splendid chance to educate white students to the fact that great numbers of Negro teachers are as well-prepared and effective as their white colleagues. Many Negro teachers would be encouraged to apply for transfers if they knew that the principals of the receiving schools would welcome them.

## THE PLEASURES OF TEACHING

Teaching can be very pleasurable. We like putting our knowledge and training to work. We like helping young people to find their own way. We like the feeling of accomplishment when a youngster says: "Now, I understand." We like to help students see the need for a better world than we and their parents have made for them.

Teachers in ghetto schools, however, may as well forget about much of this. Their job is terribly frustrating and unpleasurable. To know what must be done and to suffer the lack of any opportunity to do it—this is torture for the teacher. The overcrowding, the shortage of materials, the lack of time, the knowledge that teachers in more favored areas of the city do experience the pleasures of teaching—all of it bunches up into fistfuls of frustration. **Here is the most basic reason why experienced classroom teachers flock from ghetto schools, and why potentially good young teachers prefer to stay away in the first place.**

## ABOLISH SUB-STANDARD EDUCATION

Our city's school system is in an emergency condition. Many thousands of children are simply not receiving the education to which, by law, they are entitled. We must abolish all sub-standard education. This is the highest priority in the school system. Every

school must operate at a certain minimum leve of quality. Otherwise, the blight of low standards will undermine the entire system.

## WHAT TO DO RIGHT NOW?

1. **Relieve overcrowding by a comprehensive and, if necessary, permanent policy of open transfers.** The city-city-wide average class size is said to be 36 students. The school system should itself arrange a transfer whenever the city-wide average is exceeded in any school. Children on second shift should be transferred at the earliest opportunity. Students on an overcrowded full-time schedule should be transferred next.

When you have an average of 36 it follows that the less-crowded neighborhoods have individual classrooms containing from 25 to 35 students. In each of these schools, at least several ghetto children could easily be accommodated. Distributing them widely throughout the city would be a wise policy for two reasons: (1) The room is widely available, and (2) the educational advantages of integrated classes would be experienced by a maximum number of chilren.

Transporting school children by bus is traditional in many areas. The suburbs and countryside do it; many parents of students in private and parochial schools do it; even the Chicago Board of Education does it for physically handicapped children. In New York and Cleveland many children in public elementary schools are transported by bus. In none of these cases have there been any bad effects on the children arising out of bus transportation. Also, bussing is very economical; in Cleveland, it costs only ten cents per student per day.

Transfers should not depend upon parental initiative. A transfer of the type described here is an educational decision which the school system itself is competent to make. Nor should transportation of the transferred

children be charged to the parents. Overcrowding is not caused by parents of ghetto children. Why should they be forced to pay the cost? Public education in this country has always been founded on community-wide cooperation to educate all the children of all the people.

2. **Children of the ghetto must receive enough special help to give them an equal chance.** Plainly, this means that for a long time ghetto children will need drastically lower-than-average class sizes. There is no other way that teachers can help deprived students make up for lost time. It takes prolonged, patient, personal contact which is impossible even in a class of 36 students. Lower class-size in the earliest elementary grades is especially urgent. It is of prime importance for children to experience success in the earliest grades.

Children of the ghetto can learn much, much more than they presently do. But teaching children who have been systematically deprived is an extremely difficult task. Given favorable classroom conditions, however, it is a task that cannot help but be an inviting challenge to experienced teachers.

3. **The teaching staff must be integrated, city-wide.** The city's children are growing up in a new world of race relations. We may hope it will be a world in which mutual respect is increasingly based on first-hand personal knowledge. To accept people on their merits is a mark of a truly educated person. White children who have a competent Negro teacher learn more than their school lesson. They learn, too, that color is of no importance in evaluating human beings. Is this not a critically important lesson to learn in today's world?

The school system must first announce a positive policy of integration of faculties. Invidious considerations of race should be forbidden in processing assignments of teachers and principals.

**DEAR BOARD OF EDUCATION MEMBERS:**

School segregation has become a much debated topic in the community. Charges and counter-charges have been exchanged. But none has been resolved. This is dangerous. Crucially needed now are several bold actions by the Board which will demonstrate its good faith. You are the key to solving the problems of school segregation. The community will long remember such leadership.

Integrated schools will mean that more students who have not fallen behind in their education will be graduated from high school. Over a period of years, this will save the millions of dollars which non-high school graduates more often need in public assistance.

These high school graduates are actually capital added to our City. They are capital assets because in the new era which automation is ushering in at an incredible speed only the educated need apply for jobs. Many jobs will go begging because educated Americans will not be available for them.

Thus, in the midst of plenty, in a future with unlimited possibilities, in a space age that will demand the highest intellectual accomplishments from an exceptionally well educated populace, we are creating an under-educated mass of human beings whose bitterness can only result in increased racial tensions. When every citizens does not have the same rights and opportunities as every other citizen, it is a denial of the spiritual excellence which democracy claims for itself before the world. Let us affirm our democratic beliefs by offering equal educational opportunities to all Chicago's school-children in an integrated school system.

## TEACHERS FOR INTEGRATED SCHOOLS

T.F.I.S. is an organization of Chicago public school teachers who favor integrated schools.

We believe that the best possible education can only take place in integrated schools.

We know that education under segregated conditions is a travesty on the very idea and purpose of education.

We will work for and with every group which is seeking genuinely to bring about integration in the Chicago Public Schools.

We are in favor of any moral means which can be used to bring about integration in the Chicago Public Schools.

We shall present in every way possible our unique professional observations and information to the public, to parents, and to other teachers.

We will work for the integration of faculties in the Chicago Public Schools.

We stand willing to actively participate with all educational groups seeking to achieve equality of educational opportunity for all of Chicago's school children.

# Women Disrupt School Hearing

## *Racial Equality Group Assails Willis; Asks to Be Heard*

BY HELEN FLEMING

A loud ,prolonged demonstration Thursday disrupted a South Side hearing on the school board's proposed 1963 budget.

About 30 women, members of the South Side Chapter of the Committee on Racial Equality (CORE), chanted and waved placards.

A spokesman for the 4th Ward Independent Voters of Illinois demanded that Benjamin C. Willis resign as superintendent of schools.

Willis, pale and busily jotting notes, threatened to walk out unless the commotion subsided.

* * *

"IF YOU WANT to know what I'm thinking about," Willis told the 200 spectators when it was all over, "get a copy of Kipling's 'If.'"

(The Rudyard Kipling poem begins: "If you can keep your head when all about you/ Are losing theirs and blaming it on you;/ If you can trust yourself when all men doubt you/ And make allowance for their doubting, too . . .")

The disorder started after seven speakers had already read

statements into the record at the hearing in Beulah Shoesmith School, 1330 E. 50th St.

* * *

**MRS. JOAN** Hamilton, 29, of 5639 S. Cottage Grove, a representative of CORE, attempted to get the microphone ahead of the eighth scheduled speaker.

The chairman, District Supt. Curtis Melnick, gaveled her out of order.

About 30 other women began chanting, "Let CORE speak!" while Melnick continued to bang his gavel and Mrs. Hamilton read her statement.

* * *

**THE** demonstrators waved placards that read, "General Willis," "The Superintendent Belongs in Mississippi" and "Let's Get Hep to Ben and His Wagons."

("Wagons" is a reference to mobile classrooms, which Willis critics charge are a device for avoiding transferring of Negro pupils to undercrowded schools in all-white neighborhoods.)

The bedlam continued for 15 minutes until Willis rose and said, "I want to assure you I will soon be on my way if this continues. I have a number of other things I can do."

* * *

**SCHOOL OFFICIALS** had scheduled Thursday's hearing for community organizations. They said they would not recognize CORE because they consider it as a city-wide organization, and as such should be heard at a city-wide hearing Nov. 19.

CORE spokesmen argued that theirs is both a community and a city-wide organization, just as the PTA is recognized in the dual capacity.

* * *

**LATER IN** the hearing, Mrs. William J. Rogers, of the 4th Ward Independent Voters of Illinois unit charged that Willis "has failed to date in his respect for human dignity and consideration for the rights of the individual."

# Demonstrators Je

By Ruth Dunbar

Jeering, unruly demonstrators, angry over school segregation problems, repeatedly disrupted a school budget hearing Thursday in the Hyde Park-Kenwood area.

At the hearing for District 14 in Shoesmith School, 1330 E. 50th, they waved placards and clapped loudly at attacks on Schools Supt. Benjamin C. Willis.

**Chant A Demand**

Several times they took over the microphone and refused to sit down, shouting their bitterness above the pounding gavel of District Supt. Curtis C. Melnick, who chaired the hearin

The demonstrators chanted demand that Melnick shou "Let CORE speak." CORE, th Congress on Racial Equalit was denied a place on th schedule on the ground tha it is a citywide organizatio School officials, who have con sistently refused CORE's re quest to speak at every distric hearing, contend CORE is eli gible to be heard only at th citywide hearing that will b held Nov. 19 at the Chicag Board of Education.

CORE members contend tha the organization has communit units that are concerned abou the schools in specific areas.

Willis listened grim-face throught he noisy, two-hour ses sion. At one point after a 15 minute demonstration, the super intendent said they were wastin time.

"If this is what the peopl here want, I assure you I have a lot of other things to do and will soon be on my way," he said.

**Wave Placards**

The demonstrators finally yielded to Melnick's pleading— "Won't you please sit down?"

# er, Disrupt A School Hearing

following the last scheduled presentation, about 50 persons stalked out shouting and waving placards.

Typical placards read: "Wanted — Chicago school superintendent," "Get hep to Ben the gyp and his Willis Wagons" (a reference to mobile classrooms), and "We love Uncle Ben — Signed Uncle Tom."

Willis told the 150 remaining in the room:

"If you want to know what I've been thinking, get a copy of Kipling's poem 'If.'"

The poem begins:

*'If you can keep your head when all about you*
*Are losing theirs and blaming it on you . . .'*

Several speakers condemned mobile classrooms, which they called "Willis Wagons." Mrs. Mamie Mitchell, 1504 E. 62d, contended that the school board is spending "double money" to prepetuate segregation in Chicago — "namely, money for empty classrooms and money for trailer camps."

**First Demonstration**

The first demonstration followed a statement by Kenneth Gillis, speaking for Ald. Leon M. Despres (S.L.) He insisted Chicago schools are segregated and asserted that the school board "has a solemn moral and legal obligation not to permit schooling to be racially separate and therefore inadequate."

Mrs. William J. Rogers, speaking for the 4th Ward unit of Independent Voters of Illinois, was loudly applauded and cheered when she said:

"Dr. Willis to date has failed in his respect for human dignity and consideration of the rights of the individual . . . He has preferred to insult and belittle interested citizens rather than to speak to the issues at hand . . . We ask for the resignation of Dr. Willis as superintendent of Chicago public schools."

**Pastors' Group**

The longest demonstration followed a presentation by the Rev. Charles T. Leber Jr. of the Greater Woodlawn Pastors' Alliance.

He urged the school board to save money by utilizing all vacant classrooms and to adopt a statement favoring racial integration. Referring to Willis' $48,500-a-year salary, he said: "We believe that Chicago should expect, for the money being spent, much more than it is getting."

Although several speakers commented favorably on the board's plan to permit students to transfer out of overcrowded schools into some underused schools, it was faint praise.

They said the formula is unfair in that it will permit children to transfer only when classes have more than 40 pupils, into schools that average less than 30 per room. They said the board should pay transportation costs of those in the plan.

**Another Outburst**

Another outburst came when a dissenting group from the Tesla PTA tried to keep Mrs. Juan Sinclair, their treasurer, from speaking for the group. Mrs. Betty Brown, 6461 S. Kenwood, seized the microphone and shouted defiantly that Mrs. Sinclair had been hand-picked by the school principal.

She was followed by Lawrence Young, 6156 S. Vernon, who shook his finger at Willis and said: "I'm from the South Central Council of the PTA. The people chosen to represent the PTA are not being heard. The PTA may as well not be in existence." Young said he is recreation chairman for the council.

After the meeting, Deputy Supt. James H. Smith observed that such demonstrations "only make the job of trying to integrate the schools more difficult."

He predicted it will be harder to carry out the voluntary transfer program, scheduled to start next month, because of reactions to the demonstrations.

## Erhard Returns

FRANKFURT, Germany (UPI)—West German Economic Minister Ludwig Erhard Thursday returned from a one-week trip to the United States "deeply impressed by the firm

Boarder

DR. CURTIS C. MELNICK, District 14 Supt. of Schools (2nd from left), consults with General Supt. Benjamin C. Willis at local budget hearing at Shoesmith School, 1330 E. 50th, last Thursday morning. Dr. Melnick served as chairman, and met much resistance during the half day task.

# Ald. Despres' Statement

(Continued from page 4)

boundaries.

--permanent or temporary abandonment of unfit schools.

--accurate methods for appraising actual use of classrooms.

--analysis and correction of teacher-load figures.

--transfer of pupils in districts or combinations of districts.

--transportation of such pupils.

--arrangements with suburban schools for unilateral or reciprocal transfer of students to or from suburban schools.

--formulation of Chicago's educational goals in consistency with basic American principles of freedom and equality.

Supplied with adequate staff, appropriations, and power; backed by the will and resolution of the Board to achieve integration in education; and supported by a school administration imbued with a desire to achieve such a policy, the recommended Bureau on Integration in Education could be an enormous step forward in the improvement of Chicago.

Unfortunately the Board has not yet adopted an affirmative policy for integrated education; the Board's administration has not yet given up its rigid defense of segregated education, sometimes euphemistically referred to as "Chicago's neighborhood school policy"; and School personnel have not been allowed to express or implement plans for integrating education.

# Woodlawn Conference Demands Info

Exerpt from statement by UNITED WOODLAWN CONFERENCE, 1230 E. 63rd, presented on behalf of Lorenzo W. Smith, President, by Miss Esther Davis, Member, Board of Directors

"There is a rumor current in the Woodlawn community that a ship from outer space landed at 61st Street and University Avenue during the summer — and took off again in panic after its occupants had absorbed the strange picture around them. On the northwest corner stands a huge parking lot, sparsely dotted with autos; near the southeast corner stands a smaller lot, lined with rows of mobile classrooms — 18 in all — and with less space between them than the cars on that parking lot enjoy.

The creatures from that other world concluded that the earth belongs to things on wheels with motors; that the fate of small, two-legged animals like themselves, with hearts and minds instead of motors, must be confinement in groups of 30 to the crowded box-like units. They decided to take off before they too were trapped. . .

"Your budget, Dr. Willis, is, like all other budgets, no more than a translation of your policy —and if, as you claim, your purpose is to provide equal educational opportunity for all the children of Chicago, then we must ask, with apologies for the crude vernacular, that you "put your money where your mouth is", and that the Board of Education spends that money as it has been budgeted.

"And finally, your budget for 1963 should list in clearcut language the full information the public has for so long asked about each school - its capacity, enrollment, facilities, the exact assignment of teaching personnel, and, of equal importance, how many more teachers and what new facilities it requires to provide a full education with 30 pupils per class. . ."

Mrs. Esther Davis

# Jeers Upset School Hearing

(Continued from page 8)

and money for Trailer Camps."

Dr. Charles T. Leber, pastor of the First Presbyterian Church, representing the Greater Woodlawn Pastors' Alliance, defended the right of CORE and others to be heard. Mrs. Alice Brown, 7318 Blackstone, representing T.W.O., called for Supt. Willis' resignation.

When Supt. Willis rose to make concluding remarks, almost half the auditorium emptied, led by the demonstrators waving their placards and shouting denounciations.

## EDITORIAL

# Public's Right To Criticize

Supt. Benjamin Willis is the most arrogant host we know. He invites the public to come to district budget hearings and if they dare to criticize he insults and harangues them. There have even been comments from PTA leaders that pressure has been exerted on them by school officials to eliminate criticism of school policies from their testimony.

Supt. Willis seems to feel that people should come to the budget hearings and cheer everything loudly. Exactly where they are supposed to go if they want to criticize he doesn't make clear.

The superintendent's behavior has succeeded in intimidating his own staff. They live in fear of his wrath. He now seems to be trying to do this to the public. It would, however, be more helpful if Supt. Willis would remember that public education is the concern of the public, that they pay for it, that it is their children who get educated, and that it is the general public's good which is served.

Characteristically, Supt. Willis concluded the hearing by arising to say that, "If you want to know what I'm thinking about, get a copy of Kipling's 'IF". The Kipling poem begins: "IF you can keep your head when all about you/ Are losing theirs and blaming it on you;/ IF you can trust yourself when all men doubt you/ And make allowance for their doubting, too..."

Kipling, of course, was the poet of English imperialism, of the subjugation of less fortunate nationalities. But there was a poet of American democracy, James Russell Lowell. In his "Stanzas Of Freedom", there too may be found lines beginning with the word, "IF". Lowell declared one unfit: "IF ye do not feel the chain, when it works a brother's pain", and, "IF ye hear without a blush/ Deeds to make the roused blood rush..."

Considering the segregation in Chicago's public schools, it would seem Lowell might have been more appropriate than Kipling for a fit Superintendant of schools to quote at the end of a hearing such as occurred last week in district 14.

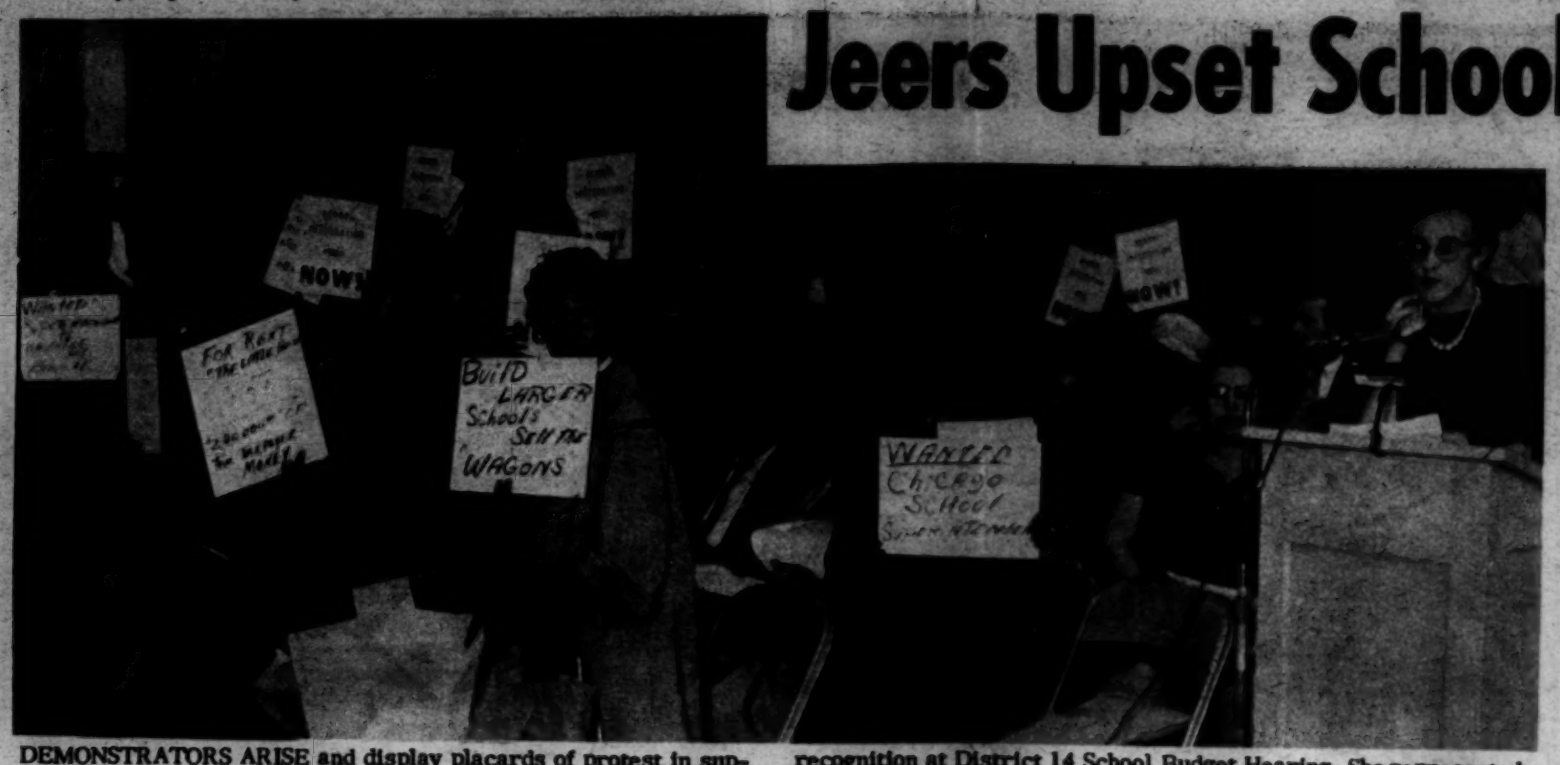
# Jeers Upset School Hearing



DEMONSTRATORS ARISE and display placards of protest in support on Mrs. Joan Hamilton (at microphone) who was denied recognition at District 14 School Budget Hearing. She represented CORE.

## District 14 Explodes In Angry Scene

### T.W.O. Leads Protests

Anger over school segregation and the arrogance of school officials exploded in unruly demonstrations and protests last Thursday at the District 14 School Budget Hearing. A group of some 50 persons led by The Woodlawn Organization, crowded into the gymnasium of the Shoesmith School, 1330 E. 50th, with protest signs and determination to air their grievances.

The biggest explosion came when Mrs. Joan M. Hamilton, 5639 Cottage Grove, representing the Southside unit of The Congress Of Racial Equality, was denied recognition by acting chairman, Curtis C. Melnick, District 14 Superintendent of Schools. Mrs. Hamilton had been refused the right to speak at the hearing in a letter from Melnick, dated Sept. 17, ". . .on the grounds that Chicago CORE is a city-wide unit and should seek to speak at the city-wide hearings. One has already been announced for Nov. 19 . . .

The letter continued, "I fond nothing in the telephone book, nor any other evidence to substantiate your claim that there is a south side unit of CORE: nor have I seen any mention of CORE in any newspaper, either community or metropolitan, which refers to it in any other terms than Chicago CORE, a city-wide group.

However, the 4th ward unit of the Independent Voters of Illinois was permitted representation at the local hearing.

During the ensuing demonstration, placards were displayed. Some read: "The Superintendent Belongs in Mississippi", "Let's Get Hep to Ben the Gyp and His Willis Wagons", and "We love Uncle Ben — signed, Uncle Tom."

At this point, Chicago School Superintendent Benjamin C. Willis threatened to leave the hearing. However, only the unrelenting gavel of Melnick quieted the throng.

Another controversy arose over who would properly represent the PTA of Tesla School, 67th and Kimbark. Mrs. Juan Sinclair, treasurer, was recognized by Melnick. Mrs. Betty Brown, 6461 Kenwood, took the floor and protested above the hammering of Melnick.

Mrs. Sarah Black of 6110 Greenwood, who has children attending Fiske School, also protested not being allowed to speak. She made three points in a mimeographed statement circulated about the room: 1) Sell the 'Willis Wagons' back to the Gypsies and use the money to transport Negro children from segregated schools to empty classrooms in white schools; 2) Stop wasting money to persecute mothers for going into public schools (I refer to the 'Truth Squad Mothers'); and 3) Tell the truth about segregation in the schools, and then you will not have to spend money hiring a lot of Human Relation 'experts' to tell people night is day and day is night."

Mrs. Mamie Mitchell, 1504 E. 62nd, representing Scott School PTA, branded mobile units as "a serious misappropriation of school funds. . . General Ben," she exclaimed, "Do not spend double money to perpetuate segregation in Chicago — namely, money for empty class rooms

(Continued on page 9)

**A BOOSTER FEATURE :PART 1**

# Much Good Some Bad Found In Statements At Hearing

A CHICAGO PUBLIC SCHOOL TEACHER WAS ASKED TO ANALYSE STATEMENTS BY WOODLAWN REPRESENTATIVES DELIVERED AT THE DISTRICT 14 SCHOOL HEARING. HIS NAME IS WITHHELD FOR OBVIOUS REASONS. HIS ANALYSIS FOLLOWS.

The following quotes seem representative of those made at the District 14 school hearings. Only those statements which were considered to be pertinent are here reprinted for comment. It should also be noted that nearly all of the statements discussed identical topics of general interest. These shall be discussed first.

**Mobile Classrooms (alias Willis Wagons and Ghetto Go-Carts):** All of the organizations agreed that the mobile classrooms are expensive and shiny vehicles of segregation. After seeing how they have been employed throughout the city, I can only agree.

The Greater Woodlawn :Pastor's Alliance, represented by Dr. Charles T. Leber, presented many interesting suggestions. Several of these are controversial and worthy of extensive comment. Most controversial of these proposals, in my estimation at least, is "a voluntary nursery and kindergarten for children of ages 3 to 6 where they will be taught to read and write."

Though there are several sides to this program, I would strongly suggest that a lot more thought and research be done before anyone makes a final decision. Among the problems which must be considered are several of great importance.

First, should the child be removed from the home at such an early age? Three is an early age to expose the child to outside influences, assuming that the home environment is a good one. If the home environment is poor, will the school be able to overcome it? There is much doubt in my mind that a child of 3 or 4 can learn to read.

A child of 3 has a listening span of no more than a few seconds. Even if he can be taught to read, should he be pushed at this early age? Childhood is a wonderful and necessary part of growing up, and entering the child in school at 3 may prove more harmful than helpful to his or her development as a capable, mature citizen.

The child at age 3 is a very sensitive, susceptible being. It is susceptible to indoctrination, for example. Russia and China both remove the child from the family environment at age 3 to begin indoctrination. There are many dangers and few benefits in such a program.

Dr. Leber's second proposal asked "an extension of the school day to 5 p.m. so that children will have the best incentive and atmosphere for homework and supervised physical fitness programs." This program demands careful thought, but I feel that it is worth trying on an experimental basis before a city-wide program is brought up for serious consideration.

On the negative side, a child who is not stimulated during a regular school day will probably not be stimulated during an extra 105 minutes of school. The cost would be large, too, since teachers would have to receive overtime or extra pay.

There is a great deal to be said for the positive side. More supervised physical fitness pro-

Mrs. Betty Brown

grams are desperately needed, not only to raise the level of physical fitness, but to make the school a more stimulating place in the child's eyes. I would prefer that the time be used for the development of a "Higher Horizons" project similar to one in New York City.

In this project, children, usually those of ethnic minorities, are treated to a cultural enrichment program. Included in this program are visits to universities where the children meet and talk with members of their own minority who have achieved great success in life. This boosts incentive and helps to remove the stigma of membership in a minority where "nobody gets anywhere." The children are also taken to symphonies, operas, and sports events. The program is a proven success. Chicago needs it badly, very badly.

Another suggestion of the Greater Woodlawn Pastors' Alliance is "compulsory summer school for all children who have not made satisfactory progress during the regular school year." I feel that this has merit, but only if it is tied in with a "Higher

Mrs. Alice Brown

Horizons" program. A teacher cannot pound knowledge into the head of a child; he can only make him want to learn. This is the secret of good teaching. A school year 12 months long will only make a child hate school that much more unless something is done.

The fourth suggestion presented by Dr. Leber suggests that principals be paid by the percentage of students placed on the "fast track" or highest level in high school. High school principals would be paid by the percentage of college students they turned out. Presently, principals are paid on the basis of the number of teachers working under them. I am opposed to this suggestion for several reasons.

First, instead of correcting the injustices of the present system, this proposal would create serious, new problems. Principals would all try to avoid neighborhoods which they feel would not turn out top students. There would be no desire to stay and fight problems, but a desire to leave the area. An exodus to the suburbs might easily follow.

Moreover, principals who did stay would be all to eager to place undue pressure and stress on both teacher and student. The teacher transfer list would grow by leaps and bounds. The end result would be less learning and more fear, suspicion and mistrust. Competition of this type breeds chaos; cooperation yields learning.

One suggestion which I am totally in favor of is the one which states: "Teachers should be available to parents of their students at school at least once a month during the evening hours from 7 to 9 p.m." Few and far in between are the teachers who would not welcome the chance to meet their children's parents. It is an excellent opportunity to find out about the home environment and the forces acting on the life of the child, as well as a chance to educate the parents to the needs of the child. Dr. Leber hit the mark with this proposal.

Several organizations, T.W.O. and C.O.R.E. among them, suggest that free use of school facilities for community functions should be a Board of Education policy. I agree completely. The school should lead as well as serve the community, and there should be no question about the use of school facilities for community functions. I might point out that this is especially important in highly disorganized areas where no other facilities are usually available.

T.W.O. 's accurate probing found a large soft spot in our universities' teacher education program. They complain of ". . . the Superintendent. . .permitting far too many substitute and unqualified teachers to be assigned to the schools. . ." To my mind, no teacher, upon leaving a teacher training institution, is properly prepared to teach in a low socio-economic level area.

What is needed is a special curriculum that will train the future teacher to be prepared for the culture he will meet in a socially disorganized area. The middle-class oriented teacher is not prepared to receive the many shocks he or she receives upon interaction with a strange and unfamiliar culture. Even though several institutions have offered or are offering a course of this nature, this is but an initial step.

# No cheers for Willis

Supt. Benjamin Willis is a most arrogant host. He invites the public to come to district budget hearings, and if they dare to criticize, he insults and harangues them.

Nor is that all. The hearings are not really public, not as long as the superintendent or his deputies decide who shall appear. This year in district 14, only one person was permitted from any group, and some groups were not permitted to appear at all.

We even hesitate to use the word "hearings", for it is a misnomer. The ground rules provide for registration ahead and for filing of six copies of a prepared statement. Instead of a hearing, then, we listen to a course of selected readings, which would be more easily absorbed at home than at the noisy auditorium.

Willis seems to feel that people should come and cheer everything loudly. Exactly where they are supposed to go if they want to criticize, he doesn't make clear.

The superintendent's behavior has succeeded in intimidating his own staff. They live in fear of his wrath. He now seems to be trying to do this to the public.

We are glad he is not succeeding.

its own Woodlawn plan and will insist by the power of its huge a highly organized community that loves all of its people.

# Despres Statement At School Hearing

I urge creation of a Bureau for Integrated Education and a substantial appropriation in the 1963 Budget to cover its staffing and operation. The reasons for such a Bureau and its appropriation are:

To meet Chicago's unmet needs, the suggested Bureau for Integrated Education would be a powerful force for school improvement. It is especially important for this District. On a citywide basis, it could at least make relevant educational research, findings, and opinions, available to the school system. It could devise and implement plans to improve the school system by the following measures, or some of them:

—improvement of teacher assignment and transfer systems.

—open registration in districts and combinations of districts.

—improvements in curriculum content.

—use of qualified advisors on integration, curriculum, and methods of integration.

—establishment of freedom for school personnel to express itself on integration.

—re-drawing of school

(Continued on page 8)

# Here is what Hyde Parkers said at school hearing Thursday

Ken Gillis, representing ald. Despres:

With comparatively few honorable exceptions, pupils in Chicago schools are being educated in racial separation from each other. The result deprives our children of adequate education and inflicts incalculable damage on Chicago.

Unfortunately, the board has not yet adopted an affirmative policy for integrated education; the board's administration has not yet given up its rigid defense of segregated education, sometimes euphemistically referred to as "Chicago's neighborhood school policy."

The suggested bureau could devise and implement plans to improve the school system by the following measures, or some of them:

—improvement of teacher assignment and transfer systems.

—open registration in districts and combinations of districts.

—improvements in curriculum content.

—use of qualified advisors on integration, curriculum, and methods of integration.

—establishment of freedom for school personnel to express itself on integration.

—re-drawing of school boundaries.

—permanent or temporary abandonment of unfit schools.

—accurate methods for appraising actual use of classrooms.

—analysis and correction of teacher-load figures.

—transfer of pupils in districts or combinations of districts.

—transportation of such pupils.

—arrangements with suburban schools for unilateral or reciprocal transfer of students to or from suburban schools.

—formulation of Chicago's educational goals in consistency with basic American principles of freedom and equality.

• • •

Mrs. William J. Rogers, 1226 Hyde Park, representing the fourth ward IVI:

Dr. Willis, to date, has failed in his respect for human dignity and consideration for the rights of the individual. He has repeatedly demonstrated arrogance toward taxpayers in scheduled conferences. He has preferred to insult and belittle interested citizens rather than speak to the issues at hand.

While Dr. Willis may seek to build his self-esteem and status by denying security and status to others, it is a false and unstable security, not based on solid and realistic personal achievements. This type of individual can only be a liability eventually in the struggle for attainment of a democratic world. We ask for the resignation of Dr. Willis as superintendent of the Chicago public schools.

• • •

Vories Fisher, 5707 Blackstone, representing Hyde Park High school PTA:

Of great concern to us is the so-called Woodlawn urban renewal plan.

We were shocked, in the initial reading, that Hyde Park high school was not even mentioned. We promptly asked for a conference with Mr. Ira Bach and were informed by him that it was merely an oversight.

We subsequently wrote Mr. Bach, asking for a further clarification. We will not burden you with Mr. Bach's long and rather involved reply, except to quote one paragraph from his letter:

". . .While we can certainly understand your viewpoint that the area immediately to the south of the high school should be cleared at the earliest possible time because of its environmental influences, the facr that the high school plant is currently used at about only two-thirds of its capacity has raised some serious doubts on the part of the board of education as to the advisability of early expansion of the school plant. . ."

It is not only our opinion, but that of persons more knowledgeable that the Hyde Park high school plant is fully utilized. Many teachers do not have their own rooms, divisions are meeting in the lunch room, gym facilities are over taxed, and many extra-curricular programs have had to be cut back.

We have in the past opposed, and still continue to oppose, the presence of the Scott branch in our high school, when there is obvious evidence that space in neighboring elementary schools could better serve these youngsters. But with the elimination of the Scott children, we are sure that our plant would not be only two-thirds used.

• • •

Mrs. Joan Hamilton, 5639 Cottage Grove, representing South Side Congress of Racial Equality. Mrs. Hamilton was one of the speakers prevented from speaking:

Administrative and clerical personnel in our neighborhood schools should be chosen on the basis of a successful background in intergroup relations, and on the ability to maintain the respect of the whole community in which they work. Seek out people skilled in human relations—they can be trained in administration if necessary.

Millions in tax money have gone into urban renewal in our district; some strain and tension has resulted. It is vitally important how manifestations of this that involve children of different backgrounds are handled. Hostility on the part of school administrators and too ready reliance on the police can have terribly serious consequences in this district.

We all have a grave responsibility to see that minor behavior problems are not aggravated into large ones by mishandling and insult.

• • •

Mrs. William Bentley, 5511 Hyde Park, representing the Hyde Park-Kenwood Community conference:

We ask for expansion of the social adjustment programs, with emphasis on early identification of children with behavior problems, in the hope of reducing the number of children who will need special schools. To implement this recommendation we urge an immediate increase in the number of social counsellors and social workers who can deal with problems at the home level.

We urge the board of education to consider the immediate need of Hyde Park High school for clearance of land adjacent to its buildings, particularly directly to the south, to create a real campus and recreation area. We also ask the board to seek some solution, with appropriate city agencies, to the serious problem of taverns on 63rd street near the school.

We again emphasize our conviction that high school students need to be housed in high school buildings having appropriate facilities, and that elementary students need the elementary school environment to achieve the best education. We ask that these factors be considered of prime importance in establishing any kind of branch school operations.

• • •

Mrs. Bernice Bild, 4819 Kenwood, representing Kenwood-Shoesmith PTA:

The Kenwood-Shoesmith PTA has been very pleased with the joint arrangement between our schools and the park district.

Our immediate concern is for the designation of Kenwood school as an upper grade center. We are very disappointed to find that after serving for all of last year as a predominantly seventh and eighth grade school, we were not included in the list officially designated last June as upper grade centers.

We request an after-school remedial program for Kenwood school. The response to such a program manned by parent volunteers last year showed the overwhelming desire of children to make up their deficiencies.

• • •

Mrs. Gerald Matchett, 5536 Kimbark, representing Ray PTA:

A matter which has assumed a greater urgency because of the re-districting of Ray as an upper grade center for children from the area bordered by 60th and 63rd streets and by Ellis and Woodlawn is the increased overcrowding of the already inadequate lunchroom facilities.

The number of children from this new district who are compelled to remain at school for lunch is about 170.

In addition, some 50 more lunches are served daily, thus giving a total of 220 lunches served in two shifts in a room which, at a very liberal estimate, might be sufficient for 80.

These figures do not include those children who, for one reason or another, bring bag lunches to school.

We urge that adequate lunchrooms should be provided so that children may eat their food in an atmosphere which is at least minimally comfortable and which provides for a reasonable amount of relaxation during the lunch period.

• • •

Irving King, 4810 Drexel, representing Reavis PTA:

This year two things have occurred affecting the Reavis school for which we are glad to express our sincere appreciation to the board of education. First, the fine addition to our school now nearing completion has increased our classrooms to 27 and provided needed non-classroom space and facilities. The present enrollment is 818, including two kindergarten classes. Additional classrooms will be available upon completion of the addition. The fact that 12-1/2 out of a total of 32-1/2 teachers are substitutes however, is a condition which requires correction.

We appreciate the designation as a receiving school under the pupil transfer policy. We will welcome transferring students and render every possible assistance to them. We are glad that our school is able to assist in relieving overcrowded conditions in other schools and o aid the victims of these deplorable conditions to which the board of education has so long been blind or callously indifferent.

We deeply regret, however, that by reason of the inadequacies of the transfer policy itself our school is not able to participate in a more meaningful program. The failure to provide transportation to transferring pupils will seriously cripple the utilization and effectiveness of the program.

Those families who, by reasons of economic status, race and consequently limited opportunity are forced to live in the neighborhoods in which the schools are most crowded are likely to be the least able to provide the cost of transporting their children to schools outside of the neighborhood. We urge the board of education to arrange with the CTA to transport transferring students.

• • •

Mrs. Ruth Summer, 5440 Ridgewood, representing Murray PTA:

One year ago we asked that the unused cottages on the school playground be removed, because they constitute an eyesore, an attractive nuisance, and a potential hiding place for undesirables who might prey upon our children, our teachers, or passersby. We emphatically repeat our request.

We emphasize this now, because we realize that we may receive students from other areas on a transfer basis. We welcome children who come to us because their own schools are crowded.

We fervently hope, however, that they will become an integral part of our student body, in our comfortable main building.

We respectfully urge that neither they nor our currently enrolled children, be asked to occupy the substandard cottages. In this, as in all other areas, we seek the best possible education for all children.

# A Challenge to Public Schools in Our Great Cities

by FRANCES R. COUSENS

As doctors pledge to uphold the Hippocratic oath, teachers subscribe to the concept of equality of opportunity as a basic tenet of our democratic society.

The concept of equal opportunity for all is, in itself, a distinctive characteristic of our society. Equally distinctive, however, is the use of the American public school as an instrumentality through which our society strives toward true equality of opportunity.

As schools seek better ways of dealing with this aspect of democracy's challenge, two basic principles become increasingly meaningful. First, each student must be judged on his individual merit; and, second, there must be recognition of and provision for individual differences. Of course, both of these principles have been accepted in theory by educators for many decades. All too frequently, however, the acceptance of these principles in theory has not been reflected in actual classroom practices.

Certain individual differences which are innate always have been troublesome to teachers. It is a tribute to the profession that teachers have coped as well as they have with differences in ability, in rate of growth and development, in temperament and the like. If, at times, teachers have behaved as if all children were alike in their values, capability, background and readiness for learning, some of the blame lies elsewhere. Much of our graded teaching materials and unimaginative, "lock-step" school organization has not been conducive to realistic treatment of differences among children. Regardless of where the blame lies, however, the challenge is now clear to all.

*(continued on page 2)*

In general, each issue of the HUMAN RELATIONS REVIEW deals with a particular aspect of this area. The November 1963 issue discussed separation of church and state. This issue addresses itself to racial concerns in the problems of equalizing educational opportunities.

## Challenge to Public Schools in Great Cities (continued)

Today, teachers in our great cities face the task of making school truly effective in the lives of increasing numbers of children whose innate differences are widened further by environmental factors. In a society where the nature of employment and required skills has changed overnight, the effects of environmental factors on learning are observable as never before. The child of impoverished circumstances, low aspiration, and low motivation ultimately must make his way in the same world of work as his more advantaged fellows. Our society expects the school to make the difference — to equalize his opportunity to compete in that world.

The city in American society is characterized and enriched by the heterogeneity of its people; and this fact can be construed as a problem or met as a challenge by the school as it attempts to transmit the values of both the total society and the local community. In the latter, the school can emerge as a leader or simply as a mirror. In either instance there are many social and individual problems, in a world which the school did not create but with which it must cope, in maintaining a tradition of equality guaranteed as a human right to all people in our society.

The school's role in maintaining a tradition of equality is made especially perplexing today by patterns of residential housing based upon race.

The Northern city, in particular, in mid-twentieth century is confronted with a dilemma. It is neither racially segregated by law nor integrated in practice. This "gray area" of ambivalence and ambiguity finds the schools in a frustrating position as they attempt to uphold their counterpart of the Hippocratic oath while seeking the support and identification of the total community in which they exist.

Whereas total urban areas reflect the heterogeneity of the society itself, local communities or neighborhoods, i.e., the geographic area served by a single school, tend to be homogeneous in the racial status of their populations. This situation makes the socialization function of the school more difficult; for how can we help prepare youth for participation in a *pluralistic* society when they live in a racially homogeneous local community?

Another imperative faced by the school is the need for flexibility to deal with constant population mobility. Many neighborhoods in every large

*(continued on page 7)*

Dr. Cousens, a sociologist, brings to this article several years of experience as a researcher and practitioner in intergroup relations. Before joining the "Great Cities" staff as Research Associate, she was a public school teacher and Director of Research for the Michigan F.E.P.C. She is now engaged in an important research project at Wayne State University.

"RACIAL ISSUES BESET SUBURBAN SCHOOLS" (New York)

"BIAS FIGHT PRESSED IN L. I. AND JERSEY"

# EQUAL OPPORTUNITY

"ZERO HOUR FOR SCHOOLS" (N. Y.)

## Another

"RACE TENSIONS IN CHICAGO"

## American Dilemma

"RIGHTS STRATEGY WEIGHED ON COAST"

"SCHOOL SEGREGATION REPORTED HIGH HERE" (Philadelphia)

Newspaper headlines across the nation reflect recently intensified community discussions of disadvantagement and inequity in opportunities afforded American youth. An appreciable measure of sentiment and support have polarized around each of two extreme positions generating much heat and comparatively little light in the process.

At one extreme are those who feel that the solution is simple: disperse Negro children among all schools of the city, thus assuring them the same quality of teaching, curriculum, materials, and school buildings available to other children. At the other extreme are those who adamantly oppose what they call "artificial mixing of the races" in the school (by which they mean *any* mixing). That the latter extremists often do not voice their positions openly does not detract from the fact or the force of their feelings.

Both extremes are unrealistic, of course — first, because of the complex nature of the school's responsibility; and second, because of the many externally imposed limitations confronting the schools. Furthermore, both extremes ignore and obscure the fact that, in its attempts to fulfill each child's right to equal opportunity, the school cannot take total credit for success, nor total blame for failure. The fulfillment of *many* "rights" is required to bring about true equality of opportunity.

Every child has the right to a wholesome, stimulating out-of-school life to reinforce school learnings; the right to competent, insightful, empathetic teachers; the right to instructional materials which promote his self-esteem; and the right to expect that hard work and success in school will lead to an occupation of his choosing and improvement of his lot in life.

At least three major adaptations in the structure of our community life are required to secure these rights which are basic to truly equal opportunity for all children. Restrictive residential patterns which tend to bring about an artificial separation of children in schools must be changed. Employment opportunities must be broadened so that Negro children generally can see a real relationship between success in school and success in life. The tone and quality of total community intergroup relations must be improved so that designations of superiority-inferiority

*(continued on page 4)*

## Equal Opportunity: Another American Dilemma (continued)

become matters of individual quality and competence rather than racial identification.

> *Furthermore, and above all, special school programs and procedures must be increased to offset the effects of cultural and economic blight which show up in poor academic attainments of many children.*

Certain aspects of these changes can be approached effectively only through a mobilization of community understanding and action by agencies more appropriately geared to this task than are the schools. In the meantime, how best can the initiative and resources of the schools be brought to bear in ways that are educationally sound? A review of some pertinent steps already taken in our Detroit schools will indicate some beginnings and may suggest further paths to progress.

Among the nation's great cities, Detroit pioneered in establishing Citizens Advisory Committees to study school needs and problems and to advise the Board of Education on appropriate solutions. The Committee on School Needs (1957-58) and the Committee on Equal Educational Opportunities (1960-62) are outstanding examples of such citizen participation in school affairs.

Three Board of Education actions growing directly out of Citizens Advisory Committee recommendations have special relevance to this discussion. A decision was made (November 1959) to transport children from excessively overcrowded schools to the nearest schools with available classroom space. As a by-product of this action, some racial desegregation occurred. This happened because most schools in predominantly Negro areas were overcrowded, and the nearest schools with available classroom space usually were those attended predominantly or entirely by white pupils. In connection with bussing, it is important to note the emerging practice of selecting children to be transported by geographical area rather than by class groups. This enables the receiving school more easily to absorb and disperse the new pupils among its population.

The second Board action with some desegregation as a consequence was the liberalization of the pupil transfer policy (September 1961). Under this policy any child may attend any public school in the city as long as the chosen school has room for him.

HAVE YOU TRIED. . .Pupil exchanges with other schools. Several schools have used this means to have their pupils meet and work with children who differ in religion and/or race. If you try it, remember: (1) the groups should have something in common, i.e., age level, interests or function (such as safety patrol): and(2) the visits seem to give best results when they lead pupils to plan or work together on something important to the young people.

These two actions though meagre and slow in coming represent important recognition of the Board of Education's responsibility for equal educational opportunity for all.

The third action was the Board of Education's approval of School-Community Relations Recommendation 4 of the Citizens Advisory Committee on School Needs. In preparing this recommendation, the Citizens Committee referred to the public school as "the mortar of American beliefs and ideals — the institution which serves to cement relationships among our people." The recommendation itself follows:

> A complete analysis be made immediately of all school boundaries within our city for the express purpose of establishing school districts that will be based on major principles: safety of the child; distance involved; efficient use of school plant; and the inclusion of all ethnic, racial and religious groups residing in each school area.

Some boundary changes have brought about "inclusion of all ethnic, racial and religious groups." Similarly, a marked increase in Negro children now attending heretofore "all white" schools reflects the value of the pupil transfer policy. It is clear, however, that neither these actions, nor bussing to relieve overcrowding, has eliminated the all-Negro, all-white schools which follow the segregated residential pattern of the city; nor will they do so as long as a segregated housing pattern remains. If desegregation of schools is to be, in itself, a major objective of the school system, despite existing residential patterns, then other approaches must be found.

When school desegregation is viewed as an aspect of the responsibility for providing equal educational opportunity, some other developments in Detroit schools appear significant. Notable among these are communications with teachers colleges requesting more attention to training for proper intergroup attitudes and a "no discrimination" agreement from all employers having contracts with the Board of Education.

More dramatic, perhaps, are the recent pioneering actions pertaining to text materials which, by commission or omission, are discriminatory toward members of minority groups. New reading texts developed originally for use with early school-age children of the inner city have proved to be valuable additions to instructional materials in other parts of the city as well. A special supplement to American history materials at the junior high school level has been helpful in providing a broader, more accurate portrayal of American history with the Negro more realistically included. These materials, produced by Detroit school teachers themselves, take into account the detrimental effect of traditional text materials on the self-image and motivation of Negro children. Furthermore, they recognize the subtle but important influence of text materials on the formation of attitudes white children hold toward Negroes.

*(continued on page 6)*

## Equal Opportunity (concluded)

In a closely related step, the Board of Education (December 1962) reaffirmed its policy of "having the schools contribute in maximum degree to understanding and good will among different racial, religious and nationality groups" with the following statement:

> The Detroit Board of Education is directing its textbook selection committees and committees for the review of all audio-visual aids to make sure that all textbooks, supplementary books, library books and audio-visual aids are consistent with the human relations policy of the schools and that these materials do contribute significantly to understanding and good will among different racial, religious and nationality groups. The content, the illustrations and the general tone of all instructional materials to be used in the Detroit schools should be such as to constitute fair treatment for all groups in our society.

The Board called upon publishers and makers of all instructional materials to present a more "balanced and satisfactory picture of all groups in American life."

Another factor held to be of significance in the provision of equal opportunity for all lies in the assignment and promotion of staff personnel. Detroit's stated policies in these matters have been clearly non-discriminatory in intent. The operation of factors such as personal choice (in assignment and transfer) and seniority, however, have created an appearance of racial discrimination. Recent revisions in assignment and placement procedures provide an improved basis for reversing a trend toward predominantly Negro staffs for schools serving Negro neighborhoods and all white staffs for schools in white neighborhoods.

The foregoing represents a brief summary of actions aimed at improving educational opportunities for all Detroit children. Dealt with here were matters of policy, of practice, of procedure. In all of this, however, it must be remembered that it is not policy or procedure alone which will determine ultimate quality of educational opportunity. It is the people who make policies and procedures work who are the final determinants. It is people working together — parents, non-parents, teachers, administrators and service personnel. In 1964 let's have more of such cooperative effort aimed at improving our schools.

## COORDINATING COMMITTEE SUPPORTS OPEN OCCUPANCY

On December 3, 1963, the Detroit Public Schools Coordinating Committee on Human Relations officially endorsed the *covenant card campaign* for open occupancy now being carried on by the Greater Detroit Committee for Fair Housing Practices.

Covenant cards can now be obtained from the Detroit Commission on Community Relations (963-9550) or the Greater Detroit Committee for Fair Housing Practices, 705 Fine Arts Building, 58 W. Adams, Detroit 26.

## Challenge to Public Schools in Great Cities (continued)

city have experienced a pattern of transition from a population predominantly middle class white to one which is lower class and non-white. Inasmuch as the teacher has, in her classroom, the children who live within the set boundaries of the school, population changes in the area produce concomitant changes in the classroom.

The factor which remains constant is the teacher; and ironically, this is where the problem may begin. If the methods, expectations, and attitudes of the teacher also remain fixed, with little reorientation and modification for the new and different population in the classroom, one can reasonably predict that a conflict may arise between the values and life style of the teacher and those of the students. This will result, at best, in frustration for both and, at worst, some irreparable damage to the child's self-image and achievement as he attempts to reach the unrealistic expectations set by the teacher.

Perhaps the most sensitive and potentially damaging aspect of the present race-relations situation is a tendency to equate or confuse characteristics of race with those of social class. This tends to jeopardize and make more difficult a good identification between teachers and children of different social status but of the same racial group. The problem may be intensified if the race of the children differs from that of the teacher.

The values conflict stemming from race and/or social class difference cannot be compared to a values conflict between a teacher of Slavic origin and a Scandinavian child. Distinctions of a purely ethnic nature do not carry any connotations of superiority or inferiority; whereas, Negroes in American society have, historically, been ascribed a subordinate status with concomitant social class characteristics.

*If open occupancy were a reality instead of a yet unattained goal, the problem confronting the classroom teacher would be immeasurably simplified. Negro and white children of comparable socio-economic status would be attending the same school and bringing very similar kinds of motivation and goal orientation.*

One method employed, in a few cities, to achieve a better distribution based on race has been the voluntary bussing of children. The consensus of intergroup relations professionals is that bussing as a means of integration, while having some value, is both superficial and artificial. It is of a temporary variety, i.e., only during school hours, after which each group returns to its respective segregated environment. Another argument is that bussing tends to upset the integrity of a neighborhood where a wide range of contact takes place. Moreover, many fear that use

*(continued on page 8)*

## Challenge to Public Schools in Great Cities (concluded)

of such temporary measures may tend to conceal the need for continuing action to achieve the long-range goal.

On the other hand, some argue that bussing is an expedient which has some merit. Although limited, it does provide an opportunity for interracial interaction. If the Negro's drive for equal access to all residential areas continues, voluntary bussing might serve to demonstrate that racial integration in a school can work to the benefit of both groups. Negro and white youngsters might begin to learn what is perhaps the most important lesson to be learned in our society: the worth and dignity of each individual, evaluated as an individual rather than as a member of a group.

Finally, an oft-overlooked value of bussing and other temporary integration measures is the positive psychological effect on Negroes. For many Negroes, plagued by difficulties in housing and employment, the school is the only direct contact with the official community. It will be reassuring to hear this official community representative say, "The schools belong to all the people. As long as there is room, any child may attend any school in the community."

Obviously, teachers and schools cannot do the job alone — it requires the coordinated effort of every major institution, agency and organization in the community. But teachers can lead the way, because of the professional respect and status they enjoy and because a teacher comes to know a great deal about his charges. When the teacher uses this knowledge wisely, to adapt curriculum and his own teaching style to group differences as well as individual differences, the schools and the teaching profession will have taken a giant step in becoming as effective as they are universal in the lives of the vast majority of Americans.

CORE Members Begin Hunger Strike

Chicago, Ill., July 17: An inter-racial CORE team began its eighth day of a sit-in at the Board of Education here, protesting segregated schools. Yesterday, nine of the group went on a hunger strike to "intensify our involvement with the CORE cause."

CORE alleges that present neighborhood school zone lines in Chicago foster segregation. The members plan to continue the sit-in until the school board does something about this. A school board meeting is scheduled for August 14, but CORE is asking for a special session on what it considers "this highly important issue."

According to a CORE spokesman, the August 14 date is too late to make any meaningful changes for the coming school year. The spokesman, Jack Harkins, said that action by the school board is mandatory under a new Illinois law designed to prevent de facto segregation. He charged that zone changes made at a board meeting last Wednesday achieved the opposite result and called for a rescinding of those changes.

Creeping Segregation In Chicago Schools

Chicago, Ill., Dec. 13: Segregation--not only of Negroes, but also of Jews--moves from block to block as members of these two minority groups change their residences.

So testified Dr. Faith Rich of Chicago CORE, a one-time Chicago teacher, on the basis of a study she made in 1956 and 1957. Her testimony was before a state examiner investigating charges of de facto school segregation.

"There appeared for a while to be integration as Negroes moved into new neighborhoods, but the integration was only temporary," she said. "Oddly enough, this applied to Jews as well. This trend of spreading segregation runs contrary to a Board of Education prediction that Negroes would eventually be assimilated."

At a recent budget hearing, Samuel Riley, chairman of Chicago CORE, urged "that placement of teachers be on a democratic basis and that neither race nor color be a determinig factor as to whom or where one teaches."

Carter D. Jones, Jr., chairman of the West Side CORE group told the committee: "I was born and brought up on Chicago's west side. The schools I attended were integrated for the most part. Those my son will soon enter are almost 100% of one race. This is the experience of most Chicago Negroes and their children."

## Dixie Teachers Report Their Pupils Learn Well In Mixed-Race Schools

### Negro Students Lag at First But Study Hard to Catch Up With Whites, They Say

### After Snubs, 15 Autographs

By JAMES C. TANNER
*Staff Reporter of* THE WALL STREET JOURNAL

NASHVILLE—Lesa Gibson and Cynthia Thornton, nine-year-old girls at Buena Vista Elementary School, consistently score high marks in fourth grade reading, writing and arithmetic. A few blocks away at North Nashville Junior-Senior High School, Geneva Ware, 12, is speedily stepping into the ranks of honor students in the seventh grade, and also is president of her home room class.

The experience of these youngsters is significant for three reasons. They're Negroes attending school with mostly white classmates. Their academic and social gains are being made in an Old South city where classroom integration began with racist bombing of an elementary school seven years ago. And, say many Southern educators, their progress is not at all untypical of Negro children studying under such circumstances.

A large number of Southern whites refuse to believe this—and, their stubborn conviction that school desegregation lowers academic and moral standards for both Negro and white children is a major reason why classroom integration is still the South's most explosive racial issue. Nor is this view confined to extreme segregationists. "Education suffers" from integration, insists a white businessman in St. Augustine, Fla., who's regarded by many as a moderate on the race question. "Regardless of merit, the fact remains that when you integrate classes you dilute the level of education."

**"Normal or Nearly Normal"**

But Southern schoolmen who have had actual experience with desegregation tell a different story. W. H. Oliver, Nashville school superintendent, readily concedes that Lesa, Cynthia and Geneva are outstanding among the 800 Negro youths now attending Nashville schools with whites. But, he says, the Negro students generally "are achieving normal (levels) or nearly normal from a social, emotional and scholastic standpoint, and the achievement of white students has not been adversely affected to an appreciable degree."

Other educators concede that the first Negro children to enter formerly white schools often lag behind their white classmates scholastically, because of their environment and the poor education many had been receiving in Negro schools. But once in school with whites, teachers say, the Negroes usually study hard to close the gap—and the white children often study hard to prevent having the Negroes pass them. Typical result: Tests made the year before and the year after integration in Louisville, Ky., show substantial gains in scholastic achievement for both Negro and white second, sixth and eighth graders, with the Negroes making proportionately the larger gains.

Socially too, teachers report, the Negro children usually win gradual, if grudging, acceptance from their white classmates. It's true many draw jeers and rebuffs at first, and some drop out. But educators relate many such incidents as that of a Negro high school girl in Atlanta who was snubbed all during her senior year. On the last day she was approached by more than 15 white students who asked to autograph her yearbook.

**Easing Other Race Tensions?**

Altogether, despite some remaining problems, many Southern educators think classroom integration is working well enough to prepare the way for eventual Dixie harmony on other race issues, too. "Students are making more rapid progress toward race acceptance than are parents," assert Southern college teachers Herbert Wey and John Corey in Action Patterns in School Desegregation, a guidebook for Southern schools that expect to integrate. "When the students now in school become parents, many of the problems that seem insurmountable will decrease in importance."

This, of course, would be far in the future. For the time being school desegregation seems rather to be inflaming Southern racial tensions, as can be gauged from some of the incidents that attended the reopening of Southern schools last fall. In Birmingham, classroom integration and white resistance to it stirred passions that led to a church bombing in which four Negro children were killed. In Tuskegee, Ala., white students have boycotted the previously all-white high school following admittance of 13 Negroes. Surry County, Va., closed its only white public school this year when seven Negroes were assigned to it by the state's pupil placement board.

Nevertheless, desegregation is making continual Southern gains. In the 17 Southern and border states which had compulsory school segregation prior to the 1954 Supreme Court ruling against it, more than one-third of the 3,053 biracial districts now have some desegregation, according to the Southern Education Reporting Service. Mississippi is now the only U.S. state with no mixed schools. In all, 318,039 of the South's 3,412,799 Negro students, or 9.3%, now attend classes with whites, and the number grows almost daily.

**What Happens**

As a result, Southern teachers are gaining more experience with the results of desegregation, and many Northern educators have been studying their progress and problems. Here, in some detail, is what they say usually happens when a Southern white school begins admitting Negroes:

The first Negroes to attend a formerly white school are often one to two years behind their new classmates in scholastic achievement, educators say. That's partly because their social and economic environment had given them little incentive to learn, and partly because many of them had received inferior teaching in Negro schools. Many of the children have had "traumatic experiences in learning" in

*Please Turn to Page 6, Column 2*

# Integration in Action: Teachers Say Biracial Classes Work Out Well

*Continued From Page One*

poor Negro schools, and feel hopelessly behind their white classmates at first, says a school psychiatric consultant who has studied the effects of desegregation.

However, schoolmen say, once they do begin attending school with whites the Negro children usually develop a burning desire to learn enough to catch up with their new classmates. This "motivation factor compensates for deficiencies of past academic records in many cases," says R. W. Stephens, deputy superintendent of Atlanta schools. "Although we have found that Negro high school students generally are about two years behind white students, they are highly motivated, and they tend to be over-achievers in desegregated schools. The Negro student does better actually than his tests might indicate."

As a result, most teachers report, the Negroes learn more rapidly than they did in segregated schools, and soon begin closing the gap with their white classmates. When Negroes were first admitted to San Angelo, Texas, high school, says Superintendent G. B. Wadzeck, those who had received A marks in Negro schools usually dropped to B, those who had been getting B dropped to C, and so on. "Then they began to pull up," he reports.

In Nashville, Glenn Hale, principal of the Buena Vista Elementary School, finds many Negro pupils entering the second and third grades about a year behind their white classmates in learning. But, he says, by the time they leave his school at the end of the seventh grade, they "knock three or four months off" that deficiency. After one class of Negroes has gone through all 12 years of elementary and high school with whites, he believes, the gap will disappear.

Studies of the Washington, D.C., school system, which began integrating immediately after the 1954 Supreme Court decision, give strong support for Mr. Hale's belief. In the early months of integration in 1954, achievement tests showed Washington students generally far below national standards. In progress reading tests, for example, the typical Washington sixth grader scored 4.9—the level he should have reached the ninth month of the fourth grade—against a national norm of 6.6.

In the most recent comparable tests, however, Washington sixth graders—a larger proportion of them now Negro—fell only two to four months below the national norm in reading, world knowledge and social study skills. And they surpassed the norm by two months in arithmetic, by three months in language usage, and by five months in spelling and language study skills. Some 84% of the students in Washington public schools now are Negro.

While Negro students thus learn rapidly in desegregated schools, the achievement of white pupils doesn't seem to suffer. "Even the strongly segregationist (white) children we have followed for two years have continued their studies without impairment," reports Dr. Robert Coles, a Boston child psychiatrist who spent two years in extensive research on how desegregation affects Southern students. He tells of one white student who worked much harder after integration because of the fear that several of his Negro classmates might get better grades.

The end result, says Dr. Coles: "We have yet to hear a Southern teacher complain of any drop in intellectual or moral climate in a desegregated room or school."

These happy results, of course, are not uniform from child to child. Some mediocre and poor Negro students have turned up in classes with whites. And, says Dr. Coles, "if the younger (Negro children beginning to attend class with whites) manage well, the older ones sometimes have the burden of their former years" of limited educational opportunity and incentive.

On the other hand, some Negro students have made outstanding records in desegregated classes. A Negro girl who was graduated recently from Oklahoma City's desegregated Central High School made the National Honor Society and won a scholarship to the University of Oklahoma, where she's now studying for a medical degree. In Little Rock, where Federal troops first had to be used to end violent resistance to integration, two Central High Negro seniors last term won college scholarships.

In general, J. Kenneth Morland, professor of sociology at Randolph-Macon Women's College, Lynchburg, Va., concluded in a study of classroom race-mixing that desegregation has had no "adverse effect on the achievement of the most gifted (students) of either race."

On the social side, younger white and Negro children attending desegregated classes seem to accept each other better than the older ones. Negro and white youngsters can be seen playing together on the slides and swings of almost any desegregated Southern elementary school's playground. At Nashville's Buena Vista Elementary School, Negro boys have won two of the three positions of captain on the school's safety patrol. And in Birmingham, often called the most segregated U.S. city, a Negro boy was chosen vice president of a sixth grade class that was desegregated last fall.

Even in desegregated high schools, some Negroes win quick social acceptance. When a lone Negro was admitted to the 10th grade of one high school in a small Texas town, he was elected vice president of the class his first day. A Negro also has become president of Oklahoma City's integrated Central High School student council.

Educators concede, however, that desegregation poses some other social problems for Southern schools. At North Nashville Junior-Senior High, where Negroes now are in the seventh grade, school authorities worry over whether they should permit school dances to be held this year. "We might have to curtail some of these things," says W. J. Mullins, principal. But he's enthusiastic about the reception 20 Negro parents got the other night from white parents at a school chili supper, the school's first biracial social affair.

Mr. Mullins and other school officials who know desegregation first-hand dispute segregationist arguments that race mixing brings new problems in discipline, delinquency, morals and health. They do not deny, however, that it accentuates those problems already present in the schools. It brings about some teaching changes, too.

Incoming Negro children, for example, often are grouped with whites according to their academic abilities. The ones who lag far behind scholastically are taught alongside whites of comparable academic achievements, even if these white children are younger. The brighter Negroes go into more advanced groups. This permits a speedier education pace for the fast learners.

And one Nashville teacher is making her new Negro pupils feel at home by "integrating" the bulletin board. She clips pictures of Negro children from magazines and pastes them on the board.

# INTERACTIONAL STUDENT-TEACHER PROGRAMMING

Myron Woolman
Director

The Institute of Educational Research, Inc.

Washington, D. C.

## Introduction

Not too long ago, the teaching machine was considered, by some, to be the magic ingredient in making effective use of programmed materials in the classroom. Some boldly held that it would produce greater motivation for learning, would be cheat-proof, and would provide the learner with a new sense of power and independence as he turned a knob or handle and/or pushed the appropriate button or lever.

More realistically, the teaching machine and programmed book may be viewed as vehicles through which programs flow to individual learners. These self-instructional programs (SIP's) are essentially solipsistic in that the boundaries are set by the adequacy of the program and the characteristics of the individual learner.

The SIP is fundamentally non-interactive; the learning process is limited to the individual (whatever he may be) and the program (whatever it is), and the

---

A paper presented to the District of Columbia Elementary Principals Association, Washington, D. C., June 18, 1964.

learning gain is a function of the operations which are performed between the man and the program. The fact is that the SIP attempts to ignore the fact that the classroom is a social system. A major problem in the American classroom centers on the fact that our teachers tend to reward the wrong students; classroom rewards have favored selectively the docile and obedient student, capable of good recall. Beyond this, the quality of classroom operation and organization varies enormously. The exclusion of the teacher simplifies the problem of delivering the correct information in the best sequence to the largest body of students.

The Interactional Skill Program

In 1956 the research problem faced, was to design a method of training Nike missile operators. What ultimately evolved was a method in which an operator possessing some skill was termed an "instructor". He was the vehicle through which the program (embodied in the USARADCOM Training Guide) flowed. The program contained: (1) a detailed sequential organization of equipment-operation and safety information; (2) a six-step method by which an untrained instructor could produce operator skills in trainees with speed and efficiency; (3) an evaluation and quality-control system; (4) an administrative framework for conducting the training in the on-site situation (Woolman, 1960). Following an experimental field test covering 24 operational Nike batteries, the programmed method was adopted by the U. S. Army for training Nike Ajax and Nike Hercules operators.

In this "Interactional Program" the instructor totally lacked any instructional background and was often uncertain of the required tolerances and procedures.

The trainees used the same guide as the instructor. The instructor was required to utilize selectively the instructional information; the trainee was expected to focus on trainee-related information. The fact that the instructor and his trainees had the same program offered some advantages; instructors often became trainees to learn new operator positions, and conversely, trainees often phased into instructor status on these operator positions which they had mastered.

The above type of reciprocal program (in which the instructor and trainee have the same program) would not be suitable for a classroom containing a teacher and 20 to 40 children. The classroom was viewed as requiring three interlocked and synchronous programs which would interact dynamically with each other. These were:

1. Learner's Program: A program for each learner, organizing the information into a rigorous program format.
2. Teacher Skill Program: A specification of the procedures to be used in the classroom to optimize the effectiveness of the learner's program. This program covers such factors as presentation, classroom atmosphere, techniques of

correction, illustration, informational feed-back and ongoing evaluation.

3. Conceptual Program: A self instructional program to provide the teacher with the psycho-educational concepts underlying the learner's program. The aim of the program is to develop in the teacher an ability to make increasingly independent judgments, as her experience increases.

The conviction that Interactional Programming of the student-teacher relationship could offer major advantages, ultimately led to a series of presentations at the National Institute of Mental Health and the Office of Education. It was suggested that reading skills offered a major test area for evaluating the efficiency of this approach; and that the population of choice for making the experimental demonstration should involve the teaching of mentally retarded children through an Interactional Programming approach.

A proposal was presented involving the programming of a reading method, the Progressive Choice (PC) Reading Method, designed in 1950 (Woolman, 1963). The PC Method has been experimentally tested a number of times with normals (Bloomer, 1961), and has been shown to be capable of teaching retarded children to read by an experienced teacher (Davy, 1962). The plan was to provide a set of meticulously programmed reading materials for each student (the Perceptual Program) and a teacher's manual containing: (1) a precise specification of each objective and required learner response whether oral or

written, and (2) a step-by-step procedure detailing how the teacher was to achieve the objective and obtain the required response. In addition, increased flexibility was sought by offering a variety of suggestions to solve special learner problems and to offer increased lattitude to the teacher (the Skill Program). Finally, an SIP was provided to give the teacher the underlying psycho-educational basis for the reading method (the Conceptual Program). Thus, in theory at least, the teacher could put concepts into operation while observing the consequences on an immediate feed-back basis in the moment-to-moment flux of the classroom. #

The Basal PC Reading Program

The Basal PC Reading Program is now in its second year of field testing with retarded children. In the first year, results were very encouraging, indicating that most retardates could learn to read as evidenced by gains in reading scores and significant statistical differences (Woolman and Davy, 1963). Reactions by both teachers and parents were positive. Ratings by teachers on verbal fluency, social interaction and task involvement also favored E over C students. The second year data are now being collected, but have not yet been analyzed. A survey form was developed for the second year to obtain ratings of the Interactional Programmed Method as compared with other approaches to the reading problem in the classroom. The data tabulated so far indicate a marked tendency for teachers to rate the Interactional Program favorably

and to comment warmly on its effectiveness as a classroom tool.

The Accelerated PC Reading Program

The Accelerated PC Reading Program (extract illustrated in Figures 1 and 2) was designed for use with underachieving teen-agers and functionally illiterate adults. The first pilot data have now been received. It had been our ultimate objective to obtain an eighth grade reading level within a year through this approach; we now have more ambitious aspirations. On the basis of the pilot data, we are very hopeful that a substantial proportion of drop-outs and pre-dropouts can reach an eighth grade reading achievement level within 300 hours (through Interactional Programmed Instruction), regardless of their initial reading achievement level.

The Job Skill Programs

This type of program is now being used for training Nike and Ajax missile operators (Woolman, 1960), and is also being used routinely in the GERSIS (General Electric Range Safety Instrumentation System) at Vandenberg Air Force Base for training personnel in operational procedures, adjustment, interpretation and malfunction analysis. In contrast to training individuals and groups in complex missile and aerospace systems, the Interactional Program has been designed for training Air Force mechanics to operate and maintain the Republic F-105 Fire Control System.

## The Progressive Choice Reading Method

The PC Reading Method encompasses five levels which are repeated for each learning element taught. At the first level, meanings of words containing a given sound are taught until understanding of these words is assured at the level of speech (Audial Meaning Level). At the second level, the learner proceeds through a series of perceptual exercises in which he learns to discriminate the distinctive features of given letter shapes; he then prints the letter (s) independently. Completion of both operations is required at the Discrimination Level. Next, (the Identification Level) the learner is given the sound(s) made by the letter shape(s), associates the sound(s) and the letter(s), demonstrates that he can print the correct letter(s) for the new sound(s) (and all previous sounds), and can voice the correct sound(s) for any previously learned letter(s) as well as the new letter(s). This completes the Identification Level. At the fourth level (Compounding Level) the learner demonstrates that: (1) he can correctly blend the sound of the new letter(s) when presented with various combinations of previously learned letters; and (2) demonstrates that he can correctly print the sequence of letters which corresponds with various blended meaningless sounds. Finally, the learner selects those compounds which are most relevant and meaningful from amongst a set of alternatives. This involves a demonstration that the learner can both utter and/or print the words he initially learned at the Audial Meaning Level

(loop words), under conditions which require him to select the best option for the given context. When the learner has demonstrated that he can obtain the same meanings from the printed word that he initially could obtain only from the spoken word, he has closed the "meaning loop". When he closes the "meaning loop" he has completed the Visual Meaning Level.

A Learner's Workbook page from the Accelerated Progressive Choice Program, illustrating the shift from the Compounding Level to the Visual Meaning Level follows (Figure 1). The synchronized double page spread from the Instructor's Manual, required to teach the Workbook page shown, has also been extracted (Figure 2).

(1)→ The Overall Learner Objective states in abstract terms the program goals specific to both pages. The first four columns detail in concrete terms, the requirements necessary to attain the Overall Objective.

(2)→ The Learner Objectives column specifies those sub-goals which must be achieved successfully to complete the Overall Learner Objective. The first subgoal requires that the words, "meat" and "deal", be "looped" and also that the learner print the proper meaningful generalized words even if he has never seen them before ("reverse loop").

To the left of the Learner Objectives column are two vertical lines which provide the instructor with the cross-reference code for the relevant items on the Learner's Workbook page (see

age from The INSTRUCTOR MANUAL, cross-coded to Figure 1

Figure 1). In the upper left corner ③→ of the Instructor's Manual, WB Page refers to the specific Learner's Workbook page (in this case, page 3 ④→ ). To the right of the WB Page is the WB Item ⑤→ (in this case, Items 4 and 5 ⑥→ ).

Note that to complete Item 4 the learner is required to add "ea" within the blanks in the left column ⑦→ of the Item, and then to print each of the words in its entirety (meat, deal, steal, etc.) in the boxes immediately to the right ⑧→ . Once this has been completed, his responses are checked by the instructor or a fellow student, who has already completed the entire Cycle (Student-Instructor). If the work is correct (100% required), a check is entered in the IQB (Instructor Qualification Box) ⑨→ which appears in the lower right corner of each item. Only after the IQB check is obtained does the learner proceed to the next item, (in this case, Item 5).

The specific responses required of the learner to complete Item 4 are detailed in the second column (Required Learner Responses) ⑩→ . As Figure 2 illustrates, the exact responses required of the learner are indicated: the digraph (ea) to be printed in the blanks; the number (9) of words to be formed; the complete words to be printed in the boxes; and the letters (s&t, r&l, etc.) to be selected to form meaningful words (seat, real, etc.).

The procedures to be used by the instructor to attain the objectives of

the first column are given in the third column (Basis Instructor Procedure) (11)→ . The double vertical lines between the second and third columns (12)→ contain indications to the instructor of whether the procedure in the third column is one performed by the learner, with little or no instructor assistance (SIS, Self-Instructional Student Item) (13)→ , or whether it is a responsibility of the instructor alone (I, Instructor) (14)→ . For the most part, the third column specifies a set of instructions for the instructor which corresponds exactly to the tasks to be performed by the learner. This column specifies effective ways of delivering necessary information to the learner before he is expected to perform the Workbook exercise. It also determines for the instructor the most efficient way of telling the learner exactly what is required of him in order to complete the exercise.

The level of detail shown in Figure 2 presumes a substantial amount of prior learning by the instructor; earlier sections of the program are somewhat more detailed in the third and fourth columns. However, even with the less detailed presentation in these particular facing pages, it was possible to program only two of the three items on the cross-coded Learner's Workbook page (Items 4 and 5). Item 6 (bottom of Figure 1) requires the learner to select the appropriate term from the list at the right (15)→ to fit the context of each sentence. On completing the exercise, the learner folds the page back along the vertical line, (16)→ and immediately checks the adequacy of his responses.

When the learner has obtained IQB checks for Items 4, 5 and 6, the instructor has brought him to the point where he has achieved the Overall Learner Objective.

At the end of the Basic Instructor Procedure column, the instructor is referred to the fourth column (Suggestions for Instruction) (17)→ , which provides supplemental procedures offering alternatives to the Basic Instructor Procedure to help those learners who have failed to satisfy the Required Learner Response column. Illustrative material and suggestions for varying the presentation of material already covered are contained in this column to give the instructor greater flexibility.

The instructor should have been progressively completing the fifth column (Program Rationale) (18)→ , which is designed to provide him with the conceptual,psycho-educational frame of reference for the program. Its aim is to provide a general overview of the structure of the PC Reading Method in order to give greater significance and point to his moment by moment activities in moving through the program. Note that if the learner is forced to check his answer through use of the Answer List (19)→ , he can simply scan the list before responding or proceed to the bottom of the page, locate the item, and obtain a number which locates the correct response. However, as each item is numbered on both the left and right side, each number designates two possible correct responses. The instructor is then forced to make a choice between the two

alternatives rather than simply copy the correct response.

Summary

The Interactional Program may be viewed as an effort to utilize the knowledge, status, mobility and flexibility of the human adult in the classroom situation while attempting to maintain the rigorous organization, ready digestibility, growth of independence, informational feed-back and ongoing evaluation made possible through programming. Beyond this, the Interactional Program offers the opportunity to treat the classroom as a social system. In this way, proficiency development is linked to the powerful motivational forces involved in maintaining and increasing status and obtaining and extending responsiblity and authority.

A key aspect of the Interactional Program is that -- level of program mastery can be unambiguously related to improved status in the society of learners. The road to upward mobility as a group member is reduced to the speed and efficiency with which the program materials are learned. This relationship is held to be crucial to the fact that learners in Interactional Programs have obtained significantly higher morale scores.

Interactional Programs should prove themselves effective in conceptual areas such as psychology, mathematics and basic electricity. Although some Interactional Programming techniques were incorporated into a Basic Electricity Program designed for the Bell Telephone System (Woolman, 1962), no fully developed Instructional

TABLE 1

MEAN OF TEACHER RATINGS
OF PROGRESSIVE CHOICE READING PROGRAM
AND OTHER READING METHODS*

| Category of Education | Method Evaluated | Number of Ratings | Mean of Ratings** |
|---|---|---|---|
| General Classroom Effects (5 items) | Progressive Choice Reading Program | 27 | 6.73 |
| | Other Reading Methods | 23** | 4.72 |
| Reading Attitudes (5 items) | Progressive Choice Reading Program | 27 | 7.24 |
| | Other Reading Methods | 23 | 5.22 |
| Classroom Atmosphere (5 items) | Progressive Choice Reading Program | 27 | 7.04 |
| | Other Reading Methods | 23 | 5.04 |
| Transfer Effects (5 items) | Progressive Choice Reading Program | 27 | 6.99 |
| | Other Reading Methods | 23 | 4.57 |
| All Categories (20 items) | Progressive Reading Program | 27 | 7.00 |
| | Other Reading Methods | 23 | 4.88 |

* Mean of ratings obtained for each category from all teachers reporting to date represents returns from 27 teachers (approximately 70% of the sample of experimental teachers), using the scale below.

Reading Method Rating Scale

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
|---|---|---|---|---|---|---|---|---|
| Completely Useless | | Of Little Value | | Moderately Effective | | Very Effective | | Supremely Effective |

** Note that four experimental teachers rated only the Basal Progressive Choice Reading Program. These four teachers did not rate Other Reading Methods because of their lack of experience with any other method.

Program has yet been tested, (though we are not working on an Interactional Mathematics Program). Sterility, monotony and lack of challenge plague self-instructional programs in conceptual areas. The cross-stimulation, upward mobility and controlled synchronization between the instructor and the student may well offer greater intellectual opportunity and freedom along with the increased rigor and directional control implicit in the use of programming methods.

The programming process, in the last analysis, is an effort to obtain control over the quality of information delivered and absorbed by the learner. Minimizing the function of the instructor by means of programs (in whole or in part), reduces the classroom to sets of contiguous, but non-interactive bodies. The Interactional Program has taken the alternative option, i.e., to make the instructor an organic part of the programming process, and to utilize his greater knowledge, authority and status as part of a programmed classroom system.

The most powerful mechanism for educational advancement is, of course, the school system itself. Unless research methods can obtain the approval of principals and their cadres of teachers, advanced techniques become mere curiosities which occasionally emerge at conferences as "cases in point" to prove the unwillingness of educators to modify teaching methods. As our work specifically requires active teacher involvement, it was especially important to obtain some indication of teacher reaction.

Accordingly, a 20 item rating form, "The Reading Methods Evaluation Scale", was designed to permit teachers to rate the Basal Progressive Choice Reading Program in comparison with other reading materials which they had used. The survey items were distributed among four categories to permit comparisons on (1) General Classroom Effects; (2) Attitudes Toward Reading; (3) Classroom Atmosphere; and (4) Transfer Effects. For each item, teachers rated both our experimental program and the reading materials used by the school system. The teachers mailed in the forms and all responses were confidential. An illustrative item from each of the four areas follows:

> General Classroom Effects - "As an aid in activating and involving slow learners, non-responsive and resistant children to develop reading skills--"
>
> Attitude Toward Reading - "As an aid in improving attitudes of children toward learning to read--"
>
> Classroom Atmosphere - "As an aid in reducing the amount of frustration, monotony and/or tension children experienced while learning to read--"
>
> Transfer Effects -"As an aid for improving diction and pronunciation--"

The results of these ratings are given in Table 1. It is apparent that teacher ratings favored the experimental method for all items in each category; and, in fact, each of the 20 items showed a mean difference favoring the Basal PC Reading Program. A second kind of rating

was obtained for the purpose of evaluating the experimental program in comparison with all reading materials used in the course of each teacher's experience (see Table 2). The Basal PC Reading Program was again favored in this comparison. This type of rating data was further buttrussed by positive comments from teachers in the open-end responses to the survey form. The following teacher comments are given verbatim to illustrate fairly typical teacher reactions to the use of the Basal Progressive Choice Reading Program. A relatively inexperienced teacher commented:

> I came into the research program a doubter and really rather disappointed that an added burden had been placed upon me ... . ... I believe the response I got from my children turned my thinking in the right direction. Little ones who had not read before seemed so anxious and interested ... . ... when I noted hypertension developing, out came Progressive Choice, and all was calm and an atmosphere conducive to the learning experience prevailed . ... these techniques are sound basic approaches in building meaningful workable concepts of learning and can be adapted to fulfill the individual needs of all children in the classroom, regardless of what those needs might be.

A highly experienced teacher said of the program:

> The Progressive Choice Reading Program contains a reservoir of material, which, with a little ingenuity on the part of the teacher will provide correlated learning in all classroom experiences, such as social living, numbers, spelling, writing, reading and science. The classroom comes alive as children's interest soars. ... In fact, their lives have been enriched because of the program.

Of course, we do not yet know whether these first reactions will prove to be typical or to be somewhat exuberant. However, at the outset of the study, we observed that school systems and teachers remained quite neutral to the PC Program for sustained periods of time. No one on the research staff anticipated the high level of acceptance which was ultimately reflected on the survey form.

Of course, now that we have gotten similar reactions from teachers and staff in two successive years across a variety of school systems, in different sections of the country, we feel fairly confident that the overall reaction of school personnel will tend to remain favorable.

In summary, educational research techniques can be justified only if they can: (1) demonstrate increased learning efficiency in the classroom context; and (2) provide the teacher and the administrator with a tool which will be found useful in performing their own very complicated jobs. We are part of a complex

TABLE 2

RANK ORDER OF READING METHODS*

| Reading Method Rated | Number Of Ratings | Mean Of Ratings | Rank Order Of Reading Method |
|---|---|---|---|
| Progressive Choice | 24 | 7.09 | 1 |
| Ginn | 3 | 6.33 | 2 |
| Houghton Mifflin | 6 | 5.83 | 3 |
| Scott-Foresman | 7 | 5.70 | 4 |
| Experience Charts | 8 | 5.50 | 5 |

* For reading methods rated by three or more teachers.

interlocking social system. As we face the mammoth educational tasks imposed by our dynamic technology, educational research should become a more and more useful tool to aid the school administrator.

The researcher must gear his work to the realities of administration and classroom operation. Above all, he must provide methods which are adaptable for use as the schools now exist, and team with the administrator in using the available facilities and teacher resources to the best advantage of that most important consumer of both our products, the child. We face a task which offers both challenge and inspiration ... or stated in another way, the times offer our educational system great opportunities to respond imaginatively and confidently to the accelerating social and technical thrust of an ever-evolving society.

KANSAS STATE ADVISORY COMMITTEE

TO THE

U.S. COMMISSION ON CIVIL RIGHTS

# Report on Civil Rights Aspects of Vocational Education Programs in Secondary Schools

This report was prepared by the Kansas Advisory Committee and submitted to the U.S. Commission on Civil Rights in accordance with the Civil Rights Act of 1957, pursuant to which the Commission and its Advisory Committees in all 50 States and in the District of Columbia were established.

Dr. Harry Levinson, Topeka - Chairman
Honorable A. B. Howard, Kansas City - Vice Chairman
Dr. Howard Baumgartel, Lawrence - Secretary
Mrs. Raymond Cerf, Lawrence

Honorable John McCormally, Hutchinson

U.S. CIVIL RIGHTS COMMISSION

Kansas Advisory Committee

January 1, 1963

REPORT ON PUBLIC INQUIRY

into:

Possible discrimination in secondary school vocational education programs.

The Kansas Advisory Committee held three public inquiries, in Topeka on September 8, 1962; in Lawrence on October 13, 1962; and in Wichita on Nobember 10, 1962. We believe the findings of these inquiries to be representative of what we would find in other metropolitan communities in the state.

## Procedure

Invitations to participate in these public inquiries were sent to the superintendents of schools in each of these three cities, requesting also the participation of the directors of vocational education and the directors of teacher selection and placement. It was particularly requested that those having to do directly with the distributive education program be invited to participate. In addition, the presidents of the local NAACP chapters, the GI Forum (Mexican-American) chapters, the executive secretaries of Chambers of Commerce, of the Human Relations Commissions in Lawrence and in Wichita, of the Urban League in Wichita, a representative of the Lawrence League for the Practice of Democracy, the director of the Kansas Civil Rights Commission, and members of the local press were invited to attend.

The NAACP representatives appeared only at the Topeka meeting, the GI Forum representatives only in Topeka and Lawrence. The Human Relations Commission representatives appeared in Lawrence but not in Wichita, although we had written communication with them both. The Urban League representative reported that he was representing all of the minority groups in Wichita. Only in Topeka was there an observer from the local Chamber of Commerce; the educators in Wichita said that they also represented the Chamber of Commerce there because they served on committees of the Chamber of Commerce. The superintendent of schools and a group of five of his immediate subordinates appeared in Topeka; three representatives of the superintendent, but not the superintendent himself, appeared in Lawrence; the superintendent, plus a large delegation of principals, guidance personnel, vocational training personnel, and supervisory personnel appeared in the Wichita meeting.

No representatives of the press attended any of the meetings.

Following each meeting, advisory committee members discussed the events of the inquiry and summarized for themselves the conclusions to which they had come. These conclusions appear in the minutes of regular monthly meetings. The present report represents a summary of these

conclusions, further discussed, analyzed, and elaborated by the committee in its meeting of December 8, 1962.

## VOCATIONAL EDUCATION

Program of vocational education in the public schools are supported by public funds from state, local, and federal appropriations. Federal funds are available through the Smith-Hughes and George Barden Acts, as amended (20 U.S.C. 11-34) to promote and stabilize the vocational education programs. Each dollar expended by the federal government must be matched with state and local funds.

Local schools are reimbursed for 25% of the salary paid for vocational teaching up to a maximum of $1,400 for each full-time vocational teacher of trade and industrial, agriculture and homemaking education.

All vocational educational programs now being offered in Kansas come under the general classification of agriculture, homemaking, trade and industrial, practical nursing, distributive education, area vocational or technical, and office practice. Day programs in these areas, with the exception of area vocational, are offered to serve those youth who are regularly enrolled in school. Evening programs are provided to serve adults. The area vocational program is an adult program, too.

The agriculture, homemaking, and practical nursing programs seem to pose no particular problems with respect to discrimination. The first two are attended by children of farm families and the last, because of the heavy demand for practical nurses and the historic lack of discrimination in semi-custodial work, encourages the participation of minority group students. Since area vocational or technical programs are not for youth in school, we concentrated our attention on business training -- distributive education and office practices -- and on trade and industrial training.

The State Board for Vocational Education is responsible under federal and state statutes for these programs. Vocational education, by the definition of that Board, is that educational service in the public schools which prepares boys and girls, 14 years of age and over, to enter useful employment upon graduation from high school. Training opportunities for young people and adults are provided in each of the special areas noted above, and coordinated toward the goal of developing socially competent useful citizens of Kansas. Vocational education has for its main purpose to increase the productive capacity, and to increase the skills and technical knowledge of the working force in the state.

Business Training: Distributive education is part of the general business education program. It is designed to prepare high school boys and girls, 16 years of age and over, for entrance in wholesale, retail, or serviceselling occupations and to provide instruction in a variety of related subjects to increase the skills and knowledge of employed workers in these distributive occupations.

Office practice, often referred to as Business Education, is a cooperative program in the high school designed to prepare students 16 years of age and over for entrance into office occupations.

These two programs are designed to provide basic and supplementary training in the occupation in which the student is employed, and at the same time permit him to complete his high school education. Students in secondary schools who take part in these programs are legally employed at least 15 hours per week in a job in which the employer has agreed to work jointly with the schools in a cooperative program. The employers give instructions to students on the job during half the school day.

If the student is not able to obtain a job, he is not permitted to take the academic component of these courses because the academic and the practical are designed to complement each other.

Trade and Industrial Training: Trade and industrial education is designed to prepare boys and girls 14 years of age and over, for successful entrance into skilled industrial occupations. Instruction and training in industrial education is provided for in-school youth having aptitude and interest and who need a specific trade and related subject training for entrance into a trade in industrial pursuit. Trade and industrial education also includes preparation for apprentices, students who have dropped out of school and who now need training, and for those who want to advance skills which they already possess. These parts of the program, as well as those aspects of the business education program directed to adults, we have omitted from our study because our concern is with the enrolled high school student.

Essentially, that part of trade and industrial education with which we were concerned is preparatory training. Such training is provided to enable the student to continue his general education while at the same time preparing for a specific occupation. Vocational work is taught by special instructors on the high school staff while general subjects are taught by instructors regularly qualified for teaching the subject. The same is true for the business classes, the distributive education and office practices classes.

Conditions: According to the pamphlet, "Public Vocational Education Programs," produced by the Office of Education of the U.S. Department of Health, Education and Welfare, vocational education is intended to develop abilities, skills, understanding, and attitudes needed by a worker in his occupation; it is of greater value to a worker in his occupation than to a person not in the occupation; it is of value to all workers in the same occupation on the level to which the training is given. These programs are directly related to employment opportunities

in local communities determined by school officials in cooperation with local advisory committees. Training is to be carried out to the point of developing marketable skills, abilities, understandings, attitudes, and work habits sufficient to enable the trainee to get and hold a job on that occupation.

As a condition for receiving federal money, each cooperating state must prepare a plan that outlines the kinds of vocational education for which the state will use the money, and relate how it will operate the program and how it will train vocational teachers and counselors. The U.S. Office of Education must approve the plan, after which it is authorized to certify payment of federal funds to the state. The state then reimburses local districts through the State Board of Vocational Education.

In the "Administration of Vocational Education", (regulations for the administration of vocational education programs under the provisions of the federal vocational education act), published by the U.S. Office of Education in 1958, Section 102.18 states that "In the expenditure of federal funds and in the administration of federally aided programs of vocational education, there shall be no discrimination because of race, creed, or color."

Support and Enrollment: According to the biennial report of the Kansas State Board for Vocational Education for the period ending June 30, 1962, the Board disbursed $121,678 in Smith-Hughes and George-Barden funds for trade and industrial education during the 1960-61 fiscal year. Of this, $108,224 was disbursed to local school districts. These funds were for trade and industrial education. 1,825 persons were enrolled in the day-school part of this program during the year. The reports do not differentiate between the cost allocated to day school and those to night school.

In the distributive education programs in Kansas for the fiscal year ending June 30, 1961, there were 342 students in the day school. and 247 students were enrolled in the day school office practices program. Under the George-Barden Act, $29,809 received by the state for the fiscal year ending June 30, 1961, for disbursement in distributive education was intended apparently to include office practices as well. $18,729 was distributed to public schools, the remainder going to state institutions for training and being allocated to supervision.

According to the reimbursement report of the Kansas State Board for Vocational Education for the year ending June 30, 1961, 74 day trade classes were conducted in 19 cities, representing an enrollment of 1,729 boys and girls, preparing for advantageous entrance into skilled occupations. Eighty-six day trade classes were conducted in 19 cities with a total enrollment of 1,918.

For the three communities studied, the following statistics are revelant for the year ending June 30, 1961: 484 persons were enrolled in trade and industrial classes in Topeka for which the federal support was $13,159.50. 125 were enrolled in distributive education and office practices and $1,400 in federal funds were involved.

In Lawrence, 311 persons were enrolled in trade and industrial education and at a cost of $3,670 to the federal government. Sixty were enrolled in distributive education and office practices for which the federal government reimbursed the Lawrence school system in the amount of $1,425.

In Wichita, 1,404 persons were enrolled in trade and industrial education, and a cost of $17,284 to the federal government. In distributive education and office practices there were 2,242 students; federal funds were $4,057.50.

These allotments are not further divided into day and evening programs.

## Findings of the Committee

There are disproportionately fewer minority group members in office practices and distributive education programs than would logically be expected if the numbers of minority group students in those programs paralleled their proportion in the general population.

This disproportion seems to be the cumulative result of many forces. In some instances, particularly in Topeka, we heard that Negro parents believe that the school counselors do not encourage their children to take part in these programs because there are few possibilities for practical experience for them. Teachers and counselors universally deny that they discourage Negro and Mexican-American participation in these programs. In all three cities it was reported that there were more vacancies in these and other vocational training programs than there were people to fill them. The faculty said they tried their best to encourage participation of minority group members. They pointed out, however, that usually there was only one counselor to several hundred students (one to 800 in the Wichita school system) and it was therefore impossible for the counselor to give much attention to more than a few of the needs of all students.

Placement: The teachers involved in vocational and distributive education varied in their initiative in placing students in work settings as part of these programs. Some said they did no placement, that each student had to find his own job among the approved settings. Others indicated they went out of their way to find job settings and to refer students when there were vacancies. It was clear that despite the denials by some teachers, there was placement by members of the faculty and, in particular, that there had been problems in the placement of minority group students both as a result of employer resistance and student failure.

There was no special effort to place minority group members in on-the-job training. With respect to distributive education, without the experience part of the training, the student could not take part in the academic program which related to distributive education. Although in most cases the teachers denied that they had problems in placement as a result of local business pressure, in Wichita it was made quite clear that a significant barrier to the free placement of minority group students lay in some of the community attitudes, particularly those in business circles outside the Negro districts.

The opportunities for job placement for present high school students are greater than they were a few years ago. There are, however, as a result of earlier employment discrimination, relatively few minority group members in responsible occupational positions. This lack of models of Negroes who have achieved is seen as a serious handicap for young Negroes in their formative years. A sense of handicap and hopelessness is reflected most vividly in the quotations from Lawrence cited below. Present students have difficulty visualizing that there is something concrete and realistic by way of a higher level job toward which they could or should work. In none of the three communities do more than a few Mexican-Americans hold positions above that of foreman or straw boss. An occasional teacher or professional person is the rare exception. There are a few more Negro lawyers and physicians in Wichita and Topeka than in Lawrence, and a good many more Negro teachers. There are no Negroes, to our knowledge, in responsible positions in the business community in any of the three cities.

Being without images of people who succeed in business and industry, particularly in retail business, there seems to be little motivation, according to the counselors and teachers for Negro and Mexican-American students to enter such programs.

Furthermore, there is today a certain press to move ahead rapidly which means that the minority group member students are frequently to be found in one of two circumstances: 1) Either they have set high goals for themselves in the form of university training, which is particularly true in Lawrence; or, 2) unable to compete for university training, and seeing nothing possible at a lower level except menial work, they withdraw from school.

Additional Barriers to Participation: Recognizing the realities of the situation, it is not beyond possibility that the teachers and vocational counselors should unconsciously discriminate. That is, they may be reluctant themselves to confront the community prejudices and also reluctant to bring pain and discomfort upon minority group students. These attitudes may be communicated in subtle ways which serve to discourage the minority group students from these programs. This, however, is only speculation based on ways in which the various teachers involved sought to deny any responsibility for either reforming community attitudes or making special efforts with the Negro students.

One director of vocational education said vehemently that it was ". . . no part of my job to tell the local businessman how to run his business." A number of times school officials raised the question, "Is it our role to be agents of social change, is that really our job?"

We do not mean to imply that the teachers were not serious in their efforts and did not do their best to carry out their responsibilities. Rather, we do suggest that the teacher, dependent as he is upon public approval for his very livelihood, cannot readily see himself as flying in the face of the mores of powerful members of his community. It is extremely gratifying to the committee to note that the educational administrations in these three cities were far ahead of their community climates in recognizing and working toward fulfilling their social responsibilities.

There is no formal agreement between the school officials and the employers who offer the work settings that the employers will not discriminate in the assignment of students to these work settings. School officials do not think that it is their job to press employers on this matter. They do not believe that, were there a legal requirement that the employers not discriminate, it would help the situation any. (As a matter of fact, there is a state law against discrimination in employment in Kansas). Some point out that, though they obtain the agreement of the employers to provide a work setting, it is up to the student himself to obtain and hold his own job, and that the employer has the right to select which among the students he may want to have. It is therefore impossible, these teachers and administrators say, for them to control discriminatory practices even if there were a formal agreement.

Parental Concern: Another factor which may have contributed to lack of participation is the feeling on the part of some Negro parents that if their children do enter vocational and professional training, the children will be weaned away from the families and will ultimately leave the communities in which they are living. This is the perennial problem of the separation of the generations when the experiences of the younger generation so out-pace those of the older generation. The parents see also that in Topeka there are few Negroes in customer-contact jobs, in Lawrence none at all, and in Wichita a very limited number. There are equally few Mexican-Americans. The parents would be somewhat less than realistic if they did not discourage their children from entering occupational avenues that were bound to bring them frustration; the same is true of the teachers.

Lawrence Experience: A few figures reported by the Lawrence Human Relations Commission summarize the situation in Lawrence and serve as a barometer of the occupational climate for minority group students over the state. In 1961, the Commission reported, out of a total of 1,000 high school students, 51 were enrolled in the vocational education program: 11 in trades, 20 in office training, and 20 in distributive education. Of these 51, 13 were minority group members.

This finding surprised that Commission and it undertook to find out how helpful the vocational education program was to minority group members by surveying all Negro graduates of the Lawrence High School for the previous four years. Of 32 graduates reached, 19 had had some vocational training. Of these, 8 girls had taken typing for one or more years (4 of them took shorthand as well), and 8 boys had taken printing. Three boys had taken auto mechanics. Only one of the 19 had been enrolled in on-the-job training. None of the 8 girls ever got a job as a typist. None of the 11 boys ever obtained a job as a printer or auto mechanic.

More impressive than these figures were some of the individual responses from which the following are excerpts:

A young man took printing, welding, and woodwork in high school. He now works in a laundry. His response to inquiry was, "No, my high school training has not helped me, but I hope some day it will."

A young lady took three years of typing and shorthand in high school. When interviewed, her only employment after graduation had been irregular baby-sitting. She said, "I felt qualified as a typist when I graduated but I'm afraid I've forgotten it all by now."

Another young woman said, "My typing teacher encouraged me and said I did well. I knew it would be hopeless to apply downtown. I applied to a school in Kansas City after graduating from high school, to take a key-punch course but they said they didn't take colored. I am certainly not satisfied with this job (as a maid). I feel I am qualified for better work."

In the same community a leading business man was quoted in the University Daily Kansan as saying (January 20, 1961), that before Negroes will be accepted by whites as equals, they will have to raise their standards of living to the accepted level of the community. "It is up to the Negro and Negro leaders to raise the standards of their race," he said. The juxtaposition of these cases and his statement tells its own story of the failure of white business leadership.

## Summary and Recommendations

1. While there is little apparent active discrimination in the operation of these programs, a combination of many forces is keeping minority group members from taking advantage of them.

The main barriers to reducing de facto discrimination in on-the-job training programs are discriminatory practices of employers and prevalent stereotyped thinking about Negroes. The latter not only prevents hiring Negroes but also has adverse effects on the self-image and the development of job aspirations of young Negroes.

2. At the same time there is apparently a crying need for people who have the training which can be obtained in these programs. The teachers themselves told the committee that there were far more openings for students in vocational training programs than there were students to fill them and that they were constantly being pressed by employers for prospective students.

3. Nobody takes it to be his responsibility, neither the schools nor the employers nor the Chambers of Commerce, nor the community human relations agencies, to do something about this particular problem, despite its high cost to the individuals and to the local community.

4. There is an imperative need for school officials to bring this problem out in the open with local Chambers of Commerce, to recognize its reality and its price, and to formulate active programs which will specifically recruit minority group students by the promise of jobs and opportunities for advancement.

5. There is particular need for business leaders themselves to indicate publicly they recognize the nature of the problem and their willingness to do something constructive about it.

6. They must also recognize, and be patient with, the limitations of the experience and training of the Negro students who might come through these programs, just as they must with all young people. There is a tendency to demand perfection of minority group students as if somehow they must prove themselves more than others need to do.

7. The federal government should condition financial support of vocational education program upon the provision of non-discriminatory work sites by cooperating employers. Such federally supported secondary school programs should be evaluated over three-to five-year periods to ascertain whether the number of minority group students in the program is reasonably proportional to the total number of minority group students in the school population.

While the Department of Health, Education and Welfare regulations of 1958 (45 CFR Sec. 102.18, 1960) governing vocational education say that there shall be no discrimination, these regulations have already been interpreted to permit segregation, according to the U.S. Civil Rights Commission 1961 employment report (page 97). We believe this interpretation should be revoked. Furthermore, there is presently no provision for examining the functioning of these programs to see whether they do in fact discriminate. The establishment of such a condition for financial support is in keeping with already established federal and state laws (the Kansas Act Against Discrimination, 1961), and officially announced policies.

8. In order that non-discrimination provisions be enforceable, appropriate federal statutes should be amended to require that all state plans for vocational education establish responsibility for student placement. Kansas, however, need not wait for federal action; the State Board of Vocational Education could make that specification a part of its own already established plan for administrative action.

## Conclusion

It will take considerable support from both educational and business leaders to enable minority groups to develop a generation of models so that subsequent students have goals toward which to strive in the economic community, people on whom to model themselves, and an attitude of optimism and hope rather than defeat and discouragement. The elimination of stereotypes takes a long time and there is no doubt that the reaction of the community affects the performance of the minority group student. School authorities, including boards of education, and business advisory committees to vocational education programs, being closest to the immediate problem and the facts of the situation, have no alternative but to assume the initiative in discussions with local business people.

If, indeed, the various vocational training programs cannot serve a more constructive social purpose at a time when their enrollments are decreasing, we can only wonder whether they serve any useful purpose at all and whether they merit continued federal support.

# 13-Week Vacations: 'Sabbaticals' Fall Short In Creating New Jobs

*Continued From Page One*

some green operators training to take over from vacationers.

"I predict we'll lose more money in slower production than we will in extra wage costs because of this plan," says an Armco Steel Corp. plant official.

While the sabbatical agreement is falling short of union hopes on new jobs, it also strangely enough is failing to win wholehearted acceptance from those who might be expected to cheer it most—the first men to get the long holiday. Half of some three dozen steelworkers who will get the long vacations this year and who were interviewed on the subject expressed little enthusiasm for the arrangement. And except for the fact that many figured they'd at least be making room for a less fortunate man on the street, the opposition to taking so much time all at once might have been more extensive.

**"Don't Know What to Do"**

Part of the disenchantment comes because the new plan cuts down on vacation flexibility. "I don't think much of it," says towering 58-year-old Charles Michaels, an Armco employe at Butler, Pa. "This is too long to be off at one time. I used to be able to split up the weeks I had coming—maybe take off a week now and then to go fishing. Now I can't. I don't know what to do with all the time." A provision of the vacation agreement requires the sabbatical to be taken all at one time.

Often, it's a case of a steelworker having the time but not the money to take advantage of the situation. "I have a daughter in school so we can't go anywhere and I don't like sitting around home," says Lewis Nagy, 54-year-old stock recorder at the Armco plant.

Naturally, not all the workers are worrying about what to do with their long vacation. Hardee Heplar, an operator on No. 39 cold mill at Butler, can't wait to leave. First, he will head for Washington, D.C., to visit a son and then he will set out for San Francisco to visit another one. "I'll still have some time for golf," he smiles.

In general, those most pleased with the plan are the ones with a bit of the wanderlust. But they are in the minority. Only half the men interviewed said they had plans for using their time off, a situation that deeply concerns personnel men in the industry.

"There's been no education for this thing," says Dr. Joseph Llewellyn, Armco's plant doctor in Butler. "These men aren't the traveling type" and many won't know what to do with the time, he contends. "I'm only borrowing on my other experiences in 30 years here, but I'm concerned whether these enforced vacations are going to precipitate degenerative disease symptoms in these people. I predict some of these men are going to be in bad shape when they get back—some of the older ones keep going only because they work."

**Avoiding a Controversy**

Most of the mills aren't going to give the returning vacationers a physical before they go back on the job, as they would to a man called back after a layoff. Despite their concern over the effects of the idle period on health, the companies don't want to get into any controversies over whether a man is physically fit to return.

The union is less concerned about such problems. "Steelworkers are adults and they'll know what to do with the time," says one

## Long Steel 'Sabbaticals' Fall Far Short of Goal In Creating New Jobs

### Juggling Hours, 'Spreading The Load' Avoid Hirings; Doubts Among the Workers

### Plan Worries Armco Doctor

By JOHN F. LAWRENCE
*Staff Reporter of* THE WALL STREET JOURNAL

PITTSBURGH—The 13-week vacation, conceived by the United Steelworkers of America as an answer to long-term unemployment, is shaping up as a failure in creating any sizable number of new jobs.

Though negotiated in the steel industry just last summer and effective only since the first of this year, early experiences and emerging steel mill plans make it clear the long steelworker "sabbatical" is destined to fall far short of union estimates that it will add 20,000 to 25,000 new "job opportunities." It's still too early to come up with any precise employment figures, but one industry analyst predicts privately that only 5,000 new jobs—at most—will open up.

If such proves the case, the controversial vacation agreement wouldn't begin to stem the long-term decline in steel employment brought on by the big post-war shift to automation. Since it hit a high of 544,000 a decade ago, steel industry employment has skidded an average of 14,000 workers a year until today it rests at an estimated 400,000. Payrolls have been more stable since 1961 but only because steel output has been on the rise.

The mills are softening the blow of the long vacation partly by some adept scheduling which will time many of the sabbaticals to seasonal slowdowns, maintenance shutdowns, other short-term fluctuations in manpower requirements and through further automation. But the mills also are falling back harder than expected on the time-honored practice of having non-vacationing workers "carry the load" for a fellow employe who is on a holiday.

**Union Complaint**

"The companies are killing the idea behind the 13-week vacation by getting by without bringing in new men anywhere they can," complains Michael J. Zahorsky, recording secretary of Steelworkers Local 1211 at the Aliquippa, Pa., works of Jones & Laughlin Steel Corp. A J&L spokesman acknowledges the company is trying to minimize vacation replacement but only "within the contract."

Any major success in restricting new em-

what a teacher does on a sabbatical."

There's some further evidence that suggests a lack of worker enthusiasm for the long vacations. While the men covered by the contract must take the time off, every mill has a certain number of non-executive salaried workers not covered by the pact. Many mills have given these people a choice between a 13-week vacation and a payment into a company savings plan. A heavy majority are choosing the money. In the case of Armco, 80% took the payment although under Armco's plan the employes have to contribute some funds of their own to get a matching payment from the company, reports Brookes D. Billman, vice president.

U.S. Steel Corp. and Inland Steel Co., which are offering similar "extra vacation or pay" plans, are having much the same experience. At Inland, where clerical workers get a choice of two extra weeks vacation or two weeks extra pay each year, only 31% of the employes chose the time off; 45% picked the cash payment and the rest split it up between a week's extra pay and a week's vacation.

Another indication that workers are not altogether convinced that the vacation plan is best comes from the course of recent bargaining at the Torrance, Calif., plant of Armco. Represented by the Oil, Chemical & Atomic Workers Union, the Torrance workers asked for the money instead of the long vacation. Though eventually settling for the vacation plan—as the company demanded—OCAW officials acknowledge there was a strong feeling among its members that money was more desirable.

from the long vacation plan and slow its spread to other industries. Though Steelworkers union president David J. McDonald still stoutly defends the plan ("It's a step in the right direction, however many jobs it creates"), it is noteworthy that other unions have so far failed to make it a major contract demand. The United Auto Workers, for example, appears to be ignoring the idea entirely in preparing for this summer's bargaining talks with the auto makers. "Other unions will watch the plan for two or three years to see how it works before pressing for it themselves," figures a Steelworkers official.

Basically, the steel sabbatical program gives the senior half of a mill's employes a quarter-long vacation once every five years. The holiday is financed out of a fund into which steel firms pay 12.5 cents an hour for each employe—an amount which is now running about $100 million annually. Versions of the long vacation plan have been carried by the Steelworkers into the aluminum and metals fabricating fields and the can manufacturing industry.

**One Mill's Experience**

For an idea of how companies are working with the new plan, look at the way it is handled at one medium-sized mill. About 320 men are scheduled to get extended vacations this year but instead of sending out an average of 80 a quarter, only 41 are gone now. Later in the year 120 or more will be going at one time. "We checked back and found we run higher in the first five months each year, then we have a dip," explains the plant's labor relations director. The mill official says by juggling jobs and schedules it has managed to send the 41 men off on vacation and replace them with only 16 new workers. It expects similar successes later in the year.

Other companies are following similar policies. In the aluminum industry, where all but the newest workers will get a 10-week holiday in the next five years, a Reynolds Metals Co. official says, "We'll use the long holidays in lieu of layoffs as much as we can."

Replacement of vacationers will be held down, too, by getting along with smaller crews. This isn't possible on some direct production jobs but company and union men says it's almost certain to be done in the maintenance department which accounts for about 20% of the men in a steel mill. "There's always some flexibility in the maintenance force," says one company's labor expert.

Most mills also have a small pool of lesser skilled workers who perform odd jobs or fill-in assignments. Occasionally some of these men will be used to replace vacationers and the spot left open in the pool won't always be filled, personnel men say.

**A Loss of Efficiency?**

The long vacations, however, haven't come entirely without problems for the companies. One which concerns mill officials is the possible loss of efficiency because of the plan. Under the complex agreement, the next man in line in terms of seniority and job rating gets first crack at a higher paying production job when it opens up. Thus, when a top-ranking production man goes on vacation, a chain reaction can be set off as half a dozen or more men step up to better jobs. This means that many jobs are temporarily filled by men "green" to the posts. In some cases, this is bringing slower operations and more breakdowns.

Pittsburgh Steel Co., for instance, reports that in December it had three unexplained breakdowns on one rolling mill on which it had

# LEADERSHIP TRAINING INSTITUTES FOR CIVIL RIGHTS ACTIVISTS

## Purpose

The Institute Program is designed for young people who, for the first time, have begun to find themselves in the civil rights movement. Their demonstrations, their sit-ins, their jail-ins, have given them a hope that there may be a place for them in America that is worth a fight, and a new America they can help create which is worth the discipline. Thus they have become aware of books and learning as a means of deepening their understanding of the political, social and economic landscape which is essential to intelligent action. The task of the Institutes is to open doors to these kinds of knowledge --not to provide pat answers or narrow concepts, but to supply tools and to show how and where they can best be used.

The League for Industrial Democracy Training Institutes for Civil Rights Activists came to a close the weekend of April 4-5. Five weekend sessions, which began on Feb. 8-9, have thus been held. A full evaluation of the Institutes is in preperation and will serve as a useful guide for future educational activity in this field. Meanwhile, the outline below summarizes the topics and speakers presented. (Astericks indicate speakers on cultural topics. We sought, with only partial success, to make such topics a regular Saturday evening feature of the Institutes.)

I. A Historical and Theoretical Framework -- Feb. 8-9

A. An Outline History of the Civil Rights Movement

1. August Meier, Prof. of History, Morgan State College; author, Negro Thought in America, 1880-1915

* 2. Jazz and the Ghetto
Nat Hentoff, noted author and jazz critic

B. The Socio-Political Framework

1. Social and Economic Institutions
Prof. Martin Fleisher, Political Science, Brooklyn College

2. Political Institutions
Prof. Robert Koblitz, Political Science, Bard College

II. Two Crucial Periods of Social Change -- the Reconstruction and the New Deal -- and their Impact on the Negro -- Feb. 22 - 23

A. Reconstruction after the Civil War
Robin Myers, historian and free-lance writer

B. Populism and Progressivism
Prof Martin Fleisher

C. Discussion of Hofstadter's The American Political Tradition
led by Professors Fleisher and Emanuel Chill (Columbia)

D. The New Deal
Michael Harrington, author of The Other America

III. The Relationship of the Labor Movement to the Negro Revolution -- March 14-15

A. Problems and Perspective of the American Labor Movement
Jack Conway, Executive Director, Industrial Union Department, AFL-CIO

B. The AFL-CIO and Civil Rights
Donald Slaiman, Director of Civil Rights Department, AFL-CIO

C. Getting Jobs for Negroes: A Panel Discussion
Donald Slaiman
Jack Howard, Special Assistant to the Undersecretary of Labor
Brendan Sexton, Director of Staff Education, United Automobile Workers

D. Probems of Mobilizing Group Action in the Labor and Civil Rights Movement
Brendan Sexton

IV. Making New York a Fit Place to Live -- March 22

A. Political Structure and Parties
Arnold Fein, President, N. Y. C. Committee of Democratic Voters

B. Dealing Effectively with Community Problems
Prof. Herbert J. Gans, Teachers College, Columbia University; author of the Urban Villagers

C. Organizing the Ghetto
Horace Sheffield, Vice-President, Trade Union Leadership Council, Detroit, Michigan

D. Alienation in Urban Life
Harvey Swados, author, Nights in the Gardens of Brooklyn, The Web

V. A Critical Evaluation of Modern Ideologies relevant to the Civil Rights Movement -- April 4-5

A. Ideology and the Soviet Union
Prof. Alex Garber, Dept. of Sociology, University of Colorado

B. Pacifism, Non-Violence, Christian and Utopian Socialism
Prof. Martin Fleisher

*C. Negro Prose and Poetry
Prof. Sterling Brown, English Department, Howard University; co-editor, The Negro Caravan

D. The American Free Enterprise System vs. Democratic Socialism: A Debate
Murray Weisz, Deputy Assistant Secretary of Labor
Prof. Alex Garber

E. A Non-Ideological View of Social Progress
Ralph Helstein, President, United Packinghouse Workers of America

# THE NEGRO IN THE UNITED STATES

## Course Outline

1. The African Background
   - The continent, people and history
   - The Africa Europe discovered (15th-16th centuries)
   - The slave trade: Africa and America
   - The African heritage

2. The Slavery System (1607-1860)
   - The economics of slavery
   - The north-south division (17th and 18th century)
   - Social and political aspects of the Slave State (post cotton-gin south)

3. The Negro in Emerging America (1700-1830)
   - The first free Negroes
   - Early slave revolts
   - The development of institutions
   - Colonization

4. The Negro in the Freedom Movements (1830-1865)
   - Abolition
   - The Civil War
   - (Colonization)

5. Reconstruction and Counter-revolution (1865-1900)
   - The Negro Role in Reconstruction
   - Education
   - The post-slavery economy of the South
   - The post-war position of the northern Negro

6. Emergence of the new South (1877-1900)
   - Booker T. Washington
   - The Terror and the Nadir
   - Alexander Crummell and the intellectual movement

7. The new Freedom Movement (1900-1920)
   - Niagara and NAACP
   - The World War I exodus
   - The economics of race

8. The Development of Negro Nationalism (1920-1930)
   - Roots of Nationalism (Bruce)
   - The Garvey Movement
   - The Harlem Renaissance
   - Nonchurch institutions; new structure of Negro community
   - The South in the Twenties

9. Depression and New Deal (1930-1940)
   - The Role of Government
   - Mass Industry, Industrial Unions, and the Negro
   - Beginning of Political Influence

10. World War II and After (1940-1960)
    - The first March on Washington Movement (FEPC)
    - Segregation and the Armed Forces
    - The Four Freedoms at Home
    - 1954: high point of economic advance; Supreme Court decision
    - The Civil Rights Revolution

FREEDOM SCHOOLS
ELEMENTARY
Teachers Guide

GAMES (ages 5 through 8)

1. Indian Chief. One child leaves group, group sits in circle Indian fashion. Indian chief is chosen and leads group in a series of motions, changing them frequently. Child who is "it" returns and tries to find Indian Chief by close observation of motions of group.

2. A Lost Child One child leaves the group. He is the policeman. Second child is selected to be the lost child, group and leader taking note of child's appearance. Policeman returns to the group. Teacher asks policeman to find lost child. He asks, 1) Is it a boy or a girl ? 2) What is the child wearing. After receiving infprmation he tries to find child.

3. Color Tag. One child leaves group. Teacher chooses three or four other children and pins each of these with different colored paper. "It" returns and tries to determine colors worn by each child.(nore:colors are pinned to children's backs)by maneuvering around. Cildren face each other- no hands permitted.

4. Cat and Rat One child chosen to be rat in center of circle. Second child, a cat, is putside circle. The rest of children jpin hands and form a circle. Cat chases rat in and out of circle and tries to catch him. Circle must drop hands to allow rat to move freely, but must try to keep cat away from rat.

5. Skip Tag Group forms circle,one child skips around circle, taps another child on shoulder and returns to his place. This continues with other children.

6. Simon Says Teacher is the leader in this game.Children obeying orders not preceded by "Simon Says" are out.

7. Traditional Circle Games "Skip To My Lou","Looby Lou", "A Lassie".

DRAMATIZATIONS (ages 5, 6, )

1. Finger and Song Plays
   Thumkin
   Eentsy weentsy spider
   Ten little Indians
   Let everyone join in the game
   The wheels of the bus go round and round
   This little boy
2. Nursery rhymes for singing and dramatization-
   e.g., Little Miss Muffett, Jack and Jill-, Humpty Dumpty

3. Familiar stories, told by teacher-dramatized by children
   Little Red Riding Hood
   Babes in the Wood
   Hansel and Gretel
   African folktales (for those that have this resource)

4. Role playing by children
   Children act out what they like to do, what they want to be. Others guess.

ACADEMIC INSTRUCTION

First three grades

A. Reading and writing
Prepare account of what has happened so far today, and what will happen. Use this as basis of reading lesson. (Who can read the story? Which words do you know? What words start the same way, etc.)

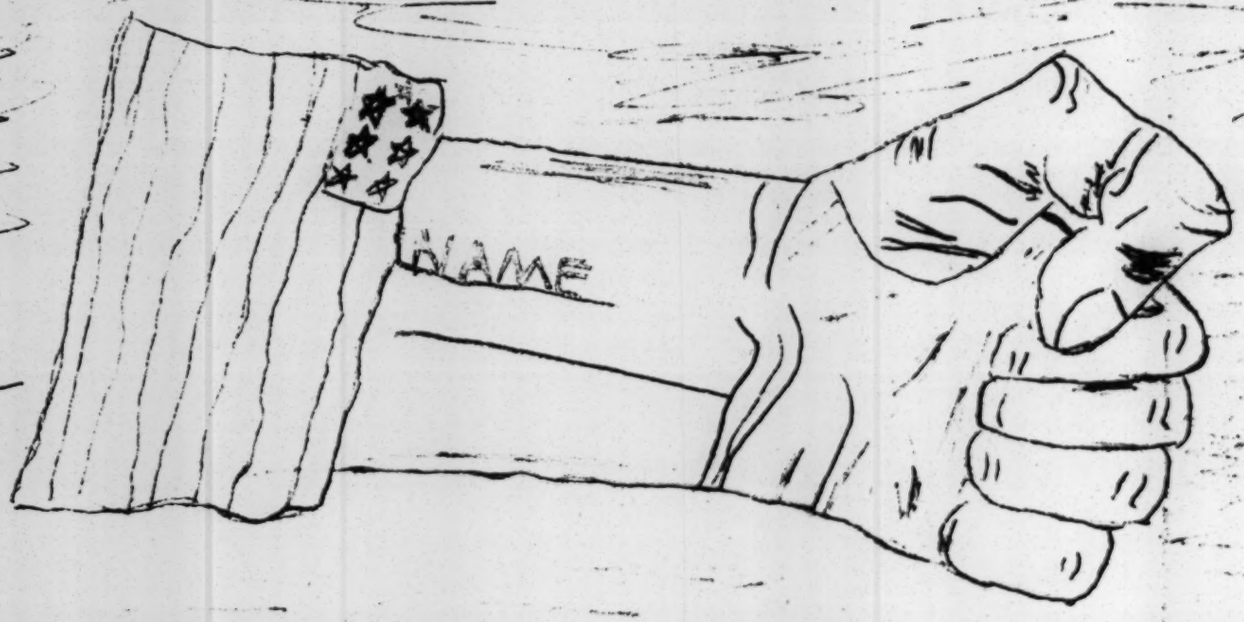
Grades 4 through 6

Individual children write stories about meaning of day, what kind of a school they would like to study in, and what they would like to have arpund them that they do not have (note: keep stories expressive)

B. Word GamesWrite a big word on blackboard (or paper). Have children find the little words in the big word. (all grades)

C. Arithmetic Any activity, oral or written, that is appropiate to the level of the group.

# FREEdom



# SONG BOOK

SONG

Hushabye
Don't you cry
Go to sleepy little baby
When you wake
You shall have
All the pretty little horses.
Blacks and bays
Dapples and greys,
Coach-a- six s little horses.
Hushabye,
Don't you cry,
Go to sleepy little baby.

Hushabye
Don't you cry
Go to sleepy little baby.
Way down yonder
In the meadow
Lies a poor little lambie,
The bees and the butterflies
Peckin' out his eyes,
Poor little thing cries Mammy!
Hushabye
Don't you cry
Go to sleepy little baby

Hashabye
Don't you cry
Go to sleepy little baby.
When you wake
You shall have
All the pretty little horses
Blacks and bays
Dapples and greys
Coach-a-six-a little horses
Hushabye,
Don't you cry
Go to sleepy little baby.

## SKIP TO MY LOU

Little red wagon painted blue (3 times)
Skp to my Lou, my darling

refrain Lou, lou, skip to my lou (3 times)
Skip to my lou my darling.

Pull her up and down in the little red wagon (3)
Skp to my lou my darling refrain

Pig in the parlor, what'll I do? (3)
Skip to my lou my darling (refrain)

Cat in the buttermilk, lapping up cream (3)
Skp to my lou my darling refrain

Skip, skip, skp to my lou (3)
Skp to my lou my darling

Skip a little faster that won't do (3)
Skp to my lou my darling.

Lost my partner, what'll I do (3)
Skip to my lou my darling.

I'll get another one preetier than you (3)
Skip to my lou my darling.

## HUSH LITTLE BABY

Hush little baby, don't say a word
Papa's gonna buy you a mocking bird

And if that mocking bird won't sing
Poppa's gonna buy you a diamond ring.

If that diamond ring turn to brass
Poppa's gonna buy you a looking glass
If that looking glass get's broke
Poppa's gonna buy you a billy goat.
If that billy goat won't pull.
Poppa's gonna buy you a cart and bull.
If that cart and bull turn over.
Poppa's gonna buy you a dog named Rover.
If that dog named Rover won't bark,
Poppa's gonna buy you a horse and cart
If that horse and cart fall down,
You'll still be the prettiest little baby in town.

Hush little baby, don't you cry, etc.

# NO MORE AUCTION BLOCK

SONG

No more auction block for me,
No more, no more
No more auction block for me,
Many thousands gone.

No more pint of salt for me,
No more, no more,
No more pint of salt for me
Many thousands gone.

No more driver's lash for me,
No more, no more,
No more driver's lash for me
Many thousands gone.

IMPROVISE

No more Jim Crow school for me- etc.

## BILLY BARLOW
(Harlem Hunting Song)

Let's go a hunting, said Risky Rob,
Let's go a hunting, said Robin to Bob,
Let's go a hunting, said Dan'l to Jo,
Let's go a hunting said Billy Barlow

What shall we hunt for? said Risky Bob,
What shall we hunt for? Said Robin to Bob,
What shall we hunt for? said Dan'l to Jo,
Hunt for a rat said Billy Barlow

How shall we kill him? etc.
Borrow a gun, said Billy Barlow

How shall we haul him? etc.
Borrow a wagon said Billy Barlow.

How shall we divide him, etc.
Borrow a knife, said Billy Barlow.

I'll take shoulder, said Risky Rob
I'll cut sides, said Robin to Bob
I'll chop leg said Dan'l to Jo,
Tailbone mine said Billy Barlow.

How shall we cook him? etc.
Over a fire said Billy Barlow.

I'll broil shoulder, said Risky Rob,
I'll fry sides, said Robin to Bob,
I'll roast leg, said Dan'l to Jo,
Tailbone raw, said Billy Barlow.

## Jimmy Rose

Jimmy Rose he went to town,
Jimmy Rose he went to town,
Jimmy Rose he went to town,
To 'commodate the ladies.

Fare ye well ye ladies all,
Fare ye well ye ladies all,
Fare ye well ye ladies all,
God Ermighty bless you.

(3)

# BLUE TAIL FLY

When I was young I used to wait
On master and give him his plate,
And pass the bottle when he got dry
And brush away the blue- tail fly.

chorus Jimmy crack corn and I don't care,
Jimmy crack corn, and I don't care,
Jimmy crack corn and I don't care,
The master's gone away.

And when he'd ride in the afternoon,
I'd follow after with a hickory broom.
The pony being rather shy
When bitten by the blue-tail fly

chorus
One day he ride around the farm.
The flies so numerous they did swarm,
One chanced to bite him on the thigh,
The devil take the blue-tail fly!

chorus
The pony run, he jump, he pitch,
He flung my master in the ditch.
He dies and the jury wondered why,
The verdict was the blue-tail fly

chorus

They laid him under a 'simmon tree,
His epitaph is there to see,
"Beneath this tree I'm forced to lie,
Victim of the blue-tail fly".

chorus

## Aunt Rhody

Go tell Aunt Rhody
Go tell Aunt Rhody
Go tell Aunt Rhody
That the old grey goose is dead

The one she's been saving (3)
To make a feather bed.

She died in the millpond (3)
A standing on her head.

The goslings are crying (3)
Because their mammy's dead

Go tell Aunt Rhody etc.

## Michael Row the Boat Ashore

Michael, row the boat ashore
Hallelujah,
Michael row the boat ashore, Hallelujah,

Michael's boat a gospel boat, etc.

Then you'll hear the trumpet sound, etc.

Trumpetsound the world around etc.

Trumpet sound for you and me, etc.

Trumpet sound for rich and poor, etc.

Trumpet sound the jubilee

Michael row the boat ashore, etc.

## I'M ON MY WAY

I'm on my way and I won't turn back (three times)
I'm on my way, Great God I'm on my way.
I'm on my way to freedom land (three times)
I'm on my way, Great God, I'm on my way.
I asked my brother to come with me (three times)
I'm on my way, Great God I'm on my way.
If you won't go, don't hinder me (three times)
I'm on my way, Great God I'm on my way.
I'm on my way, and I won't turn back (three times)
I'm on my way, Great God, I'm on my way.

(4)

## O Freedom

Oh, freedom, oh freedom,
Oh freedom over me,

refrain And before I'll be a slave,
I'll be buried in my grave,
And go home to my Lord, and be free.

No more mourning, no more mourning,
No more mourning over me,

refrain

No more weeping, no more weeping,
No more weeping over me,

refrain

(5)

## Hallelujah I'm Travelling

1 Stand up and rejoice: a greaat day is here,
We're fighting Jim Crow and the victory is near.

chorus Hallelujah I'm a travellin'
Hallelujah ain't it fine,
Hallelujah I'm a travellin'
Down freedom's main line.

2 The judges declared in Wasington Town
"The white folks must take that ole Jim Crow sign down"

chorus

3 I'm paying my fare on the Greyhound Bus line
I'm riding the front seat to Nashville this time.

chorus

4 Columbia's the gem of the ocean they say
We're fighting Jim Crow in Columbia today.

chorus

5 I hate Jim Crow and Jim Crow hates me
And that's why I'm fighting for my liberty.

chorus

6 We're going to school at a quarter to nine,
There'll be black and white children together this time.

chorus

7 We've been marching for hours and we'll march for days,
Till Jim Crow has flown off and equality stays.

chorus

(6)

MARCHING SONG OF THE FIRST ARKANSAS (COLORED) REGIMENT

tune: John Brown's Body

Oh, we're the bully soldiers of the "First of Arkansas",
We are fighting for the union, we are fighting for the law,
We can hit a Rebel further than a white man ever saw,
As we go marching one.

Glory, glory halleljah,
Glory, glory, halleljah,
Glory, glory halleljah,
As we go marching one.

See, there above the center, where the flag is waving bright,
We are going out of slavery we're bound for freedom's light
We mean to show Jeff Davis how the Africans can fight,
As we go marching on!
Glory, glory halleljah etc.

We have done with hoeing cotton, we have done with hoeing corn,
We are colored Yankee soldiers now as sure as you are born
When the masters hear us yelling, they'll think it's Gabriel's horn,
As we go marching on.
Glory, glory halleljah etc.

They will have to pay us wages, the wages of their sin,,
They will have to bow their foreheads to their colored kith and kin,
They will have to give us house--room or the roof shall tumble in!
As we go marching on.
Glory, glory halleljah etc.

(7)

# PICK a BALE of COTTON

chorus

O lawdy, pick a bale o' cotton
O lawdy, pick a bale a day
O lawdy, pick a bale o' cotton
O lawdy, pick a bale a day.

1

You got to jump down turn around
Pick a bale o' cotton,
You got to jump down turn around
Pick a bale a day

chorus

2

A me an' my wife can
Pick a bale o' cotton
A me an' my wife can
Pick a bale a day.

chorus

3

A me an' my girl can
Pick a bale o' cotton,
A me an' my girl can
Pick a bale a day.

chorus

4

A me an' my friend can
Pick a bale o' cotton,
A me an' my friend can
Pick a bale a day.

chorus

5

A me an' my pappa can
Pick a bale o' cotton,
A me an' my pappa can
Pick a bale a day.

chorus

6

You got to jump down turn around
Pick a bale o' cotton,
You got to jump down turn around
Pick a bale a day.

chorus

(8)

# O Mary

chorus
O Mary don't you weep don't you mourn,
O Mary don't you weep don't you mourn,
Pharoah's army got drownded,
O Mary don't you weep.

1
If I could I surely would
Stand on the rock where Moses stood,
Pharoah's army got drownded,
O Mary don't you weep.

chorus

2
One of these nights around twelve o'clock
This old world's gonna reel and rock
Pharoah's army got drownded,
O Mary don't you weep.

chorus

3
When I get to Heaven, going to sing and shout,
Nobody there for to turn me out,
Pharoah's army got drownded,
O Mary don't you weep.

chorus

# GOODBYE OLD PAINT

refrain

Goodbye, old Paint,
I'm a-leaving Cheyenne
Goodbye old Paint,
I'm a-leaving Cheyenne.

1. I'm a-riding old Paint
I'm a leading old Fan,
Goodbye little Annie,
I'm off to Cheyenne

refrain

2. Oh, hitch up your horses,
And feed them some hay,
And seat yourself by me
As long as you stay

refrain

3. My horses ain't hungry
They'll not eat your hay
My wagon is loaded
And rolling away.

refrain

CLEVELAND C.O.R.E
1740 CRAWFORD RD.
CLEVELAND 6, OHIO

THERE ARE TWO GROUPS OF QUESTIONS WHICH, IF POSSIBLE, SHOULD BE ANSWERED BEFORE EMBARKING ON AN ACTION CAMPAIGN FOR SCHOOL DESEGREGATION.

I) THE ANSWERS TO THESE QUESTIONS WILL BE VERY USEFUL IN DRAWING COMMUNITY ATTENTION TO THE PROBLEMS OF SCHOOL SEGREGATION. MOST IMPORTANT, THEY WILL DRAMATIZE THE SITUATION FOR THE NEGRO COMMUNITY AND ITS SUPPORTERS.

1. What is the racial distribution, school by school, of pupils, teachers, and administrative staff? In good sized cities this information generally reveals fairly rigid segregation on all three levels.
2. What are the pupil-teacher ratios, school by school? Here again, usually there is more crowding in predominantly Negro schools.
3. What are the achievement levels, school by school? Usually the levels of pupils in predominantly Negro schools lags anywhere from one to three years behind those of most white schools.
4. What % of high school students drop-out before graduation, school by school? What % go on to college or stable employment after graduation? Usually the drop-out rate is higher, and the employment and college rate lower, in predominantly Negro schools.

Although usually this information must be obtained from the school administration, it is not an impossible task. Often it is possible to secure it by arranging a conference between school officials and either a National CORE staff person, or some other outside consultant. Sometimes school officials will offer it to local civil rights workers, upon request. Otherwise, if officials resist, it is useful to demand that the information be made public. Since it is not in any way secret, this at least will embarass school officials. IF THE INFORMATION IS SECURED, EXPERIENCE SHOWS IT CAN BE MOST EFFECTIVELY DRAMATIZED BY RELEASE THROUGH A SPECIAL PRESS CONFERENCE, SHORTLY PRECEDING THE PRESENTATION OF C.O.R.E PROGRAMS FOR DESEGREGATION.

II) WHILE ANSWERS TO THE ABOVE ARE USEFUL IN DEVELOPING PROGRAMS AND PROPOSALS, IT IS ALSO NECESSARY TO KNOW, IF POSSIBLE, WHAT -- IF ANYHTING -- IS BEING DONE TO REMEDY THE SITUATION.

1. How much is spent per pupil per year?
2. Are there any programs in compensatory education already established? ( i.e. reading readiness, tutorials, homework centers, remedial programs, etc.)
3) What efforts, if any, have been made to develop a building program designed to desegregate?
4) What efforts to desegregate pupils and teachers in existing facilities?

5. Are teaching materials "integrated"? Do they reflect racial and ethnic differences, and the facts of big-city life?

6. What sort of ability and achievement tests are used? (Most ability tests presently in use seriously discriminate against Negro and other minority group youth).

7. Is there an established ability track system used, based on these test scores?

8. What efforts have been made to intensify vocational and other guidance, to encourage Negro youth?

ANSWERS TO THESE QUESTIONS WILL GIVE A GENERAL IDEA OF HOW MUCH REMAINS TO BE DONE.

Program development is of great importance. There is, in city school systems, almost no interest in or sensitivity to the problems of segregation. There is little idea of how to remedy the situation, even if the will to do it exists. This throws a large burden on the shoulders of civil rights groups. We cannot merely say " Set the existing situation straight", without pinpointing what is wrong, and indicating how it can be remedied. In fighting the education battle we need to educate both the educators and the community. . . and that is the role of program.

If we can be of any help, please call or write.

ADDRESS BEFORE THE AMERICAN TEXTBOOK PUBLISHERS INSTITUTE

JUNE 10, 1964

BY JOSEPH O. LORETAN
Deputy Superintendent of Schools
New York City Board of Education

I am very pleased to have been invited to address you today. Much of the time I have spent in my new position as the Deputy Superintendent in charge of Curriculum and Research has been occupied with the whole area of communication and instructional materials.

I started my career as a history teacher and, although I make no claims to being an historian, I have an everlasting interest in and, I hope, a bit of a sense of history. Inherent in the study of history is the ability to look back, to synthesize, to evaluate, and then, on the basis of facts, to move forward.

At one time communication was solely a verbal medium. The minstrel, the jongleur, was the talking textbook. Then, as pictures and letters were developed to represent events and sounds, the scribe and scriptorium became necessary. The advent of the Gutenberg Bible in the 15th century marked the beginnings of the facility for large scale linear learning. However, it wasn't until a century later, with the surge of the Renaissance and the development of national language, that the presses really began to fulfill their promise.

We have moved far from the recorder, the scribe, far from the early press and its "limited editions." We have moved into an era in which we are committed to mass education. For that reason, the publishing of materials for education has become one of the major industries in this country. One of your own colleagues, William Jovanovich (President of Harcourt, Brace & World), stated in a recent article in The Saturday Review:

> Given this tradition of attempting to educate the whole of society, which in the past decade has been intensified for reasons of international competition, the American publisher can anticipate an almost unlimited market for educational books. It seems likely that this market will grow at a rate of 15 per cent a year during the next decade, far faster than the rate of population growth.

Now what does this imply? To me it says that more than ever before educators must tell publishers what the needs of education are--both general and specific. It is the responsibility of educators to "project"-- to anticipate curriculum, to say to publishers, "We are moving in this direction." It is not fair to spring our curriculum on publishers and then say that because the materials aren't ready that the publishers are dragging their feet. On the other hand, I hope the time is over when publishers say to me, "But it takes five years to write and produce a book." Ladies and gentlemen, in these days of exploding knowledge, five months can make a curriculum obsolete.

What else does it mean? It means that publishers must throw away the vestiges

of being printers. Educational publishers must be in the vangard of research; they must keep up with our changing society and as a team with educators produce the best instructional materials in the world.

Today's theme--Books for Disadvantaged Students--disturbs me for two reasons. One is, isn't it late? Haven't we been dragging our feet? Doesn't the statement "disadvantaged" imply after the fact? If we had been more alert to all segments of our population these past 100 years, would we now have to gather here today to discuss this problem? The second reason that the theme disturbs me is the implication that books for the disadvantaged must be "different." Different in what way? It is the lack of differentiation that disturbs me.

Disadvantaged is a negative term--the lack or absence of advantage--as simple and as complex as that. Unlike the term disenfranchised, when a person can look forward to the time his franchise will be returned, a disadvantaged youngster just never had it; there is nothing to return. It is just a vacuum. The need of the disadvantaged youngster is the same as the need of the advantaged. We want to move these youngsters from the "have nots" to the "haves." Now, in terms of instructional materials, then, we must give them everything that the "advantaged" youngster has. We must never think in terms of watering down, simplifying, adapting. Instead, we must enrich, motivate, entice, excite. This is the charge for books for all children, but the disadvantaged youngster needs the books faster and he needs more of them. The vacuum must be opened and filled.

At a recent meeting of the Research Council of the Great Cities Program for School Improvement, a report was made on the policies and procedures for the selection of textbooks in great cities. Three major recommendations were made: that there be

(1) Reference in content and illustration to representatives of all elements of society;

(2) Reference in content to problems and conditions of all levels and classes of society;

(3) Reference in content to our American heritage and values of the American way of life.

Let us now look at the criteria for educational materials for all children--the advantaged and the disadvantaged. Children should start where they are. They should start from meaningful material. Children in urban areas should be introduced to reading concepts that they can understand, that they see around them. This is nothing new; it is as old as Dewey. Now, fifty years later, some readers are emerging using city concepts. However, let us not forget that education seeks not only to help us understand our present environment; we must move on to discover new things. Let us not get into the rut of producing solely urban readers to replace suburban readers. Developing reading power by starting in familiar surroundings is merely a "jump off" point, a springboard.

Children should be helped to see America as it is, a combination of all races and creeds. They should see this pictorially as well as in the content of the text.

Once again, we must make up for the lag.

Above all, the content of our books should be accurate. The author is a "middle man" between the original document or fact and the audience for whom he writes. This has become a dangerous "no man's land." For in this transition from fact to printed word, some things have been getting lost; some things are misrepresented. We are guilty of omissions as well as commission. Authors tell me that publishers state that the truth doesn't sell in some parts of the country. How can we establish real value concepts in the hearts and minds of the children if we cannot present honest, balanced material in the day-to-day instruction going on in the schools? If all the publishers worked in unison on this approach, there would be no books except worthwhile ones to select from.

Lastly, we must fill this vacuum with as many good books as we can. This places a responsbility on both of us, the publishers and the educators. As a school system we must speed up, extend, and liberalize our textbook practices; you, in turn, must not outprice yourselves. The heavier, the glossier, the more colorful the books, the more expensive they become. We cannot afford it--just as simple as that. If you are sincere in wanting to fill the gap for disadvantaged youngsters, do not make it impossible for us to provide these children with books. As we produce packets of texts accompanied with records, filmstrips, movies, and programmed materials, there should be less need for elaborate pictorialization in texts.

Now, having stated some (certainly not all) important goals for better educational materials, I would like to go on to what we have done in New York City this past year, both for the professional staff and the pupils, in order to move toward these goals. At the same time, I will stress your responsibility to these new directions. I trust this is one of the reasons you invited me to speak to you today.

For the first time, teachers' reference books may be purchased on an off-list basis, replacing the policy of central appraisal and listing. The purpose of this is to allow teachers and supervisors to purchase those books for their professional libraries that they (and not a central office committee) find useful for on-going and changing departmental, school, and district programs. Professional books for teachers must be concurrent with, if not ahead of, pupil materials.

Now that we have taken this step, it is the responsibility of book publishers to bring to the attention of the schools the most current professional books available in all areas connected with education.

Secondly, on February 3, 1964, all schools were sent a basic list of books on various minority groups to be used in the school libraries. Every school was asked, regardless of ethnic composition, to have such a collection for teachers as well as students. All students are to be directed to read these books.

Again, we have taken this step; now it is the responsibility, as I see it, of book publishers to see that such books are written by competent scholars so that they will become available for use in our libraries. Should we not have more books available

to students on Peter Salam, Phillis Wheatley, Benjamin Bauneker? This leads me to a brief discussion, and one very close to the interests of our schools, of the treatment of minorities in textbooks.

In a policy statement, the Superintendent of Schools indicated that he would recommend only those instructional materials which were in accord with the stated educational objectives of the Board of Education. Those objectives include a realistic and sympathetic account, both in text and illustrations, of the role of minority groups in our culture, both past and present. Wtihin the last year, two meetings have been held with publishers at which this matter has been discussed.

In order to bring to our schools the most recently published texts treating the role of minorities, an accelerated program of review and listing was initiated last January. As a result of this, at the end of February I submitted to the Board of Education for their formal approval a list of social science textbooks that presented constructively the role of minorities in our history and culture. This, of course, was in addition to books which had already appeared on the official list of approved textbooks. I do not mean to give the impression that no books have ever been written that treat the role of the minority accurately, but I must say at this important meeting today that <u>few</u> books have fallen into this category.

We also have the problem of books <u>already</u> listed and currently in use in the schools. Many of these are in need of up-dating and revision in order to help the pupil to understand civil rights issues from an historical and contemporary view point. If these books are not up-dated and improved by the time they are ready for relisting, they will not be included among the books available for use in New York City.

A special problem involves books listed some time ago but in need of revision. On May 1st of this year, I called a meeting of publishers of books to discuss contracts that are <u>not</u> currently expiring. Many of these books do not meet our current criteria demanding an expanded discussion of the role of minorities. I proposed at this meeting that publishers consider the immediate preparation and publication of special supplements for social studies texts. These supplements should include current material on civil rights questions and the role of minority groups in our culture.

I see it as the moral responsibility of book publishers to comply, to the best of their ability, with this request. At this time, I would like to say that I have received phone calls and letters from almost every publisher who came to the May 1st meeting saying that they will be providing this temporary supplement.

This year, for the first time, a revised policy has been initiated in the ordering of paperbound materials. Principals of schools may spend 5% of the money allocated by the school for textbooks for the purchasing of paperbound materials. These books can be purchased off-list, thus giving the principals tremendous leeway in the selection of books appropriate to the needs of their schools. I am hoping that we may be able to increase this figure of 5% next year, since I consider this only the beginning.

Therefore, I would consider it the responsibility of textbook publishers to make certain that paperbound books meet the high educational standards set by our school

system and that nothing be lost "in binding."

A departure has been taken by our school system this year in the preparation of pupil materials for new courses of study. The new junior high school course of study in science, when introduced in September 1964, will be accompanied by pupil materials written specifically for this course of study by Lyons and Carnahan. By working cooperatively with textbook publishers, we will be able for the first time to introduce custom-made pupil materials concurrently with a new course of study. This takes us out of the publishing business and puts publishing where it should be, in the hands of responsible, professional publishers; and, furthermore, it eliminates the surprise element I spoke of earlier in this paper--that of asking the publishers to supply pupil materials for a curriculum they have never seen. In addition, programed materials in reading developed by the New York City staff have been awarded to Charles E. Merrill and Company for national as well as New York City distribution. In the process of being sent out to bid are biographies of local heroes and adult education materials. Royalties from these programs will be assigned to a special fund for further research and development of curriculum materials.

I have just sketched for you some of the changes that have taken place within this past school year. Now for the future. We are aiming at more frequent listing of books, perhaps even continual listing through issuing supplements to our textbook lists.

We are re-evaluating our criteria for selection of books, with the purpose of being less restrictive and more liberal. Teachers should have the opportunity of using new, experimental materials as soon as they are published. We will never relinquish our standards of accuracy, scholarship, and quality, but that should not preclude "new materials."

We plan to extend the use of paperbacks in our schools. There may be some doubt as to whether they are sound investments financially, but we must ask ourselves if they will encourage children to read. Parents and students are for them; teachers and textbook publishers are less so. We are not building factories; we are building minds and citizens.

You know, it is interesting to watch the educational pendulum in action. It is constantly in motion. The uncertain person jumps on and becomes part of the momentum; a sober person watches and becomes part of the axle. I have watched the pendulum swing. About ten years or so ago, many people felt that the printed word had lost its place in communication and had given way to the television screen. I remember educators, yes educators, saying to me, "Why in ten years children won't be learning from books. All they'll have to do is turn on the television set." There are those, if you recall, who put whole subjects on television. In a very small study I did about five years ago, I found one school system (and I am sure there was more than one) that spent more money on television equipment, telecasting, and making filmstrips than they spent on buying books. This is what I meant by jumping on the pendulum. And we do it so quickly, I am sorry to say, in education. It should not be the case of one medium replacing another; it must be that of one complimenting and supplementing the other. Educational materials should be a combination of all that is effective in

all media. We must look toward a broader view of educational materials.

Austin McCaffrey has made great strides in calling attention to a revolution in the textbook industry that will require massive changes and a great deal of time and money to satisfy new textbook needs. In his words: "People are not only surging to the metropolitan areas, but 96% of the population growth is taking place in only 14 of our largest cities." In addition, he has called for continuing use of new research on subject matter. Publishers are now working with educators on finding a common denominator of knowledge in English and the social studies. He also wants to see research conducted on the make-up of textbooks. More and more textbooks will be "audiovisual," combined with films and filmstrips. Publishers are developing materials for programed learning and ETV "in substantial quantity."

I am a practical man. I know publishers need to produce textbooks that will sell--sell in sufficient numbers so that publishers will not only recover their investment costs but also a reasonable profit. These are the economic facts that all groups must face. On the other hand, school people want publishers to produce books at a fair price that effectively meet the needs of both students and teachers. The problem, then, is for publishers to publish texts which satisfy the educational needs of school people and which will sell in sufficient quantity to provide publishers with a reasonably fair profit. I believe tin the present climate of this country that the two are not incompatible.

Finally, I would like to inject a personal note. For this past year I have worked very closely with publishers and their representatives. At no time have I detected anything but the most genuine concern for improving the quality of educational materials. I know that some of my requests have incurred hardships from the point of view of creating new materials, revising old ones, and meeting deadlines. In all of these instances, I have met with the utmost of cooperation.

I want to thank you most warmly for inviting me today, and I hope that as New York City continues to extend and liberalize its textbook practices that you, in turn, will continue to work cooperatively with us.

Excerpts from: ACCELERATED PROGRESSIVE CHOICE READING PROGRAM

by Dr. E Terry Schwarz

BANK STREET COLLEGE OF EDUCATION
216 West 14th Street, New York 11, N.Y.

September 29, 1964

From June 4 to August 30, Bank Street College provided consultative services for a pilot project in which the Accelerated Progressive Choice Reading Program by Dr. Myron Woolman was made available to approximately 2oo high school dropouts in New York City. ....

1. The program is designed so that any lay, literate, intelligent person can guide an illiterate or inadequately literate person through the program. There is no need for professional personnel. This factor makes the program especially attractive, because it would make it possible for a community to provide its own remedial services.

2. In its present form, the programmed materials could be produced at a very minimal cost which makes a wide distribution more possible. ....

Of the participants, only 20 dropped out of the program. Of that number, ten dropped out of one group. The high dropout rate in this group lead to a very interesting insight which should be a guide in the selection of future instructors. The instructor often seemed to be the stereotype of the directive, authoritative teacher. Her teaching style would not allow the programmed materials to be used as specified. The self-pacing, self-initiative factors which are crucial were rarely permitted to function. Instead, the group as a whole were subjected to excessive drill and didactic teaching of phonics, grammar and spelling. ....

In summary, the attendance pattern of the participants revealed deep motivation for learning to read in a society which deems the symbolic skills crucial. ....

The observed reactions of students to the program were overwhelmingly positive....It is not overstating to say that almost every youngster at some time finished a book toward the end of an instructional period and was asked if he wanted to stop or go on. The decisions were unanimously in favor of continuing immediately. In one group, where instruction was on a one to one basis and in three hour blocks of time, the students wouldn't take a break and tutors finally would ask for one. ....

If the reading program could be built into some total life program for dropouts, for which they would be paid an adequate salary, there would be more possibility of success. Most of the students came from poverty-stricken areas. They were pressured at home to get a job and contribute to their impoverished families. Even those participants who wanted to stay in the program were constantly taunted by family and peers with the fact that they weren't earning any money. ....

October 21, 1964
Meeting with Alan Cohen
Mobilization for Youth

I met with Alan Cohen for an hour and a half today to hear his views on Dr. Woolman's method, which MFY has been using on an experimental basis. MFY began using the APC program in the spring of 1964 with seven Spanish speaking adolescents. To date they have instructed approximately one hundred.n Mr. Cohen feels that although this method is not the panacea that we had hoped, it is extremely effective, and because it is set up as a "package" and can be programmed to fit specific needs it is the most practical method available.

As for the BPC, Mr. Cohen feels that it is not as effective as the Columbia Teachers College Program by Robert and Virginia Allen.

Some points made by Mr. Cohen:

1. At the end of cycle 1 the student cannot really read, but he does have good basic skills. It is only after the completion of cycle 1 (about 100 hours) that it would be worthwhile programming the readers in any special direction.

2. Since there is such a great deal of literature available on African culture and history of the Negro in America (and for all age levels) he feels that it would be wasteful to include these subjects in the readers. Suggested employability and voter registration.

3. He thinks it unwise to try to go through the Board of Education because of the red tape involved, but they do intend to have the program in one local public school. Suggested using community centers, churches, etc.

4. Thinks that South Jersey would be an excellent area in which to start a literacy program. Suggested contacting Mr. Jim Kimple, Superintendent of the South Brunswick Township School System. (He mentioned using Rutgers students as volunteer teachers.)

5. Mr. Cohen wishes CORE would go into some sort of Higher Horizons program for ptential college students.

Mr. James Farmer, National Director
Congress of Racial Equality
38 Park Row
New York 38, New York

Dear Jim:

Ralph asked me to look over the Woolman APC proposal. I did this, and I also asked Jack Herkerl, a colleague of mine, to make some observations.

First, I should explain that I work at Hawthorn Center, a children's psychiatric hospital, in Northville. Our director, Ralph Rabinovitch, has always put a heavy emphasis on educational problems, especially reading. Consequently, I have seen and worked with a number of children with severe reading problems. However, I am not specifically trained in the area of remedial reading. Jack Heckerl, on the other hand, is the director of our reading clinic, and is quite sophisticated in the field. The comments that I have to make represent both my own and Jack's thinking.

The project looks feasible on the face of it. Certainly the people whom Woolmen indicates have supported the idea are reputable. The phonic approach that Woolman utilizes in his program has been found to be effective in teaching reading.

Woolman, on page 6 of his proposal, says that the program "was designed to provide an 8th grade reading level within 300 hours of instruction." However, as far as I can see, Woolman has presented no evidence that this goal is a realistic one. On page 5, nine pilot studies are listed. Appendices A-3 and A-4 apparently report the results obtained in two of these (No. 1, Washington Action for Youth and No. 6, D.C. Public School System).

Mr. James Farmer, National Director
Congress of Racial Equality

October 20, 1964

The first study includes only eight subjects, with great variation in the number of hours of instruction each learner received (none over 78 hours), and great variation in mean reading improvement. For instance, the student receiving the greatest number of instructional hours made a below average (and probably non-significant statistically) gain in reading level, whereas the student receiving the least amount of time, made an above average improvement.

The second study (Pitts-Payne, D.C. Public School System) is not very clearly reported. (E.g., I do not understand just how many subjects were included.) At any rate, they received only 45 hours of instruction.

There is no reason to believe that just because the average student makes a certain gain in the first 40 hours that he will continue to improve at that rate for each successive 40-hour period.

Perhaps Woolman has more current data that shows that the APC can "provide an 8th grade reading level within 300 hours of instruction," but there is nothing in the proposal that would support this. (There are some other considerations that I might raise, but I feel that this is the crucial one.) If CORE wishes to finance an interesting experiment, I think the money would be well spent. But if CORE wants to buy a proven product, then perhaps it would be wiser to wait for the results of large scale validating studies.

If you have asked anyone else to evaluate the proposal, I am sure that they have already pointed out what I have just stated.

If I can be of any further assistance, please let me know. Just today I learned the name of a sympathetic professional psychologist who has worked in the Washington, D.C. school system and might know more about Woolman through personal experience. I would be glad to put you in touch with her if you are interested.

Sincerely,

Janice

SUBJECT: CORE as a National Force in Developing Human Potential

DATE: September 27, 1964

## INTRODUCTION

As muscle is increasingly replaced by machinery, the illiterate and functionally illiterate member of our society faces a losing battle for personal survival. Urban and rural slums have become self-perpetuating cancers which corrode and reduce human potential. The slum dweller is limited to his ghetto because of limited language, limited literacy and limited skill levels. He is imbedded within a social capsule whose walls defy penetration and which places him farther behind with each successive generation, as the larger society advances. Social symptoms such as delinquency and crime, unemployment and illegitimacy are by-products of the limited preparation for adulthood possible within this pauperized environment. Further, available institutions, including the schools, have been inadequate to the task of producing the literacy level, skills and attitudinal equipment necessary for productive adaptation within the mainstream of the society.

Some federal recognition of this problem exists. The President's Committee for Juvenile Delinquency and Youth Crime has been the major agency involved in combatting the problem. Very recently, legislation has been enacted to form the Office of Economic Opportunity (OEO) which will step up the effort considerably. However: (1) The funds available are meagre, considering the scope of the problem; (2) federal decisions, appropriations and actions are developed through compromise amongst politically powerful factions, and CORE is only one of the forces involved; (3) producing an organization, facilities and a program demands an extraordinary amount of cooperative interaction amongst and between government agencies which would involve both delay and additional compromise;

(4) these federal programs are controlled largely by educators, and conventional educational approaches to this problem already have been demonstrated to be inadequate; (5) federal programs face barriers in terms of attitudinal and educational differences, legal and bureaucratic requirements, differences in the language used by outsiders (their only available personnel to carry out the programs). This brief list of difficulties is far from exhaustive.

The great power of the federal government faces the slum community with the helpless impotence of the outsider bringing flowers to the sick-room of a man he scarcely knows; he can be expected to be relatively ineffective regardless of the price of the bouquet. On the other hand, CORE can enter these same communities with the confidence and understanding born of mutual trust, hard-won over years of effort. The same forces which reduce and largely nullify federal efforts, act to sustain and heighten the impact of CORE in these same communities. In this connection, the recent surge of legislation directed to providing legal rights and economic opportunity has not reduced, but rather has increased the frustrations and conflicts inherent in social and economic subordination. The Hungarian revolution occurred following the promises by Malenkov and Kruschev that oppression would end and would be replaced by freedom and plenty. The promises of a better future inherent in present legislation, the mood of the country, and the very existence of organizations like CORE, demand that something tangible take place or they will only add to existing frustration and lead to explosive emotional reactions which can, under certain circumstances, spread across whole communities.

The fact is, that in this national crisis, rapid and efficient headway can be made in the slum community only by an organization such as CORE; to make a dent in this problem, if there were no CORE, the federal government would have had to invent one.

## I. CORE AS A COMMUNITY ACTION AGENCY

The key to the door which bars the way to productive participation in the greater society is, of course, to rapidly increase the level of literacy in the slum community. The fundamental position of this prospectus is that it is possible for CORE to act as a catalyst to enormously accelerate the attainment of social and economic equality, by itself acting as a major agency for producing the skills crucial to stable and productive employment and to more active and meaningful participation in our society. The Institute of Educational Research, Inc. has developed methods and techniques which permit non-teachers to develop literacy, arithmetic (and job skills) in the absence of traditional school buildings and traditionally trained teachers. These methods have been designed for use with drop-outs and other under-achieving adolescents and young adults. They have been tested and offer an immediate vehicle for use by CORE to rapidly increase literacy skills on a mass basis in each of the areas served by CORE Chapters.

The problem is to provide an escape route out of the ghetto into the mainstream of the society.

Once an adequate literacy level is reached, then, and only then can the individual progress up a job ladder. In our time, a man must be able to read sufficiently well to understand manuals and directions related to his job task. An 8th grade level of reading skill is now a minimum for economic survival.

CORE represents a national resource which can cope with the problem of community education and training from the "inside-out" rather than to attempt to affect these communities from the "outside-in". It possesses an intelligent, cohesive and energetic membership which has repeatedly demonstrated that it can achieve CORE objectives.

Each geographic area served by CORE has a system of supervisory control and a leadership structure which can carry through an action program. Further, space and facilities are already available for use by CORE members in most communities, and would be readily available in communities not now providing such facilities. In short, CORE already possesses the following resources for an educational and training program:

1. an organized administrative system capable of putting an action program into effect and supervising its use;

2. a membership capable of following out a detailed plan of action over a sustained period of time; and

3. available space and facilities within each community.

<u>The Required Ingredients</u>:

In addition to the resources previously mentioned (leadership and administration, an organized capable membership, space and facilities), an educational system requires:

1. an instructional capability,

2. educational and/or training materials, and

3. methods of evaluation and Quality Control.

For CORE's purposes, these materials should permit persons with no previous background as a teacher to provide systematic instruction in whatever facilities are available, including homes, churches, stores, or whatever well-lit, warm, dry space may be available.

Further, the programs must be designed to maintain the interest of those being trained and to insure (by means of suitable evaluations) that the learner is actually meeting the required performance standards.

The six major ingredients involved in mounting an effective program may be summarized:

1. an organized administrative structure, capable of imposing direction and guidance;

2. a body of personnel capable of meeting organizational goals;

3. available space and facilities;

4. methods of instruction which teach what is required;

5. an organized and systematized body of training materials;

6. a Quality Control and evaluation method which assures that learners meet the required standards.

## II. THE INSTITUTE OF EDUCATIONAL RESEARCH, INC.

Facilities:

The Institute of Educational Research, Inc., was established December, 1960, as a non-profit corporation operating under the laws of the District of Columbia. The statement of incorporation describing the major corporate objective reads: The more effective realization of the human resource potential...The major objectives are: the improvement of behavioral efficiency...

The Institute of Educational Research has approximately 2,000 square feet of office space and is fully equipped with office furniture including desks, typewriters, chairs, etc. In addition, it has a complete in-house printing capacity including copying and multilith equipment for reproduction. The staff consists of twenty-three administrative and research employees.

The Accelerated Progressive Choice Reading Program was developed through the support of the President's Committee on Juvenile Delinquency and Youth Crime, (Dr. Leonard S. Cottrell, Chairman), and is presently under test in the following locations:

| | Organization | Address | Title and Name of Responsible Officer |

## III. THE READING PROGRAM

The Accelerated Progressive Choice Reading Program (APC) is based on methods initially developed in 1950. It has been tested experimentally six times with normal first graders and has been successfully shown to be able to teach reading skills to mentally retarded children. (See Appendices A-1 and A-2.) The Accelerated Progressive Choice Reading Program was first planned for use in Prince Edward County, (see Appendix B) but was shifted for use with adolescent drop-outs in coordination with the President's Committee for Juvenile Delinquency and Youth Crime. It has been pilot tested in a number of locations and the results so far indicate that it produces reading skills somewhat more efficiently than estimated. It was designed to provide an 8th grade reading level within 300 hours of instruction, using a non-certified person as a teacher and whatever facilities were available.

At Washington Action for Youth, the pilot group of eight students showed gains of more than 15 months (1.28 years) in a mean time of 40.3 hours. (See circled data in Appendix A-4.)

The Pitts-Payne study (see Appendix A-3 for their memo summarizing their results) showed a somewhat greater gain in a period of one month which officially provided 45 hours of instruction.

The method is designed for use with groups, and permits one instructor, lacking teaching experience, to teach at least ten learners simultaneously.

<u>The Criteria for the Experimental Reading Program</u>:

Economic Criteria:

a. The Literacy Program should be adapted to the use of existing community resources and facilities for training, obtaining subjects and teaching.

b. The Literacy Program should be able to be used by non-professional, unskilled persons in the role of instructor at the expense of some loss of efficiency.

c. The Literacy Program should not require the use of highly specialized buildings or other facilities, but rather be designed for use in any available space where one literate person can meet in some privacy with one or more illiterates.

d. The materials used for the instructor and illiterates should be relatively cheap to reproduce in quantity.

Functional Criteria:

a. The Literacy Program should be designed so that it can be used as the first phase in developing job skills.

b. The Literacy Program should be designed to provide a capability to participate actively and productively in the total society.

The Approach:

In a recent proposal to The Office of Education, The Adult Education Association of the U.S.A. suggested that the Accelerated Progressive Choice Reading Program be tested in a correctional setting. A statement from their proposal, relevant to the present study, follows:

> Since the above studies have been completed there have been improvements in methodology related to the development of reading skills. Woolman's Progressive Choice Reading Method now appears to take a greater role in the development of literacy skill. The Progressive Choice Reading Method has already demonstrated that it is able to be used to teach reading skills to mentally retarded children. Recently, Woolman developed a high speed version of this reading program (The Accelerated Progressive Choice Reading Program) to obtain a high rate of literacy skill development in functional illiterates and young adults under the auspices of the President's Committee for Juvenile Delinquency and Youth Crime (Leonard S. Cottrell, Chairman).

This program has been favorably reviewed by the Adult Education Branch of the U.S. Office of Education (Edward W. Brice, Director) and by various authorities.

The following descriptive analysis of the Accelerated Progressive Choice Reading Program was made by the staff of a well-known publisher of reading materials, (Science Research Associates, Inc., Chicago, Illinois).

The Progressive Choice Reading Approach

The materials are designed to increase the reading level of students, ranging in age from about 12 years through young adulthood, who read below the fourth grade level.

Woolman materials appear especially promising for the following reasons: (1) they meet the criteria recommended by the special Task Force of United States Office of Education, (2) the content of the stories is determined by a rationale designed to change attitudes of the learners, and (3) other basic skills and vocational training materials are being developed to coordinate with this basic reading program. Preliminary tryouts of the materials with several different groups of students have been encouraging.

Woolman adopts a linguistic approach to reading. His Progressive Choice Reading Method is designed to develop those perceptual skills necessary to extract meaning from printed words that are already known in speech. There are several distinctive features about the Progressive Choice Reading Method. Four of the major features are described by Woolman as follows:

Response Activation

> There will be a requirement for high rates of response as learning rate is largely a function of the activity of the learner.

Evidence of Achievement

> These children must perceive themselves as effective members of their own society....Here we are concerned with convincing evidence of achievement earned by effort and success.
>
> The (lessons) will be designed to provide clear-cut goals, indisputable evidence of goal attainment, and responsibilities, as well as privileges, as a consequence of goal attainment....

Frustration Tolerance

> The learner will be provided with learning tasks designed to produce increasing rates of response in the face of frustration, conflict, and uncertainty. This is of particular importance as the opportunity to achieve beyond the levels of their present limited environment requires an ability to maintain high response rates in the face of trying and difficult situations.

General Language Reservoir

> Finally, we are concerned with sharply increasing the verbal reservoir so that subjects can comprehend printed materials at various levels of abstraction, with sufficient precision to understand the intent of the writer....The subjects must understand, as fully as possible, language beyond the limits imposed by regions, color, or familial pattern.

Two principles of learning that particularly distinguish the Progressive Choice Reading Method are discrimination and invariance. The principle of discrimination states that any new learning factor (e.g., form of a letter) should be as highly discriminable as possible from previously learned factors. The principle of invariance states that after one learning factor (form of a letter) has been taught, then only one characteristic (e.g., its most useful sound) is taught at a time.

The combination of these principles and their application to the teaching of reading in the Progressive Choice Reading Method result in the following important characteristics.

1. Beginning readers are introduced to new letters in an order that is designed to make each letter as distinct as possible from the letter presented before it. Capital letters are presented initially, and discrimination is determined by line form.

   The letters are described in terms of straight and curved lines and classified accordingly as (a) angular -- all straight lines, (2) curved -- all curved lines, or (c) mixed -- straight and curved lines. The first letter presented is angular (M), the second is curved (O), the third is mixed (P), and so on.

2. During the initial part of the program, symbol-sound combinations are completely consistent. Beginning readers are introduced to (a) only one form of each letter -- they learn only capital letters at first, (b) only one sound for each letter -- its most useful sound, and (c) only one letter for each sound.

The Progressive Choice Reading Method is divided into three major cycles according to simplicity and consistency of sound-symbol combinations to be learned. The cycles are outlined on the following page.

Cycle I: Learning emphasizes words that contain phonetically consistent letters

Cycle II: Learning emphasizes words that contain vowel or consonant compounds

Cycle III: Learning emphasizes words that contain varying sounds for given letters and different letters for given sounds

Each cycle is divided into segments. For example, the first segment of Cycle I introduces the letters M, O, and P. Mastery of this segment means that the subject has learned to read and write all the words that can be formed by these letters: MOM, POP, MOP.

The second segment consists of T and S. Mastery of this segment means that the subject has learned to read and write all the words that can be formed by all of the letters he has learned: TOM, TOP, POT, TOT, STOP, SPOT, POPS, MOPS, and so on. Two or three letters are presented in each segment until all the letters of the alphabet have been learned except for the letter Q. The number of words the subject can read and write increases at an accelerating rate with the acquisition of each new letter.

The activities in each segment are divided into five levels of increasing complexity. Individual levels are planned so that a subject is initially presented with a very simple learning task, and as he demonstrates that he has mastered the task, he is presented with a more complex task. With each new task, the newly mastered information is thoroughly integrated with information mastered in previous levels. The five levels of complexity are outlined by Woolman below:

Audial Meaning Level:

Words which the learner must ultimately read in a given segment are used in spoken form and the learner must demonstrate understanding (content of usage) of each of these goal words.

Discrimination Level:

The learner must show that he can discriminate the characteristic features of each new learning element among dissimilar and similar alternatives using matching and printing responses.

Identification Level:

The learner must demonstrate that he can "label" (give the relevant sound for) each new learning element by printing and/or sounding responses.

Compounding Level:

The learner must demonstrate that he can blend sounds when shown printed letter compounds and vice versa.

Visual Meaning Level:

The learner must demonstrate, by printing and sounding, mastery of meaningful printed information. He must demonstrate that he can get the same meaning from speech and visual modes interchangeably for the goal words.

As students acquire vocabulary, they read stories using only the words they have learned to read. The content of the stories is crucial to the Progressive Choice Reading Method and the rationale and description of the content is presented below:

A primary initial requirement of this project is to produce a high rate of response. It will be assumed that the subjects will appear lethargic and relatively inert at the outset. These outward manifestations are seen as masking a relatively active fantasy life in which they obtain the material possessions, responsibilities and status which are in fact denied by their life circumstances. These "dreams of glory" will be the target of the initial inputs and our first effort will be to transform these covert activities into energies for overt responses.

The transformation programs will possess the following characteristics:

The Goal:

A hero or heroine with whom subjects can identify; a poor slum city dweller in extremely limited circumstances who has a goal which appears unachievable.

The Obstacles:

Lack of money, misunderstanding, time, circumstances, family, position, the law.

The Effort Made to Overcome Obstacles:

Specification of actions taken to overcome obstacles shown...above (performing extra work, resolution by discussion and explanation, awareness of unfairness by authority, unexpected support by others, assistance from a stranger, reconsideration of problem, substitution of sub-goals, persuasion of group members, unexpected support).

Goal Achievement:

Detailing of actual attainment of the initial goal or some aspect of the goal.

The Birth of New Goals:

The awareness that once the prize has been obtained that it sets up new goals. Goal achievement thus always becomes a signal for the emergence of new goals but now the hero or heroine knows that effort can produce rewards. Response is a prerequisite for success; failure in the process of goal attainment is merely a signal demanding the development of a new and better plan.

At the outset, stories will be constructed using culturally familiar terms; emphasis will be given to the values, needs and interests which already exist in the delinquent community. Thus, we begin with goals and situations which are identifiable and understandable in terms of the existing world in which these children live. The bridge is initially anchored on their side of the water. At later stages, as skills increase, vocabulary expands and confidence grows, the program gradually shifts in both attitude and content to provide a more useful language reservoir and increased awareness of the behavioral boundaries by the non-delinquenogenic community.

The Teacher's Manual is completely coordinated with the student materials, and it details specific objectives for each lesson, how to achieve the objectives, and how to determine student mastery.

## IV. PUTTING THE APC PROGRAM INTO THE FIELD

The Institute of Educational Research and CORE will be engaged in a joint enterprise in which there will be close coordination, but with a clear division of responsibilities:

<u>CORE is expected to provide</u>:

1. An administrative structure which will convey information, materials and directives to field personnel within a reasonable time.

2. Staff personnel who are literate, motivated and will follow the procedures in The Accelerated Progressive Choice Reading Program.

3. Supply the facilities to be used in those communities in which the programs are initiated.

4. A responsible CORE official to operate as a liason with IER to facilitate planning, to provide CORE policy positions and requests, and to make decisions for CORE actions when and where required.

IER will be responsible for carrying out the following tasks:

1. Provide necessary orientation workshops and instruction to initiate programs in various communities.

2. Monitor, evaluate, and critique CORE staff and supervisory personnel to maintain level of performance.

3. Establish and maintain a record-keeping Quality Control system which will provide rapid and up-to-date information on the program as a whole and the progress of individual units.

4. Develop special materials specific to the needs of the CORE learner population.

   It is expected that the average time in which students will complete Cycles I, II and III of the APC Reading Program will vary between 100 to 300 hours as students can move at their own pace. At the present time, Cycles I, II and III are complete and ready for use in the field.

   Although the development of a Vocabulary Expansion Program (VEP) was undertaken, this program has not been completed because of lack of funds. The special CORE-oriented material will be developed as part of the Vocabulary Expansion Program. The last 150 hours of literacy training will involve the use of this special CORE material agreed upon jointly. Part of the cost of the project will involve the development and testing of these special CORE-related programs.

   The Institute of Educational Research, Inc. has licensed Science Research Associates, Inc., Chicago, Ill., to publish and distribute the APC Reading Program (Cycles I, II and III). In accordance with IER policy, all property rights including copyright are to be held by IER in accordance with IER policy.

5. IER will collect, analyze and summarize data and write project reports of results obtained.

6. Consistent with IER's non-profit status, costs will be calculated to cover IER overhead, production, travel, etc. As the volume of CORE learners increases, IER cost per learner is expected to decrease and this reduction will be passed on to CORE as soon as it is known.

## V. THE EXPANDING WEDGE CONCEPT

The CORE Literacy Program is expected to resemble an ever-expanding wedge. All subjects participating in the Program will be tested (Pre-Test) prior to entering the Program and upon completion of the Literacy Training Program (Post-Test). IER will supply all test materials and procedures and will supervise all pre and post testing.

Progress of the Program is visualized in the following manner:

Step 1: (First four weeks) A single location will be obtained in a suitable New York City area (CORE Literacy Training Unit). Three persons from each of nine CORE units will be selected to be trained as CORE Literacy Training Teams. One week after the Teams have been established, three classes, each consisting of 15 functionally illiterate persons, will be tested and then, scheduled for two hours per day of APC instruction. The three CORE Literacy Training Teams will be trained, in part, working on each of the three classes. Each CORE Literacy Training Team will be tested on its class and when it satisfies the standards imposed by IER staff personnel, it will be released to instruct its own class using the APC Program.

In each succeeding step, the training of CORE Literacy Training Teams will involve essentially the same procedures as those employed in Step 1. IER will consider that the quality of the training given will remain its responsibility, although to the extent possible, the training itself will be shifted to CORE personnel.

## Tentative Pattern of CORE Literacy Program Expansion*

| Step | Approximate Time | Activities to be Performed | IER to Provide |
|---|---|---|---|
| One | Weeks 1,2,3,4 | Activation of first Literacy Training Unit in New York City. Assignment of nine Literacy Training Teams from New York City area. Training continued until each Team meets IER standards. | 1. Pre-tests and test supervision<br>2. APC Materials<br>3. Workships, monitoring and instruction |
| Two | Weeks 5,6,7 | Activation of nine CORE Literacy Teams from New Jersey, Penna. Maryland and upstate New York. Bring in nine additional units to same CORE Literacy Training Unit. Train CORE Teams and evaluate as in Step #1. | 4. Evaluation of CORE personnel<br>5. Planning of special CORE materials |
| Three | Weeks 8,9 | Set up second CORE Literacy Training Unit in city such as Philadelphia or Baltimore. Provide simultaneous instruction in both CORE Literacy Training Units, providing training for 18 CORE Literacy Teams (see Step 4). | |
| Four | Weeks 10,11 | Eighteen CORE Literacy Teams, drawn from Washington, D.C., North and South Carolina (and other Southern states - to be determined later) will be trained in the Training Unit set up in Step 3. | |
| Five | Weeks 12,13 | Set up third CORE Literacy Training Unit in city such as Chicago or St. Louis, and provide training for 27 Literacy Training Teams. | |
| Six | 16th Week | Set up fourth Literacy Training Unit on West Coast in city such as Los Angeles or San Francisco, making a total of 36 Literacy Training Teams which will be training simultaneously. | 6. Initiate field tests of CORE-related literacy materials and other special programs as mutually agreed upon. |

*These steps are illustrative only, and have been used to indicate the rapidity of growth possible. Actual step sequence will be worked out jointly with CORE.

In my judgment, this project offers an unparalleled opportunity to IER to carry out its function. There is no project on my horizon, past or present, which I would rather commit IER to do. I look forward to the reaction of CORE's Committee with both anticipation and the hope that we can together begin on the great task of providing more Americans with the tools needed for greater self-fulfillment.

Dr. Myron Woolman

Myron Woolman, Ph.D., Director
Institute of Educational Research, Inc.

UNIVERSITY OF FLORIDA
GAINESVILLE

REPLY TO:
READING LABORATORY AND CLINIC
310 ANDERSON HALL

April 19, 1963

Dear Dr. - - -:

I have received and read the materials you forwarded regarding the efforts to solve some of the problems inherent in the Prince Edward County situation.

I have been familiar with the experiments by Bloomer and the work of Myron Woolman almost since its beginnings. Dr. Woolman has permitted me to review the Progressive Choice Reading materials as they were prepared for each research trial.

Some reading authorities would object to the emphasis upon phonics or letter sounds in this material, arguing that there is more to the process of beginning reading than just this element. They would prefer an emphasis upon word form and the use of semi-narrative materials. Under normal classroom conditions, with children of average mental abilities and the usual school experiences, this argument is sound. But in dealing with children of limited intelligence, and a lack of schooling amounting almost to illiteracy, the usual arguments do not apply. A much more practical approach, involving training in reading and writing simultaneously, under learning conditions which progress in very small steps (with no assumptions regarding the supporting language experiences of a normal classroom) is appropriate here. This detailed, sequential training by very easy stages is the inherent rationale of the Progressive Choice Method. Furthermore, the experiences of the Laubach Foundation, the Tennessee TV programs and the current Florida "Operation Alphabet" confirm the values of this particular kind of approach to reading with illiterates or the culturally-deprived. These programs have shown that a step-by-step approach keyed to reading and writing letter sounds is highly effective.

A number of reading specialists both in this country and England have tried to devise reading programs of this type. Among these are Hunter Diack of the Institute of Education, University of Nottingham, Dr. I.A. Richards of Harvard University and the late American Linguist, Leonard Bloomfield. Despite intensive efforts, the programs produced by these authorities are far inferior to the Progressive Choice Method, in my opinion. In fact, Dr. Woolman's materials are the only completely consistent programed reading materials now available, and suitable for use with school-age children. For the abnormal conditions present in Prince Edward County, I know of no more appropriate approach.

Sincerely,

George D. Spache

George D. Spache, Head
Reading Laboratory and Clinic

GDS:sab

Director, National Institute of Mental Health July 17, 1963

Associate Director for Program Development
National Institute of Mental Health

Need for programs learning materials for non-reader, retarded children, and children who have suffered interruption of the educational process.

One of the major problems in the mental health field involves the determination of the factors associated with the outcome of child rearing practices up to adulthood. A great deal of work has been done, as you know, concerning the effects of maternal behavior in producing a variety of maladaptive results such as feeding problems, sleeping problems, enuresis, nail biting, anxiety, and other classical problems with which child guidance clinics have occupied themselves. On the other hand, we do not fully understand the causes for the recent rise in Juvenile Delinquency, and some of the disorganization shown by adolescents and late adolescent youth. The data on the increase of delinquency are now convincing, and disorganization is the sense of the lack of place in the social order upon the part of many other youth is becoming increasingly clear. It is imperative, therefore, that this Institute dedicate itself to a full and complete understanding of the factors associated with the non-fruitful outcome of elementary and secondary education and childhood experiences generally. It is only by an attack upon such problems that the Institute can, in good conscience, say that it is concerned with prevention as well as remediation.

The Program Development area of the Institute has been giving serious thought and attention to these problems for a long period of time. Considerable effort has been made to look for some gross relationships between early experiences during pre-school and early school years, and the ultimate outcome in terms of the nature of the young adult thus produced. While we have an equal interest in both favorable and unfavorable outcomes, a first order of importance must be attached to unfavorable outcomes, since they are the ones that cause public concern.

One of the interesting apparent relationships seems to be that which exists between the inability to learn to read and write during the first two elementary grades and the increased probability that such individuals will ultimately show a pattern of anti-social behavior and possibly delinquency. It would be naive and simple-minded for us to assume that the inability to learn to read during the first and second grade is itself a major determinant of later delinquent behavior. Undoubtedly the relationship is much more complex. It probably reflects the fact that the child in the first year or two of elementary school is under the pressure of adults, his teachers and his parents, to achieve a goal which for a variety of reasons such as basic inability, or disorganization of the home or both, is not really attainable by him. This pressure may well be applied either in a benign or damaging way. But during the first two years he is not disadvantaged in his relationships with his peers because they do not value him on the basis of his ability to read or write. By the time he reaches the third or fourth grade, however, these skills are more important in the daily economy of the child, and he may well become scape-goated as a dope or dummy or square, or

what ever the current jargon of childhood is, indicating a child is not quite one of the group. At this point, you will note he is disadvantaged with both adults and his peers, and he faces quite an insufferable situation. He becomes a devalued person. A moment's reflection shows that he has several possible ways available to overcome this devaluing experience. He may compensate by some area of other excellence, such as unusual ability in the field of physical prowess, athletics, or music. This he can do only if he has these other abilities. He might, if very mature, buckle down and overcome his problems directly. But this solution cannot be expected from many children. The most likely event is that he will become hostile toward the whole social circumstances of his time and that he will retaliate at first with minor peccadilloes and later with more serious anti-social behavior. These disturbed relationships really reflect his attempt to maintain his personal integrity and his sense of self. They will be associated with establishing relationships with similar disorganized children who face the same problems and therefore form quite naturally a small in-group that can well develop into delinquent gangs. This is one course of development which makes psychological sense out of the data we now have, namely that early reading disability may lead later to delinquent anti-social and possibly criminal behavior.

It is important as a consequence of these circumstances that this Institute make serious effort to understand these problems, and to explore to the fullest extent possible the development of remedial devices available including improved techniques of helping the child to overcome his reading disability.

It should also be made clear at this point that many children for a variety of reasons, such as illness, suffer an interruption of the educational process between the ages of 6 and 12 or 15. We are completely ignorant of the effect of such interruptions upon the ability of the child later to resume his normal, formal education. We do not know, for example, whether it is psychologically possible for a 10 year old child who has never been to school to dedicate himself fully to the tasks involved in the first grade learning experience. We do not know whether educational deprivation leads to peer group rejection which appears to be associated with the early reading disability of children continuously in the educational system. It is my guess that the results are as severe for the deprived child as for the one who could not originally learn to read, perhaps more severe.

In other words, these children, those unable to learn to read and those deprived of education because of bad health and other factors really represent a population in great risk of emotional and social maldevelopment.

Within recent years, the advent of programmed learning techniques has indicated that these methods have great potentiality for overcoming early learning disabilities and probably for overcoming disabilities associated with interruption of education.

It is therefore proposed that this Institute negotiate a contract with a competent group to develop programmed learning materials that can be used in testing some of the hypothesis outlined above. If the child's development can be improved by helping achieve literacy at or near the appropriate age, or at the earliest opportunity that is made available to him, we may be able to do more to prevent personal tragedy and the unfavorable outcomes of early life experience.

The staff of the Institute has surveyed the individuals and organizations in this country best able to produce these materials which could open a new chapter in preventing the development of emotional disorders. It is our considered conclusion that the Institute of Educational Research, Inc., in Washington, D. C. under the leadership of Dr. Myron Woolman is the best equipped of any available to produce these materials. It is proposed therefore, that a contract be negotiated with this organization as quickly as possible to permit it to proceed with the task. The estimate of costs at the moment are not precise, but it appears that the range will be from $55,000 to $100,000 to produce the materials of the kind needed. Presently, I strongly urge the larger amount since I feel the task ahead is a major one and that an adequate approach to the problems is a necessity. Given these materials, the Institute can plan a series of research approaches to the problems enumerated above with a high expectation that we can make a major contribution to some of the difficulties facing present day children and youth in terms of their emotional and social development. I strongly urge that you approve this proposal to enter into immediate negotiations with the Institute of Educational Research, Inc., in Washington, D. C., for the purposes here outlined.

Joseph M. Bobbitt, Ph.D.

September 14, 1964

MEMORANDUM

TO: Dr. Carl F. Hansen, Superintendent of Schools

FROM: Anne W. Pitts, Reading Coordinator, District Junior High Schools
Frances C. Payne, Chairman, Basic Track, Macfarland Junior High School

SUBJECT: Report on "The Effectiveness of Programmed Instruction: An Adaptation of the Progressive Choice Reading Method."

In our recent study the data on 66 children from Basic Track classes in four representative junior high schools* made it evident that no real progress occurs using a conventional approach - the gain over twenty-three months for these children amounted to five months. This emphasizes the fact that under-achieving students, as you have stated, tend to continue to reduce in achievement level.

In this study results for students in the Progressive Choice program were highly encouraging.

1. Educable mentally retarded junior high school children (Mean IQ - 76) in Basal Progressive Choice and Accelerated Progressive Choice over a nine month period make a year and seven months gain.

2. Junior high school children considered typical under-achieving normals (Mean IQ - 95) gained a year and six months over a single summer period providing forty-five hours of instruction.

3. All children showed remarkable involvement in the program as attested by their comments, attendance, and completion of the entire six week summer program. Not one student dropped out. The most significant aspect of this finding relates to the Macfarland students who did not live in or near Garnet area and, therefore, were required to pay carfare every day for six weeks. Attendance was excellent.

---

*Paul - 8[303] ; Woodson - 8[201] and 8[203] ; Evans - 8[9] ; Macfarland - 8[11] .

THE NEXT STEP: We feel that Washington, D. C. could be the first system to put the Accelerated Progressive Choice Program to a large scale experimental test. This could be a part of the wide-scale experimentation planned for the model school system. If this were done, we are both convinced that the probability is high that Washington, D. C. will be the leader in pointing the way out of our present literacy crisis.

* Trainee attempted to take SAT pre–test but could not write name or begin responses to items and was terribly anxious in a test situation.

1. Scores show Reading Achievement Grade Level.
2. Scores show number of correct items on test.
3. Scores show IQ points on group test: Other trainees given SRA Non–Verbal Form Pre–Test, Post–Test not yet completed.
4. Scores show counselor ratings on Social Effectiveness Evaluation Form.

# Appendix B

STATEMENT SUBMITTED TO THE SENATE COMMITTEE

on

LABOR AND PUBLIC WELFARE

INSTITUTE OF EDUCATIONAL RESEARCH, INC.,
*Washington, D.C., March 8, 1963.*

Subject: Statement regarding bill on S. 1, Youth Employment Act, submitted to the Senate Committee on Labor and Public Welfare by the Institute of Educational Research, Inc., and the Occupational Training Center.

Mr. EDWARD FRIEDMAN,
*Counsel, Senate Committee on Labor and Public Welfare, U.S. Senate, Washington, D.C.*

DEAR MR. FRIEDMAN: Pursuant to our conversations of recent weeks, the undersigned are submitting herein a statement regarding bill S. 1, the Youth Employment Act.

The proposed Youth Employment Act has been analyzed and reviewed by the undersigned. We are in full agreement with its purposes and goals and consider that it could offer a powerful instrument for providing many young men with their only chance to become productive members of our society. The alternative to education and training will often be the greater cost of relief, institutionalization, and the transmission of squalor, crime, and dependency to the young.

In our judgment, the most important problem is to provide means to insure that these young men return to their home communities with greater employability than when they left. The development of modern job skills requires classification, specification of job training goals, efficient methods of training, and objective evaluation directed to continuous program improvement.

In addition, modern educational technology has advanced to the point where programed learning methods offer great advantages over conventional methods where large-scale training is required. The mass training demanded by the Youth Employment Act requires rapid and economical training and is ideally suited to these new methods. Appendix A ("Some Operational Recommendations") is an attempt to picture how these new methods could function to both simplify and accelerate this program.

Sincerely yours,

MYRON WOOLMAN, Ph. D.,
*Director, Institute of Educational Research, Inc.*
JEROME BERNSTEIN, M.A.,
*Director, Occupational Training Center.*

## APPENDIX A

### SOME OPERATIONAL RECOMMENDATIONS FOR S. 1 YOUTH EMPLOYMENT ACT

The following points have been discussed at some length with various specialists in the field of education with special emphasis on the use of new methods in development of literacy and job skills. The following individuals represent a cross section of those with whom this general problem area has been discussed:

Dr. Edward Brice, Director, Adult Education, Office of Education, Department of Health, Education, and Welfare; Mr. Raymond Larsen, Assistant to the Director, Automation and Manpower, Department of Labor; Dr. Harold Hildreth, Office of Program Development, National Institute of Mental Health; and Dr. Donald Stedman, Director of Research, Joseph P. Kennedy, Jr., Foundation.

1. Training methods should be economical, flexible, and provide for different rates of growth of proficiency, skill development, and understanding. Present classroom methods of vocational training tend to be inefficient.

(*a*) They force all students to move at relatively similar rates of speed.

(*b*) They require extensive physical plants, large numbers of trained instructors and large masses of specialized equipment.

(*c*) Teaching effectiveness of instructors varies widely, with many instructors having minimal instructor capabilities.

(*d*) Training is expensive, time consuming, and often limited to highly specific job skills which limit learner opportunity.

(*e*) Training tends to be artificial and reflects school methods rather than those in actual use.

(*f*) Industrial school methods tend to reflect industrial practices based on obsolete equipment.

2. The hard-core problem is one which focuses on men and women who have failed to obtain the necessary minimum of skills required for economic survival in technological age.

(*a*) The program should be directed to those persons who have been economically disenfranchised by reason of (1) literacy level, (2) dropouts from public school, (3) shifts in industrial characteristics of the community and (4) undertraining.

(*b*) Fundamental problems of motivation exist and methods must be incorporated into the training in order to overcome inertia and defeatism.

(*c*) The training must be designed to accommodate flexibly to persons of vastly differing intelligence, interests, and backgrounds; it must also be synchronous with existing and projected industrial requirements.

3. Programmatic training methods can provide mass training at relatively low cost. This training can be made practical, job related, and reflect current methods and practices. Programmatic methods can increase training efficiency by:

(*a*) Permitting enrollees to progress at their own rate based on experience, capacity, and motivation.

(*b*) Using nonprofessional teachers to provide instruction. This reduces costs and reduces the ratio of students to instructors.

(*c*) Training reflects actual practices; enrollees can be trained in the work setting. This reduces school cost while increasing the realism of the training provided.

(*d*) Training can be provided for:

(1) training of illiterates and functional illiterates in the development of reading skills necessary for job performance.

(2) training of job skills involving the use of names, procedures, and techniques.

(3) training for learning of concepts necessary for job performance (basic electricity, computer programing, drafting, etc.)

4. Enrollees should initially be evaluated with reference to their backgrounds, interests, and general level of capability. These factors should then be considered with relation to the job needs existing in the community to which the enrollee expects to return. The enrollee should then be assigned to a job area which—

(1) is expected to increase his employability on discharge, and

(2) is consistent with his own interests and capabilities as possible.

The enrollee should enter the program to achieve a job skill consistent with his general capabilities and existing job requirements. His work as a trainee should be systematically evaluated to determine the degree to which he progresses to the point of full employability on discharge. A quality control program should be performed by a nongovernmental agency.

The evaluation of programs under the Youth Employment Act should be objective, systematic, and thorough. The training methods, levels of proficiency attained by graduates, proportion of graduates employed, areas of skill deficiency in graduates, etc., should be made available to responsible Youth Conservation Corps personnel and other officials responsible for elimination of defects in the interest of systematic program improvement. It is necessary that these evaluations be performed by an objective nongovernmental agency to avoid confusing evaluation with justification of policy, or rationalizing the necessity for an existing state of affairs to avoid embarrassing a superior, etc., etc. Objective evaluation of the program should provide the basis for continuous program improvement and reduced program cost per enrollee.

5. All training should be directed to the enrollee's ultimate employment in his home community. During the period of enrollment the enrollee should learn a number of job tasks within a job area, such as carpentering. The enrollee must ultimately straddle the inner face between the Youth Conservation Corps and his ultimate responsibilities as a citizen. All training within the corps should be directed toward simplify this step across the inner face between these two discrete phases of the enrollee's career. Thus the Youth Conservation Corps objectives are specifiable in the requirement for simplifying this transition.

THE CENTER FOR VOCATIONAL TRAINING (PCVT)

The manor vehicle for carrying out the present plan is a facility designed to develop, test, and revise training programs. This facility, the Programmatic Center for Vocational Training (PCVT) would be responsible for:

1. Developing programs to produce reading skills.
2. Developing programs to produce academic certification (high school diploma).
3. Developing programs to produce job skills.
4. Developing methods of evaluating programs and enrollees.
5. Developing methods for overall program evaluation.

(*a*) *Level I, basic reading level.*—Illiterate persons can be taught to read by means of programs. The content should be related to adult interests and is focused on developing job-related reading skills. Enrollee change in reading skills will be evaluated frequently by methods intrinsic to the reading program. Various motivational devices would then be used to develop and maintain a reasonable rate of progress. Basic reading level materials will be written for adults. Enrollees will remain in the program until they attain approximately a fourth-grade reading level which it is estimated should require approximately 3 months for normally motivated learners. At this point, these enrollees become functionally literate and proceed to level II where reading skills function to increase their rate of progress toward developing job proficiency.

(*b*) *Level II, elementary vocational training.*—Reading: Low-skilled readers will be phased into vocational areas which require learning of (1) names of job-related objects, (2) job-rated actions and behaviors, and (3) critical supervisory worker relationships.

The reading materials in level II require the enrollee to master such materials as:

(1) The most important 100 terms (realistically and concretely defined) in the particular trade he is studying.

(2) Typical pieces of equipment, pictured and described along with functions and critical terminology.

(3) The steps involved in the process of manufacture (nontechnical presentation) of typical items produced in the trade.

(4) The typical supervisory structures which he would most likely find in the job situation along with titles, responsibilities, and critical aspects of various job descriptions.

(*c*) *Level III, operational context training.*—After the enrollee has mastered the basic terms and relationships involved in a job area such as fire protection, construction worker, carpenter, etc., steps should be taken to have him function in the more specific context. Enrollees would work in their job work situations for a minimum of 5 to 6 hours a day when they satisfied the level III criteria. For the remaining hours of each day they would (1) perform calisthenics and competitive sports, (2) work in other job areas, (3) discuss job-related problems such as how to get along on the job, and (4) contact home community for job opportunities, etc. In the work situation itself, trainees would be assigned to already skilled persons (two trainees to one skilled person). The skills they learn are specific to the needs of current industrial production methods. The object of the vocational training would be to assure enrollees at least a level II achievement (familiarization with names, objects, functions, and supervisory structures characteristic of a semiskilled vocational area). Men who attained level II or level III could be given certificates establishing the fact which could be used by USES to certify competency in the job area; they would also receive emphasis by USES for job placement. Where the evaluation indicated competency, efforts would be made to (1) obtain jobs in adjoining

job and geographic areas, or (2) extend the training to a related job skill to provide a dual jobholding capability, or (3) increase the depth of training in the area by additional programs with greater technical and informational scope. This would provide the enrollee with a specialized high-strength area within the job area as a whole.

(*d*) *Level IV, technical skill programs.*—Reading skills represent a necessary but not a sufficient ground for employment. Men who possess adequate reading skills may be unemployable for many reasons such as:

(1) Lack of specific area of specialized knowledge and/or skills.

(2) Possession of archaic and/or obsolete skills with lack of opportunity to learn new skills.

(3) Lack of motivation for seeking employment; feelings of apprehension and general uncertainty.

(4) Inability to cope with other workers and/or supervisors in the job environment.

Thus, there are large numbers of youth who possess the basic level of literacy necessary to absorb information rapidly who nevertheless remain unemployed because of factors related to training, personality, geography, and our rapidly changing technology. We can make rapid attack in these areas as the necessary reading skills would already be available; the enrollee can move into higher level technical training which takes advantage of his existing higher literacy level.

The basic area of emphasis in these programs should be related to the ever-increasing requirement for technologists. However, clearly, those who can learn technical materials can learn level II and level III materials and could be assigned to these training areas where appropriate. The effort, however, should be (within limits) to provide opportunities for learning consistent with learner capability. Several illustrative level IV type programs follow:

TECHNICAL ELECTRICITY

A series of programs would be developed to provide understanding and skills in areas requiring comprehension of practical electrical concepts necessary for skills in both title I and title II of this act. This training would be functional in both rural and urban areas, as modern industry on the farm, the field, and in the city is largely powered by electricity. These fundamental concepts are basic to modern technology at every level and should therefore be an important training area for the Youth Conservation Corps.

*Program A, basic electricity.*—This program would be modeled on program developed for industry. Certain features would differ: (*a*) it would be more concrete and provide more work-related illustrations; (*b*) certain areas would be eliminated as they are specific to the company rather than job relevant; (*c*) certain pedagogical changes would be made to reduce time and improve comprehension. However, the program would still provide (1) progress based on demonstrated proficiency, (2) continuous evaluation, (3) internal motivational devices, (4) continuing evaluation of performance, and (5) features to provide continuing revision and improvement.

*Program B, basic electronics.*—This program would be an extension of electronics (involving diodes, triodes) of program A and would be available only to students who satisfactorily completed program A.

*Program C, basic transistors.*—This program would involve recent changes in basic theroy connected with solid-state physics (transistors and dielectrics) which would make the trainee conversant with terminology, basic concepts, circuitry, and computations.

In programs A, B, and C, the learners would be required to work on actual materials as well as perform the abstract manipulations involved in the formulas and definitions. These materials should be economical, specially designed to illustrate the points covered in the course, should be sturdy enough to take continued abuse, should be reusable, and above all, should be typical of job-related skills in the field.

The use of programatic methods should permit very rapid training. It is estimated that literate motivated trainees could complete the three programs within a 6-month period. On completion, they should be familiar with current electrical concepts, basic computations, and useful methods for adjusting and correcting typical malfunctions.

Some areas would tend to emphasize program A only; some programs A and B; in some areas it might be necessary to provide all three levels to a large proportion of trainees. The employment situation in the home community must, of course, contribute to the training which would be given.

### COMPUTER INFORMATION AND SKILLS

*Program D.*—This program would provide basic information relating to the function of computers, including the rudiments of computer logic and an overview of computer programing methods and techniques.

*Program E.*—This program would provide computer information relative to computer board-diagrams, board-wiring techniques and associated technical language, definitions, etc. Programs A, B, and C could be presented also where appropriate and necessary for enriching computer training.

### KEYBOARD AND KEYBOARD-RELATED SKILLS

*Program F.*—This is a programatic method for teaching typing based on the use of a machine developed to teach typing skills programatically. This method should be rapid, economical, and self-pacing. Equipment is now being patented and should be available shortly.

*Program G, stenographic and shorthand programs.*—These materials are readily programed and could be taught with very few instructors through tape-recording techniques synchronized with written programs. Monitors could be used to insure proper operation of the equipment, standardization of testing procedures, classroom attendance, etc.

*Program H.*—This is training in areas such as IBM key punch, typing and coding, use in accounting machines, desk computers, etc.; can also be accomplished programatically. Cooperating of manufacturers in this area of the enterprise should be sought to reduce costs of equipment and to obtain resource personnel. However, the methods used for training should be developed rather than adapted from current techniques as training methods in these areas tend to be overly elaborate, very sketchy, or sales related.

### SUMMARY

The PCVT would of course provide an ever-expanding and ever-changing body of programs. Each of these programs would be continuously tested and revised. New programs would emerge and old programs dissipate in response to changes in the job requirements through continuous evaluation of the programs and the enrollees in their home communities. The programs would evolve in the direction of increased efficiency.

Programed method is economical, direct, and suited to large-scale mass training of the type required by this act.

MYRON WOOLMAN, Ph.D.,
*Director, Institute of Educational Research, Inc.*

## The First Federal Failure in Prince Edward County

by Ben A. Franklin and Stanley Meisler

# The First Federal Failure in Prince Edward County

by Ben A. Franklin and Stanley Meisler

Literacy brings jobs, jobs bring rights. That formula fits snugly into the Kennedy Administration's thinking about the plight of the Negro in America. "There is little value in a Negro's obtaining the right to be admitted to hotels and restaurants if he has no cash in his pocket and no job," The President said in his last civil rights message to Congress. "...A distressing number of unemployed Negroes are illiterate and unskilled,... unable to do simple computations or even to read a help-wanted advertisement." Yet, on the very day that these words filled the front pages of newspapers across the country, a decision was reached in Washington that strangled what some officials believe was one of the Administration's most exciting and promising projects to create literacy and jobs and rights. The brief life and quick death of the project is a case study of federal frustration in the field of civil rights.

The case study centers on a federal plan to do something about the 1,500 Negro children deprived of schooling in southside Virginia's Prince Edward County since 1959. That year the county's Board of Supervision, faced with a court order to desegregate its schools, decided to abolish them instead. A private school, paid for by state tuition grants, was set up for the white children, but the Negro children were left unschooled and illiterate. This action was upheld by the U.S. Circuit Count of Appeals in Richmond last August 12.

The lush, green tobacco country of Prince Edward County has become the shameful and pitiable symbol of successful Southern resistance to school integration. There are 10-year-old Negro children there who never have seen the inside of a classroom. There are Negro teen-agers who soon will be too old to leave their farms and enter a school again. Prince Edward County gnaws on the conscience of America.

In the legal wrangling over Prince Edward's abolition of the public schools, the federal government has fought at the side of the National Association for the Advancement of Colored People. The Justice Department has intervened in the case, asking for the opening of public schools, and it will join with the NAACP in appealing the latest decision of the Court of Appeals to the Supreme Court. But last February, President Kennedy decided far more must be done.

He and his aides were discussing the final draft of his first civil rights message to Congress when he came across a paragraph mentioning the Justice Department's intervention in the court suit. As the conference broke up, Kennedy beckoned to Burke Marshall, the Assistant Attorney General who heads the civil rights division at the Justice Department. Isn't there something else, the President asked, something direct, that the federal government can do in Prince Edward County?

Kennedy did not want a federal school system there --- almost any kind would provoke a storm in Congress. But he wanted some system of making up for lost years. He wanted a remedial instruction program that could go on even if the courts ordered the county to open its schools again. Kennedy appointed Marshall a committee of one to brainstorm the government and come up with ideas.

One memorandum, circulated among the agencies of the Health, Education and Welfare Department, explained, "The President said he did not want anything negative, only positive statements as to what can be done --- so long as it is remotely possible and legal." The memorandum said Kennedy was interested in ideas "no matter how far out they may seem. No deadline has been set," it continued, "but considering the source of the request, consider it URGENT." Similar circulars went through other departments.

The ideas flowed in. One government office suggested taking the county over as an army base and running a remedial school system for the Negro children on the post. Another proposal: build a television transmittor 80 miles south in the mountains of North Carolina and beam in a special intensified educational TV program, a sort of Radio Free Edward. The White House discarded these ideas as ingenious but impractical.

But a little more than two weeks after the White House meeting, an idea came in that seemed both ingenious and practical. Dr. Robert H. Felix, director of the Public Health Service's National Institute of Mental Health, put it forward. He proposed a federal grant to a research psychologist working with a quick, new method of teaching reading. The researcher would use the Negro children of Prince Edward County as his subjects. The grant could serve science and conscience at the same time.

Felix had Dr Myron Woolman in mind. Woolman, 46 year-old director of the Institute of Educational Research in Washington, is a pioneer in the use of programmed instruction for quick, mass and inexpensive education. He had demonstrated his methods in teaching soldiers to operate Nike missiles and in teaching basic concepts of electronics to new employees of Bell Telephone Laboratories. He is patenting a teaching machine for typists and pianists. And, for some time, he has been using a grant from the NIMH to teach mentally retarded children to read. His subjects in this project include pupils at the Joseph P. Kennedy Foundation School in

Washington, a school visited often by Mrs. Eunice Shriver, the President's sister.

Woolman's theories are couched in complex psychological concepts, but basically he simply believes that quick breakthroughs in education may be achieved by using programmed instruction. Programmed instruction takes the pupil out of the classroom-lecture situation and puts him in front of a workbook or a teaching machine that allows him to move forward at his own pace. He may not turn the page or flick the machine forward until he has mastered the lesson before him. When he understands point A, he is rewarded by seeing point B. Programmed instruction still is in its infancy, but, at the least, it seems to be successful in teaching the rudiments of reading, spelling, and arithmetic and in teaching a specific skill that must be learned by many students in a short time. In a society unwilling or unable to spend too much more money on education, programmed instruction has the advantage of seeming relatively inexpensive. A psychologist prepares the intricate program in the workbook or teaching machine; the program may be mass produced; an untrained person may be hired to supervise the students at the workbooks and machines. (see Spencer Klaw's "What Can We Learn From the Teaching Machines?", The Reporter, July 19, 1962)

On March 11, NIMH rushed an urgent invitation to Dr. Woolman to submit an application for a grant. In four days, he submitted a 26-page proposal. Woolman proposed a $2,500,000, 5-year exper-

iment, using his "progressive choice reading program" to teach 500 Negro illiterates in the first year. Although the proposal focused on the illiterates of Prince Edward County, Woolman actually was anxious to demonstrate that his method of programmed instruction could be used to raise the level of the hundreds of thousands, perhaps millions, of Negroes and others throughout the nation who need literacy and basic work skills. Just a few days before he submitted his proposal, Woolman had sent a statement to the Senate Labor and Public Welfare Committee on the Youth Employment Act. Woolman wrote the committee that programmed instruction could raise motivated illiterates to a fourth-grade reading level in three months in a concentrated program and that these new literates could ultimately learn basic electricity, electronics, and transistor. "Programmed method is economical, direct, and suited to large-scale mass training of the type required by this act, " Woolman said.

But the psychologist made no attempt to make this clear to the White House. He understood that his research was being used to fill a political need but had organized it to remain clear of political influences. Scientists face this kind of situation all the time in a nation where so much research is paid for by private industries and the Pentagon. Woolman has worked for both. "It is... quite possible, " he wrote in his proposal, "that the proposed project will be viewed as a disguised method of providing federal schools for Negro children..." Yet he sold his idea in just those terms that would appeal to the White House: an experiment designed to solve illiteracy in Prince Edward County. The fact that this would provide other

communities with the same capability was left to the reader.

At the same time, he felt that the psychiatrists, psychologists and other social scientists at NIMH would see a limited experiment as far more scientific than one attempting to deal with the problem of Negro job skills in America. This, too, made his stress the limited picture. Despite this, Woolman believed he had a scientific experiment that might yield results brimming with sensational implications for a government trying to deal with widespread Negro unemployment and anger.

NIMH Director Felix sent a memo to his boss, James M. Quigley, Assistant Secretary of Health, Education and Welfare. "The National Institute of Mental Health," Felix wrote, "is happy to propose at this time one step that might be taken to overcome some of the effects of the educational deprivation which has occurred in the last few years in Prince Edward County. Basically, the proposal is to conduct a study in the county of a greatly improved method of teaching reading which has already been developed, partly through support of an NIMH grant." Felix wrote that Woolman's programmed methods "could conceivably overcome" illiteracy in the county and "would be a perfectly legitimate research activity." He added that the research would have "considerable significance in the field of mental health, since non-reading is related to anti-social behavior and delinquency and since severe frustration phenomena during the middle years of childhood is known to occur upon the part of non-readers."

Felix obviously was enthusiastic. The enthusiasm soon caught Quigley, Commissioner of Education Francis Keppel, Burke Marshall, Attorney General Robert F. Kennedy, and the President. Woolman's project wouldn't solve the whole Prince Edward County problem, they believed, but it might help a large part of the Negro children catch up. On April 18, a Special Review Committee of eminent psychiatrists and psychologists and specialists from other related disciplines descended on Woolman's cluttered office in an old row house on the edge of Georgetown and grilled him for more than an hour. They discussed the project for almost three hours and then voted unanimously to recommend an NIMH grant to Woolman.

Eight days later, under pressure from Quigley, Felix mailed ballots to the 12 members of the National Advisory Mental Health Council, the group that has the final say about disbursing NIMH's $100,000,000 research fund each year. The Council was not scheduled to meet until June 20, too late to get Woolman and his proposed 21-man crew started during the summer. The ballots came in during May. Ten approved Woolman's project, one voted against it, and the twelfth member abstained.

On may 24, NIMH told Woolman to go ahead, hire his staff, and prepare to start work in Prince Edward County by August 1, But the final authorization letter from NIMH still was not in his hands. In early June, newspapers begain printing reports about Woolman's project, and a reaction quickly set in. It had a southern accent.

First, Senator Lister Hill, D-Ala., made a polite phone call to NIMH. Hill is chairman of both the Senate Labor and Public Welfare Committee and the Senate Appropriations Subcommittee on Health, and his generosity to medical research over the years has given him a paternal though near absolute influence over the National Institutes of Health. Hill did not say he objected to the project. He simply asked for information.

The evident objection came instead from Herman E. Downey, the flinty Tennessean who is staff director of Hill's appropriations subcommittee. Downey read the news accounts, immediately asked NIMH for the records, and then described the project as "a prostitution of medical research."

The seeming displeasure of the subcommitte that feeds money to the National Institutes of Health began to worry officials of the Department of Health, Education and Welfare. The enthusiasm of some officials began to wane. They also started to look nervously toward another southerner, Rep. L. H. Fountain, chairman of the House Subcommittee on Intergovernmental Operations. Fountain is preparing to hold hearings on how NIH grants funds to researchers. Ironically, Fountain never did make a query about the Woolman project. His staff, in fact, is first looking into the situation now. But the shadow of Fountain and his forthcoming hearings loomed large enough to shake some of the convictions in HEW.

The unease showed quickly. On June 6, just after the first news accounts appeared, one of Felix's staff members, was briefing a group of federal officials and Prince Edward County residents on the mechanics of Woolman's project. Then a messenger handed him a memo from Felix. It said that the office of Secretary of Health, Education and Welfare, Anthony Celebreeze, had ordered NIMH to hold back the project, at least until Congress adjourned for the year. Celebreeze's information officer, Harold Levy, has since denied that the Secretary himself issued the order. But, whoever was responsible, the order seemed to have Celebreeze working at cross purposes from the White House.

Some days later Mike Gorman, a member of the Advisory Council who had voted for Woolman's project, wrote a formal request for full reconsideration of the mail balloting. Gorman, a veteran of appropiration battling on mental health, is head of the National Committee Against Mental Illness. For years, he has been publicizing the crisis in mental health and promoting appropriations and donations of funds to meet it. The work has made him an intimate of the congressman who appropirate funds for mental health.

The Council met for its regular June 20 session in a conference room in "The Stone House," an aging cottage on the campus of NIH in Bethesda, Md. Ironically, it was the day after President Kennedy sent his last civil rights message to Congress, a message calling for the most sweeping civil rights bill since Reconstruction Days. The psychiatrists, psychologists and social scientists on the Council clearly had changed their earlier views.

It would be wrong, however, to assume that this change came only under the pressure of southern congressmen. Part of the change could be attributed to a growing resentment among the members toward another kind of pressure. Many of the Council members felt they had voted for Woolman's project originally under political pressure from the White House.

"We're a bunch of liberals, said one member. "We were for this thing as citizens. As scientists, we were not." There seemed to be a growing number of questions as to the strict scientific validity of the project. At the meeting, Gorman lashed a scathing attack against it. He said the project had been hastily and improperly drawn "under the gun" of the White House. He said it was not relevant to the mission of NIMH, and he expressed doubts about Woolman's experience and qualifications to run it. Two other members spoke out and supported Gorman. No one mentioned the appropriations subcommittee, but the name of Fountain was brought up. Oddly, in view of the earlier, almost breathless enthusiasm, no one from NIMH arose to defend Woolman

and the project. The Council, which had voted 10 to one with one abstention for the project by mail, decided to vote unanimously against in in person. Woolman and his programmed instruction would not be used in Prince Edward County.

"It's true that we were vulnerable," said a Kennedy Administration official who followed the episode closely, "and that makes it hard to argue with the contention that our scheme was non-scientific. But I think the moral of this mess is that some people, when the chips are down, have a greater loyalty to the appropriations committees than they do to the President of the United States." The moral of this mess, however, actually may be somewhat more complicated.

For one thing, the White House, while worrying about Prince Edward County, failed to see any of the broader implications of Woolman's research. No attempt was made to push the project as a real experiment that might help the problem of Negro unemployment throughout the nation. The White House saw the project as a disguised way of helping the county and pressured for it on these grounds. In doing so, the White House feel into a trap and found itself defeated by science, not segregation. This criticism, of course, is easy to make with hindsight. Woolman and NIMH actually sold the project as a cure for Prince Edward County. That's all the White House was looking for, and its search was sincere and commendable. It may be unfair --- though accurate --- to accuse the White House of not seeing the forest for the trees. At the

same time, it would seem that the White House was just as guilty as HEW in backing away from congressional pressure. The incident, at the least, shows a lack of coordination between the White House and Celebreeze.

One of the most troublesome questions is whether the episode actually resulted in setting back the whole cause of using programmed instruction to wipe out Negro illiteracy and unemployment. It is not easy to answer. Certainly the opportunity to demonstrate the method in a dramatic laboratory has been lost. But there still is some evidence that the publicity about the incident may have given programmed instruction a boost in some circles of the federal government.

The rejection of the project did not end the Administration's search for a way to help the Negroes in the county. In early August, William van den Heuvel, an assistant to Attorney General Kennedy, worked out a plan with Negro and Virginia officials for a privately-financed school system to open in Prince Edward County in September. Full details of the remedial program have not been announced, but the schools may be staffed with some psychologists. If so, a bit of programmed instruction surely may enter the curriculum.

Woolman does not believe he has suffered any crushing defeat. The Demonstration Review Panel of the President's Committee on Juvenile Delinquency has recommened that a grant be made to try out his methods with a few hundred children in the Washington school system. An expert in the programmed instruction field puts the Woolman situation this way: "He's probably a little punchy about what happened to him. But he really hasn't been hurt by it. His ideas have received a lot of exposure now. And he is a very talented fellow."

Nevertheless, the government has lost a unique chance to see if programmed instruction can be used to raise the work skills of culturally-deprived people. There are a few other experiments in progress. Woolman's work in the Washington schools will be one of them. Mobilization for Youth, another project of the President's Committee on Juvenile Delinquency, is using some programmed instruction in its project on the east side of Manhattan. Some work has been done in prisons and correctional institutions. A few other projects are ready to get going. But none have the advantage that Woolman would have had: a chance to work in the public spotlight with 500 Negro illiterates in one compact area.

All signs, however, show that federal job training has programmed instruction in its future, although officials don't see it as any panacea. Seymour Wolfbein, director of the Department of Labor's Office of Automation, Manpower and Training, says "We haven't used programmed instruction up to not, but we will very soon. There are oodles of companies in this field, and we

are asking HEW to check on them for us. I've been travelling about the country and looking at the material. Some of it looks pretty good. It looks like it can be used to raise the literacy and basic work skills of Negroes and others so they will be ready for technical training. Teachers are in such short supply that we have to look for something like this."

The need for these basic skills is increasing as the economy demands more and more skilled workers and the schools produce more and more dropouts. This foreshadows a mad, dangerous crisis of mass unemployment at the bottom of the economy and a critical need for skilled manpower at the top. "There are hundreds of thousands of Negroes without a fourth-grade education," Wolfbein says. "We find that we can't even train them to be gas station attendants. We worked with one company and found that 40 per cent of its business involved credit cards. Trainees have to know how to read and to add decimals. It takes more than just manning a pump. That's where programmed instruction could help, teaching the basic literacy and arithmetic."

These views are seconded by Dr. Hyman Frankel, the co-ordinator of training for the President's Committee on Juvenile Delinquency. "Unfortunately not much is being done right now," he says. "We really are at the very beginning. There has been a lot of thinking about programmed instruction. We don't believe it is the key to the problem of job skills, but it has tremendous possibilities. Of course, there has been a lot of resistance to it by traditional educators . But we are going to move with much more acceleration now."

The comments by Wolfbein and Frankel may be the key to the episode. No one knows whether programmed instruction really can do the job of uplifting the skills of illiterates. But its possibilities for literacy and job skills seem too attractive for the bureaucratic machinations over Woolman and Prince Edward County to hold it back very long, if at all.

Dr. Calvin E. Gross
Superintendent of Schools
110 Livingston Street
Brooklyn 1, New York

Dear Dr. Gross:

About two weeks ago Mr. Alan Cohen, Director of Reading for Mobilization for Youth, asked for my comments on Dr. Myron Woolman's Accelerated Progressive Choice literacy program. On November 2nd I wrote him at his request and am enclosing a copy of my letter because I thought you might find it of interest.

The Congress of Racial Equality feels a vital concern to become more involved in the problem of quality integrated education. My staff has investigated Dr. Woolman's approach and observed it in the field. We have been most impressed to say the least. There is a very good possibility that we may enter into a literacy program in the near future. Because we see Dr. Woolman's method as having particular appeal and relevancy within the Negro community, we are also interested in seeing Accelerated Progressive Choice used within school populations and by other organizations.

I understand that the New York City schools have investigated the use of this program. I am told that someone in your office has suggested that Dr. Woolman's material might be considered offensive to minority groups. I would certainly like to stress my belief that this is not the case.

At your convenience I believe it should be fruitful for us to sit down and discuss this matter further.

Sincerely yours,

James Farmer
National Director

Reverend William Stuart Nelson
Vice President
Howard University
Washington, D.C.

Dear Mr. Nelson:

It was indeed a pleasure to meet with you last week. Myron Woolman and I both thought that the session was challenging. I am extremely encouraged about the possibility of developing a viable reading program aimed at high school dropouts and other youth who have missed or been denied the opportunity of an adequate education.

It seems to me that the expanded idea of a center for research and educational action has great potential as well. We are currently working on a detailed proposal to submit to you and Dr. Habrit within a few weeks. Before the proposal is in its final form, I shall be in touch with you again.

Again, let me thank you for your kind attention and for your insight into the problems faced by CORE and the challenges presented by the undereducated and therefore unemployable youth of America.

Sincerely yours,

Gordon R. Carey
Assistant to the
National Director

Memorandum to
The President

Subject:

**A Plan of Action**

**For Remedial Education**

(A follow-up on my memorandum
of October 16, 1964.)

From James Farmer
November 21, 1964

In my previous memo to you (October 16, 1964) I suggested that CORE believes that it is possible, working with other organizations and private citizens, to provide literacy skills for a million Americans in an eighteen month period with an investment of $30,000,000. I stressed the fact that CORE is an organization of volunteers, who are accepted and trusted within the communities most in need. Further, I stated that it is possible to perform this task in whatever buildings and facilities are available, using non-teachers to instruct with the Accelerated Progressive Choice Reading Program, developed by Dr. Myron Woolman of the Institute of Educational Research in Washington.

The fact that millions of Americans see the fruits of our rich, productive society and yet cannot taste those fruits is a violation of the right of all citizens to equal opportunity. Moreover, these millions of economically and socially disfranchised Americans represent an unstable and potentially explosive force within our society. From the point of view of simple justice, economic growth, and social stability, we must attack this problem with all available resources. The social advances made possible by the Civil Rights Act and the promise in the Economic Opportunities Act are like a menu presented to long-hungry diners. These legislative acts must be followed by something tangible or the very hopes they raise will stimulate further disillusionment and resentment. The problem infects every American community and action must be taken wherever the problem exists.

In considering the issue, I am convinced that CORE has only begun to make its contribution. We must help the disadvantaged develop literacy and job skills and a concomitant confidence in their future as Americans.

I have a deep conviction that CORE must participate actively at the community level, lending support to these important programs as they begin to function within our deprived communities. The dropouts, illiterates and the unemployed cannot be helped by laws, buildings, money or good intentions. They distrust officials and schools, in whatever guise they appear, and they can only be brought into full and active participation in our society by people they trust using methods of training which are suited to their needs. Above all, there must be mutual confidence between the people who operate the programs and those to whom the training is given.

The prime fact of the war on poverty is that the trainee must not only enlist but actively participate if he is to learn. Learning, as you know, is a personal matter and requires both confidence in the teacher and a willingness to invest oneself in the process sufficiently to succeed. I am convinced that the next step is for organizations such as CORE to move forward into the national arena and if this important step is to succeed, to act as a catalyst for simplifying and accelerating the process of education and training.

Further, it is necessary for organizations such as CORE not only to participate in community education, but also to assist in developing the new educational methods and techniques required for community-action education, as contrasted with public education, which, to date, has been ineffective in coping with the problems rampant in our deprived communities.

While it is the responsibility of the schools to educate, it is our obligation to supplement that education where necessary and to reach those who have failed to respond to the schools. No one can reach the youth on the streets in quite the same manner as another youth or an adult who has come from the same background and environment. CORE feels strongly that the Negro protest organizations along with individual churches, local unions, social clubs and community groups have a unique role to play in motivating and educating those Americans who remain functionally illiterate. Our record shows that we have had astonishing success in motivating and training the very population that is most in need of inspiration, most in need of enrichment, most in need of literacy skills, most in need of jobs. We do not propose a program for non-whites alone. We propose to begin a campaign in which volunteers of all ages, backgrounds and races will be able to offer a unique learning experience to hundreds of thousands and even millions of disadvantaged and underprivileged persons.

We have in the field the structure for putting into effect a large scale literacy program. We have the methodology. With the proper funding we will be in a position to effect substantial literacy programs throughout the rural South and in hundreds of cities and towns. Through coordination of the efforts of private agencies and with the assistance of the federal government we believe we can make great strides toward the elimination of illiteracy in this great nation.

Our objective is to teach people to read and thus provide them with the underpinning required to go on to further educational and employment levels. But we have an even greater objective. Negroes and other members of depressed minority groups have been taught to reject their own potential. Those on the bottom have for their own self-protection become apathetic and lethargic: to try to advance is to be beaten down. Thus, millions of Americans have chosen to accept their inferior status. The militant civil rights campaigns of the past decade have awakened the sleeping aspirations of many of these sullen millions. For the first time we have brought the spark of

life into whole communities. While we have provided the awakening, we must now shift our programs so that we may provide the tools to translate these new-found aspirations into reality.

The ingredients necessary for the successful implementation of a literacy program which can provide reading skills and motivation for further growth are:

1. A population receptive to the idea of learning and self-advancement.

2. A technology which can provide the ability to advance reading skills at a substantial rate and which also has built-in self-motivating factors.

3. A large group of persons able to act as instructors.

4. A structure able to administer and supervise the program.

5. Community facilities available for implementing the program over a long period of time.

6. Funds.

## Population

There is no need to dwell on the need or the receptivity of a large population. The statistical evidence is overwhelming. This has also been dealt with here and in the earlier memorandum.

## Technology

The method developed by Dr. Myron Woolman appears to hold the best possibility for success. It is a programmed approach which has been designed for use by relatively untrained personnel. It incorporates the learning by teaching approach. The content of the reading material can be tailored to meet the peculiar requirements of the southern Negro child and adult, the ghettoized high school dropout or the Appalachian white, and it allows the student to advance as rapidly as his own capabilities permit. CORE has observed the method in operation in the field. Our staff was amazed at the interest, involvement, discipline

and motivation of both instructors and students.

Others who have studied Progressive Choice in practice attest to its striking ability to stimulate and hold the learner. Students almost unanimously ask to spend longer hours on the program than time permits. They take tremendous pride in their accomplishments and in their successes. We are thoroughly convinced that Accelerated Progressive Choice offers the best opportunity for non-teachers to reach and teach the educationally and socially deprived.

Instructors

Many volunteer Literacy Instructors will be drawn from the dropout or potential dropout population itself. Retired teachers, housewives, student volunteers, church members and workers can also become volunteer Literacy Instructors.

The initial cadre of instructors will come from the active membership of the Congress of Racial Equality, the National Association for the Advancement of Colored People, the Student Nonviolent Coordinating Committee, the Southern Christian Leadership Conference, and the churches. In many cases the instructors will recruit their own students. As students progress in the method they themselves will instruct others just entering the program. With CORE's extensive experience in the utilization of volunteers we will be able to recruit an ever-expanding number of instructors who will have wider and wider outreach.

We have observed student helpers on the junior high school level giving instruction in this method in a public school in North Carolina. It was startling to see that the student helpers were as effective in teaching as were the teachers. If 8th graders are able to teach reading to other 8th graders it becomes obvious that the number of potential teachers is limitless and that the demands of the Woolman method on the instructor do not preclude using youngsters themselves under supervision to teach others. A number of CORE chapters in New York are somewhat acquainted with the literacy program and many of our high school members have come to us asking when they can begin to implement the program in their schools and through their chapters. With the small amount of publicity there has been on the literacy program my office has been flooded with offers of professional assistance, with volunteers who want to become instructors and with inquiries from communities wanting to know when they can begin the program.

Structure

I propose that a Center for Research in Community-Action Education be established in an appropriate university setting. Preliminary discussions have already been carried on with two universities and this proposal has met with initial positive responses. The university would receive and account for funds from all sources, public and private. The Center's sole initial function would be to research, develop and execute the literacy program on a national scale. This aspect of the Center's work shall be referred to as Phase I.

The Center will require four operational arms: Research, Development, Planning and Community Action. Under Phase I the functions of these departments would be:

1 a. Research Arm: To develop theory and perform experimentation directed to improving the efficiency of the processes of human learning, with emphasis on narrowing the gap between human potential and performance.

2 b. Development Arm: To design and produce educational materials specific to the requirements for Community-Action Education Programs.

3 c. Planning Arm: To coordinate the professional, educational governmental, and organizational resources to facilitate work done in the field. Further it would operate as a resource for the other three arms in the Center.

4 d. The Community Action Arm: This arm would do the work of going out into the communities to carry out the plan of action and use the materials developed through the research and development arms. It would also evaluate and make recommendations for change in the methods of implementation employed by the cooperating agencies.

I further propose, however, that the scope of the University Center eventually be expanded into Phase II. In this second phase the Center should broaden its program to include all aspects of quality, integrated education. For example, Phase II should be concerned with sharply reducing the proportion of dropouts and increasing the ability of students to learn.

The functions of the four departments under Phase II would be expanded to include the following:

1 a. Research Arm: Research in the whole area of school integration, and other research appropriate to developing quality education within the public schools.

2 b. Development Arm: Development of proposals at the request of school systems and local organizations for achievment of quality, integrated education, and development of materials and textbooks toward this end.

3 c. Planning Arm: Communication and coordination of the work being done by community action groups, boards of education, governmental agencies, and various experimental projects. Planning and expediting the transition from community-action education to public school education inasmuch as the success of Phase II will progressively render Phase I unnecessary.

4 d. Community Action Arm: Act in a consultative capacity to school boards, school supervisors and community groups to assist in the solution of educational and training problems arising from intergroup tensions or desegregation.

It should be pointed out that the expanded scope (Phase II) of the Center is independent of and not a requisite for the national reading program (Phase I). A financial commitment to Phase I implies no such commitment or endorsement of the projected second phase.

Community Facilities

In addition to the University Center which would serve as the research, administrative, and supervisory headquarters for the literacy development program, certain community resources will be required. It has been indicated that the body of instructors will be a prime resource provided by the community. Places in which to teach also will be necessary. Church basements, lodges, clubrooms, union halls, plant facilities and community centers will be ideal. In fact, the logic of the program indicates that the more the quarters are unlike a typical school setting, the better.

Funds

The educational crisis facing America requires a massive effort on the part of volunteer agencies. Only the federal government can support such an effort on the scale which is imperative. However, on a large scale the average cost of developing an eighth grade reading level in students beginning near point zero can be less than $50. This low cost will be possible due to the use of volunteer instructors and free facilities.

In most cases the cost to a community or agency desiring to undertake the literacy program should consist solely of the investment of time and energy. The materials, research and supervisory staff would be paid for by the funds made available by the federal government. I am in the process of preparing a budget which will be available shortly.

THE PROGRAM OF ACTION

I would suggest that we begin implementation of the literacy program in Philadelphia or Washington, D.C. We should move next to Pittsburgh and New York City. After that we should expand into the South and as rapidly as possible spread to cities across the nation.

At the beginning we would use the network of CORE chapters, NAACP, Urban League, SNCC and SCLC units and Freedom Schools, which already have expressed an interest in the project, as the nucleus for implementation. These groups are uniquely equipped to move into this type of community program rapidly and effectively and without necessitating new and elaborate community machinery. But we shall by no means limit participation to civil rights organizations. Already, one of America's major industries has approached CORE about the possibilities of putting the reading method into effect among the workers in its plants.

The Center at the outset will develop facilities to train Literacy Instructors both on its own premises and in the field. In any given city we would start with a cadre of between twenty and fifty Literacy Instructor Trainees. They can be trained as Literacy Instructors in from twenty-five to forty hours of instruction, depending upon the number of hours they have available and on their own motivational and educational level. At the end of their training period they will be fully equipped to: 1) instruct in the Accelerated Progressive Choice method, 2) recruit their own students, 3) secure their own facilities in which to carry on their instruction if necessary, and 4) maintain all appropriate records.

As Literacy Instructors they will work largely within their own neighborhoods with students of compatible backgrounds with whom they readily can establish rapport. Each Instructor will be able to teach up to twelve persons in a group. Depending upon their initial level the students can become student-Instructors within a period of 30 to 150 hours of instruction and many of them are expected, at the end of 250 to 300 hours of instruction, to be fully qualified as literacy instructors without having gone through cadre training.

The Community Action arm of the University Center will also develop a large staff of Community Reading Program Consultants whose function will be to investigate, develop and supervise new agencies which can serve as fruitful local instruments for this aspect of the War Against Poverty. Working under the Program Consultants will be teams of paid staff members drawn from the ranks of the Literacy Instructors, who will check on each local Instructor and provide him with methods for continually improving his effectiveness.

Coordinated and planned from the Center, largely utilizing the already existing structures of national and regional organizations, and drawing upon local initiative, the nation-wide literacy program can be functional in a surprisingly short period of time and with an extremely low per capita expense.

I believe that this welding of research, development, and planning to community action represents a major new force in the War Against Poverty and the struggle for equality in our nation. This program is, as you know, very much a part of my deepest convictions and I would participate personally and actively in the Center to insure its viability. I intend to seek, and am confident of gaining, the support of all civil rights groups, as well as unions, churches, the business community, and the general public in this task.

Within the framework of a Research Center such as the one outlined, a target on the order of one million literacy trainees appears both practical and feasible. This Center is a vehicle which has not existed to this time, because there was no public requirement to combine research, development and community action. Now, it seems to me, it is a necessary development to help insure the success of the War on Poverty. It utilizes many forces and combines them into a synchronous and functional system.

This new kind of war demands its own special weapons. The Center for Research in Community-Action Education will be a vital addition to our nation's arsenal in prosecuting this war - against poverty and for social justice.

Dr. Thomas J. Edwards
Science Research Associates
295 East Erie Street
Chicago, Illinois

Dear Bud:

I thought that your participation and that of Lyle Spencer constituted a splendid addition to the Howard University meeting. It appears that we have in the making a beautiful relationship with the University. I am terribly glad that you suggested that Spencer be invited.

As I indicated iin my letter to Lyle, I would hope to keep in close touch with you. If you are in the city, please be sure to see me and at any rate, I will keep you informed of development as they occur.

Best wishes,

Gordon R. Carey
Assistant to the
National Director

Dr. Lyle Spencer
Science Research Associates
295 East Erie Street
Chicago, Illinois

Dear Lyle:

Let me extend my most sincere thanks for your participation in Washington on December 9. I though that the meeting was tremendously successful and Jim, Mike and I are most encouraged. Your contact with Keppel was most important and most heartening.

This week I will begin on the memorandum which will form the basis for our meeting with Shriver. I believe that your participation in that meeting could be most helpful. As soon as I get fairly well along with the draft of this document, I will be in touch with you again. In the meantime I will keep in close contact with Bud Edwards.

Let me also thank you for your offer to help with the expenses involved in having the potential literacy instructors from Chicago trained in New York.

It was indeed a pleasure meeting you and I trust that we shall be seeing a great deal of one another in the future.

Sincerely yours,

Gordon R. Carey
Assistant to the
National Director

Dr. James Nabrit
President
Howard University
Washington, D.C.

Dear Dr. Nabrit:

Jim Farmer has asked me to express CORE's appreciation for the fruitful meeting at Howard University on December 9. We left the University with a deeper conviction and a great deal of optimism. Your insight, your suggestions and your extremely competent handling of the meeting have been of inestimable value in charting the course toward our goal.

Especially helpful were your suggestions for tying in the reading program with the Peace Corp and your challenge to expand the scope of the program to include vocabulary expansion, verbalization and math.

I shall be in touch with Vice President Nelson shortly in regard to further plans. We look forward to a continuing and most helpful relationship with the University.

Sincerely yours,

Gordon R. Carey
Assistant to the
National Director

14 December 1964

Dr. Wm. Stuart Nelson
Vice President
Howard University

Dear Stuart Nelson:

I am enclosing a copy of my letter to President Mabrit. We at CORE felt that the meeting was extremely productive and that firm goundwork for our future relationship was laid.

I will be in the process shortly of preparing a much more detailed report to be submitted to Sargent Shriver. When I have this document prepared in its rough form, I will be in touch with you.

Without your kind assistance and cooperation, we could not have progressed as we have. The kinds of ideas and suggestions made by you and Dr. Mabrit were precisely what we needed to help clarify our ideas.

Sincerely yours,

Gordon R. Carey
Assistant to the
National Director

Domingo Carino

Why I would like to help.

I believe I would like to help, just for the satisfaction of knowing that I have helped someone

It is a great pleasure to know that you have helped your fellow man to make a better life for himself

I know this sounds like I just want glory, but this is not true, I just want to help my peers.

December 21, 1964

Miss Frances Covington
936 Fulton Street
Brooklyn, New York

Dear Miss Covington:

Just a note to let you know how pleased I am with the way the meeting went on Saturday and the enthusiasm and dedication shown by all of you. You were terrific.

Now I hope you will be instrumental in getting you chapter started on the Literacy program. To make this program a success we will need total committments on the part of all those involved.

As soon as you have recruited a sufficient number of students, please get in touch with Mr. James T. McCain, Director of Organization, CORE 38 Park Row.

Sincerely yours,

Gordon R. Carey
Assistant to the
National Director

21 December 1964

Mr. Sargent Shriver
Director of Economic Opportunity
Washington, D.C.

Dear Mr. Shriver:

Some weeks ago I took the liberty of sending to your office copies of some preliminary proposals which were submitted to the President at his request. Shortly after the first of the year I will have a more complete and detailed proposal available.

As soon as the proposal is completed, it will be submitted to your by my assistant, Gordon Carey. I hope that you will be able to meet with Mr. Carey in regard to this proposal as I will be in Africa until the end of January.

Our proposal for a national literacy program is not a proposal to be implemented by CORE. We have already talked with Howard University about the establishment of a Center for Research in Community-Action Education. When the Center is established, its services will be available to any community or organization in the United States.

We in CORE believe that the civil rights agencies have a unique opportunity to help in developing the basic educational skills which must constitute an essential part of the Poverty War. CORE is already beginning a pilot project in New York City. I have also discussed my proposal with Whitney Young, who responded with enthusiasm. I will be meeting with Mr. Wilkins shortly. We have also been in touch with labor unions, businesses and other community groups who have expressed an interest in the problem.

I am enclosing copies of the two memoranda which I sent to Mr. Johnson. CORE looks forward to its involvement in this next phase in the struggle for equality with a great deal of excitement and challenge. We are elated that the federal government, under your leadership, has so boldly moved into this attack on the roots of poverty and despair.

Sincerely yours,

James Farmer
National Director

# BUDGETARY ESTIMATE

1. The base cost of the project per month will be calculated at $15,000 for a 375-unit learner load or $40.00 per student at this base level. Due to previous commitments, only 67% of planned IER personnel will be able to be activated for the CORE project during the first month. Therefore, the cost is estimated at $10,000 for that month.

2. By the second month, the project will be fully manned and the cost will then attain the base figure of $15,000.

3. Any month in which more than 375 students are activated, the cost will be calculated at $40.00 for the first 375 students and $15.00 per student above this number. Payments will be made quarterly in advance. The first payment will be made upon acceptance of the project by CORE:

| | | |
|---|---|---|
| Acceptance of project by CORE | $40,000 | $175,000 |
| End of 3rd month | 45,000 | |
| End of 6th month | 45,000 | |
| End of 9th month | 45,000 | |

4. The preceeding estimates to CORE are based on present IER operational costs. Computer time will be required for data analysis. It is hoped that cost of computer time will involve no additional project costs. In the event that IER costs for the CORE Literacy Program are in excess of these estimates, it is anticipated that a new base figure will be negotiated. Likewise, in the event that IER costs are reduced through time sharing, overlapping projects, etc., IER will notify CORE and negotiate a reduced base cost per month.

5. This Literacy Project will extend over a minimum period of one year and will be continued only if there is a joint agreement between CORE and IER. Each continuation period will, likewise, extend over a period of one year. A new base figure will be negotiated for each continuation, if any.

# News for You

Alex Quaison-Sackey from Ghana, the new United Nations president, receives congratulations from U. N. Ambassador Adlai Stevenson. A real test on Russia's right to vote was avoided by a negative vote. Quaison-Sackey was elected merely by asking if any nation objected. Membership in the United Nations has now reached 115 countries.

## F.B.I. Arrests 21 Suspects In Mississippi

The Federal Bureau of Investigation (F.B.I.) recently arrested 21 men in Mississippi.

The F.B.I. arrested the men on a civil rights charge. They said the men were connected with the murder of three civil rights workers last summer.

The federal government cannot charge the men with murder. Murder is a state crime.

If a jury says the men are guilty, the biggest punishment they can get is ten years in prison.

Two of the men arrested were the sheriff and deputy sheriff of Neshoba County, Mississippi.

The civil rights workers were last seen in Neshoba County on June 21. F. B. I. agents found their murdered bodies in August. The bodies were buried in a dam.

## Pope Paul Visits India

Pope Paul VI visited India last week. A million people awaited his arrival at Bombay Airport. The Pope said, "We come as pilgrims of peace, of joy, and of love."

The Pope was sad to see many poor children begging in the streets. He said that nations should spend their money for food, homes, and medicine for the world's poor people, instead of buying weapons to kill each other.

Pope Paul VI went to India to make friends with people of other religions. He visited the International Eucharistic Congress of the Roman Catholic Church.

Indian Prime Minister Lal Bahadur Shastri (right) greets Pope Paul VI at the Archbishop's residence in Bombay, India.

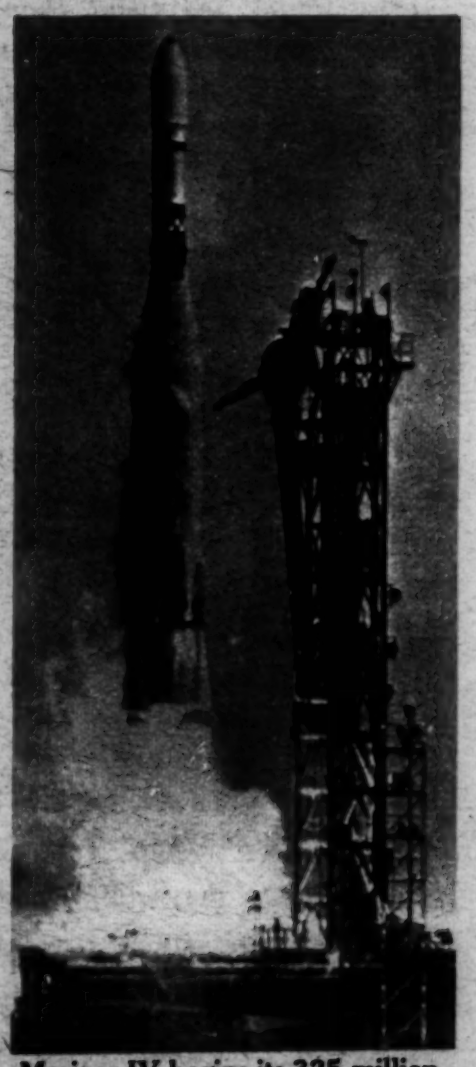
Three University of California coeds smile at the photographer through the bars of the Oakland, California jail. They were part of the 900 students arrested for staging a sit-in demonstration in the Administration building on the Berkeley campus. The sit-in ended with their arrest.

## U.S. Spaceship Races For Mars

Two spaceships are racing toward Mars. Mariner 4 is a U.S. spaceship. Zond 2 is a Russian spaceship. Both were sent into space the last week in November. There are no men on either ship.

Mars is 325 million miles from the earth. Mariner 4 will come near Mars next July. Scientists say Mariner 4 will be 10,000 miles from Mars.

Mariner 4 is carrying a television camera. This camera will take pictures of Mars. Then we will know more about Mars.



Mariner IV begins its 325-million-mile, 228-day trip to planet Mars.

*And it came to pass in those days, that there went out a decree from Caesar Augustus, that all the world should be taxed. [2](And this taxing was first made when Cyrenius was governor of Syria.) [3]And all went to be taxed, every one into his own city. [4]And Joseph also went up from Galilee, out of the city of Nazareth, into Judaea, unto the city of David, which is called Bethlehem; (because he was of the house and lineage of David:) [5]to be taxed with Mary his espoused wife, being great with child. [6]And so it was, that, while they were there, the days were accomplished that she should be delivered. [7]And she brought forth her firstborn son, and wrapped him in swaddling clothes, and laid him in a manger; because there was no room for them in the inn. [8]And there were in the same country shepherds, abiding in the field, keeping watch over their flock by night. [9]And, lo, the angel of the Lord came upon them, and the glory of the Lord shone round about them: and they were sore afraid. [10]And the angel said unto them, Fear not: for, behold, I bring you good tidings of great joy, which shall be to all people. [11]For unto you is born this day in the city of David a Saviour, which is Christ the Lord. [12]And this shall be a sign unto you; Ye shall find the babe wrapped in swaddling clothes, lying in a manger. [13]And suddenly there was with the angel a multitude of the heavenly host praising God, and saying, [14]Glory to God in the highest, and on earth peace, good will toward men. [15]And it came to pass, as the angels were gone away from them into heaven, the shepherds said one to another, Let us now go even unto Bethlehem, and see this thing which is come to pass, which the Lord hath made known unto us. [16]And they came with haste, and found Mary, and Joseph, and the babe lying in a manger. [17]And when they had seen it, they made known abroad the saying which was told them concerning this child. [18]And all they that heard it wondered at those things which were told them by the shepherds. [19]But Mary kept all these things, and pondered them in her heart.*

Luke 2:1-19

*And it came to pass in those days, that there went out a decree from Caesar Augustus, that all the world should be taxed. [2](And this taxing was first made when Cyrenius was governor of Syria.) [3]And all went to be taxed, every one into his own city. [4]And Joseph also went up from Galilee, out of the city of Nazareth, into Judaea, unto the city of David, which is called Bethlehem; (because he was of the house and lineage of David:) [5]to be taxed with Mary his espoused wife, being great with child. [6]And so it was, that, while they were there, the days were accomplished that she should be delivered. [7]And she brought forth her firstborn son, and wrapped him in swaddling clothes, and laid him in a manger; because there was no room for them in the inn. [8]And there were in the same country shepherds, abiding in the field, keeping watch over their flock by night. ## Favorite Carols

The first Christmas carols were sung in the 13th century. St. Francis made a scene to look like the Nativity. Children brought gifts to the Christ Child. Young people sang and danced in a circle.

The word "carol" came to mean singing and dancing in a circle. The story of Christ's birth was put to music and the songs about it passed on to us.

The people liked to see Bible stories acted out as plays. The actors sang carols in the plays. If the people liked the songs, the singers walked through the streets singing. They sang the carols over again. This was how caroling began.

Here are carols from five countries:

### Austria

Silent night, holy night,
All is calm, all is bright.
Round yon Virgin Mother and Child,
Holy infant so tender and mild,
Sleep in heavenly peace,
Sleep in heavenly peace.

### England

God rest ye merry, gentlemen,
Let nothing you dismay.
Remember Christ our Saviour
Was born on Christmas day
To save us all from Satan's power
When we had gone astray.
Oh, tidings of comfort and joy,
comfort and joy,
Oh, tidings of comfort and joy.

### France

The first Noel, the angels did say,
Was to certain poor shepherds in fields
where they lay.
In fields where they lay keeping their
sheep,
On a cold winter's night that was so deep.
Noel, Noel, Noel, Noel,
Born is the King of Israel.

### Germany

Away in a manger, no crib for a bed,
The little Lord Jesus lay down his
sweet head.
The stars in the heavens looked down
where he lay.
The little Lord Jesus asleep on the hay.

### United States

Oh, little town of Bethlehem,
How still we see thee lie.
Above thy deep and dreamless sleep,
The silent stars go by.
Yet in thy dark streets shineth
The Everlasting Light.
The hopes and fears of all the years
Are met in thee tonight.

## Nations of the World

# Jordan -- Jesus' Birthplace

By Jamil Shamy

Jordan has a special meaning for Christians at Christmas. It is the country where Jesus was born. Bethlehem is in Jordan.

Today Jordan is an Arab nation. It is the part of Palestine which was given to the Arabs when Israel became a Jewish state. It has about two million people.

It is the shape of a hatchet and is about as large as the state of Indiana.

Nine-tenths of the land is desert. About 200,000 of the Arabs are called Bedouins. They wander over the desert with their camels, goats, and sheep.

Bedouins are kind, friendly people. They know every water hold and every inch of pasture land. At night they sit under the stars, around a fire, and tell stories and recite poetry.

One-third of the people who live in Jordan today fled from Palestine. They left their homes there during the war with Israel in 1948.

Jordan had almost no jobs for them. They live in small rooms with little food and water. The United Nations supports them now. But they are learning new trades so they can support themselves.

Crops grow in only one-tenth of the land--the small section watered by the Jordan River and the Yarmuk River. Here wheat, barley, and fruits are raised.

Jordan's ruler is King Hussein. He is helped by a cabinet of several ministers. The parliament is elected by the people every four years.

The small country is growing fast. There are new schools and hospitals. To encourage trade, a new 220-mile road was built to Aqaba on the Red Sea. Aqaba is Jordan's only port.

Amman is the capital city.

# TLC* For Your Christmas Tree

*(Tender Loving Care)

Christmas means Christmas trees to families all over the country. Everybody likes to have a pretty tree.

Do you know how to choose a tree? Do you know how to keep it fresh for a long time?

The College of Forestry at Syracuse University has some hints about Christmas trees. Follow these hints and your tree will stay pretty a long time.

Be sure to buy a fresh tree. It will keep its needles a longer time than a dry tree. A fresh tree will not catch fire as easily.

### Hints For Tree Care

After you buy your tree, keep it fresh this way: cut the bottom of the trunk at an angle. Then, put the tree in a stand. Make sure there is some water at the bottom of the stand.

Some trees last longer indoors than others do. Firs and pines make good Christmas trees.

Church World Service

**Refugees learn metal-turning operation.**

Technical Cooperation Administration, Dept. of State

**Bedouin tribesmen and their herds pause beside a cistern at Muwaggar, Jordan. It was built by Jordan and the U. S.**

### About the author...

Jamil Shamy lives in Ramallah, Jordan. His father directs the Laubach Literacy Program there. He teaches people to read and write.

Jamil is in the United States now. He is studying at the University of Arkansas. He plans to return to Jordan and help teach the more than 50 million people in the Middle East who cannot read or write.

He says, "They are in the dark! They can see the light but cannot reach it."

# U.S. Postal Service Is Big Business

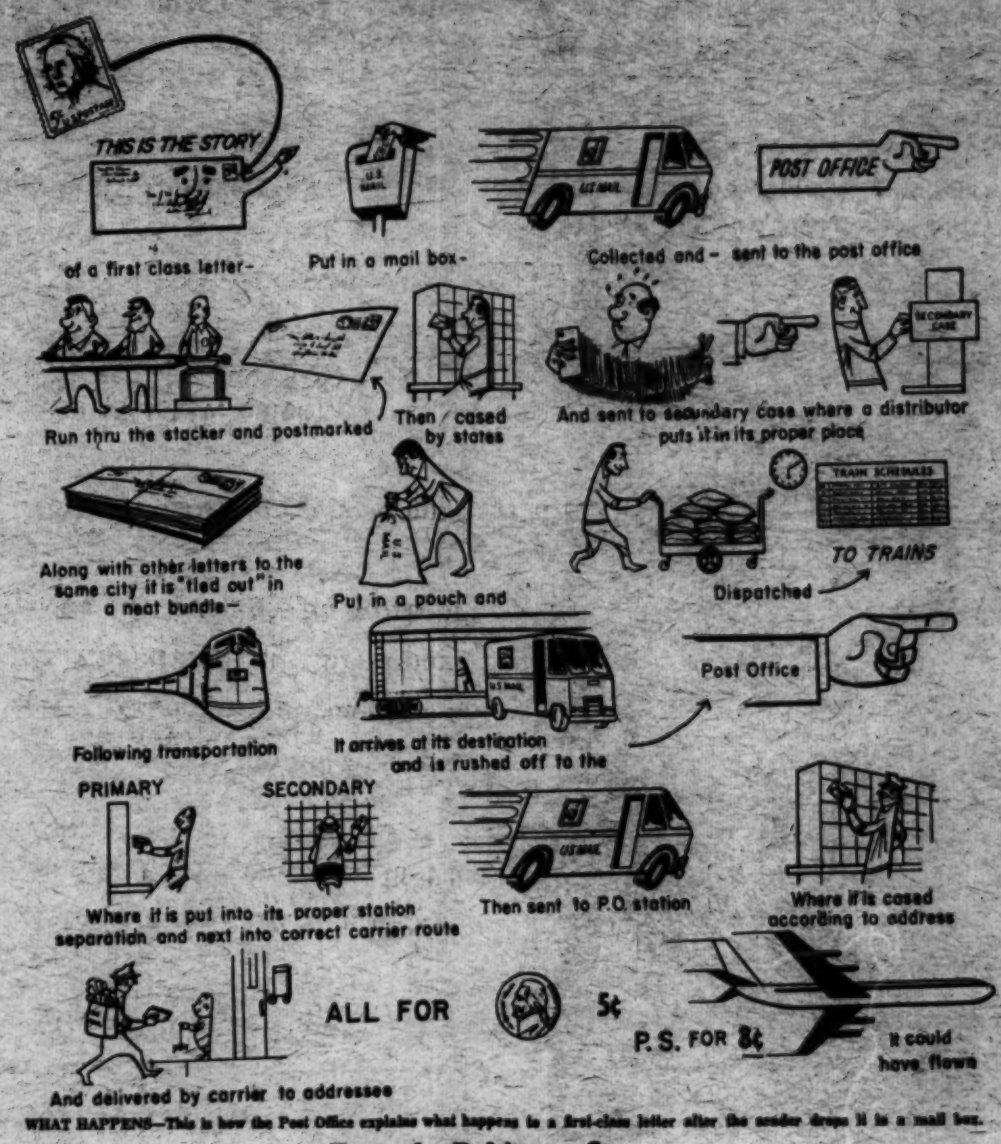
By Alta Bell

Christmas is a busy time for all of us. But it is especially busy for people who work in the Post Office. Each year the Post Office Department handles 67 billion pieces of mail. This is enough to reach from earth to the moon 44 times, if we put them all end to end.

Who handles all this mail? You probably know the postman who comes to your door six times a week. But there are many, many others. There are 558,000 workers in all. They work in 35,000 post offices. Our government pays them 10 million dollars a day.

Mr. John A. Gronouski is the Postmaster General. He is the head of the Post Office Department. He is in the President's Cabinet.

The first Postmaster General was Benjamin Franklin. The Congress gave him this job in 1775.



WHAT HAPPENS—This is how the Post Office explains what happens to a first-class letter after the sender drops it in a mail box.

From the Baltimore Sun

The Post Office Department has grown each year since 1775. It touches the lives of all Americans. All of us receive and send some mail.

All of us want to get our mail quickly. We don't like to get it late. But sometimes mail is delayed. This is especially true at busy times

How can the mail be moved quicker? The Post Office Department is trying to get quicker ways of sorting mail.

There are machines that help. Detroit sorted 20 million pieces of mail in one day. More machines are needed.

### Use Your Zip Code

Have you heard about the Zip Code? Do you know what it means? It has five numbers. For example, the number for News for You, is 13210. The "1" is for the states of New York, Pennsylvania and Delaware. The "32" is for the area around Syracuse, New York. The "10" is the old zone number for News for You. This Zip number helps us to get your letter quicker.

Progress and the Post Office Department go along together. It is good to get news from far away places. Our country would not be great without the Post Office Department. It is that important.

## To Help You Learn

I. Answer these questions with complete sentences.

1. Who was the first Postmaster General?
2. What is a Zip code? Can you give your Zip code?
3. Where is Jordan?
4. How old are some of the Christmas carols we sign today?
5. What are some ways to make a Christmas tree last a long time?

II. Circle the word in parentheses which completes the sentence so that it is correct. Example: Jordan has a (special, specially) meaning for Christians at Christmas.

1. It is (especial, especially) busy for people who work in the Post Office.
2. You (probable, probably) know the postman who comes to your door.
3. All people want to get their mail (quickly, quick).
4. At night they sit under the stars, around a fire, and tell stories and (tell, recite, speak) poetry.
5. Some trees last (long, longer) than others.
6. The actors (sing, sang, sung) carols in the play.

**News For You is taking a vacation for two weeks. Your next issue will be dated January 6, 1965. Merry Christmas!**

Dawn Baker of Pasadena, California, was chosen December 1st as Queen of the 76th Annual Tournament of Roses Parade and football game.

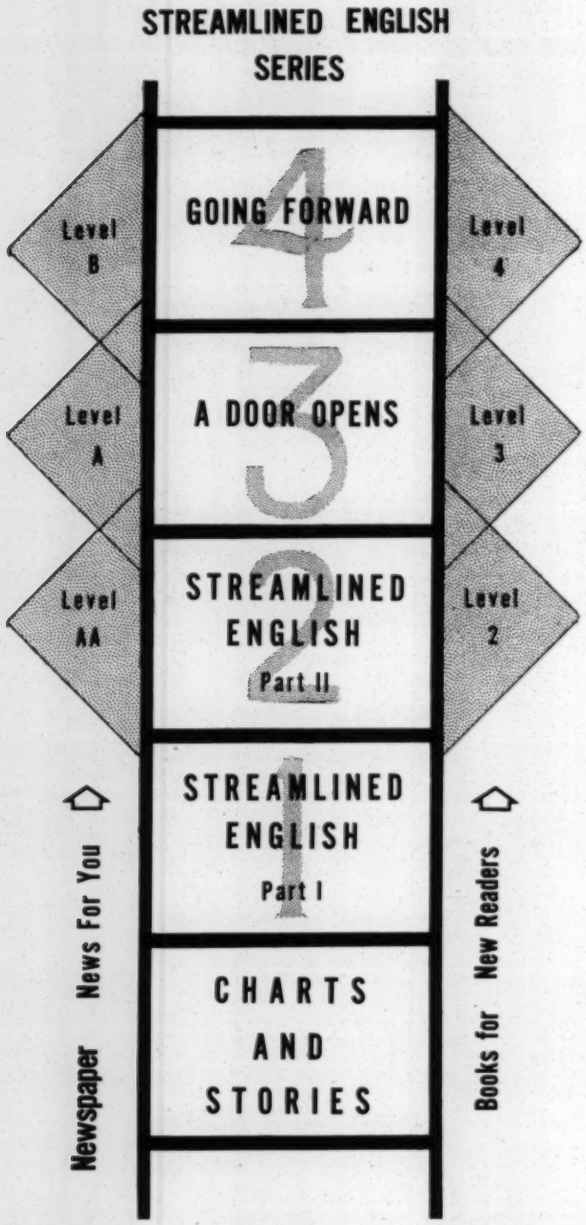
# THE LADDER OF LITERACY



# THE LADDER OF LITERACY
# A CONCEPT IN ADULT GRADED MATERIALS

New Readers Press is dedicated to the preparation and publication of graded reading materials for adults, arranged in a "ladder of literacy," climbing from almost complete illiteracy to the threshold of "functional literacy."

Just where "functional literacy" begins is debatable. Some educators maintain that an adult who gains information, instruction and entertainment daily through reading requires at least an eighth grade reading ability. We certainly agree this to be desirable for all adults in a highly advanced nation like ours.

But we also have read the Census figures: in the United States there are 8.3 million persons, 25 years of age and older, who have achieved less than five years of schooling. If the age limit is lowered to 18, we have at least 12 million who, having had less than five years of schooling, are in the range between nonreading and fourth grade reading.

Because the need is so great, and because of the dearth of adult-oriented materials in the lower levels, we have chosen fifth grade reading as our threshold of functional literacy.

To help the adult climb from the abyss of illiteracy to this threshold is the objective of our "ladder of literacy."

At the center of the "ladder" is the Streamlined English series, with a set of materials for each level. At Level 1 there are, at present, no other materials. But with each succeeding level more materials, on a variety of subjects, are being prepared; and with each succeeding level more excellent materials are available from many publishers.

Teachers of the Streamlined English series are using supplementary materials from many sources. The supplementary materials of New Readers Press—periodicals and books—will be of use to teachers of English-speaking and nonEnglish-speaking adults, no matter what text they may be using.

Because of a number of subtle differences between adult materials and materials for children, the levels in our "ladder of literacy" correspond only roughly to grades in school. Our placing of each book on a certain level is suggestive rather than definitive, though teachers generally have found the placement accurate.

New Readers Press is focusing readability and linguistic theory on the development of ever more readable and interesting materials. We welcome comments from teachers, and suggestions for manuscripts.

Robert S. Laubach, Publisher

# THE STREAMLINED ENGLISH SERIES

by Frank C. Laubach

### Pre-Level One Materials

**Charts and Stories** ..... .40
Teaches the consonants and vowels, with picture-sound associations.

**Teacher's Guide for Charts and Stories** ..... .40
What to do, what to say; complete and precise instructions.

**Wall Charts and Stories** ..... 2.00
Ten large sheets (17x22 inches), exactly as in Charts and Stories, plus three letter-sound review sheets.

**Writing Book** ..... .40
Contains guide lines for writing letters and words found in Charts and Stories.

### Level One and Two

**Streamlined English** ..... 1.~~50~~ .75
Begins with Charts and Stories for review. This book in two parts: Part 1 contains 20 lessons on vowel sounds, leads student into Level 2. Part 2 contains 10 lessons on the consonant sounds, takes student through Level 2 into Level 3. Vocabulary: about 1,100 words.

**Lesson Plans for Streamlined English** ..... 1.00
By Elizabeth Kirk; detailed plans especially useful for teaching the English-speaking student.

**Manual for Streamlined English** ..... 1.75
Especially useful for teaching the nonEnglish-speaking student.

### Level Three

**A Door Opens** ..... 1.~~25~~ .50
By Pauline Hord and Frank Laubach; 20 true-to-life stories of the Hill family; careful control of vocabulary and sentence structure.

### Level Four

**Going Forward** ..... 1.~~00~~ .25
By Pauline Hord and Frank Laubach; more stories of the Hill family; sentences and words gradually more complicated.

## SUPPLEMENTARY READING MATERIALS

**Pre-Level One and Level One consist of the materials in the Streamlined English Series. The following supplementary materials are useful with any course for English-speaking or nonEnglish-speaking students.**

### Level Two

**News for You, Level AA** (see price below)
A weekly newspaper, October through May, on three reading levels; Level AA ranges from high Level 1 through Level 2 and into Level 3.

**Story of Jesus, Part 1** ..... .60
Jesus' Birth and Ministry; careful vocabulary control; suitable to begin about half way through Streamlined English.

**Heroes of Faith** ..... .60
Stories of the Old Testament; told in a simple and dramatic manner without theological interpretation.

### Level Three

**News for You, Level A** (see price below)
Weekly, October through May; level A ranges from high Level 2 to high Level 3.

**Story of Jesus, Part 2** ..... .60
Jesus' Death and Resurrection; more words per page than in Part 1, but still has careful vocabulary control.

**Our United States** ..... 1.50
One page for each state and territory, with maps and photos of interesting places.

**Good Manners in the U. S. A.** ..... .30
What to say, how to act, in various situations in the home and in public.

**Trouble and the Police** ..... .30
In sprightly conversation form tells about police functions; defines several legal terms.

**Story of Ruth** ..... .30
The famous Bible story retold simply.

**Story of David** ..... .30
David, from shepherd boy to king.

**The First Christmas Tree** ..... .30
The legend from Germany retold.

**We Honor Them, Volume 1** ..... .40
Stories of 20 American Negroes who have contributed to the history of the last 100 years.

### Level Four

**News for You, Level B** (see price below)
Weekly, October through May; Level B ranges from high Level 3 through Level 4 and beyond.

**Story of Jesus, Part 3** ..... .60
The Parables of Jesus; gradually increasing difficulty, still with vocabulary control.

**How to Find a Job** ..... .30
Practical tips on procedures and agencies for job finding.

**Why You Need Insurance** ..... .30
Discusses, in lively fashion, various types of insurance and why you need the protection.

---

## NEWS FOR YOU SUBSCRIPTION PRICES

| No. of copies | | One Semester (15 issues) | School Year (30 issues) |
|---|---|---|---|
| 1 to 5 | each | 1.25 | 2.50 |
| 6 and up | each | .60 | 1.20 |

Groups of 6 and up are mailed to one address. Each group may consist of all one level, or any combination of levels, including the Spanish edition, Noticias para Ud.

## NEW MATERIALS IN 1964

**Books for New Readers** ..... .75
**Publication date, June 1, 1964.** A much-needed bibliography of books and materials for adult new readers, compiled by Jeanette Smith.

**Literacy, U. S. A.** ..... .75
**Publication date, June 1, 1964.** By Richard W. Cortright; introductory handbook discussing problems of illiteracy and what each one can do about them.

**Our World Is Small** ..... .40
**Publication date, June 1, 1964.** By Walter Powell, with special message from Frank C. Laubach. A Level 1 book; treats theme "we are all neighbors" in a charming manner, with beautiful photos and easy words.

**Making Our World Safe, Part I** ..... .60
**Publication date, June 1, 1964.** By Frank C. Laubach; a graded reader in three parts; Part 1 begins on Level 2. Chapters on the United Nations, working together, need for understanding, etc. Part 2 (Level 3), and Part 3 (Level 4) have tentative publication dates of July 1 and August 1.

**Noticias para Ud.**
**Begins weekly publication in October, 1964.** Spanish translation of News for You, Level AA. Suitable for use with adult literacy classes in Spanish, Spanish-speaking adults learning English, and high school and college Spanish classes. Free sample copies of pilot edition now available; see subscription prices.

## RESEARCH AND TRAINING

**These materials are useful in teacher workshops, in university classes, and for individual study of literacy problems.**

**Toward World Literacy** ..... 4.75
By Frank C. and Robert S. Laubach; Part I on literacy techniques, and Part II on writing for new literates.

**Start A Do-It-Yourself Literacy Program** ..... .10
By Robert Likins; how to get started teaching illiterates in your town.

**Streamlined English Word Lists** ..... .20
Combination of Thorndike-Lorge and Laubach lists, with hints for using them in writing for new readers.

**What Readability Can Do For You** ..... .30
Introduction to readability theory and formulas, and application to writing for new readers.

**How to Take the Fog Out of Your Writing** ..... .30
By Robert Gunning; it does what it claims.

**Are We Losing Both Races in Literacy?** ..... .10
By Frank C. and Robert S. Laubach; a documented comparison of the progress of literacy teaching on both sides of the Iron Curtain.

# To the Educator

Teachers have long felt a need for easy-to-read material about Negroes. They are well aware of the paucity of materials in this area. The teacher in the average public school must search beyond the textbook content in order to secure information on the Negro. Few textbook accounts draw upon the research on Negro history. They lag behind development in this field of history. Yet, the social studies can serve as an effective means to modify attitudes and sentiments. Increased information tends to make such modifications possible. Therefore, information on the Negro should be included in social studies materials used in the classroom.

The social studies deal with relationships. Students are led to a realization of the interdependence of peoples. The teacher creates an environment for positive learnings. These establish an appreciation for the worth of all individuals and for their contributions to total human welfare. All peoples have had great individuals whose ideas and efforts found expression in many different ways. Social education develops an awareness that superior individuals are members of all races; that our American cultural and social heritage evolved from the contributions of many peoples.

The knowledge that many Negroes have contributed to the onward development of society enhances the Negro's own concept of himself. He must have this kind of knowledge to help him find a place for himself. Everyone, adult and child alike, needs information to help acquire the common values, ideals, and behavior necessary for good social living.

The reading levels of the stories are low, ranging from about school grade 2.5 in the first few stories to about 4.0 in the last few stories. The "new words" are those not found in the Thorndike-Lorge and Laubach lists (see page 48). Brief definitions of the new words are on pages 44-45. Exercises are suggested for using the new words (pages 46-47), and the teacher of advanced classes may ask the readers to create more "word games." The teacher may enrich discussion of the stories by additional information from the books listed in the bibliography on page 48.

We hope that both teacher and student will find this book useful; we may publish more books in the "We Honor Them" series if interest from teachers and readers is sufficient.

# A Lover of Freedom

Martin Luther King, Jr. loves freedom. He fights for freedom. He preaches non-violence in the fight for freedom. The Negroes of Montgomery, Alabama, listened to him first in 1956.

Now, since 1963, all America listens to Dr. King. Dr. King preaches to us all. He says, "All men are created equal. Not only some men. Not only white men. All men in America. All men in the world."

Dr. King not only preaches. He writes also. He wrote a book. The book is called "Stride Toward Freedom."

Dr. King leads Negroes in their non-violent fight for freedom. He walks ahead in the street parades. He sits with them in their "sit-ins."

Dr. King travels all over the United States. He talks to large crowds. He talks to the President of the United States. To everyone he says, "It is time now for everyone to have his rights."

Time magazine named Dr. Martin Luther King, Jr. "Man of the Year" for 1963. We honor him!

# A Man of Ideas

Benjamin Banneker had great thoughts. He put his thoughts to work.

Banneker wrote his thoughts in an almanac. The almanac helped many people. People read the Banneker Almanac for ten years.

Banneker studied the stars. He shared his thoughts of the stars. He thought of peace and war. He wrote his thoughts on peace. He wrote about a "Peace Office" for the United States.

Banneker knew that young men love parades. They love to parade in uniforms. Banneker said, "If there were no uniforms, there would likely be no armies." Do you like to see uniforms in a parade?

Banneker thought about science. He put his thoughts to work. He made the first wooden clock in America. Years later he used other ideas. He helped to plan Washington, the capital of the United States.

Think of Benjamin Banneker on your next visit to Washington. He used his ideas to help all of mankind.

SIERRA
LEONE

# Sailor of the Century

"Let's change our name," said Paul.

Paul spoke to his brothers, "Let's drop our father's slave name. We can then use his first name as our last name."

Paul began to call himself Paul Cuffee.

Paul Cuffee began his adventures at sixteen. He sailed out to sea. At twenty he had a business. He owned a small boat. Later he owned a ship and many other boats.

Paul's sailors were all Negroes. They crossed the ocean to England. The Engish had a colony in Sierra Leone. That is in Africa. Cuffee sailed there in his own ship.

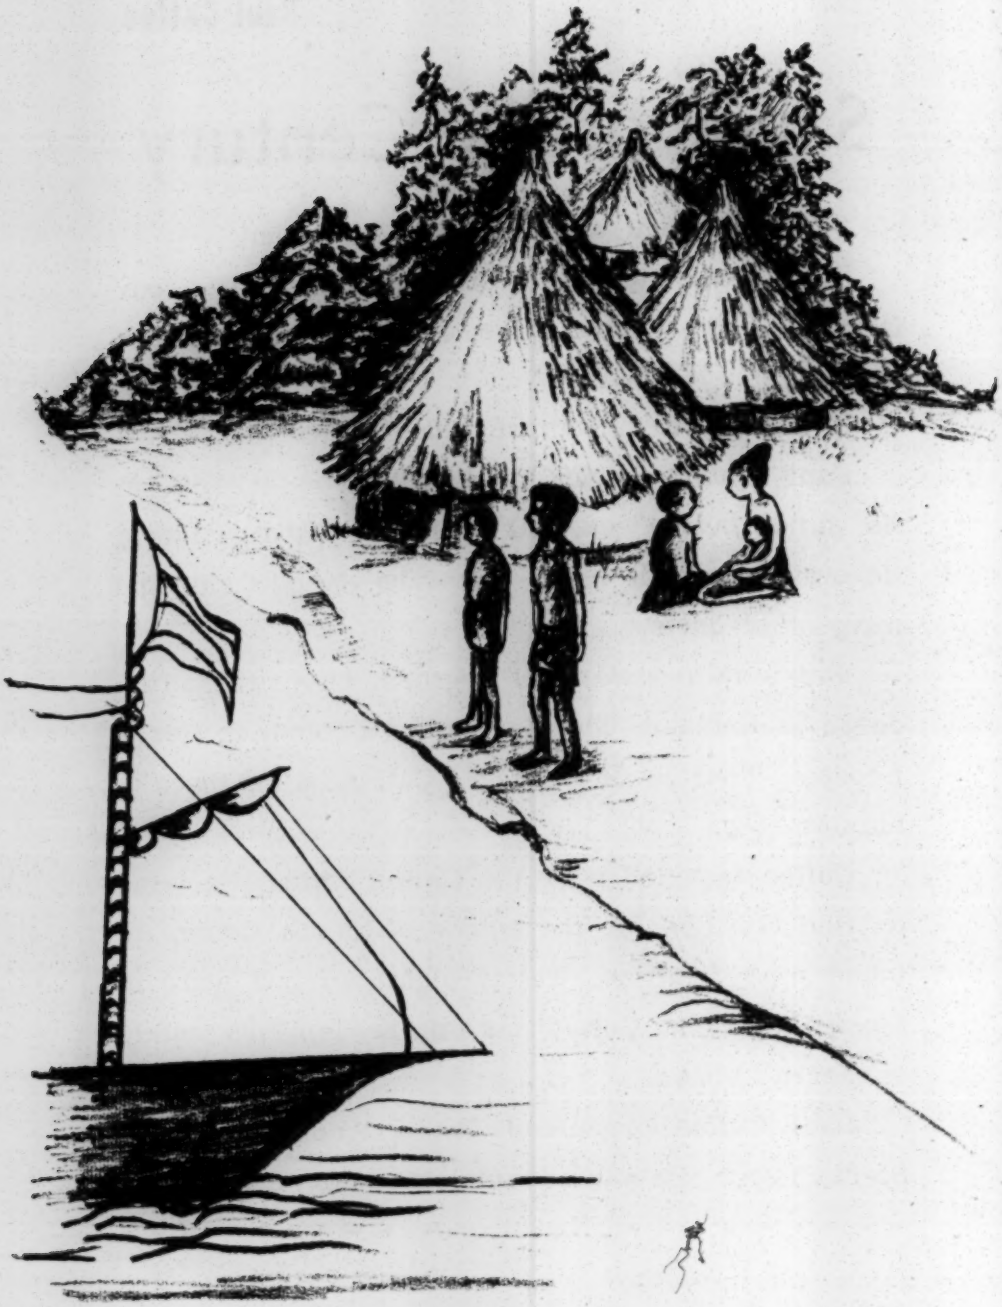
Cuffee traveled over the United States. He tried to find families for the colony of Sierra Leone. He found nine families. Thirty-eight persons were in those families. Cuffee landed the families safely in Sierra Leone.

Paul Cuffee organized The Friendly Society of Sierra Leone. He wanted to visit the colony every year.

---------- New Words ----------

colony Sierra Leone

---



# A Missionary Hero

Do you know Lott Carey? Lott Carey mended shoes. He preached, too. Lott Carey left his home in Richmond, Virginia. He sailed a long way from home. He sailed to Liberia. Liberia is in Africa. Would you like to go so far from home?

Lott Carey started a new country in Liberia. He was a missionary. He helped form a new government. He helped make new laws. The laws made people free in the new country. The laws allowed no slaves in the new country. No slave ship could even land in the new country!

One day a slave ship tried to land. The sailors brought the ship close to the land. But the lookout saw the ship. "Get ready for battle!" shouted the lookout.

Lott Carey said, "We must stop the sailors. Sailors cannot load slaves here. Bullets can stop the sailors." Lott Carey helped make bullets. He lost his life trying to keep people free. Lott Carey was a hero. He was a missionary hero.

---------- New Words ----------

missionary hero lookout slave

---

# A President of Liberia

From a slave to the leader of a country!

Joseph Jenkins Roberts rose like that. Roberts was born a slave in Norfolk, Virginia. He heard Lott Carey preach in Norfolk. Lott Carey said, "In Liberia a man can be free." Roberts sailed to that country. He went as a trader. He helped organize an army there. Later, he became chief of the army.

Do you think he stopped there? No. He served as governor next. Then Liberia became a republic. Roberts was elected first President of Liberia.

President Roberts visited other nations. He helped other nations recognize his government. The United States recognized Liberia, also.

Years later the Republic had problems. The problems required wise action. Joseph Roberts served as President a second time. He helped settle differences. He helped the Republic of Liberia to grow.

Norfolk named a place for Joseph Roberts. The streets have names found in the Republic of Liberia.

---------- New Words ----------

Republic Liberia

---

# A Shakespearean Actor

Have you ever thought of the many Negroes who were never slaves? Ira Aldridge's parents were not slaves. Ira was born in 1807. His father was a minister. He hoped that Ira would be a minister.

But Ira didn't want to be a minister. He wanted to be on the stage. He attended the African Free School in New York. While still in school, he acted in Shakespearean plays. He took a job in a theatre, too. He watched the plays, but he couldn't be in them.

Ira's father didn't want his son to be an actor. So his father decided to send Ira away. He sent Ira to a university in England. But Ira didn't stay there.

Ira went to London. He got on the stage in London. He was less than twenty years old. He acted at the Royal Theatre.

Ira acted in Shakespearean plays again. This time he played the part of Othello. He played Othello in England. He played Othello in other countries, also.

Ira Aldridge became famous as a Shakespearean actor. He never returned to the United States.

# An American Statesman

John Henry Smythe knew about crime. Men and women break the law. Sometimes boys and girls break the law, too.

Smythe asked, "Why put the boys who break the law with the men? Why put the girls who break the law with the women?"

He hated to see the boys with the men, He hated to see the girls with the women. He thought the children needed to be kept separate.

So Smythe talked with the law makers in Virginia. He helped to get an industrial school for boys. He helped to get an industrial school for girls, too. The industrial schools help to make good citizens.

The President of the United States sent Smythe to Liberia. Smythe served his country in Liberia. He studied the products of Liberia. He helped Liberia to sell its products to the United States.

Liberia College honored John Henry Smythe. It gave him a degree in law. Smythe served Liberia well. He served the United States well, too.

- - - - - - - - - - - - - - - - - - - - - - - - - -

# A Song Writer

Do you love to sing? Then you have sung songs by James A. Bland. You may like to sing spirituals.

Many people enjoy singing spirituals. Bland wrote the spiritual, "Oh, Dem Golden Slippers."

Do you like to sing romantic songs? You may love romantic songs! Bland wrote the romantic song, "In the Evening by the Moonlight."

Are you a Virginian? Virginians sing one of Bland's songs. Bland wrote, "Carry Me Back to Old Virginny." This song is the state song. It became the official song in 1940.

Many minstrels sang Bland's songs. Bland acted as a minstrel. He acted as a minstrel in London for twenty years. He grew famous.

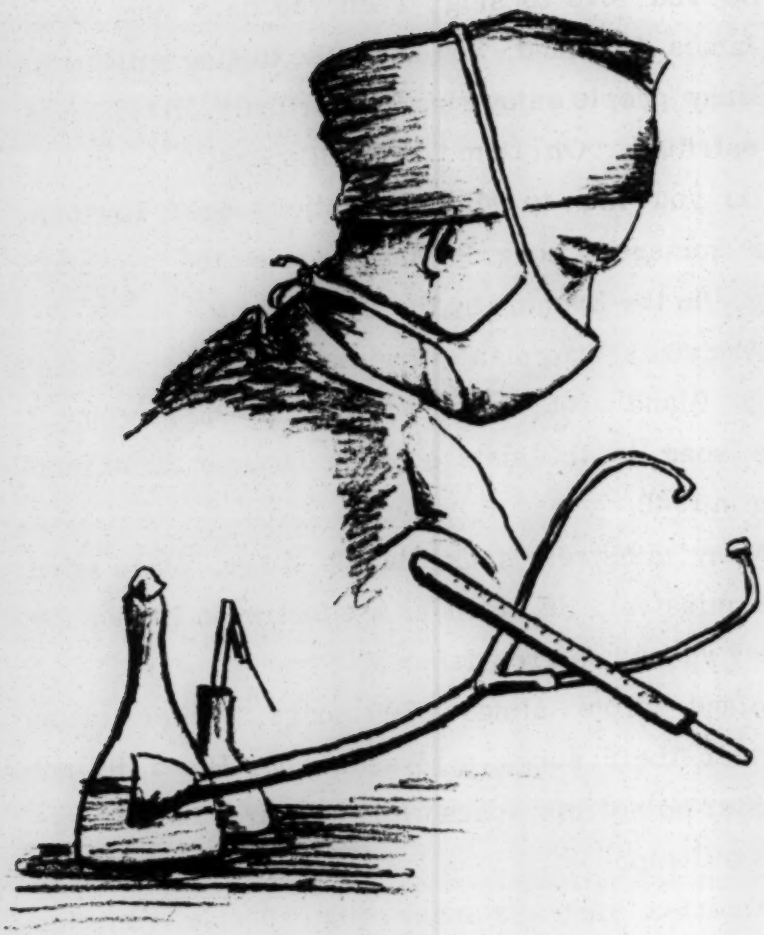
Bland wrote almost 700 songs. Writers must register their songs in Washington. Bland did not register all of his songs. He registered only thirty-eight of them.

America sings to many other people. America sings to them through the songs of James A. Bland!

---------- New Words ----------

spirituals minstrels Virginian register

---



# The Heart Mender

"Dr. Dan! Dr. Dan!" An excited voice called for Dr. Daniel Hale Williams. The doctor came quickly.

"What have we here?" he asked. The nurse moved aside. A man lay on the table. Blood poured from the man's chest. The blood flowed from a wound. The man was going to die!

Dr. Dan made a quick decision. The man must not die. He would try to save the man. He would open the man's chest. He would mend the man's heart. Would you have thought of that?

Quiet settled over the room. The minutes passed slowly. No one moved. No one spoke. Each person almost held his breath.

Everyone watched Dr. Dan. Could he mend the man's heart? Would the man live?

At last the job was over. The man breathed. He still lived! Dr. Dan had mended his heart. What an experience!

This operation made histoy. This operation made Dr. Daniel Hale Williams famous.

- - - - - - - - - - - - - - - - - - - - - - - - - -

# North Pole Explorer

The flag hung down. Soon a little wind lifted it. The wind opened it. The flag waved in the wind. It spoke to the world.

What did the flag say? It said that two Americans had reached the North Pole. They reached the top of the world!

Matthew Henson reached the North Pole. Commander Peary reached the North Pole. Matthew Henson helped Peary. Peary took trips to far places.

Henson helped Peary as a trusted friend. He did all kinds of work. He learned the Eskimo language. He learned Eskimo customs, too. He learned much about the frozen North.

Once Henson nearly lost his life. The frozen North was not a safe place. The rough ice was not safe. Paths were cut through the ice. The ice broke! The Eskimoes acted quickly. They saved the men and dogs.

Matthew Henson loved to explore. He sailed on the high seas. He saw a lot of the world.

---------- New Words ----------

explore frozen Eskimo

---

# National Youth Worker

Mary Bethune worked in the cotton fields. She worked in her bare feet.

Her parents worked in the cotton fields, too. Her parents worked in the cotton fields of South Carolina. They were slaves before Mary was born.

Mary walked five miles to school every day!

A few years later, Mary started her own school. She started a school in Florida. Now this school is called Bethune-Cookman College.

She used orange crates. She made benches from the orange crates.

Mary Bethune worked hard at her school. The President, Franklin D. Roosevelt, called her to Washington. He knew that she was a good teacher.

The President gave her a big job to do. She still worked in education. She directed national classes. More than 600,000 Negroes learned in these classes. Some of them learned skilled trades.

Dr. Mary Bethune loved her work. She said, "This is our day! Doors will open everywhere."

---------- New Words ----------

crates skilled

# A Successful Writer

"The problem of the century is the problem of the color line." William Edward Burghardt DuBois wrote this. He wrote it in his book.

DuBois wrote in "The Souls of Black Folk." This is a study of the Negro people. It is beautiful writing. Many people in America read this book.

Could DuBois talk about the color line? Yes. He went to Fisk University when he was sixteen years old. Fisk is in Nashville, Tennessee. That is a long way from the DuBois home in Massachusetts.

DuBois taught in log-cabin schools. He taught children of the sharecroppers. Sharecroppers see the color line in their work.

DuBois studied two years in Germany. He was the first Negro to get a Doctor of Philosophy degree from Harvard. He got his degree in 1895.

Dr. William DuBois taught at Atlanta University. He held conferences at Atlanta University. The conferences studied problems about the Negro. The Atlanta Conferences printed thirteen studies of Negro life.

## WHAT EDUCATORS SAY

"Your ideas for News for You reflect sound knowledge and good judgment. I read all issues of the paper and, considering my schedule and the amount of material I have to read each day or week, this is an indication of regard I hold for your publication."

*Edward W. Brice*
*Director, Adult Education Branch*
*U. S. Office of Education*
*Washington, D. C.*

---

"News for You has a very attractive format. The content is well-selected and well written. I especially like the weekly quiz."

*Edgar Dale*
*Bureau of Educational Research*
*Ohio State University*

---

"As a former supervisor and teacher of adolescent non-readers and retarded readers, I feel that News for You meets a long-felt need."

*Gertrude P. O'Connor*
*Curriculum Laboratory*
*Northwestern University*

---

"News for You is a magnificent piece of work. The Reading Center has found it very useful in teaching slow readers of junior-high and senior-high age."

*Roy A. Kress, Director*
*Reading Center*
*Temple University*

---

"I have used level A in my 1-2 class and level B in my 3 class. I have found that the vocabulary and sentence structure is very well suited to these levels. I am glad to see that someone has begun to consider reading material for the lower levels."

*Dorothy J. Popkin*
*Cambria Adult School*
*Los Angeles, California*

---

"I find that News for You is very useful in my English classes. I am teaching about 35 adults English as a second language."

# Miss 3 B's

Nannie Helen Burroughs believed in the 3 B's.

She believed in the BIBLE. The Bible guides daily living.

She believed in the BROOM. The broom makes a clean house and a clean city.

She believed in the BATH. The bath stands for a clean body.

Dr. Burroughs started a school. Women and girls came to her school. They learned the 3 B's.

Dr. Burroughs said, "Don't make excuses, make good."

Dr. Burroughs loved working with women and girls. She organized the largest body of Negro women in the world. She organized the Woman's Auxiliary. The Woman's Auxiliary is in the National Baptist Convention of U.S.A., Inc.

Dr. Burroughs built a chapel. The chapel stands on Lincoln Heights in Washington, D.C.

The chapel reminds us of Dr. Nannie Helen Burroughs. It honors her work with women and girls.

# Fighter for Human Rights

Walter White lived in Atlanta, Georgia, as a boy.

He saw race troubles in Atlanta. Sometimes a mob formed. The mob grew angry. The mob lynched Negroes.

Walter asked, "Why does this happen?" He decided to fight against lynching.

So Walter moved to New York. He took a job with an organization in New York. He discovered trouble spots. He reported on trouble spots. He went to find out about the trouble. He helped Negro and white people understand one another better.

One day Walter took a train. The conductor said, "You are leaving town too early. You will miss the fun. There will be a lynching tonight."

The conductor thought Walter White was a white man. The conductor saw Walter's fair skin and blue eyes. His fair skin helped Walter. It helped in his fight for fair treatment of Negroes.

Walter White traveled around the world. He wrote for newspapers and magazines. He wrote six books. He talked and wrote in his fight for human rights.

---------- New Words ----------

# Mr. Blood Plasma

Who wants to be a doctor? Many boys say they want to be doctors.

Sometimes a girl wants to become a doctor, too.

Some doctors become surgeons. Surgeons operate on the body. Sometimes a patient needs more blood. The patient needs the blood for an operation. The patient dies if he doesn't get the blood he needs.

Dr. Charles Drew studied a lot about blood. He knew how important blood is for the patients. He knew how important blood is for the surgeon, too.

Dr. Drew became an expert on blood plasma. He studied how to keep blood plasma until it is needed. He put blood plasma in a blood bank.

England asked Dr. Drew to help them do this. The American Red Cross needed him also. Dr. Drew became a director of the American Red Cross.

Dr. Drew directed the first American Red Cross Blood Bank. He helped the U.S. Army, also.

Many people were saved because of the blood bank. There are blood banks all over the U.S.A. now.

**Katherine Dunham**

# Daughter of the Dance

Eight-year-old Katherine Dunham gave a performance. She gave it at her church. She taught other boys and girls to sing and dance.

This performance surprised the people at church. They doubted that it belonged in the church. But the

One time Katherine surprised a committee. The committee had to decide something. It had to decide whether to give Kathie some money. The money would help her study dancing in other countries. Katherine was nervous. How could she prove her point?

"May I show you what I mean?", asked Kathie. The committee agreed. Katherine started to dance. She danced on and on. She won the money. She studied dancing.

"I learn about people from their dances," said Katherine. "For dances tell a lot about people. They tell almost more than anything else."

Kathie studied the dances of many people. She studied dancing in Africa. She studied in other places. People all over the world like to see her dance.

---------- New Word ----------

performance

# Talented Hands

Babies talk. Babies walk. But do babies draw before they walk? Usually not!

Richmond Barthé drew before he could walk. His mother said, "I gave him a pencil. I gave him paper. He filled the paper with pictures." She hunted for work. Richmond stayed at home. He kept busy. He drew and drew.

Years later Barthé studied painting. He studied at an art institute. One day he tried something new. He tried a new art form. He made a head of clay. The clay work delighted him. He liked to work in clay. He began to work in wood, brass and stone, too.

Barthé made a bust of Booker T. Washington. The bust was very good. Judges chose the bust for the Hall of Fame. The Hall of Fame is in New York. Barthé was the first Negro to have work in the Hall of Fame. He has other work in New York also.

Barthé made many pieces. Some of his pieces are in America. Others are in Europe and Africa. Barthé's hands made a fine future for him.

---------- New Words ----------

drew clay bust

# A Voice for the World

What a surprise! An important singer was in the school. Can you guess who it was? Dorothy Maynor came to see an old friend. She came to say "Hello" to an old neighbor.

The neighbor knew Dorothy as a little girl. She knew Dorothy when she went to school in Norfolk, Virginia. Now Dorothy had come to town. She visited her neighbor at school. The children were delighted to see her. Some of the teachers shook her hand.

Dorothy Maynor knew some songs before she could talk. She loved to sing. She sang in her father's church. She sang at Hampton Institute. Dorothy traveled over the United States. She traveled with the Hampton Singers. The Hampton Singers traveled to Europe, too.

"The world must hear this voice," one man said.

Now the world has heard Dorothy Maynor's beautiful voice. People heard her in Central and South America. They heard her in Canada. They heard her in Australia and other places. All over the world

When Dorothy Maynor sings, the world listens!

# A Record Breaker

Jesse Owens was a new student. No one noticed him very much. But not for long! Physical education classes changed that! For shy Jesse Owens broke records. He ran the 100-yard dash in ten seconds.

Jesse broke records in high school, too. He ran the 100-yard dash in less than ten seconds. He broke the record for the 200-yard dash. He jumped over 26 feet in the broad-jump. No other person had jumped so far.

Jesse Owens went to Europe. He went on the American Olympic Team. He raced in the Olympic games. He jumped, also. His jump set a new Olympic record. The next day, Jesse broke two records. He broke the Olympic record for the 200-meter race. He broke the world's record also.

Jesse Owens brought glory to America. Each time he won, the American flag flew higher. It flew above the flags of other nations. Our national song was played, too. Everyone in Germany knew that Jesse Owens was a fine American!

# A World Champion

Who closed the street? The police closed it. Harlem children were playing in the street. They were playing paddle tennis. Althea Gibson was one of the children in the street. She was good at paddle tennis. She won medals. She was champion of 143rd Street. As time passed, she won more medals.

Althea played tennis in a lot of places. She played in Miami. She was the first Negro to play in mixed games there. She traveled to Asia. She traveled to other countries. She played tennis in these countries.

Althea grew to be a champion. She was champion of France. This was another "first". She became champion of Asia. She became champion of Italy ,too. Next, she played in England. The Queen gave her a medal.

America praised Althea. Her country was proud of her. President Eisenhower told her so in a letter. She played at Forest Hill again. This time she became champion of the United States. Althea Gibson was then the champion of the world.

| broom | an object used for sweeping |
| bust | the head and shoulders of a person |
| champion | the best person in a contest |
| chapel | a small church |
| clay | a kind of useful soil |
| colony | a settlement of people |
| conductor | a worker on a railroad |
| conference | a meeting to discuss certain things |
| crates | packing boxes |
| drew | past tense of "to draw" |

| | |
|---|---|
| Eskimo | a person in a group living far north |
| explore | to search, or look around a new place |
| frozen | hardened by the cold |
| Hampton | a college in Virginia |
| hero | a very brave man |
| industrial | about busy cities and factories |
| lookout | someone who watches for danger |
| Liberia | a country in West Africa |
| lynch | a killing, often by a mob of people |
| medal | a token of honor |
| mender | one who fixes things |
| minister | one who preaches in a church |
| minstrels | singers and poets who make us happy |
| missionary | one who teaches and preaches in a country far from his own home |
| mob | a large crowd of people |
| non-violence | not fighting back |
| Olympic | a world gathering for sports |
| paddle | a long flat stick to make a boat go |
| parade | marching bands and many people |
| patient | one who is ill |
| performance | a scene done by an actor |
| plasma | the fluid part of the blood |
| preaches | tells others about God |
| products | things grown or made in a place |
| register | to enter in a record book |
| Republic | a kind of government run by the people |
| Shakespearean | anything about William Shakespeare |
| sharecropper | one who farms for someone else |
| Sierra Leone | a country in West Africa |
| skilled | knowing how to do a thing well |
| slave | a person who belongs to someone else |
| spirituals | songs created by the American Negro |
| stride | to take long steps |
| surgeon | a doctor who operates |
| tennis | a game played with a small ball |
| uniform | special clothes worn by certain people, like soldiers, or sailors, or nurses |
| university | a place of high learning |
| Virginian | one born in Virginia |

# Word Games to Play

King — Match Column A with Column B

| -A- | -B- |
|---|---|
| 1. To take a long step | preaches |
| 2. Not to fight back | non-violence |
| 3. To tell others | stride |

Banneker — Fill in the right word:

1. Armies put their men in _____.
2. Information about the seasons is found in an _____.
3. Children like to see a _____.

Cuffee — Choose the right word:

1. English people formed a (colony, college, company) in Sierra Leone.
2. Paul Cuffee took families to (Sierra Leone, England).

Carey — Match Column A with Column B:

| -A- | -B- |
|---|---|
| 1. Lookout | one who is sold |
| 2. slave | one who is sent |
| 3. missionary | one who watches |

Roberts — Which is the right answer?

1. Liberia is in (a) West Africa (b) South America.
2. A republic is a (a) government (b) news report.

Aldridge — Put a new word before each phrase:

1. _____: a preacher.
2. _____: written by Shakespeare.
3. _____: a character in a play.

DuBois — Fill in a new word:

1. A person who farms for another is a _____.
2. Several colleges form a _____.
3. People meeting to discuss something make a _____.

Burroughs — Finish each sentence:

1. Church services were held in the _____.
2. Clean your house with a _____.
3. An _____ helps another group.

White — Answer TRUE or FALSE:

1. A conductor runs a train. _____
2. To lynch is unlawful. _____
3. A mob is hard to control. _____

Drew — Find the right word:

1. A _____ must have a _____.
2. Blood _____ went to the _____ ___ _____.

Barthe — Choose the word that rhymes with:

1. dust _____ 2. play _____ 3. dew _____

Dunham — Who gives each performance?

1. At the circus, you see a performance by a _____.
2. On the stage, the performance is by a _____
3. In the ball park, the _____ give a performance.

Smythe — Use a new word for the word underlined:

1. Labor schools teach persons to work.
2. Ships carry things between America and Africa.

Bland — Answer YES or NO for each question:

1. Are you a Virginian? _____
2. Do minstrels sing and dance? _____
3. Can you register to vote? _____
4. Can you name two spirituals? _____

Williams — Find the name for:

1. A shoe mender _____
2. A heart mender _____
3. A tooth mender _____
4. A car mender _____

Henson — Put a new word in each sentence:

1. _____ people have their own language and customs.
2. Much ice is in a _____ land.
3. I like to _____ new places.

Bethune — Find a different word for:

crates _____ skilled _____

Maynor — Put the new word before each line:

1. _____ is an old school in Virginia.
2. _____ is located in the city of Hampton.
3. _____ has trained many African students.

Owens — Answer RIGHT or WRONG:

1. Owens set an Olympic record. _____
2. Owens ran in the Olympic games. _____
3. Owens was not on the Olympic team. _____

Gibson — Choose the right word:

1. Althea played (paddle, deck, lawn) tennis on 143rd St.
2. She became very good in (track, swimming, tennis).
3. She won (movies, medals, ribbons) for her playing.
4. Winning over others makes one a (coward, champion).

# LAUBACH LITERACY FUND, INC.

FRANK C. LAUBACH, Founder and President

January 11, 1965

Mr. James Farmer
CORE
638 Park Row
New York 38, New York

JAN 12 1965

Dear Mr. Farmer:

As you well know the problem of adult illiteracy is a major problem in our nation. For that reason the interest of CORE in combatting this problem is of national importance.

For more than thirty years Dr. Frank C. Laubach and his collegaues have been involved professionally in attacking the problem of illiteracy throughout the world. During this time Dr. Laubach and his colleagues have prepared literacy materials in 311 languages in 101 countries, including English for the United States. Since 1947 we have been involved in literacy programs in the United States. Most recently we have continued to develop our Ladder of Literacy materials to bring adults to the stage of functional literacy.

For this reason I am writing you to explain our interest in exploring with CORE the use of our skills in combatting illiteracy. Our areas of specialization are (1) Teacher Training and (2) Materials Development.

We would be pleased to meet with you or your staff in New York or Washington to explore with you a plan for attacking literacy in the United States more fully and in detail.

Sincerely yours,

Richard W. Cortright
Director of Education

Mr. Richard W. Cortright
Director of Education
Laubach Literacy Fund, Inc.
2000 P Street, N.W.
Washington, D.C. 20036

Dear Mr. Cortright:

Thank you very much for your letter of January 11th, addressed to Mr. Farmer, which has been referred to me since Mr. Farmer is in Africa for several weeks.

CORE is vitally interested in initiating a program to help combat the problem of illiteracy in the United States, and hopes to implement this program through our chapters throughout the country. We have been working with Dr. Myron Woolman for the past several months in adapting his Accelerated Progressive Choice reading program to our needs.

We very much appreciate your interest in our activities in this area and your offer to work with us in developing a detailed plan. We, of course, know of the fine work of Dr. Laubach in pioneering new methods for teaching literacy skills and of the success of his "each one teach one" projects in India and throught the world. We do feel, however, that the slightly different emphasis and approach of the Woolman program make it better suited to our needs.

If, in the future, we find that our program has become broad enough to utilize more than one method, we will certainly contact you. Again, many thanks for your interest.

Sincerely yours,

Nancy Mutarelli
Staff Associate

# PROPOSAL FOR IMPLEMENTING A NATIONAL LITERACY PROGRAM

TO: The President

FROM: James Farmer

(A draft of a proposal to be submitted to the Federal Government for the establishment of the Center for Community-Action Education. The purpose of the Center will be to mobilize the forces necessary to organize and implement a national drive against illiteracy. In addition to this text there will be a title page, an index, a synopsis, a summary state, a budget, and appendices. The finished proposal is to be forwarded to various U.S. Government officials by James Farmer on behalf of CORE.)

> "The loss of one year's income due to unemployment is more than the total cost of 12 years of education through high school; and when welfare and other costs are added, it is clear that failure to take... steps will cost us far more... . There is no more profitable investment than education, and no greater waste than ill-trained youth."
>
> John F. Kennedy

The Congress of Racial Equality (CORE) is aware of the tragic millions who are imprisoned behind the bars of illiteracy and ignorance. Millions of Americans live marginal existences in poverty because they lack the basic educational and training tools to escape. As civil rights agencies worked to release America from the bondage of racial segregation, we now have the obligation to end the bondage of ignorance.

Illiteracy and undereducation prevent millions of Americans from finding gainful and productive employment. Without basic educational skills they cannot participate effectively in our democracy, cannot be trained for jobs in our increasingly technological society, and are prevented by the life circumstances in which they are imbedded from taking steps to further their education and skills. The ability to read and write is essential to functioning effectively within the American context. Therefore, providing minimal educational skills is a necessary preliminary step for moving out of poverty and out of the ghetto. Unless America is able to provide the basic tools of literacy on a massive scale the success of the anti-poverty program is imperiled. To date, no literacy program adequate to meet the problem has been launched. As a democratic nation we must meet this educational challenge squarely.

A major national effort to provide literacy skills can supply the minimal educational and motivational requirements to enable this population to acquire further training, and in many cases, to move directly into new areas of employment. The task is enormous, but we are convinced that there is available the necessary combination of ingredients to virtually eradicate illiteracy in the United States. To do this job, we must tap the enormous unused resources now lying fallow in the communities themselves.

## Objective

Changing events present new perspectives both to men and nations. CORE sees the years ahead as imposing new responsibilities in addition to those it now has.

We propose that a major national drive be launched to attack the social sore of illiteracy. This effort must combine (1) the power of Americans acting within their communities spearheaded by the dynamic thrust of the civil rights organizations, (2) the research and educational capabilities of leading educators and psychologists working within the framework of a major university, and (3) the participation of various arms of the Federal Government committed to the elimination of poverty. These combined forces could in two years of operation raise approximately one million functional illiterates to a sixth-grade reading level through the utilization of volunteer literacy instructors.

## Requirements for an Effective Program

To implement an effective national literacy program six essential ingredients are required:

1. A social force adequate to penetrate the population most in need of literacy skills.

2. A method for developing literacy which can produce substantial results on a massive scale and which can be taught by non-teachers.

3. A large group of persons able to serve as volunteer instructors.

4. A structure able to administer and supervise the program.

5. Community facilities made available for instruction.

6. Adequate funding to plan, operate and direct.

Social Force

A national literacy program can succeed only if it has the ability to reach those persons who are most in need of literacy skills. That is, we must have the ability to reach, motivate and train the most deprived, the poorest and least motivated segments of our society.

We are striving, then, to reach a population which, for various reasons, did not respond to traditional educational methods or which was denied the opportunity of availing itself of an education. Most illiterates presently are beyond the reach of educators and the schools. Due to their past failures and consequent feelings of inadequacy they cannot or will not again attempt to seek an education through presently available means.

We must, therefore, establish contact with this population through those people with whom they have lived and in whom they have confidence. We must motivate and train through institutions which are currently satisfying physical, social and psychological needs.

Due to the advances gained through the civil rights movement within the past decade, civil rights organizations are in a unique position to reorient and train large segments of the Negro community. In fact, if they do not meet this challenge they will be delinquent since once having given rise to hope within the Negro community they now have an obligation to translate that hope into programs which will be both socially and economically meaningful. Likewise, churches have the potential to reach and teach immense numbers of illiterates. Many unions have members who could benefit from such a program if the program were operated within the union itself. Further, employers could provide literacy within the plan to simplify the development of job skills. There are literally thousands of fraternal organizations, community agencies and other groups which could provide training in literacy if given the proper techniques, support and rationale.

Civil rights organizations, unions, churches and others do have the ability to reach most of those who are in desperate need of basic education for survival. These groups can and must rise to the challenge of training the populations with which they have established rapport. Unless such action is taken, these illiterates and poverty stricken populations will remain in poverty and will continue to exist at great social and economic cost to the society.

The National Association for the Advancement of Colored People, the National Urban League and other organizations have already expressed their enthusiasm for this proposal and their willingness to cooperate in bringing it to life. These organizations, along with CORE have had astonishing success in motivating and training the hard-core population that is most in need of literacy skills and jobs. These organizations, the churches and other national and regional organizations have already existing regional and local administrative structures which readily become the operational super-structure for the literacy program. Even more important, they have the commitment to do the task and the energy and social force which will permit them to reach those who cannot be reached through any other means.

Method

The technology used for literacy training must be able to provide substantial reading-skill gains in populations which are considered to be difficult to teach. The literacy materials must be designed so that volunteer instructors who lack professional training as teachers are able to use them with no difficulty. It must be available for mass use and must relate to the social and educational needs of the trainee. Specifically, the required literacy training technique must satisfy certain crucial criteria. The techniques must be:

1. suitable for use in non-school settings;

2. designed to be used effectively by persons with high school educations;

3. appropriate for use in groups varying from 1 to 30 in size;

4. consistent with the interests and values of the learner population, thus stimulating involvement in the learning process;

5. intrinsically motivating, thus, resulting in a lower proportion of dropouts by giving students feelings of accomplishment;

6. relatively inexpensive to purchase in quantity; and

7. appropriate to serve as the first phase in developing job interests and job skills.

CORE has investigated various literacy methods carefully and feels that The Accelerated Progressive Choice (APC) Reading Program, developed by Dr. Myron Woolman of the Institute of Educational Research in Washington, D. C., holds the best possibility for success and comes close to meeting the above criteria.

The APC Reading Program is a carefully programmed approach to developing literacy skills which presents the material to be learned in small, readily digestible units. The learner realizes a high rate of success throughout the program, and as he progresses from one phase to another he becomes a student-instructor. He is able to proceed at his own rate

with materials which have been tailored to meet the peculiar requirements of his circumstances. The method is, in fact, designed specifically for those who have not responded to traditional educational methods.

The Woolman method has been extensively tested, using mental retardates through grants from the National Institute of Mental Health. It has been used in public schools in a number of states. In a recent test with pre-dropouts (underachieving students) in a junior high school in North Carolina, very impressive results were achieved. In six classes averaging over 25 students per class, 51.2 hours of instruction in APC resulted in a mean reading gain of 1.2 years per student. Just as striking is the interest, involvement, discipline and motivation of both students and instructors. Dr. E. Terry Schwarz of Bank Street College of Education in New York City made the following comments in a report at the conclusion of a study using APC during the summer of 1964:

> The observed reactions of students to the program were overwhelmingly positive.... It is not overstating to say that almost every youngster at some time finished a book toward the end of an instructional period and was asked if he wanted to stop or go on. The decisions were unanimously in favor of continuing immediately. In one group, where instruction was on a one to one basis and in three hour blocks of time, the students wouldn't take a break and tutors finally would ask for one.....

While CORE does not feel that this literacy proposal should be limited to the use of any one technique, we are convinced that The Accelerated Progressive Choice Reading Program is a highly functional tool which offers the best method now available for non-teachers to teach the educationally and socially deprived.

## Instructors

Central to this proposal for a national literacy campaign is the availability of literally thousands of part-time volunteer instructors who will be selected on the basis of the following qualifications:

1. High school graduate or equivalent in reading-achievement level.

2. High degree of motivation to work with deprived persons.

3. At least four hours a week to contribute as an instructor.

4. Ability to follow instructions, adhere to work routines and to accurately complete periodic reports.

5. Ability to cooperate with others in performing coordinated activities.

The organizations which will be affiliated with the literacy-action program have extensive experience in recruiting, organizing and utilizing volunteers. Present plans call for the recruitment of many literacy instructors from the dropout and potential dropout population. Retired teachers, housewives, students, church members and union members are additional sources of volunteer literacy instructors. Literacy trainees who complete the literacy program will likewise become candidates for the job of Literacy Instructor. Since we project a training period of only 150 hours to reach the required reading-achievement level, we expect a constantly expanding number of volunteer Literacy Instructors (LIs). Although this proposal has received practically no publicity, CORE has been flooded with offers of assistance from many individuals and agencies. The combined resources of the many organizations that have expressed an active interest in this proposal could produce adequate volunteer LIs in communities of all sizes within every state of the nation.

The Proposed Community-Action Structure

We propose that this national literacy effort be spearheaded by the civil rights groups in coordination with Howard University. A Center for Community-Action Education would be set up within the University for this purpose. All activities of the National Literacy Program would be planned, directed and coordinated from the Center. The Center would have the responsibility of assuring that:

1. Research was performed to advance and improve the development of literacy methods suited to the needs of the National Literacy Program.

2. Suitable literacy-training materials were developed in accordance with the needs of the population being trained.

3. Educational, psychological and governmental resources were coordinated to optimize the efficiency of field operations.

4. Specific problems were isolated and given attention by "Task Forces" selected to make recommendations for the solution of "Community-Action" problems related to literacy and education.

5. There were suitable techniques for implementation, direction and guidance of the National Literacy Program in the field. These tasks would involve such problems as:

   a. coordination of the cooperating national and regional organizations,
   b. screening and selection of communities and community agencies for participation,
   c. training of Literacy Instructors,
   d. supervision and quality control of instructors,
   e. coordination and quality control of local community training programs,
   f. evaluation of training programs, and
   g. trouble-shooting methods to detect problems and strengthen training methods.

6. Extension of the literacy-training program to provide greater employability and increased awareness of social heritage and civic responsibilities.

Thus, the Center would constitute a merger of the research, educational and technical genius of the nation combined with the social-action capabilities of existing and proven national organizations. The Center would be the vehicle for merging the prime ingredients necessary for an effective national literacy program, i.e., educational methods, instructional resources, community facilities, funding, and a broad base of popular support.

Through the Center for Community-Action Education any community or community agency in the nation would be able to institute a local literacy-training program as long as the community or agency could demonstrate its ability to (1) supply LIs, (2) carry on a sustained and stable program coordinated with other agencies in the community, (3) provide adequate physical facilities for the literacy-training program, and (4) serve all elements of the community without regard to national origin, color or creed.

Howard University, because of its location, history as a pioneer for the educationally disadvantaged, and its deep commitment to the improvement of the status of the socially deprived, is viewed as the ideal setting for the Center for Community-Action Education. In addition to these factors, Howard University offers resources for further research and development through its existing staff and facilities. Above all, the concept of the Center for Community-Action Education is particularly congenial to the purposes and goals of Howard University. Its location, in this context, is viewed as having symbolic value as an assertion of purpose and dedication to the cause of education for the underprivileged. The Center would operate within Howard University and utilizing its facilities and personnel where possible. However, it would be free to pursue its objectives within those limits agreed upon by the Board of Trustees of the University and the Board of Trustees of the Center.

The type of program which the Center plans to undertake is a natural extension of many programs now in effect at Howard University. The Center would initially concentrate on producing literacy skills on a mass basis, and would be limited to education and training problems at all levels, in coordination with Howard University. The Center would strive to support research, development, and training to extend the capability of those persons who finish the literacy training. The Center would use all available resources from the University, across the nation and the world to develop techniques and methods to improve the efficiency of community-action systems of education and training. The goals would be to meet the total needs of the person emerging from illiteracy into the world of employability, and to develop the most efficient means of moving persons into positions where they could satisfy their responsibilities as citizens and employees in a world of constant change.

## Community Facilities

Most facilities will be outside the public-school structure; therefore, adequate facilities for training will be required elsewhere. It may well be that, in many cases, settings quite dissimilar from the typical school classroom will be necessary since many literacy trainees associate their schooling and the school itself with feelings of deep personal failure. Church basements, lodges, clubrooms, "Ys", union halls, plant facilities and community centers should make excellent training sites in many areas. The local sponsoring community agency will have the major responsibility for soliciting and providing the facilities which in many communities will be made available through the cooperating national organizations.

The specific requirements for the training facilities are:

1. accessibility to the population to be trained.

2. adequate space to seat the training group comfortably.

3. sufficient quiet and freedom from distraction to permit focus on the task.

4. sufficient lighting to permit performance of the work.

## Funding

If the National Literacy Training is to reach those persons who are most in need, the program must have broad-scale financing, independent of individual local communities. It is possible to minimize costs through the use of volunteer LIs and free community facilities. However, if we are to train a million persons in such a national program, the costs will mount to a level where federal support appears to be required. In a volunteer program a large supportive staff is essential. Costs per individual are expected to be very low. On a large scale, the average cost of developing a sixth-grade reading level in an illiterate is expected to total less than $50.00. If we are to reach one million persons with literacy skills in a two-year period, the cost over the two years of operation should total less than fifty million dollars.

In view of the severe educational crisis facing America, an immediate and massive attack is justified at a national level. If we are to make appreciable progress on the elimination of poverty in the near future, we must reach the hard-core masses of underprivileged who are being bypassed by the present programs. In view of the magnitude of the project proposed, our estimate of 50 million dollars represents a relatively small sum as compared with other expenditures now being made. Further, the results which appear possible are sufficient in scope, and within a population sector, which makes the cost minute in comparison with the ultimate savings which can be anticipated when persons shift from illiteracy to literacy. Beyond the practical investment involved in getting these people from dependency into jobs, the funding of this venture offers a unique opportunity to provide support where it is most needed, and to those who need it most.

This task is visualized as national in scope. It sets up a new structure, the Center for Community-Action Education, which is expected to supply our nation and the world with methods and techniques for overcoming ancient hostilities and misunderstandings. It will pioneer new educational and training methods specifically adapted to the needs of our age, and will at the outset, provide literacy skills to a million Americans.

This new force, the Center for Community-Action Education, is called for by the problems of our time. As part of its function, it will help to overcome problems inherited from the past. Its estimated cost appears to be quite low in comparison with the gains which it promises to give to all Americans.

James Farmer

## Part II

### The Howard University Center for Community-Action Education

The Center for Community-Action Education is planned to increase the potential of community-action education and training. The Center will be uncommitted to specific educational methods or techniques except as they can demonstrate their value as tools for improving community-action education. Initially the Center will emphasize the planning, research, development and implementation of the National Literacy Project. It will also develop, at a later point, educational and training systems aimed at improving the ability of each community to provide a better economic and cultural base for its members.

Ultimately, the Center is expected to provide assistance for planning and organizing methods of re-training to maintain and improve the employability of workers with (1) obsolete job skills, (2) low skills which can be upgraded, (3) skills limited to particular geographic areas, etc. In all cases, the Center will attempt to provide each community with methods and techniques best suited for its particular local problems.

### Structure of the Center

The Center will consist of four operational arms: Planning, Research, Development and Community-Action.

1. Planning

   This division will map out over-all plans and strategies. It will coordinate the three other arms and also will act as a resource for them. It will sponsor conferences, seminars, workshops and other activities aimed at solving community-action problems.

2. Research

   The Research division will develop a theory of community - action research and perform experimentation directed to improving the efficiency of the processes of human learning and to narrowing the gap between potential and performance, with emphasis on literacy techniques and other projects of the Center.

3. Development

   This division will design and prepare educational materials suited to the requirements of the spectrum of community-action problems.

4. Community-Action

This division will be responsible to carry out the program developed by the three other arms. It carries the techniques directly into the community.

Control of policy will rest within a Board of Directors consisting of designated personnel from the staff of the Center and Howard University, representatives of the civil rights organizations and appropriate representatives drawn from the fields of education, psychology, business, labor, religion, etc.

In addition to the Board of Directors, there will be an advisory committee consisting of a panel of experts also drawn from such disciplines as economics, social work, psychiatry, psychology, etc.

The Center itself would be headed by a Director who would also serve as Director of Planning; an Associate Director for Research and Development; an Associate Director for Community-Action; and an Administrative Director.

Operation of the Center

The National Literacy Project will take place in three successive stages. These are: (1) Planning stage, (2) Operational stage and (3) Extension stage. Each of these stages will be discussed:

Planning Stage

During the planning stage the Center will plan new research and continue the development of existing programs to meet the requirements of the functionally illiterate populations to be trained. Also, the Center will further develop and extend pilot projects such as the ones now being started under the auspices of the Congress of Racial Equality. During this first period the Center will begin to hire and train personnel for the supervisory field apparatus, later described, and for the training of volunteer Literacy Instructors. Physical facilities for the Center will be established and systems set up for data processing and quality control of the field operation. Initial selection of communities in which the literacy program would begin will also take place in this planning stage.

Operational Stage

By the end of the planning stage, the Center will be in position to begin the National Literacy Programs in at least a score of communities across the nation. In this stage, the entire field apparatus will be activated. This apparatus consists of three main classifications of personnel: (1) Community Organizers, (2) Literacy Instructor Trainers (LITs) and (3) Field Supervisors.

Community Organizers

Community Organizers will serve primarily to investigate and screen those community organizations which express interest in having literacy programs. The organizer will evaluate the particular community agency and the community itself in terms of pre-established evaluational methods. It will be his function to obtain the data and forward it to the Center. The Center will then be in a position to decide which communities will best meet the conditions required for the operation of the program. Once the decision has been made the Community Organizers will also serve to stimulate interest in the literacy program, and to interpret the aims of the Center to a wide audience.

The Literacy Training Section of the field operation will consist of those persons responsible to guide and direct the initiation of the program in the local community. It will be their responsibility to insure proper training of Literacy Instructors, work with local organizations, and monitor the literacy program in its initial weeks of operation, to insure that it is functioning properly.

The supervisory staff will operate at three levels:

1. Supervisors
2. Project Coordinators (PC)
3. Volunteer Coordinators (VC)

Since literacy instruction will be performed by volunteers, a careful system of supervision is required to insure that the program maintains its quality and continuity of operation in each community. The echelon immediately above the volunteer Literacy Instructors (LIs) will be the Volunteer Literacy Coordinators. The VLC will be responsible for supervising the activities of from five to ten LI's. He will insure (1) that the students are instructed properly, (2) that the instructors are carrying out their responsibilities as scheduled, (3) that the facilities used for the training are given adequate care. It will also be his duty (4) to contact those students who drop out of the program and try to straighten out their problems, and (5) to carefully report to his supervisor difficulties which he sees in the functioning of the project and to make recommendations for project improvement. For each group of Volunteer Literacy Coordinators there will be a Project Coordinator. Project Coordinators are expected in large part, to be drawn from among the LIs themselves. As these are paid positions, the National Literacy Program would provide a limited number of jobs for persons indigenous to the community. In the echelon above the Project Coordinators would be a staff of professional Supervisors, they would generally supervise, trouble-shoot and oversee the program across fairly large geographical areas. It would be their responsibility to see that all data and other information on local projects get to the Center. This National Literacy Program supervisory staff will be organized on a local, state, and regional basis.

In the operational stage the National Literacy Program should quickly move into high gear and spread rapidly across all regions of the United States. During this phase we expect to build an expanding system (in which students become instructors) and ultimately provide a million persons with literacy training.

Extension Stage

During this third (expansionary) stage of operation, in addition to the continuation of the literacy program, the scope of the Center will be expanded beyond the goal of providing a sixth grade reading capability. While for many persons a functional sixth grade literacy level will provide stimulation to seek further education and broader employment opportunity this literacy level will also provide a base for seeking higher employment skills. Various experimental programs will be carried out during this extension stage. These experimental programs will include such methods as: (1) vocabulary expansion programs, (2) verbalization programs, (3) English composition programs, (4) arithmetic concepts programs, and (5) vocational skill programs including electrical repair, mechanical equipment repair, etc.

These experimental pilot projects are to be carried out using experimental groups of students who have established a minimum sixth grade reading level.

The Center's Research division, during this stage, is also expected to experimentally produce training techniques for obtaining high school equivalency in a very short period of time.

We propose the following schedule for the duration of the various phases:

Stage 1. To begin as soon as funding permits, and to continue for six months.

Stage 2. To begin at the conclusion of Stage 1, and to continue for approximately 24 months.

Stage 3. To begin after 18 months of Stage 2.

The Literacy Instructor (LI) (Summary Job Descriptions)

The Literacy Instructor is the core of the literacy program. It is he who will be in constant contact with the trainee. To the extent that the LIs are successful, the Center will be able to make gains in reading and writing ability. However, since the literacy training material is expected to be programmed and largely self-instructional, we will be working with a system that is efficient to the extent that LIs perform each step as required. LI's must also bring enthusiasm, involvement and dedication as many students will require emotional support as well as instruction in reading. However, the academic background of the LI may be relatively low; he may not have completed high school and may be a housewife or in an unskilled job situation. Many LIs will in

fact, gain as much or more from the National Literacy Program as their students because of the requirements for planning and scheduling and attention to language skills. We are hopeful that many LIs will become motivated to seek careers as teachers.

In Part I of this proposal the qualifications of the LI were specified.

The specific duties of the Instructor are:

1. to give instruction using materials supplied to him.
2. to recruit trainees.
3. to help secure facilities in which to carry on instruction.
4. to maintain and periodically submit all necessary records and reports.

Prior to the time the LI is expected to begin instructing, the Center will train him for the above duties. In the case of highly educated and motivated persons the time required for training will be minimal - perhaps 10 hours. For persons with little experience in working with others and for those who may have only a tenth grade reading capability themselves, the training period may extend up to 25 hours.

In a given city for example, we could start with an initial cadre of 40 potential LIs. Within a week most would have completed their training. We expect 25% attrition so that of the original 40, about 30 would become Literacy Instructors. The others will have dropped out or been unacceptable for a variety of reasons.

If sufficient literacy training recruits had not already been located and if adequate training facilities had not been secured, the first assignment for most of the LIs in this illustrative community would be recruitment of students and facilities. As trainees are increasingly recruited, a larger portion of the LIs would begin instruction, and a correspondingly smaller proportion function as recruiters. Some LIs will perform in both capacities, and some will function in one or the other. Eventually we can expect a high proportion of LIs to become regular instructors and others will continue to recruit on the basis of demonstrated merit. Some proportion of LIs would become Volunteer Literacy Coordinators or even join the field staff of the Center.

The number of LIs in this hypothetical community is expected to expand. Others can enlist in the project for LI training and can be trained in their LI duties by experienced Instructors. Likewise, as trainees move ahead in the literacy instruction, many of them will become student-LIs in from 30 to 100 hours of instruction as provided for in Dr. Woolman's reading method, depending on their initial level. Upon completion of the training program they can perform as LIs and instruct their own groups. In this manner, in any community, the number of LIs (and trainees) can continue to expand.

Trainee Recruitment

The recruitment of LIs in sufficient numbers to mount the program is not expected to constitute a major problem. Recruitment of large masses of literacy trainees is expected to pose the Community-Action arm of the Center with its greatest challenge. For this reason the support of the civil rights groups and other community agencies allied with them is of vital importance to the success of this project. The key to the recruitment of the functionally illiterate lies within the LI himself. As far as possible it will be desirable to select a majority of the LI's from essentially the same population group from which the literacy trainees will be recruited. These LIs will be trusted community members who have a ready rapport with the prospective trainee. Since one of the responsibilities of the LIs will be to recruit their own students and since a high proportion of the LIs will be neighbors of prospective literacy trainees, recruitment will be informal and should be both more economical and more successful than has been the case in typical community service agencies. The LI speaks the same language as the trainee, and offers a ready example of successful accomplishment for all to see.

As a result of these same factors and because the literacy training materials are designed to be intrinsically motivating, the drop-out problem is expected to be minimal.

Present planning calls for recruiting a large number of the initial LIs from the membership of the National Association for the Advancement of Colored People, the National Urban League, CORE, the Southern Christian Leadership Conference and the Student Non-Violent Coordinating Committee. Due to the involvement of civil rights organizations we expect strong initial support for this project, particularly for improving the literacy level of Negroes. However, it is most important that all coordinating organizations work on the principle that literacy training will take place without regard to color.

Dr. Myron Woolman
Director
Institute of Educational Research
2226 Wisconsin Avenue, N. W.
Washington 7, D. C.

Dear Dr. Woolman:

A number of our CORE chapters have expressed an interest in activating literacy programs in their own communities in line with CORE's community action policy. National CORE wholeheartedly supports their efforts and is intensly interested in the development of literacy projects under its own auspices for many vital reasons.

As you may know I have a deep personal concern for basic education. Further, it is my personal conviction that CORE has an obligation to launch a full scale attack on illiteracy as a necessary first step toward training programs and employability.

During the past year, I have had my staff investigating various reading methods. In the course of this effort, CORE has carefully investigated The Accelerated Progressive Choice Reading Program developed, and currently being tested by your Institute. The reaction has been extremely favorable. In our judgment your literacy method is very well adapted to maintaining the interest of culturally deprived school children (as in Charlotte, N.C.) and dropouts and is well suited for use in action projects undertaken by CORE chapters and other organizations which work directly in the community.

We are prepared to move ahead in cooperation with the Institute of Educational Research in developing literacy programs both in CORE chapters and in other community agencies. You may be assured that you have CORE's complete cooperation for the development of literacy programs in New York, North Carolina, and

other communities. Financial support for these projects has not been worked out, but we are deeply committed to the same literacy goals and hope that sometime in the near future CORE will be able to assist in raising funds for these projects.

It was a great pleasure to meet you. I look forward to a continued relationship with you and the Institute of Educational Research.

Sincerely,

James Farmer
National Director

Dear Nancy:

I am enclosing a copy of a letter to be signed by Jim Farmer to Dr. Woolman. Jim looked over the letter last week when I was in New York and asked me to make a change in the paragraph which deals with funds. I made the suggested change and would like very much to have Jim sign it and mail it to us right away.

Of course, if there are any other changes in the text that Jim would like to make that will be perfectly alright with us.

Sincerely,

Gordon R. Carey

Dear Jim:

I am writing to recap the CORE Literacy Project progress as I see it. I believe that the most important thing to be done at this point is to set up a conference here in Washington between you, Mike Woolman, Floyd McKissick and myself. If the national project that we have proposed to the President is to become a reality we are going to have to move ahead more rapidly than we have to date.

In regard to pilot projects within CORE, it is unfortunate that the Bronx experiment was such a big flop. However, by the end of this week we should know whether CCNY can produce, and I am also quite encouraged about the prospects in North Carolina. As Floyd pointed out, it appears to us that North Carolina holds great promise for a good pilot project. With the $5,000.00 that has been promised from IBM and the prospect of getting Western Electric to sponsor one or two projects we should be able to finance at least a limited effort without undue burden on either CORE or IER.

The incorporation is moving along and we should have the matter taken care of within a week. I am most anxious to set up the meeting with Shriver and Keppel before too much longer. Please let me know when you think we can hold these meetings. Also I would like your thinking on whether it would be better for me to set them up from down here or if you want to handle that from your office.

called 2/15-

The last thing is the meeting with the officials of the United Planning Organization in Washington. The UPO is the local poverty program here. Jim Banks, the Director, and Hy Frankel, his assistant, would like to meet with you to discuss the possibilities of a joint effort between UPO and CORE. If this were possible it could serve as the prototype of further CORE participation in local CAPs.

Please let me hear from you as soon as possible or have someone in your office pass on the information to me. Thanks ever so much.

Sincerely,

Gordon R. Carey
Research Coordinator

Mr. James Farmer
National Director of CORE
38 Park Row
New York, New York

Dear Mr. Farmer:

This month, Science Research Associates, Inc. will publish Reading in High Gear, a basic reading skills program written and developed by Dr. Myron Woolman of the Institute of Educational Research, Inc., Washington, D. C.

We are planning a conference to announce publication of the program to the press and would like to extend an invitation to you to attend. The conference will be held on Wednesday, February 24, from 10 AM to 12 PM in Room 313 at the International Business Machines Corporation Educational Center, 80 East Lake Street, Chicago.

Dr. Woolman will be our guest at this conference. Lyle M. Spencer, President of SRA, will act as host and Dr. Thomas Edwards, Senior Consultant in the Language Arts for SRA, will present Reading in High Gear.

It would be helpful in completing plans for the conference if you could let me know whether or not you will be able to attend.

I hope you will be able to join us on February 24.

Sincerely,

Frank S. Johnson, Jr.

*Statewide Program Moves Ahead*

By MONROE C. NEFF

# *ADULT BASIC EDUCATION IN NORTH CAROLINA*

NORTH CAROLINA FIRST—The North Carolina State Board of Education on November 5, 1964, became the first board in the nation to approve a state plan for adult basic education under the Economic Opportunity Act of 1964. The State Plan, along with the Plan of Operation and Budgets, was then submitted to the U. S. Office of Education. The adult basic education program is administered by Dr. Monroe C. Neff, Head, Division of General Adult Education and Community Services, and Assistant Director of the State Department of Community Colleges under the North Carolina State Board of Education. The Department of Community Colleges is directed by Dr. I. E. Ready. A Federal allocation of $819,068 will be used for administering this program through June 30, 1965.

PROGRAM PREPARATIONS—Beginning in August of 1964 and continuing through the first week of October, the adult education director had the opportunity to discuss adult basic education with representatives from each of the 100 counties in North Carolina. Seven regional Economic Opportunity meetings were held in the state during this period of time, and all phases of the Economic Opportunity Act were discussed with five representatives from each of the 100 counties. An adult educational panel discussed the program during separate one and one-half hour sessions with the representatives from each county. The purpose of these meetings was to alert the community leaders to the importance of including certain elements of the adult basic education program in their community action proposals. The main objective was to encourage each county to include as a part of its community action proposal a plan for recruiting adult basic education students. A question that constantly appeared in most of the discussion sessions was "Where can we get the necessary teachers for basic adult education when we already have a shortage of teachers in our public schools?" This question proved to be of little concern in the later phases of planning and preparation in the state.

MATERIAL SYSTEMS SELECTED—The state department personnel reviewed all of the seven so-called adult basic education material systems. The staff was concerned with finding programs that would be comprehensive in nature which would include the communicative and computational skills and also provide supplementary materials in these two basic areas that would be of interest to adults and related to their everyday lives. Such information would include consumer education, health, social studies, homemaking education, family relationships, and other areas that might be applicable in helping to make the person better able to meet his adult responsibilities.

Four basic adult education material systems were approved for use in North Carolina as the regular or non-pilot project instructional program. The four systems have been modified as such and are as follows: System for Success, Laubach, Words in Color, and Learning Laboratories.

- The System for Success is designed to teach adults and older youth the functional use of communication skills—reading, writing, spelling, arithmetic, and grammar—in six to nine weeks. It utilizes a basic vocabulary of 1,000 words.
- The Laubach Literacy Education Course of Study consists of 98 filmed lessons, each 30 minutes long, with instruction by an expert literacy teacher. It utilizes the "picture-word-letter" association procedure and a basic vocabulary of 1,000 to 1,700 words.
- The Words in Color System, developed in England, is now provided by Encyclopedia Britannica. It is estimated that adults can learn to read and write in 50 three-hour sessions with this system.
- The Learning Laboratories System, already in use in many institutions in the state, was developed in the Department of Curriculum Study and Research, North Carolina State Board of Education. It utilizes programmed instructional materials which allow each student to proceed at his own pace and on his own level, from basic reading, grammar and arithmetic, through the eighth grade

---

*This very timely article concerning a plan for North Carolina's statewide program of adult basic education was written by* DR. MONROE C. NEFF. *Dr. Neff qualified for his doctoral degree at the University of Wyoming. He taught in secondary schools in Jackson, Mississippi, for eight years and was director of adult and vocational education there for five years. He was also a member of the staff of the division of adult education and community services at the University of Wyoming and was recipient of a fellowship given by the Fund for Adult Education. He now serves as Consultant for Southeast United States for the U. S. Office of Education, Adult Education Branch, for Title II(b) of the Economic Opportunity Act.*

level. Teaching machines are not used in the program.

To be classified as a material system, two of the above programs had to be supplemented with other materials from about the 3.5 grade level up to the completion of eighth grade level.

If an institution wishes to use any other adult basic education material, a request in the form of a project proposal as listed in the State Plan will have to be submitted. A reserve fund is held for approval of special projects in designing or the use of other literacy systems.

TEACHER TRAINING INSTITUTES HELD—In October of 1964 planning sessions were held by the staff for programming initial teacher training institutes for the state. Through planning it was decided that it would be necessary to have between 20 and 30 teacher training institutes in the initial phase in order to have teachers prepared for the adult basic education program. The North Carolina State Board of Education approved contractual agreements with the Board for Fundamental Education to provide the initial teacher training institutes in North Carolina. An outline of a sixteen-hour teacher training institute was prepared. The universities and four-year colleges in North Carolina that have general extension divisions were asked to send two representatives from their faculties to audit the first series of teacher training institutes. It was required by the state department that the adults who planned to become adult basic education teachers should have as a minimum a baccalaureate degree in some discipline—not necessarily in education. It was felt that people at this ability level could be prepared to be successful teachers in this program.

Through news releases the teacher training program was announced and the response was overwhelming. The first teacher training institute began on December 17, 1964 in Durham, North Carolina. One hundred and twenty-five teachers completed this training institute. All of the teacher training institutes were scheduled for a three-day period. The majority were conducted consecutively on Thursday and Friday nights and all day Saturday. A few institutes were scheduled on Monday, Tuesday and Wednesday nights. The prospective teachers were not paid to attend these institutes and had to contribute their time and provide transportation.

Between December 17, 1964 and January 30, 1965, 24 teacher training institutes were conducted in North Carolina. Through these sessions over 3,300 teachers completed the sixteen-hour course. Prospective teachers were enrolled from all 100 counties in the state. Approximately one-half of those completing the institute were professional teachers, the other one-half being lay people with baccalaureate degrees. The institutes were designed to acquaint these prospective teachers with the overall problem of working with the undereducated adult. It was necessary before classes started that the teacher understand the characteristics that the teacher himself would have to possess. Approximately one-half of the training time was given to these important areas of general orientation. The last half of training was the actual discussion of materials and how these materials should be presented beginning with the first class meeting.

**THE TEACHER TRAINING PROGRAM**

**The teacher training program dealt with such topics as follows: the problem of illiteracy; its costs in prejudice, unemployment, in crime, to the national defense, and to the everyday life of the individual; variations in literacy among the states and among social classes; an examination of the characteristics of the illiterate individual; his impact on the community; responsibility of the community; student counselling and guidance; motivation for self-betterment; recruiting illiterates; desirable characteristics of teachers of illiterates; testing for literacy levels; curriculums for the new reader; records of student progress; assignments for home work; variations in schedule and methods; and goals of the teacher trainee.**

IN-SERVICE TRAINING PLANS—The next phase scheduled to follow immediately is that of in-service training. The 18 faculty members from the senior institutions in the state audited at least one of the teacher training institutes. Additional meetings scheduled with these professors will enable them to provide all in-service training and other teacher training in North Carolina. The in-service training teams will be called into action after the first five or six weeks of classwork. They will be responsible for meeting with small groups of 15 to 20 teachers for three and four-hour sessions in all parts of the state to help the teachers upgrade themselves so that they may present a quality program.

INSTRUCTION WIDELY AVAILABLE—The classes or learning teams for adult basic education are available throughout all 100 counties of the state during the morning, afternoon or evening. A large number of the groups are conducted away from public buildings. The state department is attempting to provide adult basic education during any time of day or night and conducted in any place that might be available and suitable where the adult student and teacher can be brought together as a learning team.

RECRUITING STUDENTS—The dynamic part of the entire Economic Opportunity Act to the adult education division personnel in North Carolina is the function that the community action programs throughout the state can provide in recruiting the hard-to-reach adult who is to be served.

Adult educators concerned with public education have a difficult time identifying and reaching this hard-to-recruit group. Most programs use only a broad "shotgun" approach for recruiting students. These methods include the use of the mass media, messages through utilities services, notices through milk deliveries, notices sent home by school children, and other standard practices. But through this approach the adult in the low socio-economic group is not reached. If only this type of program promotion is used, the adult basic education programs will not be too successful.

Of the adult population of the United States—roughly 120 million people—the adult education programs over the nation are reaching

## *Basic Education*

approximately one-half, or 60 million people, at the present time. The other 50 percent, or 60 million adults, are more difficult to reach. At the present time, adult education is serving the educated people—those that have education seek more education—but the lower one-half of our adult population is an undereducated group. These people really do not see a need for additional education.

Of the lower 50 percent, adult basic education might be expected to reach ten percent of this group without too much effort. These people are motivated to some extent and will come into programs with some encouragement because they see a need or have a reason for continuing their education. But what about the other 40 percent? It will be necessary to go out into the communities, door-to-door across the state and get these people into adult basic education programs so that they might be upgraded in order to pursue some occupational training which will enable them to profit self, family and community. Adult educators will be dealing with second and third generation welfare cases where they find that the adult completed the fourth or fifth grade and feels that this level of education is all that is necessary for his children. This situation points to one of the causes for our public school dropout problem. By changing the attitudes of these adults it is possible to improve the holding power of our public schools. Each community action program should be encouraged to budget funds under Title II-A of the Economic Opportunity Act to employ people to recruit adult basic education students.

PROGRAM EXPECTATIONS—North Carolina is fortunate to have the North Carolina Fund. This organization, financed by Ford and Carnegie grants, was developed a little over a year ago and is concerned with community action programs in North Carolina. The Fund sponsored community action programs in 11 project areas in the state. The organization is providing funds for 11 full-time recruiters for basic adult education programs for a three-month period. These recruiters are identifying undereducated adults for basic adult education programs in the project areas. Proposals have been submitted by these community action groups to the Office of Economic Opportunity for full-time people to recruit adult basic education students in all project areas who will replace these temporary recruiters. One community in North Carolina has 150 classes registered with 15 adults in each learning team. Other communities have equally large numbers registered for basic adult education classes. North Carolina expects from ten to twelve thousand adults in basic adult education programs throughout the state within the first four months of this program.

## THE BOARD'S PROGRAM

Throughout its ten-year history, the Board for Fundamental Education has been actively engaged in research, study, evaluation and experimentation. The purpose:

> the development and marketing of tested methods and materials to meet the special problems of the disadvantaged.

The Board's decade of experience in this field has been both unique and meaningful. Its Congressional Charter as a non profit, private organization places it under a mandate to apply this experience for the nation's benefit. It is prepared to do so, by assisting private and public agencies in their attack upon a problem which we know can be solved by this generation of concerned Americans.

A 14-page brochure titled "Bringing Basic Education To Undereducated Adults and Older Youth" is now available. The complete program of the Board and how it can assist state, community and local self-help projects throughout the nation is outlined in detail.

# READING IMPROVEMENT PROGRAM ADVISORY COMMITTEE

**PURPOSE:** To coordinate with local individuals, public and private agencies in the community, in order to: 1) recruit unemployed school dropouts between the ages of 16 and 22 not having a reading knowledge above the fifth grade, 2) help delinquent and illiterate boys and girls in our neighborhoods to amend their ways by raising their living standards, educationally, economically, socially and morally, and 3) mobilize local neighborhood leadership (from within) to search for young delinquents and encourage them to enroll and complete our Reading Improvement Program, which will substantially improve their reading levels, so that they may become self-sustaining and be eligible for more productive and higher paying employment.

**MEMBERSHIP:** The Reading Improvement Program Advisory Committee shall consist of ten (power and prestige) local lay leaders, chosen because of their concern for common neighborhood problems and a desire to do something about them. Not only have they been selected on the basis of their demonstrated abilities, but throughout the years, they have shown sympathetic insight, love and understanding for the unmet needs of those on the bottom rung of the socio-economic ladder -- those whose needs have been so systematically and so callously ignored in the past.

The ten members selected by the Literacy Counselor are:

1. Rev. Henry Miles, Pastor .... Third Baptist Church
2. Rev. T. Alexander Crawford, Pastor .. Mt. Joy Baptist Church
3. Rev. Ezerard Hudson Hughes, Pastor .. Mt. Jezreel Baptist Church
4. Rev. J. D. Foy, Pastor ... Asbury Methodist Church
5. Rev. Darneal Johnson, Jr., Pastor .. Mt. Sinai Baptist Church

6. Mr. William B. Cook, Carto Technician, Special Maps, Interior Dept.

7. Mrs. Irene S. Powell (housewife), Retired School Teacher

8. Mrs. Alma Hawkins, President, Interdenominational Ushers' Union

9. Mr. W. Harold Smith, Counselor, Cardoza Employment Center

10. Mr. Samuel Graham, President, Southeast Civic Association

**William S. Taylor**
**Literacy Counselor**

New York 38, New York

Dear Gordon:

I went over - with some care - the material that you and Jim Farmer wanted me to look at. It seems to me sound, as you realized I would say, since we have discussed this. As you know, I shall be moving to Washington the first week in April and will be at 1715 "N" Street, N.W. We should be in touch with each other as things go on.

Looking forward to seeing you soon.

Sincerely,

Allen Knight Chalmers
Executive President

Washington, D. C. 20007

Dear Mr. Carey:

I have the copy of the working paper you sent titled: "Proposal for Implementing a National Literacy Program." The overall purpose and design of the program seem to me to be quite sound and are aimed at attacking a very serious problem. My major reservation is that the program will rely solely on the Accelerated Progressive Choice (APC) Reading Program. I think that the APC Reading Program has considerable promise in the area of developing adult literacy. And, I understand that the method has been extensively tested. However, other materials and programs are being developed and tested and should be included in the proposal. I concur with CORE its feeling that the proposal should not be limited to the use of any one technique and assume that this will be taken seriously in the implementation of the proposal.

In the selection of instructors, you might include some kind of commitment to a specific length of time. Our experience with tutors has been that some of the initial enthusiasm and motivation is readily dissipated, especially if achievement results are not readily forthcoming. In the training program for the Literacy Instructors, I would hope that you would include continued in-service training and not simply an initial orientation program. Our experience with Homework Helpers in the Mobilization for Youth Program suggests that the continued weekly meetings with the tutors have been a very important ingredient in whatever success has been achieved.

The overall idea is an exciting and appealing one. I would certainly support its general design and intent despite the caveats I have suggested above. I hope you will keep me informed of future developments.

Sincerely yours,

A. Harry Passow
Professor of Education

Dear Gordon:

Because of the crises of the past weeks Mr. Farmer has been out of the office almost constantly, but he has seen your letter and memorandum of March 11th and asked me to reply.

Mr. Farmer must be in Washington on April 28th and will be able to arrange to get there a day earlier if you can set up a meeting for the afternoon of April 27th. Please let me know as soon as possible if this will be convenient for you.

Sincerely,

Nancy Mutarelli

MAR 1 2 1965

Dear Jim:

I am enclosing a brief memorandum on my meeting this week-end. The most interesting aspect of it was the possibility of the National Council of Churches cooperation with a Prince Edward literacy project. Mike and I will be in Prince Edward on Wednesday and will keep you informed.

I am enclosing a copy of our Certificate of Incorporation. We will need to have a meeting of the Board of Directors -- you, Woolman, McKissick, Spencer and myself -- as soon as possible. Please have Nancy let me know what date you may be available. We could meet either in New York or Washington, D. C. I believe that the Board meeting will require about one-half day.

It is urgent that we have this meeting in order to organize the corporation and establish by-laws, etc. In order to get tax exemption we must begin to operate. The $5,500.00 contribution from Lyle Spencer arrived Monday morning March 8. As you recall, this money is to be used by the Center for the joint CORE-IER projects. As soon as the Board of the corporation meets we can establish a bank account and have the funds transferred.

Mike and I have another meeting with Nelson and Nabrit sometime this week. Copies of the Center proposal were sent to Howard University, Spencer and various other persons early last week. In a day or two we will be sending out the proposal to a number of other persons for their comments. I will send you a copy of the covering letter as well as a list of those persons to whom we are sending the proposal.

If there is anything that I can do for you or CORE in Washington I will be more than happy to do so. I am in constant touch with a number of government officials in various agencies and may be able to be of service from time to time.

Best wishes,

Gordon R. Carey
Research Coordinator

MEMORANDUM

TO: James Farmer, National Director CORE

FROM: Gordon R. Carey, Educational Consultant

SUBJECT: Conference on the Role of the Returning Peace Corp Volunteer

PLACE: Department of State, Washington, D.C.

DATE OF CONFERENCE: March 5, 6, 7, 1965

DATE: March 11, 1965

At your request I represented CORE at the Peace Corp Conference called by Vice President Humphrey. I had expected to see George Wiley there, but did not see him.

The Conference included approximately 1,000 returned Peace Corp Volunteers as well as hundreds of representatives of federal, other governmental and private agencies.

At the reception Friday evening I greeted the Vice President and thanked him for referring us to Hy Bookbinder and Lyle Carter. Woolman and I also chatted briefly with Bookbinder and Ambassador Franklin Williams.

I was assigned as a consultant to one of four workshops on the Local Community. Assistant Attorney General Burke Marshall and Professor Leonard Fuchs chaired the workshop of which I was a member. There was some discussion of literacy programs in the local communities but most of the discussion centered around more traditional civil rights activities.

Among other consultants present were Robert Pickus of Turn Toward Peace and Jay Moore, Associate Director of The Commission on Religion and Race of the National Council of Churches. I discussed with Moore at length the possibility of Council of churches cooperation with a literacy program in Prince Edward County. He expressed a good deal

of interest and suggested that the Southern Presbyterian Church has recently contacted him about involvement in some such program.

Dr. Woolman and I will be in Prince Edward meeting with the American Friends Service Committee and Rev. Griffin on March 10 and will shortly there after submit a proposal to the National Council of Churches for a church subsidized literacy program. If it meets with your approval we will suggest that the project be done by the Center for Community-Action Education in cooperation with the Institute of Educational Research and the Southern Presbyterian Church.

Mr. Gordon R. Carey
Editorial Consultant
Institute of Educational Research, Incorporated
2226 Wisconsin Avenue, NW
Washington 7, District of Columbia

Dear Gordon,

Responding to your request of February 12 for a grant to the Institute of Educational Research, Incorporated, to conduct a controlled experiment on using volunteers for training purposes to improve the reading ability of culturally deprived youngsters, The Spencer Foundation is glad to make a grant of $5,500.

I assume that these funds will be spent approximately along the lines of your outline study and the budget you submitted.

I think that CORE has a brilliant idea in its proposed literacy training program. The specific purpose of this study, as I understand it, is to find out whether the idea can be made to work on a large scale.

SRA SCIENCE RESEARCH ASSOCIATES, INC.
259 EAST ERIE STREET, CHICAGO 11, ILL., WHITEHALL 4-7552

The key to the study will be, of course, setting up a rigorous experiment that will provide hard data that could be replicated later by other investigators. I would hope that you would use a control group in parallel with your experimental students.

If the study proves successful, you will have data of potentially great value for generalizing this type of work all across the United States and probably in many other countries as well, particularly the underdeveloped ones.

The best of luck, and I hope you will keep me posted on the progress of your experiment.

Sincerely,

Lyle M. Spencer

Enclosure: The Spencer Foundation check 921, dated March 5, 1965, for $5,500.00, payable to the Institute of Educational Research, Inc.

March 9, 1965

Mr. Lyle Spencer
President
Science Research Associates
259 East Erie
Chicago 11, Illinois

Dear Lyle:

Your generous contribution arrived on Monday. We were most elated to have the CORE projects funded. It is very rewarding to see you so deeply committed to this type of effort. I am certain that the success of the projects in New York and North Carolina will more than justify your generous effort.

As I indicated over the telephone we have incorporated the Center for Community-Action Education. Enclosed you will find a copy of our certificate of incorporation. You will recall that at the meeting with Howard University we indicated that we would proceed with the incorporation. At the time we enter into a relationship with the Howard University we can either enter into a contractual agreement or the corporation can simply be dissolved and the Center established by the University. As it is, the Center will be able to carry on a good number of activities without awaiting federal funds. I am confident that private income of a fairly substantial nature will be available to us.

I have written to Farmer asking him for possible dates for the first Board meeting. As soon as I hear from him I will be in touch with you and Floyd McKissick. A number of items of business should be taken care of at this first meeting. Among them are: adoption of by-laws, nomination for additional members of the Board and organizational matters such as election of officers and establishing a routine for further meetings.

By the time you receive this letter Mike and I will have been to Prince Edward County, Virginia. Bud Edwards can fill you in on additional background on the situation there. We will be meeting with the Rev. L. Francis Griffin and the representative of the American Friends Service Committee. I have also spoken with the Commission on Religion and Race of the National Council of Churches about funding a literacy project in Prince Edward. It seems to us that the reactivation of Prince Edward could be the project which could dramatize the Center at a national level.

The other day you indicated on the telephone that you were going to be in North Carolina on March 15, and that you might be able to be helpful to us on that trip. There is one requirement that we have which might be met at that time. If you could set up a channel for us with the Governor's office which would provide a liason with the North Carolina Department of Education officials it could be of untold assistance. We have met with some resistance to IER's research of APC from certain North Carolina state officials. A channel to the top might help resolve that problem and also aid our CORE literacy project.

Again, on behalf of Mike and Farmer, let me thank you most kindly for your contribution. I shall continue to keep in close touch.

Sincerely yours,

Gordon R. Carey
Research Coordinator

of the **Board For Fundamental Education**

Cleo Blackburn
Exec. Dir.

Chartered by Congress in 1954,
The Board for Fundamental Education is a non-profit institution

146 E. Washington Street
Indianapolis, Indiana

New York Dallas

# 1 PURPOSE AND DESIGN

## BUSINESS SUPPORT

Every corporation feels the pressures arising because this nation has seventy-five million people considered to be "disadvantaged." It senses these pressures in local, state and federal tax requirements, in the annual requests for increased giving to community chests and other support agencies, and in employee relations. Too, this disadvantage is said to deprive the economy of some $100 billion worth of consumer activity each year.

Rarely does an opportunity emerge to participate in a development holding the promise of being more than a day-by-day support activity. . . in fact, to begin to cure some of our social ills effectively. Grants to the Board for Fundamental Education and its unique ACHIEVEMENT DEVELOPMENT CENTER provide you with such an opportunity.

New techniques and approaches to the problems of the disadvantaged must be developed, proved and disseminated. More research is imperative if, in our national mood of concern, we are to avoid a tragic waste of human potential and private and public dollars. Such research and development is the major function of the Board for Fundamental Education under the Charter granted by the Congress of the United States. Its findings have proved influencial. Because of the success of programs already developed by the Board, there is active need and demand for intensive efforts to prepare national leadership in business, education and community action for their most successful use of already proven Board programs.

To meet these specific demands, the Board's budget must expand significantly. The following background is presented to assist in your decision to join the other distinguished corporations which, with sustaining support ranging from $2,000 upward annually, are financing BFE's major undertaking, the ACHIEVEMENT DEVELOPMENT CENTER: a creative group whose program achievements to advance the disadvantaged hold the promise of making corporate civic contributions, and employee development programs, significantly more effective.

## OUR PHILOSOPHY

Through a decade of practical operating experience, the Board has found that the promise and potential in the people considered "disadvantaged" can be successfully released only when they learn how most effectively to help themselves. It can and must be accomplished, for in releasing the potential of the "disadvantaged" lies the escape from welfare's increasing burden and the creation of a major contribution to the nation's well-being.

bfe

There is a disturbingly large number of Americans who have been by-passed by progress NOT because they lack the potential to better themselves, but because they have never had ample opportunity to develop their abilities, overcome the blight of their social degradation, and participate effectively in free society.

Even the man considered to be most under-achieving has the potential to become a man of talent and purpose, a more useful citizen, if he has the preparation plus an opportunity to participate in community and national life with dignity, pride and skill.

The key ingredient is What is asked of the people themselves? The potential in the people themselves is the only national resource large enough to encompass the problem of "disadvantage." Its release is the objective of the Board for Fundamental Education.

## FROM INNOVATION TO NATIONAL EFFECTIVENESS

The Board engages in a comprehensive program of action-research which has the effective progress of the disadvantaged as its goal. New materials and programs created by BFE's ACHIEVEMENT DEVELOPMENT CENTER staff are designed to improve the effectiveness, attitudes, family relationships, housing and employment potentials of the disadvantaged. Each new concept or technique is structured into a program proven effective through practical testing and refinement by innovation-oriented associates of the Center, with community responsibilities throughout the country.

Tested, functional programs are then made available nationally through commercial, professional and educational channels. As industry uses its sales allies, so the Board uses its 'social service' allies to introduce and market its products, concepts and techniques for the socio-economic improvement of the disadvantaged. Virtually every area of civic, business and professional leadership has already established its access to Board-sponsored research and planning. The Board reinforces its assistance with manuals, guides, personnel training and continual consultation.

It is in the approach and program design, however, that the Board's special skills in developing self-motivation are employed. The core of every program is the conviction that lasting improvement is rooted in a man's self-esteem and pride.

## WHY THIS APPROACH

The Board's directors and staff have observed the great gap between the needs and the approaches employed to lift people out of poverty. Conventional approaches are not closing this gap.

The obvious need is for vastly more effective answers, so successfully proven that they can be translated with certainty into successful counterparts in communities everywhere.

A comprehensive program of research and experimentation

is vitally needed to develop materials and programs which reach the under-achieving and effect fundamental changes in their skills, attitudes, behavior and general desire for education. It is vital too, that this research and development be carried on in a setting with facilities for action-tests close to the problems. The research staff, while being sympathetic to human needs, must give its exclusive and sustained attention to the development of systems which succeed and which can meet rigorous standards.

After analyzing the efforts of others, and initiating studies of its own, the Board became convinced that in a voluntary society, no one can guarantee rapid social change, even with massive effort; yet, a lever in the right place may move the world. The lever for the progress of the disadvantaged is development of their capacity to help themselves. The place to apply it is at the most effective existing contact points in their lives, such as on the job, in the family, and with their peers. Lasting progress for the disadvantaged could be established by a small, skilled group, they decided, if it concentrated upon several unique concepts:

- programmed systems to build the priceless characteristics of self-help and learning success within the disadvantaged themselves;
- effective distribution of program findings nationally through existing private, voluntary and public institutions with community-level responsibilities and points of contact; and
- continual follow-through consultation to assure success.

The Board has established a growing pattern of success in meeting each of these requirements.

2
PROGRAM

## OUR PROGRAM'S UNIQUE SCOPE AND DEPTH

In a field where acceptance of new ideas too often requires a generation, the Board has gained national recognition as a source for proven program "models," each one structured to reach the disadvantaged quickly and effectively. The scope of the Board's program reflects its conviction that all approaches to enrichment must be mutually reinforcing:

ADULT BASIC EDUCATION: Provides reading, writing, arithmetic, spelling, and English grammar, for functionally illiterate adults and older youth. In late 1964 the Board released SYSTEM FOR SUCCESS, now one of the nation's leading new programs in the field. It is designed for, and related directly to increasing participant's employment potential. Notable because of its speed and high interest, this system soon will reach an estimated 1,000,000 people per year through schools, civic groups and industry. It is already used in Michigan, North Carolina, New Jersey, Indiana, Georgia, Tennessee, Florida, Missouri,

Ohio -- over 15 states in all.

EMPLOYMENT CLINIC: Offers a neighborhood program and materials through which the unemployed develop the understandings and attitudes necessary to find and hold jobs. Those who participate in this program prepare for the business world. The Clinic uses mutual help through small groups to aid the correction of shortcomings which prevent employment. Rapid acceptance of this new system indicates that, by the end of 1966, the Board's continuing goal of equipping leaders in more than 70 cities to create city-wide network of these clinics, will be achieved.

EMPLOYEE GENERAL EDUCATION DEVELOPMENT: Introduces systematic rapid in-plant employee education programs for high school equivalency. A comprehensive study now is under way, to develop rapid-learning, high interest systems which will have vital significance to business and industry. The nation's economic progress is restrained by the more than 31,000,000 employed who have less than the high school education essential to master today's rapid job changes; new approaches are vitally needed.

PRE-VOCATIONAL COUNSELING: Serves as a bridge between education and job-skill training, to help the unskilled find their most effective career in terms of motivation, talent, and community need.

SELF-HELP HOUSING AND HOME REHABILITATION: Methods by which the Board has successfully stimulated and programmed self-help housing. The pilot experiment generated cooperative labor by the disadvantaged, to build 371 new homes increasing the value of the target area's private real property four fold by $7,000,000. The impact on family and citizen performance has been highly beneficial. This Indianapolis experiment, the "model" for a more extensive program, now being initiated in Dallas, is now being programmed so that it will apply rapidly in other cities. In addition, the self-help principles are under separate experiment to develop owner-occupant co-operation in rental housing rehabilitation.

COMMUNITY SERVICE ORIENTATION: Provides basic education in family management, consumer economics, first aid, health, citizenship and recreation for lower income families. The instruction develops the understandings which lead to more wholesome self-management, and to better relationships with schools, other community institutions and social structures. This program is undergoing continued experimentation and development on the basis of experiments in Philadelphia, Indianapolis and other cities.

## IMPACT ON OUR SOCIETY

The Board uses its structure and capacity to determine how these systems can be best applied through the range of existing organizations and agencies already committed to work in this field. In the first half of 1965 alone, Board staff trained over 4,000 educators, staff directors and businessmen, in various institutes and seminars, equipping them to use Board programs

effectively. This approach not only permits the development of new programs with relatively modest sums, but it also enables the Board to exert great leverage and create a "multiplier factor" of unusual dimensions for each of its ideas. Dollars, therefore, have impact far beyond direct support of the Board. Nowhere in the nation is there a more serious effort to weld the process of research and development to this essential strengthening of citizen and professional leadership for aiding the disadvantaged.

The approach is one which readily finds national acceptance. Every idea marketed has first demonstrated its effectiveness; every approach provides greater skills to concerned citizens and to teachers and other professional people in this field; every program uniquely involves the great untapped resources of the disadvantaged themselves.

Papers and articles describing findings are an increasing product of the staff and their cooperating educators, so that our work and concepts aid other institutions nationally where BFE programs to assist the disadvantaged are under study.

# 3 OUR FINANCIAL REQUIREMENTS

Demands for such programs and services have mounted as the Board's activity has increasingly commanded attention in domestic affairs. The Board's program opportunities have also expanded.

The year 1965 was a turning point. Since each of the Board's development Centers is self-sustaining in its normal operations, modest contributions in the past have been sufficient to meet the Board's continuing costs, principally operation of the central ACHIEVEMENT DEVELOPMENT CENTER.

Now, however, there is necessity for greater funds underwriting this Center on a sustained basis. A financial requirement of $200,000 from contributions has been established for 1965; the Board's growing opportunities will undoubtedly require a higher sum in 1966. These requirements can be most effectively raised from a number of companies pledging $2,000 and up, annually. Pledges for several years would provide needed continuity. Foundation support in aid of specific research projects will continue to provide an essential supplement to this corporate underwriting.

## A PRUDENT INVESTMENT IN THE PRESENT AND THE FUTURE

Because of the Board's approach, financial support from corporations and friends of the Board strengthens the capacity of private initiative, to solve one of our nation's most challenging problems. It will do so in the way which offers the greatest hope of success: by reaching the disadvantaged through

employment-related channels, and preparing them to help themselves.

The broad activity of government to aid the disadvantaged in no way reduces the need for the work of the Board. No single initiative will solve the massive national problem; there is an undereducated adult for every youngster now in school. Our three million businesses, the economic structure of the nation, comprise a framework large enough to encompass the problem and achieve economic progress for all.

The Board believes that the support it receives from industry will continue to represent a prudent and profitable investment. The Board's path to progress for the disadvantaged strengthens community and business initiative. Most importantly, however, its approach seeks to establish the broadened foundation of individual initiative. Once it is tapped, people now deemed "disadvantaged" will begin to perform with pride as citizens-in-action, to give, not receive, as full participants in freedom.

826-2100

Wright Elliott

Dr. R. Henney

Lee Dir Adult & Basic Ed

In December, 1964, a staff member of the Board for Fundamental Education stepped on stage in a Durham, North Carolina auditorium. He was there to train teachers . . . volunteers from diverse walks of life . . . to help them prepare for the challenge which faces thousands of concerned people across the nation:

> bringing basic education to undereducated adults and older youth.

The Teacher Training Institute which began that night was not the first active step in such special education by the Board. Throughout its ten-year history, the Board for Fundamental Education has been actively engaged in the process of research, study, evaluation and experimentation. The purpose,

> the development and marketing of tested methods and materials to meet the special problems of the disadvantaged.

The Board's decade of experience in this field has been both unique and meaningful. Its Congressional Charter as a non-profit, private organization places it under a mandate to apply this experience for the nation's benefit. It is prepared to do so, assisting private and public agencies in their attack upon a problem which we know can be solved by this generation of concerned Americans.

# THE NATION'S PROBLEM

There are ten million people in the United States . . . ten million adults and older youth . . . who cannot read, write and do arithmetic at a functional level. Such a widespread low educational level is the single most widespread cause of poverty; it is characteristic and common in two out of three low income families.

The challenge which this situation presents must be met. The ten million whose communications skills fall below even today's accepted minimums:

* cannot read newspapers, job directions, street signs or labels.

* cannot write letters, fill out questionnaires and applications, submit reports and take tests.

* cannot count money, add up a grocery list or budget their pay.

The ten million . . . and most of their children . . . face a life of chronic unemployment, with tremendous costs to the public and incalculable loss in human potential.

The Board is convinced, from its experience, that:

1. The ten million are people who must be approached in special education efforts recognizing their needs, their aspirations, and their motivations.

2. The community's private and public resources must be marshalled to the task, if it is to be accomplished; our public resources alone cannot accomplish the job.

This, indeed, is the nation's need: not for recognition that the problem exists, but for expert development of the resources necessary to overcome it.

Most important of these, by far, are the resources which lie in the ten million themselves.

# ABOUT THE BOARD FOR FUNDAMENTAL EDUCATION

The Board for Fundamental Education was chartered by Congress in 1954. It is the only national organization of its kind holding such distinction. It is composed of educators, professional people and businessmen. It is private, non-profit and non-political, bringing together men of diverse backgrounds and orientations whose uniting common denominator is a desire to find and put to use those dynamic steps by which, fundamentally and effectively, the opportunities present in our nation can be brought into the lives of all citizens.

In a decade and more of experience in programs to stimulate better housing, job training and placement, family casework, counseling of dropouts, and numerous other programs, the Board has developed methods and materials which recognize and capitalize upon the particular psychology of the undereducated and underprivileged. It has sought to find in them the secrets of response, which are essential for "catch-up" programs to succeed.

The Board has succeeded, dramatically. Not all of its demonstrations have been as visible as the hundreds of owner-built homes which have transformed an Indianapolis slum, through cooperative endeavor under expert supervision. Nevertheless, its experiments in such states as Indiana, Minnesota, Texas and West Virginia have enabled the Board to examine carefully the approaches which work best in bringing to flower the self-help resources of people who need "everything" -- but who need pride in accomplishment perhaps most of all. Its experiment series ranges from urban slums to rural, uneconomical farms as well as assisting American Indians. Each experiment has been conducted to produce the fabric of skill, motivation and leadership which will move target groups toward lasting problem solution, and not stop short at the barely sufficient. Through these continuing experiments, the Board has sought also the knowledge of human dynamics, in the special settings of the disadvantaged, which have meaning wherever these people are found.

# COMMUNITY LEADERS AND THE BOARD'S BASIC EDUCATION PROGRAM

The major national problem posed by the need to bring these ten million into full, effective economic citizenship is one to which substantial national resources are now being devoted. There are countless imaginative community programs across the nation, expanding opportunity for the disadvantaged and preparing them to seize such opportunity when presented. Locally, and at state and national levels, the most workable programs will be those that help people help themselves. This massive challenge is one in which there can be no best answer, the nation needs a variety of creative efforts . . . and an open exchange of the best findings.

It is in this spirit that the Board has established its Basic Education Program: to bring the knowledge and skills produced in a decade of structured experience to the local program leaders, so that their activity will move quickly toward the momentum and effectiveness required. The Board's various systems for success provide local leaders in education, government and industry with proven tools essential to their success as they address their community's share of this national problem.

The Board recognizes that each project leader or administrator must, in his own situation, examine the forces producing the problem with which he must cope. He must then determine the action which his resources permit, which will give him the most effective strategy for the greatest success. This requires making the best use of financial resources that are "never enough," by bringing in resources and experience augmenting his own. The project leader is then able to concentrate upon the development of effective support and participation . . . and execution which program-success requires.

The Board has taken two steps toward effective cooperation with all types of adult education programs:

1. It has undertaken through its own experienced staff, the training of the people who will teach the undereducated . . . preparing them with the knowledge and skill they need to be effective, regardless of the materials to be used.

2. It has licensed the publication by Follett Publishing Co. of its highly successful literacy program, SYSTEM FOR SUCCESS, a system devised, tested and already widely used in the education of adults and older youth.

# SYSTEM FOR SUCCESS . . . .
# A MAJOR NEW BASIC EDUCATION PROGRAM

The Board's adult education material, System for Success, was recently described by a prominent education official as "two years ahead of anything else now being marketed." It is a program which, through its rapid acceptance and continuing efforts to feed national experience back into it, will remain a leader for years to come.

The Board's experience with adult basic education has demonstrated a conviction shared by leaders in the field: traditional approaches have serious shortcomings which make it essential that dynamic new approaches be found. Those methods depending upon individualized instruction are expensive and build tenuous learning patterns which can be too easily broken by the low motivation within this group of adults and older youth.

The Board's System for Success meets the nation's need for materials which are highly effective as well as economical. Their effectiveness depends to a great extent upon how well the materials and supporting services relate to the particular psychological pattern of the target group.

1. The undereducated are adults and older youth who lived in cultural settings where there was no educational drive, who neglected educational opportunities, who could not continue their education for economic reasons, who were bypassed by economic change and opportunity, or who failed in the highly competitive learning environment of the regular schools.

2. These adults and older youth have reservoirs of strength, potentials of intelligence and reserves of energy which must be directed into constructive, lasting improvement.

3. Each of these ten million people needs educational experiences which will maximize his desire to learn through learning situations which offer challenge but which move each at his own pace without the threat of failure.

# WHAT IS . . . . SYSTEM FOR SUCCESS?

The SYSTEM FOR SUCCESS is an adult education tool, which includes reading, writing, spelling, arithmetic and the essentials of basic English grammar. It was developed by R. Lee Henney, Ph.D., Director of Adult and Literacy Education for the Board for Fundamental Education. It takes the beginner from any starting point, even from a "0.0" reading level, through the 8th grade level in the basic communications skills.

Book I, SYSTEM FOR SUCCESS, is designed to bring the undereducated adult or older youth from his performance level, up to fifth grade in the communication skills. This first book consists of:

1. A reading section which includes 42 lessons using a phonics approach. This section also includes handwriting charts which develop writing ability, and spelling exercises which develop spelling ability equal to the reading vocabulary skill. This reading section builds a basic vocabulary of 1,500 words. The practice reading selections in each lesson are taken from adult experiences.

2. An arithmetic section which includes skill development in addition, subtraction, multiplication and division. This section presents 18 lessons which are introduced early in the reading program. The vocabulary in this section is integrated with that of the reading section.

3. An English section which provides an effective and efficient method of teaching the essentials of English grammar to adults and older youth. This section contains nine lessons which develop the student's ability in an acceptable usage of English. Again, the lessons are inter-related with the earlier sections, and the vocabulary as well, is integrated.

Book II, SYSTEM FOR SUCCESS, brings the undereducated adult or older youth from grade five through the eighth grade level. It's various interrelated charts and exercises serve to expand the student's vocabulary, increase his reading and study-skill, help him apply his newly learned vocabulary, and master the taking of practical examinations and the completion of job and license forms. In addition, he is taught to handle fractions, decimals, percentage problems and graphs and employ the essentials of practical, non-technical grammar. This is accomplished using examples and lessons which seek to foster principles of good citizenship and effective economic planning for the family.

# ADVANTAGES

SYSTEM FOR SUCCESS meets the requirement of program directors, for an effective, integrated, sequential system designed for adults and older youth, which will accomplish the aims of the Economic Opportunity Act of 1964. Typical of the basic education approach generated at state and local levels, is this description from one state plan:

> This program of instruction shall include basic education in skills of reading, writing, speaking, listening, arithmetic, citizenship, health practices, consumer knowledge, human relations, homemaking and family living, as well as other areas applicable to making the adult better able to meet his adult responsibilities.

SYSTEM FOR SUCCESS meets these objectives.

The SYSTEM makes no pre-suppositions about the student's mental ability or academic status, but permits him to start where he is with what he has. The student is permitted to set his own pace in handling the material presented in a "daily-lesson" format which enables him to move ahead as he successfully completes the work for each class period, permits him to by-pass material that he already knows, and allows him to review lessons he did not retain.

A unique advantage of the system is its use of the Learning Team concept which has been found productive in both basic education and skill job training. The learning team permits the more advanced students to share responsibility for teaching the slower students. This experience enables the advanced student to help others, provides leadership experiences for many participants who have never acquired these social skills.

The method of material presentation eliminates the competitive classroom situation which causes the student to doubt his ability and inhibits his thinking. The high-interest-level material is focused upon everyday adult experiences rather than hypothetical situations or abstractions.

# UNIQUENESS

The SYSTEM FOR SUCCESS differs in the following ways from traditional basic educational materials:

* This system integrates reading, writing, spelling, language and arithmetic . . . all the subject matter of basic education.

* The system employs content which has been systematically developed at the adult basic level.

* Conversely, this system is not a children's system "written up" for adults.

* Words are presented in a sequence which enables the student to achieve a functional vocabulary which he uses immediately in reading, writing and spelling exercises. These skills progress together, reinforcing each other.

* The reading sections are based upon phonic charts containing a basic word list based upon sequential development of related word families, a system of proven success in bringing the student rapid vocabulary increase and accuracy.

* All three of the basic courses are published in one book, covering the grades 0.0 through fourth grade, and in a second book covering grades five through eight.

* Instructional time to bring a person through each book of SYSTEM FOR SUCCESS is 120 contact hours.

# MAJOR SERVICES OF THE BOARD

The Board for Fundamental Education has developed one of the nation's finest adult education staffs, especially skilled in working with the undereducated and disadvantaged adult population. This staff is available, as the requirements of our continuing research and development programs permit, to work with state and local project staffs at locations throughout the nation. Between such assignments, the staff is occupied in the Board's own action-oriented programs, through which it constantly seeks to improve the effectiveness of the methods and materials it recommends to other groups and organizations.

In the major field of basic adult education, the Board has established two major national services. They are:

1. Consultation with state and local leaders seeking effective assistance in the development of programs and the activation of plans.

2. Training those who will work with and teach the undereducated.

The Board has seen demonstrated most convincingly the need for special preparation of those who will have direct contact with the new learner in basic education, vocational classes, work orientation and other rehabilitating activities. Project program staff members are frequently recruited from vocations where previous work experience was gained with the "achieving part" of the population: the relatively successful and highly motivated. The Board's experience has indicated that special preparation is necessary in order for these persons to quickly focus upon the needs and problems of undereducated adults.

Above all, these staff members require an understanding of the psychology of undereducated persons, and the steps which are essential to attract and hold them in a new and vital educational experience. Such understanding is not granted merely by having been born in such situations and "rising above them." Frequently the understandings essential to success with the undereducated come hardest to those who have had the super-motivation to overcome the disadvantages which defeated their neighbors. This task of preparation or in-service training is one which the Board has approached with great care.

# CONSULTATION

The Board's staff has worked closely with state department's of education, school districts and project staffs across the nation. Board assistance has included the development of practical class sessions, integrating basic education and skill job training classes . . . all of which are based upon participant needs. Where requested, the Board's services have ranged from recruiting and testing potential project participants, to the development of public understanding and support, and the other stages of program realization.

Project problems approached successfully with Board staff assistance have included the determination and organization of project staff duties to produce effective program performance and program planning in order to avoid problems in the training schedules.

# TRAINING

Important enough to be considered a special activity of the Board is the staff's training of over 4,000 basic education teachers and project staff personnel, since mid-December of 1964. The in-service training sessions have included counselors, administrators, vocational teachers, skill job trainers and basic education instructors. The training sessions, requiring 12-15 hours, are concerned with the development of a practical, creative teaching approach for reaching and retaining the desired participants in the program.

In this experience, the Board has a proven system of training which has been praised by the program directors involved. One such state director recently advised us, "I would like to express my appreciation to the Board for Fundamental Education for the excellent work performed in our state in providing adult basic education institutes." ". . . teacher trainers did an excellent job in providing services . . ." and "We are looking forward to a dynamic program that will involve many thousands of our adult citizens in adult basic education programs."

The training emphasizes the psychology of the undereducated . . . and prepares the prospective teachers to enter their first class with operable skill.

# THE TRAINING PROGRAM

The Board's training program includes such topics as the following:

Examination of the nature, the importance and the ramifications of the problem.

The duties and responsibilities of each staff member of the project or program.

Definition and understanding of the undereducated individual: his strengths and shortcomings, his attitudes, his ability to learn.

Program recruitment.

Testing . . . both initial and during the program to measure progress.

Establishing a learning-oriented class "climate."

Characteristics of effective teaching in the special situation of the undereducated adult and older youth.

Mechanics of the learning team approach.

The materials available; study of major systems.

Practice teaching.

The teacher training staff orientation offers the flexibility of being available to any project regardless of the materials adopted for the basic education program.

# CONFIRMATION OF SUCCESS

The Board's effective response to the needs of "the ten million," has been enthusiastically received throughout the country. The Board's tested methods and materials have already been approved and used in practical action programs in New Jersey, North Carolina, Michigan, Florida, West Virginia, Tennessee, Indiana and Washington, D.C. The Educational situations have included programs such as public school adult education, job retaining, vocational and skill training and such diverse groups as the foreign born, "hard core" unemployed, out of school unemployed youth, prison inmates and mental hospital patients. The program has found application in both rural areas and urban slums.

The materials and methods are immediately available in order that local officials and project directors can move quickly and effectively.

Examples of basic education programs and projects in which the Board's services have been used include:

Anderson Literacy Council, Anderson, Indiana

Bluefield State College, MDTA Project, Bluefield, West Virginia

Crispus Attucks High School, Adult Evening School Program, Indianapolis, Indiana

Department of Community Colleges, State Department of Education, North Carolina

Indiana State Reformatory, New-Reader's Clinic, Pendleton, Indiana

MDTA - E & D Project, Northern Michigan University, Marquette, Michigan

Multi-Occupational Demonstration Project, Florida A & M State University, Tallahassee, Florida

OMAT Project, Newark Housing Authority, Newark, New Jersey

OMAT Project, Tuskegee Institute, Tuskegee, Alabama

Project UPLIFT, Tennessee A&I State University, Nashville, Tennessee

# VALUE-ORIENTED COSTS

The task of bringing basic education to ten million citizens in the years immediately ahead is one which is so massive that effective and efficient use of all resources is imperative.

It is this conviction which has prompted the Board for Fundamental Education to design its materials and services in the basic education field, at the level which enables the local board of education or project to produce maximum program results per dollar.

1. The SYSTEM FOR SUCCESS student materials have been published at a cost of $2.49 per book. In two books, these materials teach the undereducated person to read, write, spell, solve arithmetic problems and apply the essentials of basic English grammar; they also help develop an understanding of and appreciation for responsible citizenship.

2. The in-service teacher training program provided by the Board prepares staff and teachers with psychological insights as well as system skills and materials at a cost generally under $60 per teacher.

The SYSTEM FOR SUCCESS materials can be ordered from the Board, or through Follett Publishing Company.

Arrangements for teacher training must be made through the Board. The Board's basic charge for this service is $1,250 for a minimum group of twenty-five trainees. This fee meets the Board's expenses in providing staff direction to a three-session teacher training institute, led by members of the Board's experienced staff skilled in such special adult education; it also covers the provision of instructor manuals, program aids, and test materials for each institute participant. Instructor books for each of the two levels include all student materials as well as instructional aids. While the Board discourages larger training groups, it will undertake such groups with a surcharge of $25 for each participant above the twenty-five minimum described.

The contracting organization will also be expected to reimburse the Board for staff travel and subsistence.

# DOLLARS WITH IMPACT

The extent to which the materials and services of the Board establish effective budget economies can be seen by examining the cost per student. The following examples illustrate this.

| | Estimated Teacher Training Cost | 1-Book Materials Cost | Total Cost | Per Student Cost |
|---|---|---|---|---|
| 25 teachers, who will instruct 250 people | $1,500 | $ 625 | $2,125 | $8.50 |
| 25 teachers, who will instruct 500 people | 1,500 | 1,250 | 2,750 | 5.50 |
| 50 teachers trained in one institute, who will instruct 1,000 people | 2,125 | 2,500 | 4,625 | 4.63 |

The above figures should be examined with the following in mind:

1. The assured effectiveness of the program.

2. The reduced project overhead when difficult and expensive program elements like teacher training are provided by the Board for Fundamental Education.

The above figures will, of course, increase $2.49 per student (right hand column), if the program involves a group of undereducated adults whose education needs run through both Books I and II, SYSTEM FOR SUCCESS (Book I covers 0-4 grade level and Book II covers 5-8 grade level).

Dear Jim:

Enclosed is a memorandum on the first Board meeting of the Center. I spoke with Nancy and cleared the time and date with her. I will meet you at the airport here in Washington at 11:30 unless I get different instructions.

Enclosed is a letter addressed to you which is the form letter used to send copies of the Center proposal to various key persons around the country. We have received a good many enthusiastic and encouraging responses. I know that some of them have sent copies of their comments to you, but I am developing a complete file of these letters and will have copies available for you. Also enclosed is the list to which this letter and the proposal was sent.

We have submitted a proposal to the National Council of Churches for a project in Prince Edward County this summer. They are going to try to have it done through the Southern Presbyterian Church. It looks favorable at this time although I have received no official word as yet. I am also submitting shortly proposals to Mr. Ehinger at Western Electric for two projects in North Carolina to be done by the Center.

I will be looking forward to seeing you on the 27th. McKissick, Lyle Spencer and Mike Woolman all plan to be here. I also want to have you available early that evening for a cocktail party which will be attended by a number of government officials who can be most helpful in getting the Center off the ground.

Sincerely yours,

Gordon R. Carey
Research Coordinator

Re: Board Meeting Center for Community Action Education

The first meeting of the Board will be held on Tuesday, April 27 at 12 noon in Washington, D. C. We will meet at the Institute of Educational Research, 2226 Wisconsin Avenue, N.W. Washington, D.C.

Among other things, the agenda should include:

1. Adoption of By-laws
2. Nomination for additional board members
3. Discussion of the budget
4. Election of temporary officers
5. Future meetings
6. Proxy voting rights

We hope that you will make every effort to attend. The meeting should not last beyond 4:00 P. M., but we hope to have a private reception following the meeting at which time a number of persons in Washington who are interested in the Center will be able to meet you informally.

Please confirm your presence at the meeting by notifying me at IER, and let me know your suggestion for additional agenda items. Thanks.

Dear Jim:

James Farmer has asked me to send you the enclosed draft for your comments and suggestions. We are proposing a national attack on the problem of illiteracy. We consider this proposal to be a means of supporting President Johnson's War Against Poverty and we are hopeful that it will be financially supported by the Federal Government.

The Center for Community-Action Education referred to in the document has been incorporated in the District of Columbia. We hope to be able to secure contributions from private sources to finance the Center during its initial months of operation.

Your comments on this proposal are vitally needed. If you could have them in my hands within a week or two it would be helpful. Please address your reply to me at:

Institute of Educational Research

CHICAGO--Science Research Associates, Inc., announced publication today of a new basic reading program designed for use with culturally disadvantaged and functionally illiterate youngsters participating in community sponsored, volunteer training classes and other War on Poverty-related projects.

Lyle M. Spencer, president of the Chicago-based educational publishing company, said the new program, Reading in High Gear, was written and developed by Dr. Myron Woolman, director of the Institute of Educational Research, Inc., Washington, D. C., in an attempt to salvage as many as possible of the nearly 750,000 adolescents estimated to be out of school and out of work because they lack basic educational skills.

(more)

"The growing body of academic rejects in our society--high school dropouts, potential dropouts and functional illiterates--is a threat to the future prosperity of the nation. We must find a way to make them functioning, self-supporting members of the economic main stream," Spencer said.

"Educators throughout the country have long recognized the seriousness of the problem and have attempted, locally, to do what they could to meet it. Nationally, the effort to provide these youngsters with at least a minimum useable education and employable skills has become a prime objective of the War on Poverty. Unfortunately, little is known about how to accomplish this objective; how to get these youngsters, many of whom are the second or third generation on relief, to recognize the need for education; how to motivate them to seek it out, or how to present it to them in a meaningful way when they do come looking.

"There is one thing we do know, however, and that is that you can't give the student who has dropped out of school, after a long and consistent record of failure, a warmed-over version of the same materials that contributed to his defeat. He has individual needs, problems and interests quite apart from those of his contemporaries who stay in school. Efforts to help him must take these special needs, problems and interests into account or they are doomed to failure. Reading in High Gear is the first major effort to accomplish this in a basic educational program."

(more)

The new program is based on the Progressive Choice Reading Method initially developed by Dr. Woolman in 1950-51. It involves the use of a series of carefully integrated--but different--programed instruction techniques designed to systematically introduce the student to each of the skills required for effective reading. The program utilizes elements of the traditional (phonic) and more modern (linguistic) methods of teaching reading.

Each student is required to start at the beginning of the learning-to-read process--where he learns to recognize and to discriminate between the common letter-sounds and shapes associated with the alphabet--regardless of the degree of proficiency he may have already acquired. Once he has begun, however, the student is encouraged to proceed on an individual basis. He progresses at his own speed and remains relatively independent of the others in his training group.

Throughout Reading in High Gear, particular emphasis has been placed on hearing, speaking and understanding, as well as on the more common visual recognition, since a great part of the ability to read involves the ability to hear and speak words properly and to understand their meaning, Spencer said.

(more)

Each student first learns to understand the meaning of the word--as spoken--which he will ultimately learn to read in written form. He then learns to recognize the shapes and sounds of each of the elements in this word (e.g. letters, consonant compounds) and how these elements are used to form the word. Finally, the student learns to read the word in its printed form.

The program consists of a number of workbook-type student textbooks and four detailed Instructor's Manuals. The student books include exercises and specially written stories which, though simple in construction, are designed to stimulate and interest the older student, while cultivating an awareness of socially acceptable modes of conduct that can be applied to his own environment.

The comprehensive Instructor's Manuals have been designed to enable volunteer tutors, and others without professional training, to use the program effectively in community-action training programs.

Preliminary data from pre-publication field tests has been most encouraging, Spencer said. In one area where the program was tried out, 94.5% of the students have demonstrated some measurable gain after an average of 51 hours of study; 56.1% showed gains of one year or more and some progressed as much as 3½ years.

(more)

READING IN HIGH GEAR - 5

Science Research Associates, Inc. has long been a pioneer in the development of modern curriculum and guidance materials for all grade levels. SRA's reading, modern mathematics, social studies, science and language arts materials are widely used in schools throughout the nation. In addition, the company is the largest commercial publisher of standardized tests in the United States.

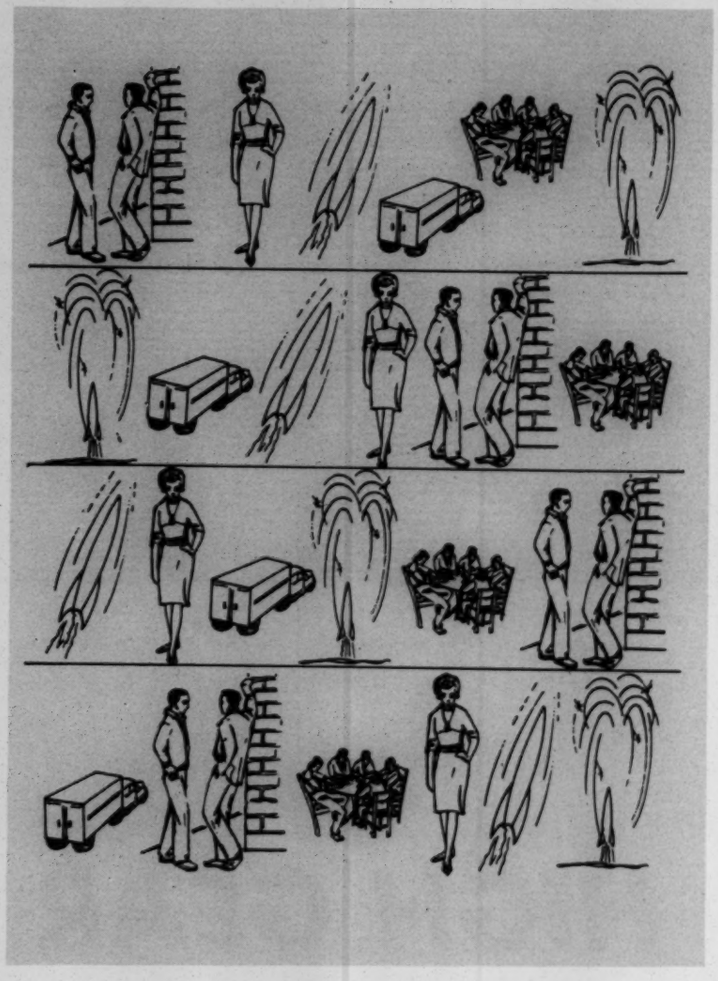
## Audial Meaning Level:

The learner must understand the meaning of the word he will ultimately learn to read. This involves hearing the word, saying the word and indicating that he knows what the word means when he hears it.



**Objective of Exercise:** Learner must comprehend and use the words MEN and ROCKET. This involves:

1. Comprehending the word MEN as more than one man.
2. Comprehending the word ROCKET as a type of engine or as a type of firework.

**Instructor Procedures:** The instructor discusses the meaning of the word MEN as the plural of man; also, used to mean human beings, both male and female.

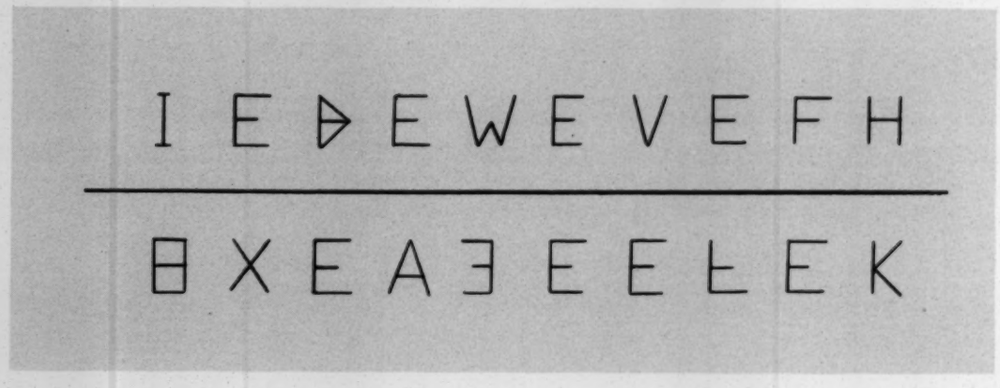
The instructor discusses the word ROCKET as a firework, an engine, or anything propelled by the combustion of gases at the rear end of the mechanism.

**Learner Responses:** Students are required to pronounce the words, and to use both words in meaningful sentences.

The learner circles all pictures in rows one and three that can best be described by the word MEN.
He then circles all pictures in rows two and four that can best be described by the word ROCKET.

## Discrimination Level:

The learner shows that he knows and can print a particular letter-shape used in the word he has learned at the audial level.



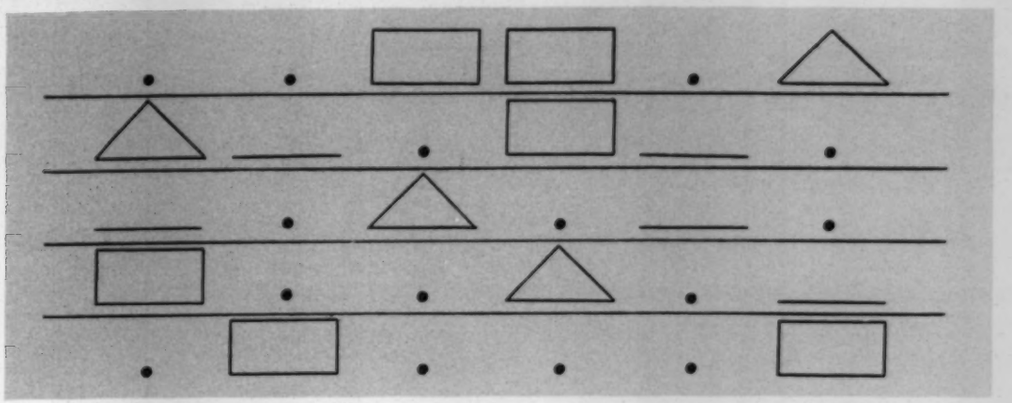
**Objective of Exercise:** Learner must demonstrate ability to visually discriminate the letter-shape E from other letter-shapes.

**Instructor Procedures:** The instructor prints the letter-shape E on the board and directs students to find and trace all the letter-shapes in the rows of shapes that are like the letter-shape E on the board.

**Learner Responses:** Learner selects the eight E letter-shapes.

In addition to the exercise shown here, there are three others at the Discrimination Level.

## Identification Level: The learner demonstrates that he can identify letter-shapes with letter sounds.



**Objective of Exercise:** Learner must demonstrate as each letter-sound is dictated that he can print the required letter-shape in upper case letters above the correct symbol shown in the workbook.

**Instructor Procedures:** Instructor dictates a series of letters, including the letter E, and explains that students should print the letter-shape that goes with the letter-sound being dictated above the symbols, proceeding left to right in each row. At this point in the exercise, the Instructor makes it clear that symbols are not to be associated with any specific letter-sound or letter-shape.

**Learner Responses:** Learner listens to dictated letter-sounds and prints corresponding letter-shape above symbols in workbook.

In addition to the exercise shown here, there are two others at the Identification Level.

## Compounding Level: The learner prints and sounds the new letter-shape when it is compounded with letter-shapes he has already learned.

| | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| • △ | LEX | KET | EXAC | KET | KET | LEX | KET | ELEK |
| □ _ • | KET | EMUM | PES | WES | VES | KET | EMUM | KET |
| • _ △ | WES | KET | VES | KET | WES | EXAC | KET | LEX |
| △ • □ | KET | PES | LEX | LEX | ELEK | KET | EMUM | KET |
| □ • △ | EMUM | KET | EXUM | LEX | EMUM | KET | GET | EMUM |
| _ △ • | KET | KET | EPTIB | LEX | WES | WES | EPTIB | KET |

**Objective of Exercise:** Learner must associate appropriate symbols with letter-compounds upon hearing the corresponding compound-sounds as they are dictated.

**Instructor Procedures:** Instructor explains the symbol system for this exercise:

EMUM = box
LEX = triangle
WES = straight line
KET = dot

Instructor tells students to indicate the appropriate symbol with the compounds as they are dictated by drawing a box around the EMUM sound, placing a straight line under the WES sound, and so on.

**Explanatory Note:** The symbol shapes at the far left of the page tell the student which compound sounds he can expect to find in that particular line in the workbook.

In addition to the exercise shown here, there are two others at the Compounding Level.

# Visual Meaning Level: The learner reads and indicates by printed responses that he knows the meanings of the words he sees.

THE JOB HUNT

SCOT GULPS HIS HAM ON A BUN AND HAS A SIP OF MILK. "GRAND HAM, MOM," COMMENTS SCOT. SCOT SMACKS HIS LIPS. BOB SPRINTS IN NEXT. "MOM GRILLS GRAND HAM AND EGGS," BOB ADMITS.

"MAN, THE FUND IS AT AN END. IT'S SPENT," SCOT TELLS BOB. "LET'S ASK MOM IF POP HAS FUNDS," BOB COMMENTS.

"STOP THE GAB AND GET A JOB," SNAPS MOM. BUT MOM GRINS AT SCOT AND BOB. "A JOB? A JOB ISN'T FUN, MOM," INSISTS SCOT. "A JOB– GET ON IT!" MOM WINKS AT BOB. "LET'S GET A JOB, SCOT," BOB TELLS SCOT. "GOT A PLAN," ADDS BOB. "THE ROCKET PLANT HAS JOBS. LET'S BUZZ IN AND GET THE JOBS." SCOTT NODS.

BOB AND SCOT TRAVEL UP THE HILL. AT THE PLANT, BOB AND SCOTT RING A BELL. A COP ZIPS UP. BOB ASKS, "GOT A JOB?" THE COP NODS. BOB AND SCOT STRUT PAST THE COP AND UP A RAMP AND STOP AT A DESK. A SWELL GAL SITS AT THE DESK. SCOT GRINS AT THE GAL AND STANDS, HANDS IN HIS POCKETS. AT LAST, SCOT PULLS HIMSELF UP AND ASKS IF BOB AND SCOT CAN MAN THE JOBS AT THE ROCKET PLANT.

**Objective of Exercise:** Learner must be able to read and comprehend the story that uses the word ROCKET and other words with the letter E.

**Instructor Procedures:** Instructor tells students to read the story. Then, Instructor leads a group discussion about the story and encourages students to ask questions, particularly about words that they do not understand.

**Objective of Exercise:** Learner must demonstrate the ability to use the word ROCKET and other words in context.

**Learner Procedure:** Learner reads sentences and fills in the blanks with words from the "Pick List." The learner then checks his own work and makes any necessary correction by printing the correct response in colored pencil above the incorrect response.

| PICK AND PRINT | PICK LIST |
|---|---|
| | GET |
| 1. MOM GRILLS GRAND HAM AND _____ | ROCKET |
| 2. MOM SNAPS, "_____ A JOB." | STEP |
| | DESK |
| 3. THE _____ PLANT HAS JOBS. | SWELL |
| 4. SCOT AND BOB STOP AT A _____ AND A GAL GRINS AT SCOT AND BOB. | BELL |
| | EGGS |
| 5. THE GAL IS _____ | |
| 6. SCOT ASKS IF BOB AND SCOT CAN GET JOBS AT THE _____ PLANT. | |

**Explanatory Note:** This material represents only a portion of one story. In the last half of the story, students must follow the same procedure with regard to the word MEN.

# Introduction to Sample Booklet

**Reading in High Gear** represents a major innovation in teaching techniques used to overcome the years of academic failure that generally haunt the adolescent and adult who, due to circumstance or lack of education, are unable to attain even a minimal level of functional literacy. In this regard, the program is intended to be a significant weapon in the hands of those individuals and organizations seeking to implement the War on Poverty.

Based on the Progressive Choice Reading Method developed by Dr. Myron Woolman, founder and director of the Institute of Educational Research, Inc. in Washington, D.C., **Reading in High Gear** incorporates many of the principles of programed instruction in that it provides for a gradual progression through the basic reading skills and permits the learner to move through the material at his own rate with relative independence. The program also utilizes certain elements of both the traditional phonics approach and the newer linguistic method of teaching reading.

Unlike most educational programs, **Reading in High Gear** cannot be related to specific grades in school. The program makes no assumptions about previous reading achievement and starts at the very beginning of the learning-to-read process, with the introduction of the most common letter-sounds and the letter-shapes.

The program is published in three sequences, or cycles, each of which consists of a number of segments. In each segment, there are several lessons, each taught on five related learning levels. To begin, the student must understand the meaning of the spoken word he will ultimately learn to read. He then learns to recognize the elements in the word (e.g. letters, consonant compounds) and how these elements are used to form a word. Finally, the student learns to read the word in its printed form.

This booklet contains material taken from one of the Learner's Workbooks and the related section of the Instructor's Manual. This particular part of the program is designed to teach the letter E.

There are several points that the reader should keep in mind:

- At the point when the letter-shape E is introduced, all other letters of the alphabet have already been taught, with the exception of Y and Q.
- In this part of the program, all letters are taught in upper case only.
- Letter names are not used until later in the program. Only the letter sounds are used.

The five related learning levels used throughout the program are:

1. **Audial Meaning Level:** The learner must understand the meaning of the word he will ultimately learn to read. This involves hearing the word, saying the word and indicating that he knows what the word means when he hears it.
2. **Discrimination Level:** The learner shows that he knows and can print a particular letter-shape used in the word he has learned at the audial level. (Later in the program when all letter-shapes have been learned, the same procedure is followed with whole words.)
3. **Identification Level:** The learner demonstrates that he can identify letter-shapes with letter-sounds.
4. **Compounding Level:** The learner prints and sounds the new letter-shape when it is compounded with letter-shapes he has already learned.
5. **Visual Meaning Level:** The learner reads and indicates by printed responses that he knows the meanings of the words he sees.

# Content and Components of the Program

The total program is divided into three major cycles and each cycle is sub-divided into segments.

**Cycle I** – Four Learner's Workbooks and two Instructor's Manuals

Cycle I is a carefully organized presentation of each letter of the alphabet, except Q, printed in upper case only, with a single sound assigned to each letter. As students progress through the series of letters, they learn to compound new sounds with those learned previously. Compounds may take the form of actual words or nonsense syllables.

**Cycle II** – Two Learner's Workbooks and one Instructor's Manual

Cycle II introduces lower-case counterparts of upper-case letters learned in Cycle I as well as phonetically consistent vowel and consonant compounds, such as oa, ea, igh, th, ch, wh, and qu. The final e and its function of changing the internal vowel to a long sound is also presented. Also, students learn the alphabetical names of the letters.

**Cycle III** – Two Learner's Workbooks and one Instructor's Manual

Cycle III introduces the variant sounds of consonants, vowels and compounds. At this point students learn to use the dictionary, to read and write cursive writing, and gain practice in alphabetizing.

D

**Reading in High Gear**, a new basic reading skills program published by Science Research Associates, Inc., is designed for use in community-action programs being set up across the nation under the Economic Opportunity Act and other poverty-oriented legislation.

These photographs show students working in various phases of the program.

A. A student learns to properly pronounce the word she will ultimately learn to read.

B. A volunteer instructor explains an exercise that is designed to teach the student to identify the letter-shapes of the alphabet with the appropriate letter-sounds. The manual being used by the instructor provides step-by-step procedures that make it possible for the non-professional without formal teacher training to use this program effectively.

C. A student completes an exercise to show that she knows the meaning of the words she has learned to read.

D. **Reading in High Gear** provides for students who achieve a certain level of proficiency in the program to assist fellow students working at a less advanced level. Here, a student assistant checks answers in an exercise that requires the use of words in context.

Biographical Sketch

MYRON WOOLMAN, Ph. D.
Founder and Director,
Institute of Educational Research, Inc.
Washington, D. C.

Dr. Myron Woolman is the founder and director of the Institute of Educational Research, Inc., a non-profit organization located in Washington, D. C. A leading psychologist and learning theorist with several highly regarded military and industrial education programs already to his credit, Woolman established the Institute in 1960 in an effort to develop up-to-date teaching techniques that would prove more efficient and more effective than those generally available in the nation's educational and training institutions.

Reading in High Gear, a new program designed specifically for culturally disadvantaged and functionally illiterate adolescents and published by Science Research Associates, Inc., Chicago-based publisher of modern learning systems, is the first major outgrowth of his work at the Institute to be published nationally. It is intended for use with high school dropouts, potential dropouts and adults who have been unable to learn to read well enough to get and hold jobs.

In 1953, while Chief of Proficiency Measurements at McConnell Air Force Base, Wichita, Kansas, Dr. Woolman developed a new method for obtaining rapid and objective measurements of pilot performance during training. This method, known as "The Sensitive Indicator Method," and another, the "Anchored Grading Method" which was designed to increase the reliability of subjective ratings, were widely adopted by the United States Air Force, and other services, for use in pilot evaluation.

Woolman joined the staff of the Human Resources Research Office, George Washington University in February, 1956, and while there developed and experimentally tested a new, programed method for on-site training of Nike Guided Missile Operators. This method was adopted for general use by the U. S. Army in 1958. Similar work for the Bell Telphone Laboratories resulted in the design of a two-week programed learning course to develop conceptual understanding in the field of basic electricity.

Woolman was graduated Magna Cum Laude from Columbia University in 1950 and was designated a President's Scholar the following year. He earned a master's degree from Columbia in 1951 and was awarded a doctorate in psychology from the same institution in 1955.

Since the establishment of his Institute of Educational Research, Woolman has directed his efforts toward the development of methods to increase the speed and accuracy of learning, with major emphasis on especially difficult learning problems. Reading in High Gear is based on the Progressive Choice Reading Method which he originated and perfected. This method, which links a number of programing techniques to teach reading skills and conceptual understanding, provides for a gradual progression through the learning-to-read process that permits the student to move at his own rate with relative independence.

Preliminary experimentation has indicated that this technique is extremely effective with teenagers and adults who, due to circumstances or lack of educational opportunities, have been unable to attain minimal proficiency in reading.

In addition to Reading in High Gear, Woolman is extending a programed method of teaching mentally handicapped children to read, and a study of programed techniques in language development that might be useful to psychiatrists in the treatment of psychotic patients.

Woolman is a member of the American Psychological Association, the American Association for the Advancement of Science, the American Association of University Professors, Phi Delta Kappa and a number of other professional organizations.

Woolman, his wife, and their three children live in Washington, D.C.

Dear Mr. Carey:

I'm very grateful to have had an opportunity to review your plans for a national attack on illiteracy. That seems to me to be a very worthy and legitimate activity for CORE.

I really have nothing to say about the working paper itself except compliments. It's excellent and even practical. Any time there may be group discussions on these plans that are open to the public, I would appreciate an opportunity to sit in to learn more.

Good luck.

Sincerely,

David R. Hunter

Mr. James C. Moore
Associate Director
Commission on Religion and Race
National Council of Churches
475 Riverside Drive
New York 27, New York

Dear Mr. Moore:

About two weeks ago I was in New York and spoke with someone in your office. She indicated that you had received the proposal for the summer project in Prince Edward County, and that it had been forwarded to the Southern Presbyterian Church in Richmond, Virginia.

I would very much like to find out the status of the proposal. If we are to mount this much needed program by the summer we will have to take quite immediate steps. I believe that your office indicated that the proposal was sent to the Rev. Malcolm Calhoun. Should I try to contact Mr. Calhoun directly or should I wait for his reply to you?

I would appreciate it if you could call me at my office (Area Code 202 - 333-1505) or at my home (Area Code 202 - 462-6526).

We are having a Board Meeting on April 27 here in Washington and I feel that we should have something definite by that time if we are to adequately prepare for the summer. Thanks ever so much for your cooperation. I will be looking forward to hearing from you.

Sincerely yours,

Gordon R. Carey
Research Coordinator

Dear Mr. Ehinger:

It was a pleasure to talk to you in your office in December. I had hoped to be in touch with you before now, but between moving to Washington and various demands of my work here I was not able to do so.

You will recall that you asked me to send you a proposal for a literacy project which might be undertaken by Western Electric in cooperation with CORE at the Institute of Educational Research. I am in the process of drawing up a proposal at this time and will have copies sent you within two weeks.

I would like to thank you for your kind cooperation. I trust that we may be able to submit some ideas which will meet with your approval.

Sincerely yours,

Gordon R. Carey
Educational Consultant

Dr. Allan Knight Chalmers
1715 "N" Street, N. W.
Washington, D. C.

Dear Allan:

Welcome to Washington! I tried to reach you at home but was unable to get through. Since I will be out of town for a few days I thought I would drop you a brief note.

I hope you will be able to come to the reception for Farmer and the Board of Directors of the Center for Community-Action Education. I trust that you received the invitation. It is being held at the home of Edgar Cahn. As you may know, he is Special Assistant to Shriver.

I would also like you to know that we have incorporated the Center here in the District and are hopeful of getting some small projects going with private financing and until such time as we may secure federal support. We are applying for a planning grant from the Office of Economic Opportunity. We have one pilot project going with CCNY CORE in Harlem and another is to begin in North Carolina with the NAACP and CORE.

I will look forward to seeing you on the 27th at the reception. Please give me a ring at the office (333-1505) as I would like to get together with you.

Sincerely yours,

Gordon R. Carey,
Educational Consultant to
James Farmer

Mr. David R. Hunter
Executive Director
Stern Family Fund
55 West 44th Street
New York, New York 10038

Dear Mr. Hunter:

Thank you for your kind letter of April 7 sent in response to our proposal for a National Literacy Program. Pending federal support for such a program the Center for Community-Action Education has now been incorporated in the District of Columbia. We have under way a pilot project in Harlem with the CCNY CORE chapter and another project in Durham, North Carolina will be begun in May with Floyd McKissick.

You should have received an invitation to a reception here in Washington for James Farmer and the Board of the Center to be held April 27. The reception will be at the home of Edgar and Jean Cahn. Jean particularly ask me to make a special point of inviting you and urging that you attend.

As our plans progress I would like very much to meet you and bring together a small group of people to discuss some of the problems posed by such a large-scale volunteer undertaking. I believe that Dr. Woolman, Director of The Institute of Educational Research, where I am employed as Research Coordinator, spoke with you about a project in Prince Edward County. While this project is being proposed as an activity of the Institute, it is the type of thing that the Center would eventually hope to be doing.

Again let me thank you for your kind response to the proposal. I will be looking forward to meeting you and I'm hopeful that we can get together before too long.

Sincerely yours,

Gordon R. Carey
Educational Consultant to

Dr. Martin Deutsch
Director
Institute for Developmental Studies
Professor
Department of Psychiatry
New York Medical College
Flower and Fifth Avenue Hospital
Fifth Avenue at One Hundred and Sixth Street
New York, New York 10029

Dear Dr. Deutsch:

I want to thank you for your letter of March 24 in response to our proposal for the National Literacy Program.

We are currently in the process of drawing up a proposal for a planning grant to be submitted to the Office of Economic Opportunity. During the time of the planning period (probably six months or a year) we would like to explore in depth suggestions such as the ones made by you that the program be confined initially to a large metropolitan area such as Washington. During this planning period it would be our intension to start pilot projects.

I would like very much to be able to discuss our plans with you in some detail in person. You suggested that you might arrange to stop by the office on one of your trips to Washington. This would be most helpful. Please let me know when you may be in town and I will arrange to set up a small conference. I wonder also whether you might be available at sometime in a few months hense for a larger planning conference. We would like to bring together various experts for a day or two for some very real consideration of the problems faced by such a national volunteer effort as we have proposed.

Pending federal support for the Center for Community Action Education we have incorporated here in the District of Columbia and have received a small grant. With this initial funding we have begun a pilot literacy program in Harlem with the CCNY chapter of CORE, and we are shortly to begin another project in Durham, North Carolina working with CORE and the NAACP.

While we have fought to begin these pilot programs with the Accelerated Progressive Choice Method developed by Dr. Woolman it is our very definite intension to explore and test other techniques. You may be aware that the Office of Economic Opportunity is in fact now spending a great deal of money to test APC as well as other literacy methods. The Institute of Educational Research, where I am now employed as Research Coordinator, has two grants form OEO for literacy work in the District of Columbia in the public schools and with drop-outs. OEO is also sponsoring large scale tests of various reading methods in Boston, Kentucky, and elsewhere. One major contract is to Greenly Associates which will be independently testing several literacy techniques in Pennsylvania and California.

Again let me thank you for your support interest. I will be looking forward to meeting you.

Sincerely yours,

Gordon R. Carey

April 23, 1965

Dr. Frank Riessman, Director
Mental Health Aide Program
Albert Einstein College of Medicine
Yeshiva University
Lincoln Hospital
333 Southern Boulevard
Bronx, New York 10454

Dear Frank:

I'm glad that I was able to help with the statement by Farmer for the book by you and Pearl. I also want to thank you for the comments on our proposal for National Literacy Program. We have incorporated the Center for Community-Action Education in the District of Columbia. It is our feeling that we should begin with pilot projects now and the success of these projects will enhance the possibility of federal funding. We have a small project going with CCNY CORE in Harlem and another to begin in May in Durham, North Carolina.

We are also in the process of drawing up a proposal for a planning grant to be submitted to OEO. I have every reason to believe that the proposal will get favorable consideration.

In regard to your suggestion that at least 1,000 non-professional tutors be employed in a paid capacity, I would like to make the following comments. We had thought of hiring a very substantial number of non-professional, indigent persons in capacity other than tutors. It seems that it would be difficult to pay some tutors and not others. Likewise, if this program is to be of the scope planned, it will have to be largely a volunteer effort, otherwise the cost could be prohibited. On the other hand, the use of volunteer Literacy Instructors will necessitate quite a careful supervisory super-structure. It was in this area that we were proposing to hire indigent non-professionals.

I believe that our plans call for at least 1,000 - if not more - personsiin this capacity. I would also like to mention that we have a project with OEO about to begin in Washington with 500 school dropouts. These are to be persons who are recruited for various jab training programs. We will give them literacy instruction and in some cases pay them for the instruction itself. However, the heart of the proposal is that a goodly number of those persons trained in literacy will themselves become Literacy Instructors upon the completion of their

training. As Literacy Instructors they would beppaid upwards of one dollar and twenty-five cents ($1.25) per hour.

As you know, I'm currently working as Research Coordinator for Mike Woolman, author of Reading in High Gear. OEO has approved a grant to Art Greenly Associates to do a large and comprehensive comparison of literacy techniques using welfare clients in Pennsylvania, California and New York. OEO is taking the position that they will test only those literacy techniques which can be purchased from publishers. Reading in High Gear is one of the methods to be tested.

The few pages which you included on the role of the Civil Rights movement at the present time is terrific. As you know from our earlier discussions, your thoughts are right in line with mine. I will be seeing Jim Farmer next week at a meeting of the Board of Directors of the Center and will be discussing some of these ideas with him at that time.

One more thing we had talked of creating some kind of advisory board or something of that nature for the Center. Would you be available if we do form such a committee? Also, would you be available for a conference in a few months to discuss in some detail the problems posed by such a large scale, volunteer literacy program as we have suggested?

Sincerely,

Gordon R. Carey,
Educational Consultant to
James Farmer

Mr. R. F. Ehinger
Manager, Personnel Administration
Western Electric Company, Corporated
222 Broadway
New York, New York

Dear Mr. Ehinger:

We are greatly pleased that Western Electric has expressed an interest in the national literacy program of the Center for Community-Action Education. We see the Center as a vehicle which can draw together the various components of the local community interested in waging war against poverty.

The support of companies like Western Electric can make real our dream of meaningful educational and vocational opportunity for all.

I am enclosing several copies of our proposal for a project aimed at developing a new approach to bringing education to the poor. It is a novel proposal. We suggest that the poor can themselves become instructors in literacy. We further suggest a new means of cooperation between industry and the community. Should this project be successful, as we have every reason to believe it will, we would hope that other companies would follow this lead so that similar projects could be set up in other communities.

We trust that Western Electric will give thoughtful consideration to this proposal. Mr. Gordon Carey, with whom you have been in touch previously is available to discuss the proposal in more detail and to answer any questions.

I look forward to hearing from you.

Sincerely yours,

James Farmer

# FIELD TEST OF
# THE ACCELERATED PROGRESSIVE CHOICE READING PROGRAM
# WITH ILLITERATE ADULTS
# IN NORTH CAROLINA AND
# PENNSYLVANIA

A Proposal to the:

Western Electric Company

From the:

Center for Community-Action Education
2226 Wisconsin Avenue, N. W.
Washington, D. C.

Date:

April 29, 1965

Project Title:

Field Test of The Accelerated Progressive Choice Reading Program with Illiterate Adults in North Carolina and Pennsylvania.

## I. Project Summary

The Center for Community-Action Education in cooperation with the Institute of Educational Research will use The Accelerated Progressive Choice Reading Program (APC) to develop reading skills for functionally illiterate, older youth and adults in North Carolina and Philadelphia, Pennsylvania. This program has already been found to be successful in developing reading skills in culturally deprived children and youth. The Accelerated Progressive Choice Reading Program (APC) is designed to rapidly produce language, reading and writing skills. Above all, the program is organized so that upon successful completion, the learner should be reading at or above the 6th-grade level. The ultimate goal of the APC Reading Program is to attain a level of reading skill for the functionally illiterate adult which is sufficient to enable him to achieve broader employment capabilities and to enable him to cope more successfully with the many problems of existence in an increasingly technical society, which places a premium on education and adaptability. This method represents an approach which has been intensively investigated by the Congress of Racial Equality and appears to offer the best basis for extending literacy in cities and communities across the country rapidly and at low cost per trainee.

## II. The Need for the Project

Illiteracy denies approximately twelve per cent (12%) of all Americans their right to fully participate in our democratic society. Edward W. Brice, Director, Adult Education Branch of the U.S. Office of Education and specialist in problems of illiteracy, has stated that the loss to the nation in terms of production potential is staggering:

> The lack of basic Elementary Education among these millions of citizens, both Native and Foreign born, constitutes a continuing national problem of great magnitude and urgency both in time of peace as well as war.

The problem of illiteracy, which affects eight (8) million Americans has been called a national disgrace. Twelve (12) per cent of the adult population, twenty-five (25) years of age and above, are functionally illiterate and many more are educationally retarded. By the vagaries of circumstance, rather than personal choice or fundamental capacity, they are not and have not been among the beneficiaries in the distribution of our national heritage. These persons are unable to cope with the demands of modern technological society, and are largely supported by public funds.

## III. Purpose and Objectives

The major purpose of this project is to evaluate the potential for cooperation between American industry and voluntary community resources in developing successful literacy programs within local communities.

### Objectives

1. To test the effectiveness of utilizing volunteer Literacy Instructors (LIs) to teach functionally illiterate adults and older youth to read using APC outside the formal school setting.

2. To determine the effects of this program on employability and job-related behavior of the adult illiterate population.

## IV. Operation of the Project

The project will be run in Greensboro or Burlington, North Carolina and Philadelphia, Pennsylvania under the auspices of the Center for Community-Action Education. (Other cities or states might be considered should Western Electric so desire.) Staff from the Institute of Educational Research (IER) will supervise and implement the literacy program. Staff of Western Electric will supervise the administration of the project in coordination with IER staff personnel.

1. Literacy Trainees: 500 functionally illiterate youth and adults, approximately 150 in North Carolina and 350 in Philadelphia, will be recruited by local community agencies over a period of six months. Among the cooperating recruiting agencies will be local churches, civil rights organizations, fraternal and civic groups, and labor and industrial organizations.

2. Training Facilities: Training facilities will be arranged and/or provided by Western Electric. In-plant literacy training could be instrumental in providing motivation for developing job skills. However, training could also take place in private homes, churches, offices or practically anywhere which can provide space for 15 persons, adequate light, relative quiet and a sufficient number of tables and chairs.

3. Testing: All persons to be trained will be pre-and post-tested using standard reading tests. Pre-test scores will establish eligibility for the program and post-test scores will establish the amount of gain. Persons whose initial scores are at 6th-grade reading level or above will not be eligible as the goal is to concentrate on the severe underachievers.

4. Quality Control: Periodic visits by staff members of IER and the Center will be made to insure proper use of instructional material, and to relate the progress of the project to the time schedule planned in this proposal. Staff of Western Electric will also visit the projects to familiarize themselves with the program and the progress of the project.

5. Personnel: A Project Director and an Assistant Project Director will be required to direct and plan the operation of the project.

6. Literacy Instructor (LIs): LIs will be trained and hired from the functionally illiterate adult population itself. These persons will be carefully selected and will be paid a nominal wage during the training period. Upon completion of their training ten of those who qualify as LIs will be hired as full-time instructors. Two others will be hired to counsel, recruit and coordinate.

## V. Project Schedule

1. Planning Period - 2 months following project initiation. During this period the project will be planned in detail. The Project Director and his Assistant will be hired. Potential LIs will be recruited.

2. Project Initiation - 1 month.
   (a) Potential LIs will be intensively trained.
   (b) Training facilities will be secured and made ready.
   (c) Recruitment of literacy trainees will begin.
   (d) Pre-testing of functional illiterates will begin.

3. Literacy Training - 9 months.
   500 persons will be trained during this phase. No new trainees will be introduced into the program after the end of the first six months of this phase in order to insure that all trainees will complete the program within the 9 month period. As trainees progress in the program they themselves will begin to function as student-instructors on new trainees coming into the program. It is anticipated that at the completion of the training period, some trainees will continue as employed LIs and some will function as part-time LIs on a volunteer basis.

4. Project Evaluation: Quarterly progress reports will be submitted to Western Electric. In addition, the following three evaluations will be made by the Institute of Educational Research and submitted to Western Electric following completion of the first year.

   (a) Within 3 months completion a report will be presented covering the overall operation of the project.

(b) Within 6 months analyses of the findings will be presented showing changes in literacy skill.
(c) Within one year a report will be submitted relating literacy-skill gains to earnings and job stability.

## VI. The Accelerated Progressive Choice Reading Method

The Accelerated Progressive Choice Reading Method (APC) was designed specifically to teach reading to culturally disadvantaged adolescents and young adults. It was originally developed by Dr. Myron Woolman under a grant from the President's Committee on Juvenile Delinquency and Youth Development. It has been field tested for over a year. Among the groups cooperating in the field research of APC were Bank Street College (New York City), Mobilization for Youth (New York City), Washington Action for Youth (D.C.), Boston Action for Community Development (Boston, Mass.), and The North Carolina Fund (Charlotte, N.C.).

APC is now published by Science Research Associates (Chicago). APC is currently being used in the public schools in Washington, D.C., Charlotte, North Carolina, and Galena Park, Texas. It is also being used by the CCNY CORE chapter in Harlem.

In one of the larger field studies of APC, 146 8th and 9th graders in a public school received an average of 51.2 hours of instruction, in classes ranging in size from 20 to 30 pupils. In this study the mean reading score of the 146 subjects was raised from 4.8 years to 6.0 years in less than 3 months. This study and others indicated significant behavioral and personality changes in the APC trainees as well as greatly improved reading, writing and speaking skills.

APC is now being published by Science Research Associates (Chicago) under the name of "Reading in High Gear".

## VII. Project Expectations

It is projected that this proposal will:

1. Substantially increase the reading ability of at least 400 persons.
2. Substantially increase the employability and income-producing skills of the trainees.
3. Provide significant status gain and increased motivation to the participants.
4. Provide full-time, meaningful employment for the 12 persons who will be trained as literacy instructors and who will be recruited from the ranks of the disadvantaged unemployed.
5. Test the ability of non-professional community agencies to recruit, organize and teach illiterates.
6. Provide a model for cooperation between industry and private social agencies which can be duplicated in many other communities.

## VIII. The Center for Community-Action Education

The Center for Community-Action Education, hereinafter referred to as the Center, was recently incorporated as a non-profit educational organization in the District of Columbia.

The initiative for the formation of the Center came largely from James Farmer, National Director of CORE. The Center is an outgrowth of Mr. Farmer's concern that the civil rights movement be more intimately involved in the day-to-day economic problems of the poor - both black and white. It is the intention of the Center to mount literacy and other educational programs throughout the nation in cooperation with various community organizations.

In addition to James Farmer, the initial Board of Directors of the Center consists of:

Gordon R. Carey - Research Coordinator,
Institute of Educational Research; formerly,
Assistant to the National Director,
Congress of Racial Equality

Floyd B. McKissick - Attorney,
National Chairman,
Congress of Racial Equality

Lyle Spencer, President,
Science Research Associates; Chairman,
Board of Trustees, Roosevelt University

Myron Woolman, Ph.D. - Director
Institute of Educational Research

IX. Budget:

| | | |
|---|---|---|
| Field Personnel: | | |
| Project Director | $11,000.00 | |
| Ass't Project Director | 6,000.00 | |
| (12) Literacy Instructors | 40,000.00 | |
| Secretary - Typist | 5,200.00 | |
| Payroll Taxes | 4,389.00 | |
| Total Field Personnel | | $ 67,089.00 |
| IER Project Administration Costs: | | |
| Supervision and Report Writing | | 11,870.00 |
| Permanent Equipment: | | |
| 1 Typewriter | $500.00 | |
| File Cabinet | 60.00 | |
| 3 Desks and Chairs | 300.00 | |
| Total Permanent Equipment | | 860.00 |
| Recruitment Costs | | 1,000.00 |
| Proportional Rental Costs in IER | | 2,750.00 |
| Travel | | 5,000.00 |
| Testing Materials | | 3,000.00 |
| Instructional Materials | | 6,000.00 |
| Postage and Express | | 1,000.00 |
| Telephone (long distance calls and on site calls) | | 1,200.00 |
| Quality Control and Data Analysis: | | |
| All testing and evaluation, coding, scoring, machine operation, data analysis and data reduction. Data handling and organization resulting from observation visits will include reports, check-lists, ratings and other evaluations. | | 6,000.00 |
| Total Direct Costs | | $105,769.00 |
| 20% Indirect Costs | | 21,538.00 |
| Total Budget | | $127,308.00 |

March 19, 1965

Mr. Gordon R. Carey
Educational Consultant
Institute of Educational Research
2226 Wisconsin Avenue, N. W.
Washington, D. C. 20007

Dear Mr. Carey:

I have the copy of the working paper you sent titled: "Proposal for Implementing a National Literacy Program." The overall purpose and design of the program seem to me to be quite sound and are aimed at attacking a very serious problem. My major reservation is that the program will rely solely on the Accelerated Progressive Choice (APC) Reading Program. I think that the APC Reading Program has considerable promise in the area of developing adult literacy. And, I understand that the method has been extensively tested. However, other materials and programs are being developed and tested and should be included in the proposal. I concur with CORE its feeling that the proposal should not be limited to the use of any one technique and assume that this will be taken seriously in the implementation of the proposal.

In the selection of instructors, you might include some kind of commitment to a specific length of time. Our experience with tutors has been that some of the initial enthusiasm and motivation is readily dissipated, especially if achievement results are not readily forthcoming. In the training program for the Literacy Instructors, I would hope that you would include continued in-service training and not simply an initial orientation program. Our experience with Homework Helpers in the Mobilization for Youth Program suggests that the continued weekly meetings with the tutors have been a very important ingredient in whatever success has been achieved.

The overall idea is an exciting and appealing one. I would certainly support its general design and intent despite the caveats I have suggested above. I hope you will keep me informed of future developments.

Sincerely yours,

A. Harry Passow

A. Harry Passow

Mr. Gordon R. Carey
Educational Consultant
Institute of Educational Research
2226 Wisconsin Avenue, N.W.
Washington, D.C. 20007

Dear Mr. Carey:

I find James Farmer's proposal as outlined in the working paper to be extremely exciting. I have great confidence that its goal of a massive increment in literacy among the illiterate will be achieved as planned.

One great fear, however, nags at me as I read this proposal. As you no doubt know, I am a scientific researcher and educational technologist in the area of communication. By this I mean that my specialty is in the processes of imparting rather than in receiving communications. Reduction of illiteracy means improved ability to receive both oral and written communications. Unfortunately, improvement of reading and listening does not seem to have any appreciable effect on the communicative skills of speaking and writing. I could compile a bibliography of experimental references to document this claim if such were desired.

I am not convinced that the achievement of literacy per se enhances the employability of illiterates to the extent many tend to believe. I find it difficult indeed to envision many occupations in which instructions and other kinds of communications cannot be given orally to workers who are illiterate. Where such occupations can be envisioned, I find no strong likelihood that the achievement of literacy either enables such workers to function better in those jobs or to qualify for more remunerative ones. The achievement of literacy seems to me merely to be a means to the end of self-instruction with verbal materials where oral instruction will not be provided; it is not a worthwhile end in itself and it is not a necessary means to the end of increased skill in speaking and writing. It is these latter skills which seem to me the two most important skills in terms of which laymen assess the "literacy" of others and, therefore, the basic language skills which most affect employability and achievement.

I foresee several unfortunate consequences of a program inordinately concerned with improving literacy per se. Because literacy is achieved among illiterates is no reason to assume that they will read either technical books which will increase their job skills or literature of a quality which will improve their education in other ways. It is far more likely that those who do not encounter reading matter so difficult they become non-readers will seek reading matter so easy that literacy has provided them merely with another form of entertainment. And, certainly, for us to enable a great segment of our population to read comic books hardly seems as laudatory as a successful war against illiteracy might sound.

However, if the skills of listening and reading are measured in terms other than that of immediate comprehension, then programs which improve the communicative skills of speaking and writing do usually result in improvement in the skills of listening and reading. Again, a substantial bibliography could be compiled.

Let me mention briefly but one specific example (a more extended treatment can be found in my text, Voice Training, published by Ronald Press, 1964). I have found diction (the quality of words used) to be closely related to the ability to discriminate among synonyms on rather frequently used words (e.g., think, believe, feel; true, right, correct; broad, wide, thick). Further, when training in synonym differentiation was provided, diction improved overall and no more on the words employed in training than on words not employed. Moreover, and very importantly, improved diction resulted in improved vocabulary. Numerous studies could be cited to support the contention that the reverse is by no means the case; vocabulary drill does tend to improve the receptive skills of reading and listening but it does not seem to have perceptible effects on the communicative skills of speaking and writing.

I therefore find the present proposal weak in two important respects: (1) it puts off research on teaching the communicative skills for at least four years from the initiation of the program, so that actual training in any skill other than reading is probably postponed for at least a decade; (2) the emphasis is on literacy per se, rather than on the use of that tool wisely or on the provision of increased skill in both imparting and receiving information, and I believe that voracious readers of puerile printed matter are no better qualified to contribute actively to our society than had they remained illiterate and sought other pastimes.

I am certainly not saying anything derogatory about the Woolman APC Reading Program. It is extremely effective in providing an essential tool for learning, that of enabling a person to select words in his oral vocabulary from symbols which appear on a printed page. To make of this skill a substitute for all other language skills is not only to expect that his great contribution is a linguistic panacea but the consequences of such an expectation in my opinion can be an undeserved defaming of Dr. Woolman, and, even more importantly, a tragedy for all of those lives who were saved from illiteracy when they could have been saved from more grievous forms of enslavement as well.

Very sincerely yours,

Paul Heinberg

UNIVERSITY OF WASHINGTON
DEPARTMENT OF PSYCHOLOGY
SEATTLE 5

April 5, 1965

Mr. Gordon R. Carey
Educational Consultant
Congress of Racial Equality
Institute of Educational Research
2226 Wisconsin Avenue N.W.
Washington, D. C. 20007

Dear Mr. Carey:

I appreciate very much your sending me a copy of the working paper submitted to the Congress of Racial Equality.

I am, as you know, somewhat familiar with the APC reading program. I have examined the materials carefully, read much of the research that has been done and discussed both theory and methodology with Dr. Woolman. I am very much impressed with this approach to reading and feel that it is particularly well adapted to the kind of program outlined in Mr. Farmer's proposal.

I am very much impressed by the proposal itself. I think the notion of using peers as instructors and developing the program outside of a school setting is a very sound one. I think there is a very good prospect of success and, if successful, the project would make a most significant contribution toward solution of the problems of illiteracy and poverty.

My only reservation would be with respect to the scope of the project in its initial stages. The proposal suggests that at least a score of communities be involved in the initial operational stage. It would seem to me to be advisable to start off on a smaller scale--in four or five communities perhaps--during the planning stage. There will, obviously, be a great many problems to work out in placing such a program into operation and an attempt to begin on a very large scale might jeopardize the success of the project.

I would appreciate very much if you would keep me informed of developments. I certainly hope that something will come of this.

Sincerely,

C. R. Strother

Washington, D. C. 20007

Dear Dr. Carey:

I read through the proposal for "Implementing a National Literacy Program" and I am quite enthusiastic about the plans you suggest. I would like to take the liberty of making a few recommendations. For the first year or two, I would suggest that the program be confined to one large metropolitan area such as Washington, D.C. so that the trained field workers could be closely observed and an evaluation could be made of the processes of growth and change both in regard to staff and recepients. It would be very unwise to stay with one technique. I have tremendous respect for Mike Wollman and the technology that he has been developing in the reading area; however, I would like to see the use of alternate techniques with a satisfactory evaluation plan in a few situations. I would hypothesize that some people respond to one technique in a more rapid and efficient manner than they would to other methods. It would be interesting and important to find out what kind of people, with what kinds of skills respond to which techniques; under what circumstance. My last suggestion is that adequate time be allowed for supervision and training of project coordinators so that they can become familiar with the inherent flexibility that can exist in the interpersonal aspects of literacy training and with the multiple strategy that may be indicated in different reading and learning contexts.

Nevertheless, this is an important program and if we here at the Institute can be of help, please let us know.

Best wishes for the success of your work. Perhaps on one of my trips to Washington I could sit and talk with you or some of your staff members and make additional suggestions or elaborate on these brief remarks.

Sincerely,

Mr. Gordon R. Carey
Educational Consultant
Institute of Educational Research
2226 Wisconsin Avenue, N.W.
Washington, D.C. 20007

Dear Mr. Carey:

I read your proposal with fascinated interest. It seems to me that the freedom school idea is exactly what we need, something that will go around the schools and reach those people who most need attention.

I would have only a few brief comments on the proposal:

1. I would assume that, when amounts like $50 million are involved, donors would insist on a pilot project to demonstrate the feasability of the major project and to iron out some of the kinks in the operation. I would think that the most important thing to demonstrate is that a L.I. could recruit illiterates (a high percent of those in a given area) and keep them in a class until they become literate.

2. If you already feel you are on the right track with Mr. Woolman's reading program, what would be the function of the research operation at Howard?

3. One gets a bit confused in reading the proposal because you seem to want to go <u>beyond</u> literacy training, and all in one gulp. Eliminating illiteracy is such a giant effort in itself, one wonders if this, in itself, is not enough for one proposal. Beyond this, you speak of skill and job training, etc., and the various activities at Howard. Is this too much? Does it need clarification? Is CORE better able to do skill and job training than other agencies?

4. If you are going to have white middle class L.Is. (among others), and I expect you could get vast numbers of them, will they be able to recruit?

5. I am not quite clear about how the $50 million will be spent.

I hope these comments are of some relevance or use. On the whole

I find the proposal very carefully thought out, imaginative, and clearly and carefully written. I hope you do well with it and I trust we will have a chance to talk further about it.

Regards,

Pat Sexton

Patricia Sexton

Educational Sociology

P.S. Will some people wonder about the word "action" in "community action" and call up images of picket lines and sit-ins? Does this terminology confuse things or do you feel it adds something vital? Perhaps you have "action" programs in mind that go beyond literacy education and training? I think some people will wonder about this.

[illegible] Gordon A. Carey
Educational Consultant
Institute of Educational Research
[illegible] Wisconsin Avenue, N.W.
[illegible]shington, D.C. 20007

Dear Dr. Carey:

Please excuse my delay in answering your letter of March 8th, however I felt that a problem of the magnitude considered in your proposal required some thought.

Let me begin my comments by stating that I am in favor of a national literacy program. Furthermore, I feel that the needs are extreme enough to recommend that any project of any scope be funded in an effort to get some beginnings in attacking the problem.

With respect to the particular proposal you have forwarded to me, I must say that I am somewhat disappointed. The proposal reads to me like a beginning work statement which may, after long and tedious efforts, develop into a substantiative proposal. At the present moment it is extremely nebulous. There are no specifics to evaluate and make recommendations about. The only portion of the proposal of any substance is the description of the A.F.C. Reading Program and I'm afraid that insufficient data is presented to allow one to state that A.F.C. provides the best hope for literacy in the United States. I would have prefered evaluations of several programs simultaneously with a possible outcome being combinations of methods showing the most probability for success.

I think my major criticism of this as a proposal stems from the fact that you really haven't told anybody precisely what you are going to do; where you are going to get the people; how you are going to evaluate the success or failure of the project; and what you will do in either event.

Please do not misconstrue my comments. I am in favor of a national literacy project, I even think that the A.F.C. method is most probably the best one to try initially, but I do think that it behooves you to provide more specific information in concerning what operations to do.

If I can be any other help to you please feel free to contact me further.

Sincerely,

A. Harvey Block
Professor of Research

Dear Mike:

Many thanks for your letter of February 9th enclosing your new patent and a copy of the proposal for implementing a national literacy program. I have not read the patent document and don't have much of a head for such things. I have read the NATIONAL LITERACY PROGRAM proposal and find it exciting indeed.

The situation at this end is that Henry Saltzman is trying to set up a time to visit Charlotte and hopes that I can go down at the same time. I certainly shall if he can arrange a time when I am free. He suggests that after they look at the Charlotte situation they may wish to set up a small meeting at which you could discuss your methods and answer questions. He has looked at the booklet on "Evaluations of the Progressive Choice Reading Method" and says that he has a number of questions that he would like to discuss with you. As soon as I hear anything else I will let you know.

With all good wishes,

As ever,

Washington, D.C. 20007

Dear Mr. Carey:

This is in reply to your letter of March 8 in which you enclosed "Proposal for Implementing a National Literacy Program", prepared by James Farmer.

While the Proposal as a whole sounds like a very worthwhile one, I will comment on only two aspects which fall within my particular technical competence.

First, the choice of The Accelerated Progressive Choice Reading Program developed by Dr. Myron Wollman is, I believe, a good one. I have known Dr. Wollman for some years during and since his employment in HumRRO and have followed his research and development work. All of it has been careful and well-tested as well as ingenious in design. Second, the provision, paragraph 2 - Part II, on research is of vital importance. I would urge that research be directed toward the measurement of literacy, general social competence and attitudes and that these be applied systematically during the course of the implementation of the literacy program. Such systematic study should add much to our knowledge of mental growth and social competence.

I hope that this Proposal will receive favorable consideration.

Dear Mr. Carey:

This is in response to your request that I comment on "Proposal for Implementing a National Literacy Program."

I have read the manuscript by James Farmer with great interest. I personally feel that it is not only a good idea but actually essential. It is necessary that we have not one center but probably many centers that will develop the procedures and show the way to many other centers.

First of all I think the problem of motivation is a major one. This is mentioned in the manuscript but I consider it as difficult a problem to solve as that of setting up some instructional materials that can be handled without trained teachers. I do not believe that the manuscript points out how motivation can be obtained. In my experience many of the illiterates are very ashamed of their inferiority in this respect, and tend to run away from any help that they may obtain. What incentives will be used to get them started is one problem that needs to be solved.

If illiterates can be brought in to a center for training, the next problem is to use instructional materials that will show them success and progress from day to day. The achievement of success is in itself an incentive and a very powerful motivating factor. Therefore, the way the program is operated, the feeling of achievement every minute, every hour and every day is essential. Programmed learning, of course, with immediate reinforcement and a step to step progress is a good method. With such materials the job of the teacher would be not necessarily instruction in reading, but supportive and motivational. Thus, the employed personnel and the volunteers that are selected have to be selected with care from this point of view.

Your discussion of the cost of such a program does not impress me. If the job has to be done and can be done, this great country can afford to pay what is needed. Saving of funds at the expense of a good program is self-defeating.

With best wishes for your program, I am

Sincerely yours,

Samuel A. Kirk

Dear Mr. Carey:

Thank you for your letter of March 8th enclosing a proposal for implementing a national literacy program.

This program is addressed to one of the most crucial elements in the whole effort to achieve a self-respecting participation by the Negro in American democratic life. In my opinion it is well conceived, and I am particularly gratified to note that you have been working this out with the Institute of Educational Research. I believe their methods and approach are admirably suited to a mass program of this sort.

I hope very much that this program can be implemented. Naturally in the development of such a program you would want to do some pilot programs in order to get the bugs out before the thing is mounted on a nation-wide basis. I assume that this is contemplated.

With best wishes,

Sincerely,

Leonard S. Cottrell, Jr.

2226 Wisconsin Avenue N.W.
Washington D.C. 20007

Dear Mr. Carey:

A few days ago I met with Jim Farmer. Before we discussed the Educational Park as a potential solution to the need for general educational improvement and as part of it to urban segregation, we spoke briefly about the proposal for implementing a national literacy program.

1.) With regard to the literacy program:
I have mainly two suggestions: on page 3, the text may be misleading. As I understand it, the program is geared toward reaching all illiterates, not only Negroes.

Some incentive should be given to participate in such a program. This incentive should not be simply "better chances for the future", but some, even small payment for the time devoted to the program.

2.) Jim shares my opinion about the great potential value of the concept of the Educational Park. He suggested that it should be discussed with Dr. Woolman and that the research which I suggest might become part of the Institute for Educational Research. The enclosed paper on the Educational Park is of a confidential character. Please, read it and let me have your reaction to it.

Very sincerely yours,

Max Wolff
Director of Research

OFFICE OF THE PRESIDENT

March 5, 1965

Mr. Gordon R. Carey
Editorial Consultant
Institute of Educational Research, Incorporated
2226 Wisconsin Avenue, NW
Washington 7, District of Columbia

Dear Gordon,

Responding to your request of February 12 for a grant to the Institute of Educational Research, Incorporated, to conduct a controlled experiment on using volunteers for training purposes to improve the reading ability of culturally deprived youngsters, The Spencer Foundation is glad to make a grant of $[illegible],500.

I assume that these funds will be spent approximately along the lines of your original request and the budget you submitted.

[illegible] has a [illegible] its proposed literacy training program. The specific purpose of this study is to find out, [illegible] whether the idea [illegible] to work on a large scale.

PAGE PARTIALLY ILLEGIBLE

The key to the study will be, of course, setting up a rigorous experiment that will provide hard data that could be replicated later by other investigators. I would hope that you would use a control group in parallel with your experimental students.

If the study proves successful, you will have data of potentially great value for generalizing this type of work all across the United States and probably in many other countries as well, particularly the underdeveloped ones.

The best of luck, and I hope you will keep me posted on the progress of your experiment.

Sincerely,

Lyle

Lyle M. Spencer

Dear Gordon:

James Farmer's proposal for national literacy program is terrific. I have made comments on the proposal which I have enclosed.

My major suggestion is the addition of at least 1,000 employed nonprofessional tutors in addition to the volunteers. I think the Office of Economic Opportunity might be interested in supporting this dimension of the program.

In connection with the discussion I had with you in New York, I have enclosed a couple of pages on the role of the Civil Rights movement in the present period. I would be very much interested in James Farmer's reactions to these proposals.

Cordially,

Frank Riessman

Dear Gordon:

I went over - with some care - the material that you and Jim Farmer wanted me to look at. It seems to me sound, as you realized I would say, since we have discussed this. As you know, I shall be moving to Washington the first week in April and will be at 1715 "N" Street, N.W. We should be in touch with each other as things go on.

Looking forward to seeing you soon.

Sincerely,

Allan

Washington, D. C. 20007

Dear Mr. Carey:

I read with interest Mr. Farmer's letter of April 29, 1965 outlining the plan you want to initiate in order to develop the reading skills of functionally illiterate adults and older youths. I know it represents a tremendous amount of work and study on your part. However, your presentation of a specific proposal to the Western Electric Company goes beyond what I had anticipated as a result of our earlier discussions. You may recall that I expressed interest in obtaining information about your project as we like to be well informed on all matters that relate to the problems of the non-white population. Where pertinent, this information is sent to our operating locations in the field so that they may be in a better position to participate in community activities affecting non-whites.

At your convenience I will be glad to discuss your proposal in more detail as suggested by Mr. Farmer in his letter. I look forward to hearing from you.

Sincerely yours,

R F Ehinger

June 7, 1965

Dr. Thomas Edwards
Science Research Associates
259 East Erie Street
Chicago 11, Illinois

Dear Budd:

I was certainly distressed to learn of your recent incarceration by the medical fraternity. It was good to chat with you on the phone the other day and to learn that your problems may not be as serious as was first indicated. I hope you will be back on your feet and feeling better shortly. In the meantime, be sure to take it easy and don't let any of us at IER stir you up unduly.

I am writing now on behalf of the Center for Community-Action Education. Let me just recap briefly some of the developments so as to refresh your memory. The Center is incorporated in the District of Columbia and has to date received no funds except the $5,500.00 grant from the Spencer Foundation. That money was received here early in March. It was specifically intended to help mount two literacy projects - one with CCNY and the other in North Carolina. At CCNY the project has been operating for a couple of months now and has been running <u>fairly</u> smoothly.

North Carolina has not yet gotten underway. This is due to a variety of reasons. You will recall, that the money received from the Spencer Foundation was not sufficient to pay for the two projects in their entirety. IER was to contribute staff time and other services. As you also know, IER was in a great deal of financial difficulty. We spent most of our time

at the Institute trying to solve its financial problems and had very little energy left over for anything else. Then, just as we were about to get started in Durham in the middle of May, we ran into Dr. Monroe Neff, Director of the Division of Community Colleges for the state of North Carolina. He is undertaking a massive literacy project and wanted to take over and finance the Durham project with SRA materials to be paid for by him. We are currently in negotiations with Neff and are not certain how that will turn out.

The other problem in regard to these projects is related to materials. In my letter of February 12 to Lyle Spencer, in which I asked for the grant, I said, "we assume that Science Research Associates will supply us with sufficient sets of Reading in High Gear to cover our needs." On March 5 when Lyle sent the check along with a covering letter, he did not refer to this assumption that SRA would provide the materials. He did say however, "I assume that these funds will be spent approximately along the lines of your study outline and the budget you submitted."

When I spoke with you about a month ago I believe you indicated that SRA could send the APC materials for the two Center projects. (IER is contributing BPC). Specifically, since the project in North Carolina is still being held up I would like to have the Center expand the CCNY project in Harlem to include two classes with the Council for Jobs and Freedom. They have one class set up and ready to go and another ready to start shortly. They need twenty-five (25) sets of "Reading in High Gear" and two sets of instructor manuals. If you could have these sent to them it would be of great help. They should be sent to Mr. John Burke, Council for Jobs and Freedom Inc., 72 West 125th Street, New York City, New York. Thanks ever so much.

Sincerely yours,

Gordon R. Carey
Secretary-Treasurer

# MINUTES OF INITIAL MEETING IN LIEU OF REGULAR ANNUAL MEETING OF BOARD OF DIRECTORS OF THE CENTER FOR COMMUNITY-ACTION EDUCATION

*Gordon Carey*
*James Farmer*
*Floyd McKissick*
*Lyle Spencer*
*Myron Woolman*

The initial meeting of the Board of Directors of the Center for Community-Action Education, was held at 1:30 p.m., April 27, 1965, at 2226 Wisconsin Avenue, N.W., Washington, D.C.

The following members of the Board were present:

Mr. James Farmer
Mr. Floyd McKissick
Dr. Myron Woolman
Mr. Gordon Carey

Mr. Lyle Spencer was unable to attend, and sent a letter of his regrets.

Also present was Nina Small, Administrative Assistant of The Institute of Educational Research acting as secretary for the meeting.

Mr. Floyd McKissick served as Temporary Chairman and called the meeting to order.

The Chairman explained the Charter of Incorporation. Dr. Woolman made a motion that the Board accept the Certificate of Incorporation. Gordon Carey seconded the motion. Carried.

The Chairman then opened the floor for a motion on adoption of By-Laws. Gordon Carey moved that the By-Laws be adopted as submitted. Myron Woolman seconded the motion. Carried.

Gordon Carey moved that an election of officers to serve until the July Annual Meeting would be proper at this time. Myron Woolman seconded this motion. Carried.

The Chairman then opened the floor for nominations. Myron Woolman nominated James Farmer for President. There were no other nominations. Elected unanimously.

Myron Woolman moved that the two offices of Secretary and Treasurer be combined at this time. James Farmer seconded the motion. Motion Carried.

Myron Woolman nominated Gordon Carey for Secretary-Treasurer. Elected unanimously.

Gordon Carey moved to create a position of Counsel to the Center. James Farmer seconded the motion. Motion Carried.

Gordon Carey moved that Floyd McKissick be retained as Counsel to serve at the pleasure of the Board. James Farmer seconded the motion. Motion Carried.

Gordon Carey moved that the present Board of Directors of the Center shall constitute the Executive Committee until such time as the Annual Meeting. Myron Woolman seconded the motion. Carried.

The Chairman stated that the next order of business was the nomination of additional Board members. Gordon Carey moved that we proceed with nominations for additional members of the Board of Directors and that the President be instructed to prepare formal letters of invitation to persons so nominated. Myron Woolman seconded the motion. Carried.

The Chairman opened nominations for Board members. James Farmer nominated Roy Wilkins, Martin L. King, Jr., Whitney Young, and John Lewis.

Myron Woolman nominated James M. Nabrit, Jr.

Myron Woolman moved that the President be directed to write to each of the nominees that they were unanimously invited to serve as Directors and that if their individual time schedules do not allow for personal attendance at each meeting that they might send representatives to carry their vote. Gordon Carey seconded the motion and moved to accept nominations submitted at this time. Carried unanimously.

Gordon Carey moved that we ask Dr. Nabrit to nominate another person from Howard University to the Board, and that the President direct a letter to President Nabrit asking for this nomination. James Farmer seconded the motion. Carried.

Myron Woolman nominated Jerry Wurf. Passed.

Myron Woolman nominated Leonard Cottrell, Jr. Passed.

Gordon Carey nominated Jean Cahn. Passed.

There being no further nomination, the Chairman then asked for a report of projects. Gordon Carey explained the status of Western Electric Project (copy of proposal attached).

James Farmer moved that we cooperate with Howard University in submission of a Planning Grant Proposal to the Office of Economic Opportunity. Myron Woolman seconded the motion. Carried.

Myron Woolman moved that officers, staff or agents of the Center who handle money be bonded in such amount as to be consistent with the funds handled. Gordon Carey seconded the motion. Carried.

Myron Woolman moved that the President and Secretary-Treasurer be permitted to select a bank or banks deemed convenient. James Farmer seconded the motion. Carried.

Myron Woolman moved that all funds to be transferred to the Center bank accounts are to be used for expediting educational programs as consistent with the By-Laws. Gordon Carey seconded the motion. Carried.

Myron Woolman moved that the actions taken by the Incorporators for the purposes of forming the corporation are hereby ratified and that the President and the Secretary-Treasurer are authorized to pay any expenses so incurred. James Farmer seconded the motion. Carried.

Myron Woolman moved that the President be authorized to submit any proposals that he may deem to be consistent with the aims of the Center. Gordon Carey seconded the motion. Carried.

Myron Woolman moved that the President and/or the Secretary-Treasurer be authorized to enter into any contract or to execute and deliver any instrument in the name of and on behalf of the Corporation. James Farmer seconded the motion. Carried.

There being no further business to come before the meeting, upon motion duly made, seconded, and unanimously adopted, it was:

> RESOLVED, that the initial meeting in lieu of regular annual meeting of the Board of Directors be, and the same hereby is, adjourned.

_____
Secretary

# BY-LAWS

# OF

# THE CENTER FOR COMMUNITY-ACTION EDUCATION, INC.

## ARTICLE I. BOARD OF DIRECTORS

SECTION 1. General Powers.

The corporate powers, property, business and affairs of the Corporation shall be exercised, vested in, managed, conducted and controlled by its Board of Directors.

SECTION 2. Number, Tenure and Qualifications.

(a) The number of Directors shall be not less than five (5) nor more than seventeen (17).

(b) Each Director shall hold office until the next regular annual meeting of the Board and his successor shall have been elected and qualified, or until his prior death, resignation, or removal. At each such regular annual meeting the remaining members of the Board shall decide whether or not to remain in office, and to elect each other to the Board for the coming year; provided, however, that any member of the Board, with or without cause, may be removed from office at any such meeting or at any other meeting of the Board by an affirmative vote of a majority of the Directors.

SECTION 3. Regular Meetings.

(a) A regular meeting of the Board of Directors shall be held without other notice than this By-Law at 12:00 o'clock noon on the third Friday in the month of July in each year. If the day fixed for the annual meeting shall be a legal holiday in the District of Columbia, then such meeting shall be held on the next succeeding business day.

(b) The Board of Directors may provide, by resolution, the time and place for the holding of additional regular meetings without other notice than such resolution.

SECTION 4. Special Meetings.

Special meetings of the Board of Directors may be called by or at the request of the President or the Secretary and shall be called by the President or the Secretary at the request of not less than one-third of the Directors. The person or persons authorized to call special meetings of the Board of Directors may fix the place for holding any special meeting of the Board of Directors called by them.

SECTION 5. Notice.

(a) Notice of any special meeting shall be given at least five (5) days previous thereto by written notice delivered personally or mailed to each Director at his business address, or by telegram. If mailed, such notice shall be deemed to be delivered when deposited in the United States mail so addressed, with postage thereon prepaid. If notice be given by telegram, such notice shall be deemed to be delivered when the telegram is delivered to the telegraph company.

(b) Emergency meetings may be called upon lesser notice, but the business transacted thereat shall not be deemed the act of the Board of Directors unless (a) at least 1/2 of the members of the Board of Directors are present at the said meeting, (b) at least 1/2 of the members of the Board of Directors certify in writing that an emergency existed of such pressing nature as to necessitate the calling of an emergency session and setting forth the grounds therefor, and

(c) the said certificate and statement of the grounds be mailed within 48 hours to all members of the Board of Directors.

(c) Any Director may waive notice of any meeting. The attendance of a Director at a meeting shall constitute a waiver of notice of such meeting except where a Director attends a meeting for the express purpose of objecting to the transaction of any business because the meeting is not lawfully called or convened.

(d) The business to be transacted at, and the purpose of, any special meeting of the Board of Directors must be specified in the notice, or the waiver of notice, of such meeting, but amendments to the agenda for new business may be offered at the meeting.

SECTION 6. Quorum.

One-third of the Directors shall constitute a quorum for the transaction of business at any meeting of the Board of Directors, but, if less than such number is present at a meeting, a majority of the Directors present may adjourn the meeting from time to time without further notice.

SECTION 7. Manner of Acting.

The act of a majority of the Directors present at a meeting at which a quorum is present shall be the act of the Board of Directors.

SECTION 8. Vacancies.

Any vacancy occurring in the Board of Directors, and any Directorship to be filled by reason of an increase in the number of Directors, may be filled by the affirmative vote of a majority of the

remaining Directors, though less than a quorum of the Board of Directors, unless otherwise provided by law. A Director elected to fill a vacancy shall be elected for the unexpired term of his predecessor in office.

SECTION 9. Presumption of Assent.

A Director who is present at a meeting of the Board of Directors at which action on any corporate matter is taken shall be presumed to have assented to any actions taken unless his dissent shall be entered in the minutes of the meeting or unless he shall file his written dissent to such action with the person acting as the secretary of the meeting before the adjournment thereof of said meeting.

SECTION 10. Executive Committee.

(a) By resolution adopted by a majority of the Directors in office, the Board of Directors may designate and appoint an Executive Committee consisting of the Officers of the corporation and at least three (3) other Directors, which Committee shall have and exercise the authority of the Board of Directors in the management of the Corporation, except that the Executive Committee may not remove a Director or amend the by-laws; provided, however, that such Committee shall report to the full membership of the Board of Directors after each meeting of the Executive Committee by mailing a copy of the minutes of the Executive Committee to each member of the Board of Directors; and the Executive Committee shall in addition report to the regular annual meeting of the Board of Directors or more often as appropriate or necessary in the discretion of the Committee or at the request of the Board.

(b) The designation and appointment of any Executive Committee and the delegation thereto of authority shall not operate to relieve the Board of Directors, or any individual Director, of any responsibility imposed upon it or him by law.

SECTION 11. Contracts.

No contract or other transaction between the coporation and any other firm or corporation or other contracting agency shall be affected or invalidated by reason of the fact that any one or more of the Directors is a party to or interested in such contract.

SECTION 12. Action by Directors Without Meeting.

Any action which is required by law to be taken or which may be taken at a meeting of the Board of Directors of the Corporation may be taken without a meeting if a consent in writing, setting forth the action so taken, shall be signed by all of the Board of Directors.

## ARTICLE II. OFFICERS

SECTION 1. Number.

(a) The officers of the Corporation shall be a President, a Secretary, and a Treasurer, each of whom shall be elected by the Board of Directors. Such other officers and assistant officers as may be deemed necessary may be elected or appointed by the Board of Directors.

(b) The powers and duties of the officers shall be exercised in all cases subject to such directions as the Board of Directors may see fit to give. The respective powers and duties hereinafter set forth are subject to alteration by the Board of Directors.

The Board of Directors also is authorized to delegate the duties of any officer to any other officer, or employee, and to require the performance of duties in addition to those provided for herein.

SECTION 2. Election and Term of Office.

(a) The officers of the Corporation to be elected by the Board of Directors shall be elected annually by the Board of Directors at the regular annual meeting of the Board of Directors. If the election of officers shall not be held at such meeting, such election shall be held as soon thereafter as conveniently may be.

(b) Each officer shall hold office until his successor shall have been duly elected and shall have qualified or until his death or until he shall resign or shall have been removed in the manner hereinafter provided.

SECTION 3. Removal.

Any officer or agent elected or appointed by the Board of Directors may be removed by the Board of Directors at any time by the affirmative vote of a majority of the Board of Directors, after notice to all of the Directors of the intention to seek such removal, whenever in their judgment the best interest of the Corporation would be served thereby.

SECTION 4. Vacancies.

A vacancy in any office because of death, resignation, removal, disqualification or otherwise, may be filled by the Board of Directors for the unexpired portion of the term.

SECTION 5. President.

(a) The President shall be the principal officer of the Corporation and, subject to the control of the Board of Directors, shall in general supervise and control all of the affairs of the Corporation.

(b) He shall, when present, preside at all meetings of the Board of Directors.

(c) He may sign, with the Secretary or any other proper officer of the Corporation thereunto authorized by the Board of Directors, any deeds, mortgages, bonds, contracts, or other instruments which the Board of Directors has authorized to be executed, except in cases where the signing and execution thereof shall be expressly delegated by the Board of Directors or by these By-Laws to some other officer or agent of the Corporation, or shall be required by law to be otherwise signed or executed; and in general shall perform all duties incident to the office of President and such other duties as may be prescribed by the Board of Directors from time to time.

SECTION 6. Secretary.

The Secretary shall:

(a) Keep the minutes of the Board of Directors' meetings in one or more books provided for that purpose;

(b) See that all notices are duly given in accordance with the provisions of these By-Laws or as required by law;

(c) Be custodian of the corporate records and of the seal of the Corporation, and see that the seal of the Corporation is affixed to any document, the execution of which on behalf of the Corporation under its seal is duly authorized; and

(d) In general, perform all duties incident to the office of Secretary and such other duties as from time to time may be assigned to him by the President or by the Board of Directors.

SECTION 7. Treasurer.

The Treasurer shall:

(a) Have charge and custody of and be responsible for all funds and securities of the Corporation; receive and give receipts for moneys due and payable to the Corporation from any source whatsoever, and deposit all such moneys in the name of the Corporation in such banks, trust companies or other depositories as shall be selected in accordance with the provisions of Article III of these By-Laws;

(b) In general, perform all of the duties incident to the office of Treasurer and such other duties as from time to time may be assigned to him by the President or by the Board of Directors.

(c) If required by the Board of Directors, the treasurer shall give a bond for the faithful discharge of his duties in such sum and with such surety or sureties as the Board of Directors shall determine.

SECTION 8. Salaries.

The salaries of the officers, if any, shall be fixed from time to time by the Executive Committee or Board of Directors, and no officer shall be prevented from receiving such salary by reason of the fact that he is also a Director.

## ARTICLE III. CONTRACTS, LOANS, CHECKS AND DEPOSITS

SECTION 1. Contracts.

The Board of Directors may authorize any officer or officers, or agent or agents, and the Executive Committee is authorized to enter into any contract or to execute and deliver any instrument in the name of and on behalf of the Corporation.

SECTION 2. Loans.

No loans shall be contracted on behalf of the Corporation, and no evidences of indebtedness shall be issued in its name, unless authorized by the Executive Committee or by a resolution of the Board of Directors.

SECTION 3. Checks, Drafts, etc.

All checks, drafts or other orders for the payment of money, notes or other evidences of indebtedness issued in the name of the Corporation, shall be signed by such officer or officers, or agent or agents, of the Corporation and in such manner as shall from time to time be determined by resolution of the Board of Directors.

SECTION 4. Deposits.

All funds of the Corporation not otherwise employed shall be deposited from time to time to the credit of the Corporation in such banks, trust companies or other depositaries as the Board of Directors may select.

## ARTICLE IV. FISCAL YEAR

The fiscal year of the Corporation shall begin on the first (1st) day of July and end on the thirtieth (30th) day of June in each year.

## ARTICLE V. SEAL

The Board of Directors shall provide a corporate seal which shall be circular in form and shall have inscribed thereon the name of the corporation, the state of incorporation and the words, "Corporate Seal".

## ARTICLE VI. WAIVER OF NOTICE

Unless otherwise provided by law, whenever any notice is required to be given to any director of the Corporation under the provisions of these By-Laws or under the provisions of the Articles of Incorporation, a waiver thereof in writing, signed by the person or persons entitled to such notice, whether before or after the time stated therein, shall be deemed equivalent to the giving of such notice.

## ARTICLE VII. AMENDMENTS

Except as otherwise provided by the Articles of Incorporation or By-Laws, these By-Laws may be altered, amended or repealed and new By-Laws may be adopted by a vote of a majority of the Directors at any regular or special meeting of the Board of Directors.

Mr. James Farmer
National Director
Congress of Racial Equality
38 Park Row
New York 38, New York

Dear Jim:

Enclosed is a copy of my letter to Dr. Neff which is pretty much self-explanatory. If we can work out arrangements with him (which I think we can) he will actually be taking over our Durham project.

If you have no objections, I would like to put the second Center project in Philadelphia. Unless I hear from you to the contrary I will proceed with arrangements in Philadelphia.

The first Center project in Harlem is proceeding fairly well. We are severely hampered by lack of funds, but that may be taken care of shortly.

Incidentally, we sent to your home signature cards for the Center bank account. As soon as you sign and return them we can open our account.

Let me know when you will be in town again for an evening. We want to get together with Mike, the Cahns and a couple of other people.

Best wishes,

Gordon R. Carey
Secretary-Treasurer

Enclosure

GRC/bb

June 8, 1965

Dr. Monroe Neff
Assistant Director
North Carolina Community Colleges
Education Building
Raleigh, North Carolina

Dear Dr. Neff:

It was a pleasure to talk with you the other day on the telephone. I regret that I was unable to be in Durham, but Mr. McKissick, serving as General Counsel for the Center, is more than capable of representing the interests of the Center.

Before going into our ideas for Durham, I would like to give you a bit of background. The Center exists primarily for two purposes: to teach literacy skills, and to involve volunteer workers in meaningful community educational activities. We see Durham as an excellent research laboratory for exploring these twin purposes.

As you know, we had proposed a small pilot project in Durham similar to the one we have in Harlem. We planned to set up classes in four to six sites and involve some 300 trainees. At the time, of course, we did not have knowledge of your literacy program which, like ours, takes the literacy training into the community whenever and wherever the trainees find most convenient.

The problem at hand, then, is whether or not our mutual goals in Durham can be achieved through a cooperative effort.

From our previous conversations, I see no reason why we cannot work together. I believe that we have already agreed to the following:

1. As of July 1, 1965, your literacy project in Durham is to be expanded.
2. The new trainees are to be trained with Reading in High Gear.
3. The availability of literacy trainees is to be the sole limiting factor in expansion.
4. A local committee, to include Floyd McKissick and other community leaders, is to serve as a planning board and liaison with your office.
5. As of July 1, 1965, Reading in High Gear will also be available throughout the state of North Carolina (as one of several methods) for use with your state-wide program.
6. Pre- and post-test data will be collected on all trainees and will be made available to the Center.

If we are in agreement on the above, then I see only one or two minor problems to be resolved. Those problems have to do with control over proper usage of the Accelerated Progressive Choice (APC) Reading Method (Reading in High Gear). The problem of control is two-fold. First, instructors must be oriented to this particular method. (I understand that you have given general training to hundreds of teachers but they should be trained specifically to teach APC). Second, there must be a schedule of visits designed to insure that the instructors continue to use the method properly. These observations and teacher reactions could be of immense value in determining what changes may be required in the APC program material for teaching adult literacy.

If we are to come to a cooperative agreement on Durham, the Center will need to have its time and travel costs to Durham, reimbursed by you. These costs will, of course, be minimal. Enclosed you will find a projection of our costs.

We at the Center are very hopeful that this extension of literacy training in Durham can be begun shortly along the lines spelled out here. We feel that there is a substantial commonality in our points of view and would like to work with you to avoid a duplication of efforts in North Carolina.

Should we not be able to agree on a cooperative project, then the Center for Community-Action Education will, of course, proceed with its independent plans for North Carolina.

I will very much appreciate hearing from you.

Very truly yours,

Gordon R. Carey
Secretary-Treasurer

Estimated Budget for Durham, North Carolina, Cooperative Project

15 round trips*: Washington-Durham-Washington by Center personnel.

| | |
|---|---|
| Transportation @ 50.00 each | $ 750.00 |
| Per Diem @ 16.00 each | 240.00 |
| Personnel for observation and orientation @ 60.00 each | 900.00 |
| Supervisory and administrative costs | 1,500.00 |
| | $3,390.00 |

*Actual cost per trip, per person is $126.00

NOTE: This budget is based on a one year project. Four people will be required during the first month, and one trip per month thereafter.

# VIRGINIA ACCEPTS ANTIPOVERTY AID

## $90,000 to Finance Reading Course Chiefly for Negroes

Special to The New York Times

RICHMOND, July 2—Gov. Albertis S. Harrison Jr. has approved a controversial $90,000 Federal antipoverty project that will provide intensive "catch-up" reading instruction for Negro children in Virginia's Prince Edward County.

The Governor's office said that Mr. Harrison had waived the 30-day period under the Economic Opportunity Act during which he could have held the proposal for approval or veto.

His approval was contained in a telegram sent Wednesday to Sargent Shriver, director of the Office of Economic Opportunity. It meant that the summer training program for up to 500 educationally deprived Negro youths in the Tobacco Belt county can begin immediately.

### Center of Resistance

The county has been a center of massive resistance to school desegregation. More than 1,500 Negro children were locked out of their school buildings from 1959 to 1964 after segregationist leaders decided to abolish public education rather than bow to a Federal court order admitting Negroes to the public high school.

During that time, white children attended a private academy established initially with the aid of tax-supported state tuition grants. The United States Supreme Court ordered the public schools reopened last September, and all but a handful of the county's 1,300 white children still attend the $280-a-year academy. The tuition grants have been enjoined by the Federal courts.

Apparently with foreknowledge of the antipoverty grant, the County Board of Supervisors—which ordered the school closing in 1959—voted earlier this week to cut $80,000 from the 1965-66 county school budget. The supervisors' action on Tuesday reduced the county appropriation for the nearly all-Negro public schools to $300,000.

The remedial reading grant is considered a particularly urgent need by school officials because many, if not most, of the county's teen-age Negro children are still seriously disadvantaged as a result of the schools' closing.

This is true even though a private group, with the assistance of the Justice Department, established the so-called Prince Edward Free Schools in the 1963-64 school year in a $1 million effort to overcome the children's deficiencies.

The $90,193 grant will go to the Prince Edward Action Group, Inc., the local community action committee in the county seat of Farmville, to finance an intensive, three-month literacy program for children of both races. Few white children, however, are expected to participate.

The Institute of Educational Research, a Washington-based private agency headed by Dr. Myron Woolman, will operate the remedial reading course under contract, using advance programmed teaching techniques. Dr. Woolman is the developer of an experimental teaching system called the progressive choice reading method. His training material is published by Science Research Associates, an experimental teaching agency that is a subsidiary of the International Business Machines Corporation.

Under various private and Government grants, Dr. Woolman's method has been used in Baltimore, Washington, New York, Charlotte, N. C., and Galena Park, Tex.

In Washington, where a local antipoverty committee, Washington Action for Youth, used the materials, pupils showed the equivalent of a 15-month gain in reading ability and comprehension in 40 hours of classroom training.

The Prince Edward reading project will employ 50 college students as instructors, most of them from Virginia, most of them white. The instructors are expected to begin classes next week.

REPRINTED FROM:

THE NEW YORK TIMES, SUNDAY, AUGUST 1, 1965.

# A LITERACY DRIVE GAINS IN VIRGINIA

## U.S. Helps Negroes in Area Where Schools Closed

By BEN A. FRANKLIN
Special to The New York Times

FARMVILLE, Va., July 29—Painfully and slowly, 500 Negro children are learning to read and write here this summer as part of the Federal campaign against poverty.

The battle against illiteracy, which comes late but is being won, stems from the closing of the public schools here in 1959 under Virginia's strategy of "massive resistance" to court-ordered desegregation. The schools reopened last September, without almost entirely Negro attendance.

The intensive methods being used to impart a sixth-grade level of literacy to the deprived children of Prince Edward County's Negro community are regarded as among the most advanced and promising available.

But it is a "harrowing" struggle against a particularly heartbreaking kind of educational poverty, the young instructors say.

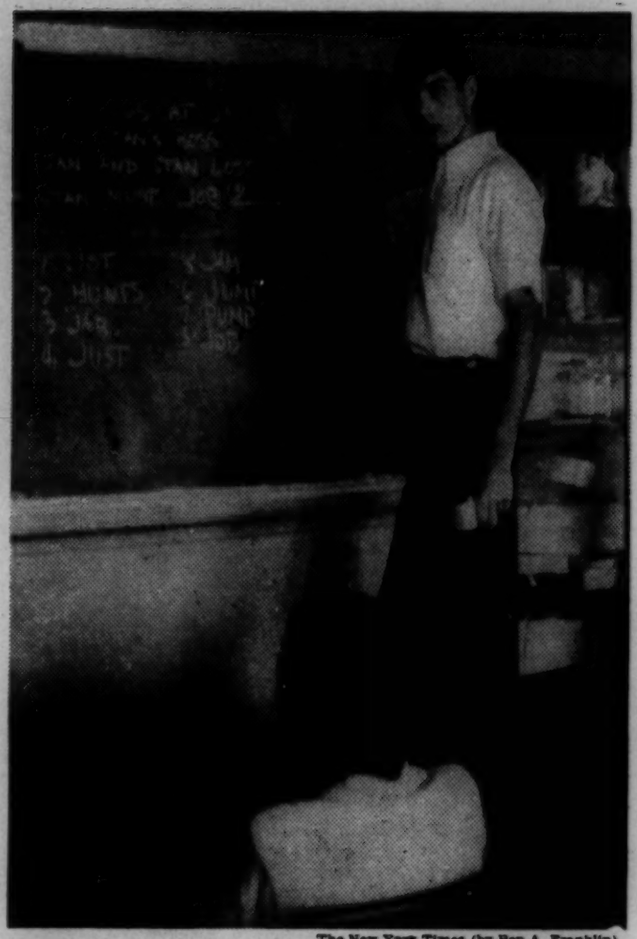
An initial reading achievement test was given to 456 of the children, mostly 12 to 20 years old, when the $93,000 program began five weeks ago. It showed that 86 per cent had scored below the sixth-grade level both in word meaning and paragraph meaning.

### Private Schools Set Up

Prince Edward County, a rural Southside Virginia tobacco area, was one of five original defendants in the United States Supreme Court's school desegregation decision of 1954.

Its decision to abolish its public school system was taken here to thwart a final Federal court order admitting Negro students to the white high school. No other schooljurisdiction in the country had tried such a move.

For four years, while white children attended a hastily established, segregated "private" academy that was partly financed by the state Government through tuition grants, more than 1,500 Negro children here had no formal scholing.



The New York Times (by Ben A. Franklin)

**LABORIOUS TASK: James Locke, a Virginia college student, working with pupils in Farmville, Va., who are striving to regain ability to read, lost when schools were closed in the state's resistance to integration.**

In September, 1963, under the orders of President Kennedy, the Justice Department helped set up the privately endowed, one-year Free School System in the county that gave Negro students their first classroom schooling since June, 1959. But the Negroes' reading achievement scores this year have raised doubts about the effectiveness of that effort.

The scores of the Stanford Achievement Test showed that the largest single group, 34 per cent, had only a second-grade level of reading ability. A total of 61 per cent scored at the third-grade level or below.

Many of these children were under the age of 10 when the public schools were closed.

### Hasn't Advanced to 'Cat'

One of them, a tall, handsome 14-year-old Negro girl, crouched in a small school room armchair designed for her far younger classmates, struggled for minutes to read and make the sound of a simple syllable like "st." She has not yet advanced to complete words such as "cat."

There are three shifts of students attending morning, afternoon and evening classes of four hours each, five days a week. Although the work is hard, progress is apparently going to come rapidly.

The intensive reading course being conducted here under a contract with Prince Edward Action Groun, Inc., the local antipoverty committee, was developed by Dr. Myron Woolman, the head of the private, nonprofit agency in Washington, the Institute of Educational Research. Called "Accelerated Progressive Choice Reading Program for Culturally Disadvantaged Adolescents and Adults," it has brought encouraging results elsewhere.

Dr. Woolman, a short, baldish and ebullient 48-year-old graduate of Columbia University who speaks in the jagon of the educator and the psychologist, was here today to make his first inspection of the program.

Despite some departures by the young instructors from what he described as "the method," he said what he saw was "exciting."

By Aug. 30, Dr. Woolman said, he expects that the instructors will have made major inroads on the functional illiteracy that for many years has characterized the Negro community here, including many adults. About a dozen Negro adults are enrolled in the program's evening courses.

### Course May Be Extended

Anti poverty officials here believe the literacy course may be extended into the 1965-66 school year.

In one classroom today, attentive students were reading rapidly from "Gulliver's Travels," learning the meanings of words and enlarging their vocabularies by quietly consulting dictionaries. Their diction and pronunciation were being patiently but persistently corrected by their instructor Miss Donna Truesdall, a white student at the College of William and Mary.

Dr. Woolman's staff of instructors, 45 college students of both races, is paid $10 a week each, plus room and board. They are living largely in the Negro community of this small shopping community, which is the county seat, so far without incident.

Farmville, however, is wary of the hundreds of idealistic white and Negro youngsters who have come here in recent summers to help the Negro children. In past years, some of them have participated in civil rights demonstrations.

This summer, the Rev. L. Francis Griffin, pastor of the First Baptist Church, who is prisident of the Virginia branch of the National Association for the Advancement of Colored

→

People, has decreed that there will be no public demonstrations. He considers literacy the important civil rights business.

Mr. Grifin, a calm 14-year veteran of the civil rights movement, is co-chairman of the anti poverty program here with Robert E. Taylor, formerly one of the country's foremost segregationist leaders.

Mr. Taylor is still vice president of the Prince Edward School Foundation, the corporate shell of the segregated academy. The antipoverty headquarters here, however, is in space rented for $300 a month at his lumber and manufacturing office, and its staff includes three Negro clerk-typists, the only Negroes currently employed here in white-collar jobs. Mr. Taylor was the initator of the federal antipoverty program in the country.

Mr. Taylor and Mr. Griffin meet frequently with their integrated antipoverty board to plan further programs here. Besides the literacy courses, the county has an active $50,000 Project Head Start program to prepare culturally deprived children for public school. It, too, is financed by the United States Office of Economic Opportunity.

The Prince Edward Academy, the white, segregated school system, apparently grows financially and academically stronger year by year. A county-wide school census published this month indicated that virtually all the county's white children would again attend the segregated academy this fall and that almost all the 1,600 children in the reopened schools would be Negroes.

*Prince Edward Pilot Project*

# 500 Negro Pupils Getting Help With Reading Ability

**By Robert Holland**
*Times-Dispatch News Bureau*

FARMVILLE, July 21—In modest church buildings, club facilities and schools of Prince Edward county, children are participating in a pilot project that may serve as an example for other areas of the nation to emulate.

Prince Edward, long a foe of the federal government's desegregation pressures, is giving more than 500 of its Negro youngsters plus at least one white child the newest in remedial educational help with an assist from Uncle Sam.

The "Woolman method," so named for Dr. Myron Woolman of the Institute of Education Research, Inc. of Washington, is being used for the first time among children of rural backgrounds. The "accelerated progessive choice reading program" is designed to advance reading levels, on the average, one and one half grades.

For many of the children, the opportunity to advance is something relatively new in itself. In the face of court orders to integrate, the county closed its public schools for a five-year period recently and the Negro children suffered from a lack of education for all but one of those years.

**THIS TIME** around, however, the summer's education is based on community consensus as most white and Negro leaders and organizations are banded together into the Prince Edward Community Action Group, Inc., which is sponsoring Operation Catchup with a $90,193 federal antipoverty grant. Leaders of the project opened up classrooms doors Wednesday for a tour by members of the press for the first time since Catchup started about two weeks ago.

Visitors found youngsters concentrating on their Woolman reader handbooks, containing pictures, symbols, letters and words. Young teachers—many of them college students—were conducting the reading lessons from instructors' manuals.

T-D News Bureau Photo

**'Catchup' Pupils Work in Mobile Classroom**
Teacher Is Miss Ruby Williams of Baltimore

In one room, a teacher with a distinctly Massachusetts accent carefully pronounced "vast" and "victim" and asked her pupils of elementary grade ages to explain meanings. In another, two teachers were checking on work in the handbooks. Outside, some pupils on a brief break were tossing a basketball around the backyard of the local Catholic church. A mobile classroom at the church serves as one of the county's nine Catchup centers.

At noon, children lined up to receive their lunches and milk.

**CLASSES** continue in the afternoon and at night for other shifts of students. A child gets four hours of instruction a day. After the eight-week program has ended the participants will have received 150 hours of reading work. Progress sometimes is as much as three grade levels during this time.

Arthur Dudley of Detroit, project supervisor an former employe of the Prince Edward Free School Association, said the desired pupil-teacher ratio is one to 10. There are 45 instructors, the majority of whom are Virginians, and attempts are being made to secure five more, he said. At last count there were 504 children enrolled.

"Attendance has been pretty good," Dudley remarked. He said about 90 per cent of the youngsters attend each day.

Under the program, "children are started at the same place in their readers. As they advance they are separated and grouped according to their achievement," he said. In essence this amounts to something resembling a one-room school situation with small groups huddled in a room for different levels of education.

**ONE OF** the teachers, Donna Truesdale of the College of William and Mary, remarked during a class break, "This method works fantastically well. I am surprised with the progress of the students."

Gordon R. Carey, research co-ordinator for the Institute of Educational Research, explained that "reading in high gear" starts with the introduction of the most common letter sounds and letter shapes and systematically introduces the student to each of the skills he must acquire to read effectively.

"All students are required to start at the beginning of the program. This tends to fill the voids and correct the errors from their previous learning experience."

Based on the progressive choice reading method, the program uses several different techniques of programmed instruction and elements of both the traditional (phonics) and newer (linguistic) methods of teaching reading. Each student first learns to understand the meaning of the spoken word he will ultimately learn to read. He then learns the shapes and the sounds of each of the elements in this word and finally learns to read the word in its printed form, Carey said.

It is especially designed for disadvantaged youths. In its present form it has been used in Charlotte, N. C., Galena Park, Tex., Washington, New York City, Philadelphia and Boston, he said.

Woolman's method was new to most of the summer's instructors and most of them are not professionals. But this is as intended, Dudley said. "The system is designed to use nonprofessionals. The preference is for the nonprofessionals because the professionals might have ideas of their own to throw in," he said.

Reading courses using Dr. Woolman's copyrighted system have been used to train army missilemen and to help the mentally retarded. But this is the first time it has been used for children from rural homes.

The Rev. L. Francis Griffin, a Negro minister and cochairman of the county's Community Action Project, said the federal government has dubbed the effort here a "demonstration project," which means the government is interested in it for possible use in other areas. Hence Prince Edward has become a model for the educational system, he noted.

MR. GRIFFIN added that about 20 adults are also taking work from the "reading in high gear" workbooks and the hope is to involve as many as 100 adults in the remedial course, if possible.

Robert H. Kirby, state coordinator of economic opportunity projects, visited recently and called the Prince Edward operation the best-organized one he has seen in the state, Mr. Griffin said. A committee of community action is currently studying other ways the county might participate in the variety of antipoverty possibilities. A separate poverty program, Project Head Start, is also going here this summer under the leadership of the county's Council on Human Relations. More than 150 preschool children are enrolled.

Catchup children are from age 10 and up. They are taken by bus to centers at three schools, a mobile unit, A Masonic hall and property of four churches. The teachers live in homes rented for them. They are separated by sex and the homes for girls are chaperoned.

John Perry, recreation supervisor, is arranging a full offering of sports and games for pupils after classes with the co-operation of the county school board. Included are badminton, softball, croquet, volleyball, basketball, checkers, dominoes, baseball and table tennis. The instructors are paid $10 a week. They also are provided two meals and their lodging.

# The Farmville Herald

FARMVILLE, VIRGINIA, FRIDAY, JULY 23, 1965

# 'Catch Up' Materials, Students Provide Vast Research Center

## Woolman Reading Techniques Get First Application In Rural Area

Operation Catch Up here is a great deal more than an isolated local summer-time program to offer remedial reading to elementary and secondary school pupils who fell behind dur-'ng the years of the public school controvery here.

It is also research and a demonstration project of national interest because the 504 young people involved in this classroom study constitute the first rural group subjected to Dr. Myron W. Woolman's reading method.

The Institute of Educational Research, Inc., has previously worked with men in the Armed Forces, with urban groups and with the mentally retarded, all with established successes.

Prince Edward county youths, from 10 to 19 years of age, are studying in daily four-hour stints in nine instructional centers under 45 instructors, most of them college students from a number of states, but chiefly Virginia. The Woolman method prefers nonprofessional instructors who do not bring to the task previously conceived ideas on remedial reading methods. The instructors receive only a $10 weekly stipend and lodging and lunch.

**Prepared Materials**

All instructional materials and guides are contained in the printed pamphlets "Reading In High Gear, the Accelerated Progressive Choice Reading Program." This constitutes the printed course material in the hands of all pupils and teachers.

The 500 odd youths working during the two-months summer program are expected to jump their reading ability one and a half grades after finishing the 150 hours of instruction.

Paul Barth, who occupies an office in the Community Action Group, Inc., operating headquarters in the Taylor Manufacturing Company suite here, works closely with the instructors. He is Dr. Woolman's staff member on the ground here.

While the average 'catch up' expected will be one and a half grades, experiences has shown that some alert and gifted students will advance as much as two and three grades from the 150 hours of instruction.

Backing up the instructional heart of the federal antipoverty program here under a $90,193 grant, is a paid administrative, managerial and service force of 73 persons. Typical of this side of the operation are the CAP, Inc., headquarters and a central kitchen, where light lunches are prepared for all children at First Baptist Church under the direction of Mrs. Mary S. Brown, the program dietician.

**Recreation Added**

Also at work is a recreational staff under John Perry, who during the regular school session is athletic director at R. R. Moton High. Perry said Tuesday that a supervised games program will become operative at

**INSTRUCTIONAL CENTER. This 'Catch Up' program center in the trailer at St. Therese Catholic Church at Farmville is one of nine now operating. Working on remedial reading techniques with the pupils are two instructors, standing, Miss Ruby Williams, a Baltimore, Md., school teacher, and Bill Mitchell, a Wisconsin college student.**

each of the nine instructional centers in every geographical area of the county. On Saturdays a centralized 'Play Day' will find children being brought to the Farmville recreation center at Mary Branch School 2 for competitive play.

Games included are badminton, croquet, volleyball, basketball, ping pong, baseball and checks, Perry said.

The program envisions involvment of unpaid volunteer committees around each center with parents and interested persons helping with the program to buttress the instructional phase of the project.

Also underway through this Economic Opportunity Act program is an effort to enroll adults, who wish to improve reading skills, in the Woolman course. These classes will be offered chiefly at night, after the centers have concluded four-hour morning and afternoon rotations.

**Adults Invited**

Program Supervisor Arthur Dudley said Tuesday, during a CAP, Inc., conducted tour of instructional centers for newspaper reporters, that 20 adults already are studying at the centers. Others may apply at the Farmville headquarters or at the various centers, he added.

The Rev. F. L. Griffin told reporters that the great majority of the paid, nonteaching staff was recruited from Farmville and Prince Edward county.

Children, all of whom but one, are Negro thus far, are transported to and from the centers in six rented buses, Dudley explained. The centers have been established in each of the six magisterial districts of Prince Edward. with two in several.

**LUNCH TIME! After their four-hour morning class a group of Catch Up students at the Worsham School center troop the lunch line. For each there was a bagged sandwich, a cookie and a half-pint of milk. Fruit is added from time to time. Students are Otis Miller, George Patterson, Gwendolyn Harris, Saundra Stokes and Victoria Lambert.**

**In Prince Edward County**

# Poverty War Eases Race Strife

By Gerald Grant
Washington Post Staff Writer

A breakthrough in more than a decade of interracial bitterness has been made this summer in Prince Edward County, Va.

In a County where officials closed the schools for five years rather than see them integrated, white and Negro groups are now cooperating in a Federal anti-poverty program.

The vehicle for this cooperation is the Prince Edward County Community Action Group, Inc., the local poverty war agency.

Robert E. Taylor, a leading businessman who was one of the most strident segregationists in the County's desegregation fight, and the Rev. L. Francis Griffin, a Baptist pastor and statewide leader of the NAACP, are the co-chairmen of the group.

Seats on the 60-man governing committee of the Poverty group have been split equally among whites and Negroes as has its ten-man executive committee. Poor whites and Negro tenant farmers are included on the full committee as well as leading citizens of both races.

Taylor himself proposed that Mr. Griffin be named co-chairman of the poverty effort at a public meeting last February.

In a telephone interview yesterday, Taylor said, "We've been working closely together ever since."

Mr. Griffin added, "Most of the folks of both races are with us all the way."

With a $90,193 Federal grant, nine instructional centers have been opened up in the County this summer as part of a program called Operation Catchup.

All but one of the 504 children enrolled are Negro, but there are Negroes on the predominantly white staff of 73, most of whom are native Virginians. The volunteer force is integrated.

Free lunches are served at the center and a recreational program follows the special remedial reading program, developed by the Institute of Educational Research, Inc., of Washington. Myron W. Woolman, author of the experimental, programmed course (which is also being tried in the Cardozo area schools here), predicts that the students will jump an average of a grade and a half in reading ability after 150 hours of instruction.

Twenty adults, some of them more than 70 years old, are also taking the course at night and having "tremendous success," the minister said.

"We hope this will be the basis for real cooperation in other areas of community life," Mr. Griffin told a reporter. "It certainly indicates that if we can work together in one project successfully, we ought to be able to do so in other areas."

Asked whether the summer co-operation would hasten school desegregation in the fall, Taylor replied:

"I don't know how things will develop . . . I wouldn't have any opinion."

Taylor is vice president of the private, segregated Prince Edward School Foundation — the academy attended by white children to avoid court-ordered integration — and head of a homebuilding firm.

Why did he spur the poverty effort? "This is an entirely different program from anything that's been tried before. It took co-operation to put it through and I think it will be beneficial to the County."

REPRINT

# The VOICE

OF PRINCE EDWARD COUNTY

VOL. I — No. 1 | P. O. Box 16, Farmville, Virginia | July 26, 1965

## Six Years Later

# THEY ARE LEARNING TO READ

About five hundred children and adults in Prince Edward County are learning how to read and write as students in Operation Catch-Up this summer. Catch-Up is a remedial reading program, paid for by the Federal government as part of the war on poverty. It is administered here by the Prince Edward Community Action Group, Inc., Rev. L. F. Griffin and R. E. Taylor Co-Directors.

The teachers are 45 summer volunteers from colleges in Virginia and other states. A few are from here in the county. Volunteers teach four hours a day, sometimes more. They also spend a few hours a day on different projects with the people of the county. Some are working to provide sports, games and other recreation. One group is rehearsing for a theater play. Some are tutoring Negro high school students in Nottaway County who will be entering the white schools next fall. And others will be working in the fields, getting to know the people in the county.

Teachers report that the students are showing real interest in the reading program. For many students it is a sacrifice to come to class, for they are needed to work at home in the tobacco fields. They study hard, often refusing to take a break in the four-hour period. Many say they are sorry to leave at the end of the class day.

At least 25 of the students could not read or write at all before they came into the program, and most are many years behind their age level in reading ability. The reason for this, of course, is the closing of the public schools in Prince Edward County from 1959 to 1964 to avoid desegregation. Teachers and students are working hard to make up for this serious lack of opportunity and are making real progress. Many of them are hoping that Catch-Up will not be simply one more summer program in Prince Edward County, but will be expanded to provide an extensive reading program to all those who were denied an education in the public schools.

Centers for the reading program are:

In Prospect: St. James Methodist Church and Sulphur Springs Church.

In Greenbay: Levi Baptist Church and Verso School.

In Rice: High Bridge Church and High Rock Church.

In Hampden: Worsham School.

In Buffalo: New Hope Church, Spenser's Store, and Triumph Church.

In Farmville: Masonic Hall and St. Theresa's Church.

Myron Woolman

TO: Members of the Board

FROM: James Farmer, President

DATE: July 2, 1965

The meeting on July 16 will be the first annual meeting of the Center for Community-Action Education. The Center has begun several small projects. Literacy projects are underway with two organizations in Harlem, and with the Philadelphia Tutorial Project. Plans are being made for a project in Durham, North Carolina.

I hope that we can have full representation at this meeting. We will discuss the planning grant proposal which is being submitted to the federal government and we will plan our course for the coming year.

There will be a report on our projects as well as routine matters such as the financial report. The viability of the Center depends on the plans and activities of the next few weeks and days. I look forward to seeing you in Washington.

Please let Gordon R. Carey know if you cannot attend. He can also make hotel or other arrangements for you if you so desire.

THE CENTER FOR COMMUNITY-ACTION EDUCATION
2226 Wisconsin Avenue, N.W.
Washington, D.C. 20007

333-1508

Minutes of the Annual Meeting
of the Board of Directors
of The Center for Community-Action Education

Held on: July 16, 1965 - 12:00 noon

Place: 2226 Wisconsin Avenue, N. W.
Washington, D. C.

*Gordon Carey*
*James Farmer*
*Floyd McKissick*
*Lyle Spencer*
*Myron Woolman*

Persons in Attendence: James Farmer
Gordon R. Carey
Myron Woolman
Floyd McKissick
Jean Cahn
Hyland Lewis (represening Dr. Stanton L. Wormley)

Lyle Spencer, James Nabrit and Jerry Wurf sent their regrets.

James Farmer, President called the meeting to order.

Gordon Carey, Secretary-Treasurer read the minutes of the previous meeting. They were approved as read.

James Farmer asked that the Agenda be amended to include:

1. Tax Exemption
2. Relationship to Howard University
3. New Address of the Center

Gordon Carey indicated that the following persons had consented to serve on the Board of Directors since the last meeting.

Dr. James M. Nabrit, Jr. - President, Howard University
Mr. Jerry Wurf - President, American Federation of State County and Municipal Employees, AFL-CIO
Dr. Stanton L. Wormley - Vice President, Howard University
Mrs. Jean C. Cahn

Mr. Carey reported that no response had been received to the invitation for membership on the Board of Directors from:

Whitney Young
Martin L. King, Jr.
John Lewis

A note was received from Dr. King's secretary stating that he would reply upon his return to the office. Mr. Roy Wilkins and Dr. Leonard Cottrell, Jr. wrote that they were unable to accept for reasons of health. After discussion it was decided that James Farmer call Whitney Young, John Lewis, Dr. King, and Roy Wilkins about membership on Board.

Floyd McKissick suggested that Board positions not filled at this time be held open. Gordon Carey suggested that a sub-committee be formed to submit names of potential board members to next executive committee meeting. After a discussion of the necessity for this committee Gordon Carey moved that the President appoint a committee of at least three people in the Washington area to consider names of persons who might be nominated for the Board of Directors and that the committee be instructed to submit names of suggested nominees by letter to all Board members. Jean Cahn seconded the motion. Motion Carried

The President appointed to the Committee:

Dr. Stanton L. Wormley
Jean Cahn
Gordon R. Carey

Gordon Carey is to convene the committee.

Gordon Carey read the financial report which is incorporated into the minutes of this meeting. There are still some small expenditures to be shown. He reported that Science Research Associates has donated the 300 sets of Reading in High Gear promised for the pilot programs.

Discussion was then opened on possible sources of funding. Gordon Carey reported that Western Electric offered to furnish limited financial support.

Dr. Woolman reported on a recent trip to New York. High Salpeter introduced Gordon Carey and Dr. Woolman to a representative of Pepsi Cola, who indicated interest and possible support. Jean Cahn reported that she has been in contact with the Stern Family Fund which can be used primarily for contact with other foundations.

Jean Cahn reported that she has been invited to discuss the Center with the Ford Foundation. Floyd McKissick is to see Mr. Staples from Ford Foundation in North Carolina next week. Contact is to be maintained and a grant actively pursued.

Corning Glass Company Foundation and other foundations are to be approached.

Floyd McKissick suggested securing full-time help to solicit funds. Dr. Woolman suggested that we wait until some additional funding comes through.

It was agreed by common consent that Jean Cahn and James Farmer make contacts and set up meetings as needed to actively pursue foundation and other private funding. It was agreed that minimal expenses would be paid for their expenses.

Gordon Carey informed members that Jerry Wurf has promised to help get labor support for the Center.

The next item on the Agenda was the tax exemption. Floyd McKissick turned over completed forms for Jean Cahn to file with the Internal Revenue Service.

Gordon Carey gave a report on projects started and contemplated.

1. CCNY CORE is continuing through the summer. (90 subjects.)
2. Council for Jobs for Freedom of New York City. Pre-testing will be done in the next few weeks. They have received 25 sets of "Reading in High Gear."
3. Philadelphia Tutorial Service. (240 subjects.) They will provide their own sets of materials (obtained at discount from SRA) but the Center will do pre- and post-testing and orientation.
4. Durham, North Carolina. Efforts to coordinate the Center's program in Durham with the literacy program of the state of North Carolina have not been successful to date. It was decided to pursue this cooperative effort and to simultaneously set up an independent project with 100 trainees. Floyd McKissick will do all preliminary work on setting up classes and will then make arrangements for orientation of instructors.

Gordon Carey also stated that a commitment has been made to send 40 sets of Reading in High Gear to Mississippi for four classes set up with CORE-COFO, and that the Center had sent one person to Prince Edward County and expended several hundred dollars to help the CAP there for several days prior to funding by OEO.

At this time the Center's project commitments are:

100 trainees in Durham
80 trainees at CCNY-CORE
25 trainees at the Council for Jobs for Freedom
40 trainees in Mississippi COFO-CORE
240 trainees at Philadelphia Tutorial Service
485 (Total number of Center trainees.)

It was noted that no additional projects could be undertaken pending additional funding.
Floyd McKissick moved acceptance of the report. Carried

Floyd McKissick moved that the Center move to the new IER address, 2900 M Street, N. W., Washington, D. C. until an independent location is found. Jean Cahn seconded the motion. Carried

Floyd McKissick suggested that a new letterhead should be designed. It was agreed by common consent.

The next item on the Agenda was the relationship of the Center to Howard University. James Farmer expressed the interest of the Center in affiliating with Howard University.

Gordon Carey reaffirmed the Board stand that membership on the Board implies no commitment on the part of Howard University.

Dr. Hyland Lewis reaffirmed that no commitment has been made at this time by Howard University, but that Howard University is also interested in pursuing the nature of its relationship to the Center. Gordon Carey is to meet with Dr. Wormley to explore further the future relationship between Howard University and the Center. Dr. Woolman noted that the Center is committed to actively pursue negotiations to establish a formal relationship between Howard University and the Center, and moved that in the meantime a Planning and Demonstration Proposal be submitted by the Center to the federal government and other interested parties. Seconded and Carried.

The Planning and Demonstration proposal report was next on the Agenda. The proposal was submitted to the Board. It covers 7,200 subjects for a minimum of 18 months. (A copy of the proposal is appended to the minutes.) This proposal is to be submitted simultaneously to the Office of Economic Opportunity, Office of Education and the Department of Labor. There was discussion on the proposal. Jean Cahn moved that the proposal be revised where necessary to make clear that it is a Center proposal rather than a CORE proposal. Carried with one dissent.

Jean Cahn further moved that during negotiations with the federal government authorization be given to make such changes in the proposal as are needed. Gordon Carey seconded the motion. Carried

The election of officers:

Floyd McKissick nominated James Farmer for President - Elected unanimously.
Gordon Carey nominated Dr. Stanton L. Wormley for Vice President - Elected
Dr. Woolman nominated Gordon R. Carey for Secretary-Treasurer - Elected
Gordon Carey nominated Dr. Myron Woolman for the executive committee - Elected
Jean Cahn nominated Floyd McKissick for the executive committee - Elected
Gordon Carey nominated Jean Cahn for the executive committee - Elected

Jean Cahn moved that all Board of Director members may attend and vote at the meetings of the Executive Committee at their option. Myron Woolman seconded and amended the motion to read that all Board members receive a notice of executive board meetings. Motion passed as amended.

Public Relations for the Center was discussed. Gordon Carey moved that the President be directed to initiate and control all press relations at his discretion. Floyd McKissick seconded. Carried

There being no further business, Floyd McKissick moved for adjournment, Jean Cahn seconded the motion. Carried

The Executive Board meeting will be held on Thursday, August 26, 1965, 11:00 a.m., Washington, D. C.

Respectfully submitted

Gordon R. Carey
Secretary-Treasurer

B. Memorandum to the President
A Plan of Action for Remedial Education (November 21, 1964)

C. Comments on the Center for Community-Action Education Proposal

# THE NATIONAL LITERACY PROGRAM

## INTRODUCTION (Section I)

The Center for Community-Action Education, Inc., proposes that a national project be activated immediately utilizing church, union, civil rights and other organized community forces in a systematic effort to erase illiteracy - a prime breeder of poverty, crime and dependency on relief.

The Center holds that this national literacy project will be a necessary and important contribution to the war against poverty. The Center provides a unique organizational capability for this essential new thrust in the movement toward a society of full and real equality. Furthermore, this national literacy drive will involve, in real and meaningful ways, the impoverished and the disinherited who are now restrained from useful participation in our great society.

Three memoranda have been submitted to the President of the United States with copies to the Office of Education and the Office of Economic Opportunity. The first memorandum (Appendix A) was submitted on October 16, 1964 and provides the rationale and a brief presentation of this approach to the illiteracy problem.

The memorandum of November 21, 1964 (Appendix B) provides the general conceptual framework for The Center for Community-Action Education as a national instrument to combine community agencies, educational technology and government into an organized force for training in literacy and job skills.

The substance of the third memorandum submitted to the President on February 3, 1965 is corporated into the body of this proposal as Section IV, "The National Literacy Program." It presents a more detailed presentation of the function and structure of the Center and elaborates the steps involved in mounting a nationwide literacy project.

"The National Literacy Program," Section IV, defines the objective of the Center: providing literacy for one million functionally illiterate Americans. This proposal is concerned with obtaining funding for the Planning and Demonstration Stages of this effort.

Two separate budgets are attached: A six-month budget for the Planning Stage; and a twelve-month budget for the first year of the Demonstration Stage, which is scheduled to phase into the end of the Planning Stage and to continue for between 12 and 24 months.

(Note: In Section IV of this proposal, the Demonstration Stage is referred to as the "Operational Stage.")

## PLANNING STAGE (Section II)

### Objective and Activities

The objective of the Planning Stage is to intensively analyze and detail the plan of action as presented here and in Section IV.

The specific activities to be undertaken during this stage include: (a) conferences, (b) staff organization and training, (c) securing the cooperation of organizations representing various community interests,

(d) planning demonstration projects, (e) laying the groundwork for the expansion of the project on a national basis, (f) develop testing methods which can be administered in the field at minimum cost, (g) develop instructor training techniques which can be used effectively with minimum investment of time and personnel, and (h) develop methods of supervision to insure a high level of instructor performance at low cost.

### Conferences and Consultations

Conferences will be of three kinds:

1. There will be two two-day conferences at which the Center will bring together no more than 25 experts in fields relating to literacy and community organization to intensively analyze and assist in formulating the plans for the Demonstration projects. The first such meeting will take place within sixty (60) days after this proposal has been approved and the second will take place shortly after Demonstration projects have begun.

2. There will be one major national conference on the problems of implementation and community support of the national literacy campaign. This conference will be attended by as many as 200 persons invited from organizations representing business, labor, religion, civil rights, education, Community Action Programs and other agencies concerned with the problem of poverty.

   The conference will last two days and will require as many as 25 additional persons to serve as speakers, panelists, workshop and discussion leaders.

3. Numerous consultations will be required with government officials and others who can offer assistance on problems of penetrating the illiterate population, securing volunteer literacy instructors, securing the facilities and support of community leaders to help insure the success of the project. Other consultants will be utilized on problems of research design and statistical analysis, training techniques and specialized problems.

   Consultants for all conferences will be furnished travel and per diem as well as consultation fees. The 200 participants in the major conference will not be paid, but will have their living expenses paid and in some cases, where necessary, receive reimbursement for travel.

## Planning Stage Staff Requirements

The following staff members will be required to execute the Planning stage and to carry out the activities specified above.

Director - to supervise and coordinate all activites of the Center, and to interpret and implement policy.

Associate Director for Research - to direct the development of training techniques, research, data collection and analysis.

Associate Director for Community Action - to direct and be responsible for staff and projects in the field.

Administrative Assistant - to carry out the administrative functions of the Center under the direction of the Director.

Chief Community Organizer - to develop methods for screening and evaluating community potential, and to supervise the Community Organizers as described on page 12 of Section IV.

Instructor Training Specialist - to develop techinques of Literacy Instructor training, staff training and to supervise the Literacy Training Section described in Section IV, page 12.

Conference Coordinator - to coordinate the conferences and concultant services.

Research Associate - to plan and carry out research under the direction of the Associate Director for Research.

Accountant - to maintain financial records and accounts.

Secretarial and clerical help as outlined in the budget.

Additional staff members will be added during the fifth and sixth months of the Planning stage in order to train them and make preparations in the field prior to the Demonstration Stage. Their duties are outlined in Section III. These additional staff members will be added during the end of the Planning Stage according to the following schedule:

| | |
|---|---|
| 2 Community Organizers | 1 month |
| 1 Statistician | 1 month |
| 18 Supervisors | 2 months |
| 2 Instructor Training Specialists | 1 month |

The Planning period will continue for six months.

DEMONSTRATION STAGE (Section III)

Although the federal government is now sponsoring a number of projects to determine the effectiveness of methods of developing reading skills rapidly, very little, if any, experimentation has been done to determine the best means of penetrating communities in order to most effectively teach literacy skills. The Center will undertake such experimentation as an integral part of the demonstration phase of this project.

Listed below are illustrative problems which will be investigated. This aspect of the study will be detailed during the planning stage:

1. To what degree can volunteers be used within an effective large scale literacy program over extended periods of time?

2. What is the minimum level of professional supervision required to insure efficient utilization of volunteer literacy instructors?

3. Are there any groups of volunteers significantly more effective than others for recruiting and teaching illiterates? For example, if various groups are compared such as college students, housewives, welfare clients, civil rights members, and retired teachers, which group will prove most effective in recruitment and/or teaching?

4. What special methods are required in carrying out a literacy program in large urban areas, rural southern or mountain areas, and small towns?

5. Can "open literacy centers" be utilized in which no formal classes are held, but instead the trainee comes at his discretion to a library-like setting where training materials and instructors are constantly available?

6. What recruitment techniques are most effective?

7. What methods of training literacy instructors will prove most efficient and economical?

Demonstration Projects

During the Demonstration phase the Center will mount literacy projects in widely dispersed geographical areas within representative communities of differing sizes and population characteristics.

It is anticipated that during the Demonstration Stage the Center will be able to train approximately 7,200 literacy trainees in 18 demonstration sites. The study is expected to include communities with a predominantly Spanish-speaking population, an isolated mountain population, migrant or seasonal workers and an Indian population.

While the average number of literacy trainees for the 18 Demonstration projects will be 400, it is expected that there will be considerable variation from community to community. The Center anticipates selecting one of the major urban areas of the nation for one or more projects. In this case we would aim for one thousand or more trainees in that demonstration city.

It is also anticipated that some of the Demonstration projects will be in communities with OEO - funded Community Action Programs. In these communities the Center will coordinate its activities with the CAP and work in close cooperation with it.

The Demonstration project will run substantially as out-lined in Section IV of this proposal. Changes will be made however, on the basis of the determinations made in the Planning Stage. Project plans will also be revised as experience is gained from the Demonstration Projects.

Literacy Instructors

The role of the volunteer Literacy Instructor (LI) is discussed on pages 5-6 and 13-14 of Section IV. LIs will not only have responsibility for instruction, but also for trainee recruitment (see page 15, Section IV) and securing space. (In those cases where sufficient space is not available free of charge, it will be necessary to pay modest rental.)

Project Staff Organization (See page 12, Section IV)

One LI can teach 10 literacy trainees at a time. In the average size project (400 trainees) 40 LIs will be required.

A supervisor will be assigned to direct each project. His duties are described on page 12 of Section IV. (During the Demonstration Stage he will be responsible only for one city or county rather than a large geographical area.) Working under the supervisor will be a half-time Project Coordinator and 5 or 6 volunteer coordinators (who receive expenses only.)

The Demonstration project with 400 literacy trainees would thus have a supervisor and a project coordinator with responsibility for 5 or 6 volunteer coordinators, each of whom would in turn be responsible for 7 or 8 Literacy Instructors.

The supervisor will be assisted by the Community Organizer throughout the duration of the project. The Community Organizers and Instructor Training Specialsists will have major responsibility for each project during its initial stages.

## Literacy Instructor Training

There will be a five day training program for the LIs and volunteer coordinators, held in each of the 18 projects. Training will be done by a team consisting of an Instructor Training Specialist, the Supervisor and a Community Organizer. The LI will be trained to instruct in The Accelerated Progressive Choice Reading Program (APC); to recruit; to help secure training facilities if required; and to maintain appropriate records and reports. (See page 14, Section IV). Each training project will use three selected consultants, one for each of three training days, who will discuss the broader implications of the poverty program and the social significance of the national literacy program. It is anticipated that staff from the Office of Education and OEO will be utilized in each training program.

In rural areas and in certain other locations it will be necessary to bring the LIs into a central place for training. All LI trainees and volunteer coordinators will receive expenses and a small salary for this training period.

## Staff Training

Supervisors will be hired 60 days prior to the beginning of the Demonstration Stage. For their first month of employment they will be brought to a central location for intensive training. The second month they will spend at their project site recruiting LIs and making preparations for their Demonstration project.

Their training will include:

1. an initial orientation
2. observations of literacy instruction in process at various sites
3. intensive training in the theory and use of APC
4. practice teaching
5. seminars and discussions on the availability of community resources; the type and nature of the organizations with which they will be in contact in the field; dynamics of community organization; administration and supervision of staff and volunteers; the relation between illiteracy and poverty and other subjects related to their responsibilities.

Each supervisor will be responsible for hiring and training the part-time Project Coordinator for his project.

Each supervisor will hire clerical help as required and be furnished with a minimum of office supplies and equipment. He will be expected to use his home for his office if possible.

## Staff Requirements

The Demonstration Stage will begin 6 months after the beginning of the Planning Stage and continue for between 12 and 24 months. The additional staff requirements for this second stage are listed below:

2 Community Organizers
2 Instructor Training Specialists
1 Statistician
18 Supervisors
18 Project Coordinators
2 Data Analysts
1 Key Punch Operator

additional clerical help as outlined in budget.

# THE NATIONAL LITERACY PROGRAM

## Section IV

## Part I

### INTRODUCTION

The Center for Community-Action Education is aware of the tragic millions who are imprisoned behind the bars of illiteracy and ignorance. Millions of Americans live marginal existences in poverty because they lack the basic educational and training tools to escape. As civil rights agencies worked to release America from the bondage of racial segregation, we now have the obligation to end the bondage of ignorance.

Illiteracy and undereducation prevent millions of Americans from finding gainful and productive employment. Without basic educational skills they cannot participate effectively in our democracy, cannot be trained for jobs in our increasingly technological society, and are prevented by the life circumstances in which they are imbedded from taking steps to further their education and skills. The ability to read and write is essential to functioning effectively within the American context. Therefore, providing minimal educational skills is a necessary preliminary step for moving out of poverty and out of the ghetto. Unless America is able to provide the basic tools of literacy on a massive scale the success of the anti-poverty program is imperiled. To date, no literacy program adequate to meet the problem has been launched. As a democratic nation we must meet this educational challenge squarely.

A major national effort to provide literacy skills can supply the minimal educational and motivational requirements to enable this population to acquire further training, and in many cases, to move directly into new areas of employment. The task is enormous, but we are convinced that there is available the necessary combination of ingredients to virtually eradicate illiteracy in the United States. To do this job, we must tap the enormous unused resources now lying fallow in the communities themselves.

## Objective

Changing events present new perspectives both to men and nations. We see the years ahead as imposing new responsibilities.

We propose that a major national drive be launched to attack the social sore of illiteracy. This effort must combine (1) the power of Americans acting within their communities spearheaded by the dynamic thrust of the civil rights organizations, (2) the research and educational capabilities of leading educators and psychologists working within the framework of a major university, and (3) the participation of various arms of the Federal Government committed to the elimination of poverty. These combined forces could in two years of operation raise approximately one million functional illiterates to a sixth-grade reading level through the utilization of volunteer literacy instructors.

## Requirements for an Effective Program

To implement an effective national literacy program six essential ingredients are required:

1. A social force adequate to penetrate the population most in need of literacy skills.

2. A method for developing literacy which can produce substantial results on a massive scale and which can be taught by non-teachers.

3. A large group of persons able to serve as volunteer instructors.

4. A structure able to administer and supervise the program.

5. Community facilities made available for instruction.

6. Adequate funding to plan, operate and direct.

Social Force

A national literacy program can succeed only if it has the ability to reach those persons who are most in need of literacy skills. That is, we must have the ability to reach, motivate and train the most deprived, the poorest and least motivated segments of our society.

We are striving, then, to reach a population which, for various reasons, did not respond to traditional educational methods or which was denied the opportunity of availing itself of an education. Most illiterates presently are beyond the reach of educators and the schools. Due to their past failures and consequent feelings of inadequacy they cannot or will not again attempt to seek an education through presently available means.

We must, therefore, establish contact with this population through those people with whom they have lived and in whom they have confidence. We must motivate and train through institutions which are currently satisfying physical, social and psychological needs.

Due to the advances gained through the civil rights movement within the past decade, civil rights organizations are in a unique position to reorient and train large segments of the Negro community. In fact, if they do not meet this challenge they will be delinquent since once having given rise to hope within the Negro community they now have an obligation to translate that hope into programs which will be both socially and economically meaningful. Likewise, churches have the potential to reach and teach immense numbers of illiterates. Many unions have members who could benefit from such a program if the program were operated within the union itself. Further, employers could provide literacy within the plan to simplify the development of job skills. There are literally thousands of fraternal organizations, community agencies and other groups which could provide training in literacy if given the proper techniques, support and rationale.

Civil rights organizations, unions, churches and others do have the ability to reach most of those who are in desperate need of basic education for survival. These groups can and must rise to the challenge of training the populations with which they have established rapport. Unless such action is taken, these illiterates and poverty stricken populations will remain in poverty and will continue to exist at great social and economic cost to the society.

The National Association for the Advancement of Colored People, the National Urban League and other organizations have already expressed their enthusiasm for this proposal and their willingness to cooperate in bringing it to life. These organizations, along with CORE have had astonishing success in motivating and training the hard-core population that is most in need of literacy skills and jobs. These organizations, the churches and other national and regional organizations have already existing regional and local administrative structures which readily become the operational super-structure for the literacy program. Even more important, they have the commitment to do the task and the energy and social force which will permit them to reach those who cannot be reached through any other means.

Method

The technology used for literacy training must be able to provide substantial reading-skill gains in populations which are considered to be difficult to teach. The literacy materials must be designed so that volunteer instructors who lack professional training as teachers are able to use them with no difficulty. It must be available for mass use and must relate to the social and educational needs of the trainee. Specifically, the required literacy training technique must satisfy certain crucial criteria. The techniques must be:

1. suitable for use in non-school settings;
2. designed to be used effectively by persons with high school educations;
3. appropriate for use in groups varying from 1 to 30 in size;
4. consistent with the interests and values of the learner population, thus stimulating involvement in the learning process;
5. intrinsically motivating, thus, resulting in a lower proportion of dropouts by giving students feelings of accomplishment;
6. relatively inexpensive to purchase in quantity; and
7. appropriate to serve as the first phase in developing job interests and job skills.

CORE has investigated various literacy methods carefully and feels that The Accelerated Progressive Choice (APC) Reading Program, developed by Dr. Myron Woolman of the Institute of Educational Research in Washington, D. C., holds the best possibility for success and comes close to meeting the above criteria.

The APC Reading Program is a carefully programmed approach to developing literacy skills which presents the material to be learned in small, readily digestible units. The learner realizes a high rate of success throughout the program, and as he progresses from one phase to another he becomes a student-instructor. He is able to proceed at his own rate

with materials which have been tailored to meet the peculiar requirements of his circumstances. The method is, in fact, designed specifically for those who have not responded to traditional educational methods.

The Woolman method has been extensively tested, using mental retardates through grants from the National Institute of Mental Health. It has been used in public schools in a number of states. In a recent test with pre-dropouts (underachieving students) in a junior high school in North Carolina, very impressive results were achieved. In six classes averaging over 25 students per class, 51.2 hours of instruction in APC resulted in a mean reading gain of 1.2 years per student. Just as striking is the interest, involvement, discipline and motivation of both students and instructors. Dr. E. Terry Schwarz of Bank Street College of Education in New York City made the following comments in a report at the conclusion of a study using APC during the summer of 1964:

> The observed reactions of students to the program were overwhelmingly positive.... It is not overstating to say that almost every youngster at some time finished a book toward the end of an instructional period and was asked if he wanted to stop or go on. The decisions were unanimously in favor of continuing immediately. In one group, where instruction was on a one to one basis and in three hour blocks of time, the students wouldn't take a break and tutors finally would ask for one.....

While the Center does not feel that this literacy proposal should be limited to the use of any one technique, we are convinced that The Accelerated Progressive Choice Reading Program is a highly functional tool which offers the best method now available for non-teachers to teach the educationally and socially deprived.

Instructors

Central to this proposal for a national literacy campaign is the availability of literally thousands of part-time volunteer instructors who will be selected on the basis of the following qualifications:

1. High school graduate or equivalent in reading-achievement level.

2. High degree of motivation to work with deprived persons.

3. At least four hours a week to contribute as an instructor.

4. Ability to follow instructions, adhere to work routines and to accurately complete periodic reports.

5. Ability to cooperate with others in performing coordinated activities.

The organizations which will be affiliated with the literacy-action program have extensive experience in recruiting, organizing and utilizing volunteers. Present plans call for the recruitment of many literacy instructors from the dropout and potential dropout population. Retired teachers, housewives, students, church members and union members are additional sources of volunteer literacy instructors. Literacy trainees who complete the literacy program will likewise become candidates for the job of Literacy Instructor. Since we project a training period of only 150 hours to reach the required reading-achievement level, we expect a constantly expanding number of volunteer Literacy Instructors (LIs). Although this proposal has received practically no publicity, CORE has been flooded with offers of assistance from many individuals and agencies. The combined resources of the many organizations that have expressed an active interest in this proposal could produce adequate volunteer LIs in communities of all sizes within every state of the nation.

The Proposed Community-Action Structure

We propose that this national literacy effort be spearheaded by the civil rights groups in coordination with Howard University. A Center for Community-Action Education would be set up within the University for this purpose. All activities of the National Literacy Program would be planned, directed and coordinated from the Center. The Center would have the responsibility of assuring that:

1. Research was performed to advance and improve the development of literacy methods suited to the needs of the National Literacy Program.

2. Suitable literacy-training materials were developed in accordance with the needs of the population being trained.

3. Educational, psychological and governmental resources were coordinated to optimize the efficiency of field operations.

4. Specific problems were isolated and given attention by "Task Forces" selected to make recommendations for the solution of "Community-Action" problems related to literacy and education.

5. There were suitable techniques for implementation, direction and guidance of the National Literacy Program in the field. These tasks would involve such problems as:

    a. coordination of the cooperating national and regional organizations,
    b. screening and selection of communities and community agencies for participation,
    c. training of Literacy Instructors,
    d. supervision and quality control of instructors,
    e. coordination and quality control of local community training programs,
    f. evaluation of training programs, and
    g. trouble-shooting methods to detect problems and strengthen training methods.

6. Extension of the literacy-training program to provide greater employability and increased awareness of social heritage and civic responsibilities.

Thus, the Center would constitute a merger of the research, educational and technical genius of the nation combined with the social-action capabilities of existing and proven national organizations. The Center would be the vehicle for merging the prime ingredients necessary for an effective national literacy program, i.e., educational methods, instructional resources, community facilities, funding, and a broad base of popular support.

Through the Center for Community-Action Education any community or community agency in the nation would be able to institute a local literacy-training program as long as the community or agency could demonstrate its ability to (1) supply LIs, (2) carry on a sustained and stable program coordinated with other agencies in the community, (3) provide adequate physical facilities for the literacy-training program, and (4) serve all elements of the community without regard to national origin, color or creed.

Howard University, because of its location, history as a pioneer for the educationally disadvantaged, and its deep commitment to the improvement of the status of the socially deprived, is viewed as the ideal setting for the Center for Community-Action Education. In addition to these factors, Howard University offers resources for further research and development through its existing staff and facilities. Above all, the concept of the Center for Community-Action Education is particularly congenial to the purposes and goals of Howard University. Its location, in this context, is viewed as having symbolic value as an assertion of purpose and dedication to the cause of education for the underprivileged. The Center would operate within Howard University and utilizing its facilities and personnel where possible. However, it would be free to pursue its objectives within those limits agreed upon by the Board of Trustees of the University and the Board of Trustees of the Center.

The type of program which the Center plans to undertake is a natural extension of many programs now in effect at Howard University. The Center would initially concentrate on producing literacy skills on a mass basis, and would be limited to education and training problems at all levels, in coordination with Howard University. The Center would strive to support research, development, and training to extend the capability of those persons who finish the literacy training. The Center would use all available resources from the University, across the nation and the world to develop techniques and methods to improve the efficiency of community-action systems of education and training. The goals would be to meet the total needs of the person emerging from illiteracy into the world of employability, and to develop the most efficient means of moving persons into positions where they could satisfy their responsibilities as citizens and employees in a world of constant change.

## Community Facilities

Most facilities will be outside the public-school structure; therefore, adequate facilities for training will be required elsewhere. It may well be that, in many cases, settings quite dissimilar from the typical school classroom will be necessary since many literacy trainees associate their schooling and the school itself with feelings of deep personal failure. Church basements, lodges, clubrooms, "Ys", union halls, plant facilities and community centers should make excellent training sites in many areas. The local sponsoring community agency will have the major responsibility for soliciting and providing the facilities which in many communities will be made available through the cooperating national organizations.

The specific requirements for the training facilities are:

1. accessibility to the population to be trained.
2. adequate space to seat the training group comfortably.
3. sufficient quiet and freedom from distraction to permit focus on the task.
4. sufficient lighting to permit performance of the work.

## Funding

If the National Literacy Training is to reach those persons who are most in need, the program must have broad-scale financing, independent of individual local communities. It is possible to minimize costs through the use of volunteer LIs and free community facilities. However, if we are to train a million persons in such a national program, the costs will mount to a level where federal support appears to be required. In a volunteer program a large supportive staff is essential. Costs per individual are expected to be very low. On a large scale, the average cost of developing a sixth-grade reading level in an illiterate is expected to total less than $50.00. If we are to reach one million persons with literacy skills in a two-year period, the cost over the two years of operation should total less than fifty million dollars.

In view of the severe educational crisis facing America, an immediate and massive attack is justified at a national level. If we are to make appreciable progress on the elimination of poverty in the near future, we must reach the hard-core masses of underprivileged who are being bypassed by the present programs. In view of the magnitude of the project proposed, our estimate of 50 million dollars represents a relatively small sum as compared with other expenditures now being made. Further, the results which appear possible are sufficient in scope, and within a population sector, which makes the cost minute in comparison with the ultimate savings which can be anticipated when persons shift from illiteracy to literacy. Beyond the practical investment involved in getting these people from dependency into jobs, the funding of this venture offers a unique opportunity to provide support where it is most needed, and to those who need it most.

This task is visualized as national in scope. It sets up a new structure, the Center for Community-Action Education, which is expected to supply our nation and the world with methods and techniques for overcoming ancient hostilities and misunderstandings. It will pioneer new educational and training methods specifically adapted to the needs of our age, and will at the outset, provide literacy skills to a million Americans.

This new force, the Center for Community-Action Education, is called for by the problems of our time. As part of its function, it will help to overcome problems inherited from the past. Its estimated cost appears to be quite low in comparison with the gains which it promises to give to all Americans.

## The Center for Community-Action Education

The Center for Community-Action Education is planned to increase the potential of community-action education and training. The Center will be uncommitted to specific educational methods or techniques except as they can demonstrate their value as tools for improving community-action education. Initially the Center will emphasize the planning, research, development and implementation of the National Literacy Project. It will also develop, at a later point, educational and training systems aimed at improving the ability of each community to provide a better economic and cultural base for its members.

Ultimately, the Center is expected to provide assistance for planning and organizing methods of re-training to maintain and improve the employability of workers with (1) obsolete job skills, (2) low skills which can be upgraded, (3) skills limited to particular geographic areas, etc. In all cases, the Center will attempt to provide each community with methods and techniques best suited for its particular local problems.

### Structure of the Center

The Center will consist of four operational arms: Planning, Research, Development and Community-Action.

1. Planning

   This division will map out over-all plans and strategies. It will coordinate the three other arms and also will act as a resource for them. It will sponsor conferences, seminars, workshops and other activities aimed at solving community-action problems.

2. Research

   The Research division will develop a theory of community - action research and perform experimentation directed to improving the efficiency of the processes of human learning and to narrowing the gap between potential and performance, with emphasis on literacy techniques and other projects of the Center.

3. Development

   This division will design and prepare educational materials suited to the requirements of the spectrum of community-action problems.

4. Community-Action

This division will be responsible to carry out the program developed by the three other arms. It carries the techniques directly into the community.

Control of policy will rest within a Board of Directors consisting of designated personnel from the staff of the Center and Howard University, representatives of the civil rights organizations and appropriate representatives drawn from the fields of education, psychology, business, labor, religion, etc.

In addition to the Board of Directors, there will be an advisory committee consisting of a panel of experts also drawn from such disciplines as economics, social work, psychiatry, psychology, etc.

The Center itself would be headed by a Director who would also serve as Director of Planning; an Associate Director for Research and Development; an Associate Director for Community-Action; and an Administrative Director.

## Operation of the Center

The National Literacy Project will take place in three successive stages. These are: (1) Planning stage, (2) Operational stage and (3) Extension stage. Each of these stages will be discussed:

## Planning Stage

During the planning stage the Center will plan new research and continue the development of existing programs to meet the requirements of the functionally illiterate populations to be trained. Also, the Center will further develop and extend pilot projects such as the ones now being started under the auspices of the Congress of Racial Equality. During this first period the Center will begin to hire and train personnel for the supervisory field apparatus, later described, and for the training of volunteer Literacy Instructors. Physical facilities for the Center will be established and systems set up for data processing and quality control of the field operation. Initial selection of communities in which the literacy program would begin will also take place in this planning stage.

## Operational Stage

By the end of the planning stage, the Center will be in position to begin the National Literacy Programs in at least a score of communities across the nation. In this stage, the entire field apparatus will be activated. This apparatus consists of three main classifications of personnel: (1) Community Organizers, (2) Literacy Instructor Trainers (LITs) and (3) Field Supervisors.

Community Organizers

Community Organizers will serve primarily to investigate and screen those community organizations which express interest in having literacy programs. The organizer will evaluate the particular community agency and the community itself in terms of pre-established evaluational methods. It will be his function to obtain the data and forward it to the Center. The Center will then be in a position to decide which communities will best meet the conditions required for the operation of the program. Once the decision has been made the Community Organizers will also serve to stimulate interest in the literacy program, and to interpret the aims of the Center to a wide audience.

The Literacy Training Section of the field operation will consist of those persons responsible to guide and direct the initiation of the program in the local community. It will be their responsibility to insure proper training of Literacy Instructors, work with local organizations, and monitor the literacy program in its initial weeks of operation, to insure that it is functioning properly.

The supervisory staff will operate at three levels:

1. Supervisors
2. Project Coordinators (PC)
3. Volunteer Coordinators (VC)

Since literacy instruction will be performed by volunteers, a careful system of supervision is required to insure that the program maintains its quality and continuity of operation in each community. The echelon immediately above the volunteer Literacy Instructors (LIs) will be the Volunteer Literacy Coordinators. The VLC will be responsible for supervising the activities of from five to ten LI's. He will insure (1) that the students are instructed properly, (2) that the instructors are carrying out their responsibilities as scheduled, (3) that the facilities used for the training are given adequate care. It will also be his duty (4) to contact those students who drop out of the program and try to straighten out their problems, and (5) to carefully report to his supervisor difficulties which he sees in the functioning of the project and to make recommendations for project improvement. For each group of Volunteer Literacy Coordinators there will be a Project Coordinator. Project Coordinators are expected in large part, to be drawn from among the LIs themselves. As these are paid positions, the National Literacy Program would provide a limited number of jobs for persons indigenous to the community. In the echelon above the Project Coordinators would be a staff of professional Supervisors, they would generally supervise, trouble-shoot and oversee the program across fairly large geographical areas. It would be their responsibility to see that all data and other information on local projects get to the Center. This National Literacy Program supervisory staff will be organized on a local, state, and regional basis.

In the operational stage the National Literacy Program should quickly move into high gear and spread rapidly across all regions of the United States. During this phase we expect to build an expanding system (in which students become instructors) and ultimately provide a million persons with literacy training.

Extension Stage

During this third (expansionary) stage of operation, in addition to the continuation of the literacy program, the scope of the Center will be expanded beyond the goal of providing a sixth grade reading capability. While for many persons a functional sixth grade literacy level will provide stimulation to seek further education and broader employment opportunity this literacy level will also provide a base for seeking higher employment skills. Various experimental programs will be carried out during this extension stage. These experimental programs will include such methods as: (1) vocabulary expansion programs, (2) verbalization programs, (3) English composition programs, (4) arithmetic concepts programs, and (5) vocational skill programs including electrical repair, mechanical equipment repair, etc.

These experimental pilot projects are to be carried out using experimental groups of students who have established a minimum sixth grade reading level.

The Center's Research division, during this stage, is also expected to experimentally produce training techniques for obtaining high school equivalency in a very short period of time.

We propose the following schedule for the duration of the various phases:

Stage 1. To begin as soon as funding permits, and to continue for six months.

Stage 2. To begin at the conclusion of Stage 1, and to continue for approximately 24 months.

Stage 3. To begin after 18 months of Stage 2.

The Literacy Instructor (LI) (Summary Job Descriptions)

The Literacy Instructor is the core of the literacy program. It is he who will be in constant contact with the trainee. To the extent that the LIs are successful, the Center will be able to make gains in reading and writing ability. However, since the literacy training material is expected to be programmed and largely self-instructional, we will be working with a system that is efficient to the extent that LIs perform each step as required. LI's must also bring enthusiasm, involvement and dedication as many students will require emotional support as well as instruction in reading. However, the academic background of the LI may be relatively low; he may not have completed high school and may be a housewife or in an unskilled job situation. Many LIs will in

fact, gain as much or more from the National Literacy Program as their students because of the requirements for planning and scheduling and attention to language skills. We are hopeful that many LIs will become motivated to seek careers as teachers.

In Part I of this proposal the qualifications of the LI were specified.

The specific duties of the Instructor are:

1. to give instruction using materials supplied to him.
2. to recruit trainees.
3. to help secure facilities in which to carry on instruction.
4. to maintain and periodically submit all necessary records and reports.

Prior to the time the LI is expected to begin instructing, the Center will train him for the above duties. In the case of highly educated and motivated persons the time required for training will be minimal - perhaps 10 hours. For persons with little experience in working with others and for those who may have only a tenth grade reading capability themselves, the training period may extend up to 25 hours.

In a given city for example, we could start with an initial cadre of 40 potential LIs. Within a week most would have completed their training. We expect 25% attrition so that of the original 40, about 30 would become Literacy Instructors. The others will have dropped out or been unacceptable for a variety of reasons.

If sufficient literacy training recruits had not already been located and if adequate training facilities had not been secured, the first assignment for most of the LIs in this illustrative community would be recruitment of students and facilities. As trainees are increasingly recruited, a larger portion of the LIs would begin instruction, and a correspondingly smaller proportion function as recruiters. Some LIs will perform in both capacities, and some will function in one or the other. Eventually we can expect a high proportion of LIs to become regular instructors and others will continue to recruit on the basis of demonstrated merit. Some proportion of LIs would become Volunteer Literacy Coordinators or even join the field staff of the Center.

The number of LIs in this hypothetical community is expected to expand. Others can enlist in the project for LI training and can be trained in their LI duties by experienced Instructors. Likewise, as trainees move ahead in the literacy instruction, many of them will become student-LIs in from 30 to 100 hours of instruction as provided for in Dr. Woolman's reading method, depending on their initial level. Upon completion of the training program they can perform as LIs and instruct their own groups. In this manner, in any community, the number of LIs (and trainees) can continue to expand.

## Trainee Recruitment

The recruitment of LIs in sufficient numbers to mount the program is not expected to constitute a major problem. Recruitment of large masses of literacy trainees is expected to pose the Community-Action arm of the Center with its greatest challenge. For this reason the support of the civil rights groups and other community agencies allied with them is of vital importance to the success of this project. The key to the recruitment of the functionally illiterate lies within the LI himself. As far as possible it will be desirable to select a majority of the LI's from essentially the same population group from which the literacy trainees will be recruited. These LIs will be trusted community members who have a ready rapport with the prospective trainee. Since one of the responsibilities of the LIs will be to recruit their own students and since a high proportion of the LIs will be neighbors of prospective literacy trainees, recruitment will be informal and should be both more economical and more successful than has been the case in typical community service agencies. The LI speaks the same language as the trainee, and offers a ready example of successful accomplishment for all to see.

As a result of these same factors and because the literacy training materials are designed to be intrinsically motivating, the drop-out problem is expected to be minimal.

Present planning calls for recruiting a large number of the initial LIs from the membership of the National Association for the Advancement of Colored People, the National Urban League, CORE, the Southern Christian Leadership Conference and the Student Non-Violent Coordinating Committee. Due to the involvement of civil rights organizations we expect strong initial support for this project, particularly for improving the literacy level of Negroes. However, it is most important that all coordinating organizations work on the principle that literacy training will take place without regard to color.

APPENDIX A

CONGRESS OF RACIAL EQUALITY
38 Park Row
New York, New York 10038

MEMORANDUM FOR THE RECORD

TO: The President

FROM: James Farmer

RE: Participation of CORE in the Anti-Poverty Program

Summary: A proposal for CORE's participation in the War Against Poverty through a program of remedial education. To develop literacy skills in one million Americans during a period of eighteen months would require an investment of thirty million dollars. This memorandum comes as a response to the request of the President for further details on the proposals set forth by James Farmer to the President on December 9, 1963.

The Civil Rights Act is a giant step on the road to equality. The Congress of Racial Equality views its passage with satisfaction because this Act spells out the minimum that the American people must do to conform to the spirit and letter of the XIV Amendment. However, men are not suddenly transformed merely because laws have been passed.

We must now face the appalling fact that in 1961 one out of three children in America's largest cities was educationally deprived. There are whole communities in this country where this condition has persisted for generations. Though the War Against Poverty is only a beginning, it is an absolute necessity if millions of Americans are to have an opportunity to catch up with those who have raced ahead. The Anti-Poverty Program is consistent with pressing national needs as well as with CORE's own objectives.

A large proportion of our Negro citizens as well as many whites cannot enjoy the pursuit of life, liberty and happiness because they live in squalor and despair. The passage of the Civil Rights Bill has given many Americans, particularly Negro Americans, the opportunity to begin the movement to obtain full equality. Until now many Americans have faced a locked door instead of a future. Now we have the key, but we must still turn the lock, open the door and advance into a future in which equality becomes a social and economic reality.

CORE is prepared to move into long range action for greater and greater equality. An important new thrust is political action. One million Negroes have been registered during the past year. Now that they have been registered we will encourage them to vote. Also, CORE is prepared to raise the level of economic activity through fostering the development of cooperatives and small industry. We will encourage full participation in American corporate life.

First and foremost, of course, is the matter of education. If people cannot read they remain isolated from the dominating ideas underlying our Great Society. The illiterate lacks the means for economic elevation and cannot participate in the fight against prejudice. CORE will move into programs of education and training so that the unemployable can become employable. CORE will actively help to develop those skills which are prerequisite to obtaining the job skills required in an automated economy.

CORE fully endorses your Anti-Poverty Program as being completely compatible with its goals. Men without skills cannot be equal in pay to men able to perform skilled work. There are inequalities bred of ignorance which are perpetuated from generation to generation. This chain of human misery must be broken by direct action within the community itself. The letter of the law will in itself do nothing. CORE stands ready to join in this next great stage of progress towards fuller equality.

When we speak of equality we mean that we in CORE see no reason for any American to be illiterate if he wants to learn to read. Likewise, we deplore the waste of human potential caused by the enormous number of high school dropouts. The school dropout is in reality forced out because we as a society have failed him.

There are many reasons why CORE considers illiteracy a special problem. Discrimination against the Negro by failing to educate him, in many cases excludes him from the ballot box because of complicated literacy requirements for registration. As the man without the vote is voiceless and powerless in our democracy, CORE has an obligation to provide, if it is possible, the literacy skills which the state has failed to provide.

CORE is committed to the War Against Poverty, not as a bystander and not as part of an audience. CORE sees itself as a part of the democratic march to an America in which equality is not a slogan, but a fact of life. CORE is ready to add its own special brand of yeast to your program. We differ from official state and local organizations and school systems because CORE members are a living part of their own communities. CORE works from the inside out and not from the outside in. It is a unique organization consisting of volunteers, so dedicated to extending the boundaries of equality that they have spent dearly of their time and energy, risking violence and imprisonment, and some have even paid the price of life itself. As our nation strides into a new more technical era, we can increase the boundaries of liberty only by extending the boundaries of knowledge. The more than 70,000 members of CORE will lend their energies to improving the political, economic, cultural and educational standards of those whom this society has neglected. We stand ready to enlist our strength into this new crusade to stamp out ignorance.

Granted the availability of funds, CORE is ready to start a program to teach literacy skills to one million Americans of all ages without reference to race, creed, sex or color. We expect this to be done in the following stages:

1. Train selected CORE leaders and staff in the use of a new method of teaching reading developed by Dr. Myron Woolman of the Institute of Educational Research. This method permits any literate person to teach a less literate or illiterate person to read, and does not require special school facilities or trained personnel.

2. Use these CORE-trained persons to provide skills to one thousand selected community volunteers and set up one hundred and fifty literacy development units throughout the country.

3. Once these programs have begun, we will use them to train others, and expand the number of literacy development units until we reach one thousand units.

CORE is convinced, on the basis of its analysis of Dr. Woolman's methods that we can substantially increase the literacy skills of one million Americans within eighteen months. We estimate that this program will cost less than $30 per trainee. The total cost for the first million CORE readers will be less than $30 million dollars. We expect our second million readers to cost even less. We in CORE will work with school drop-outs, welfare clients, prisoners, and those hidden men and women who have been forced to silently submit to eternal ignorance in every community. CORE is ready to throw its full force into helping these people climb this next rung on the ladder of equality. Beyond this next rung on the ladder there is a next and a next. The price of freedom is eternal vigilance, then the cost of equality is eternal progress.

James Farmer

16 October 1964

APPENDIX B

Memorandum to
The President

Subject:

**A Plan of Action**

**For Remedial Education**

(A follow-up on my memorandum
of October 16, 1964.)

From James Farmer
November 21, 1964

In my previous memo to you (October 16, 1964) I suggested that CORE believes that it is possible, working with other organizations and private citizens, to provide literacy skills for a million Americans in an eighteen month period with an investment of $30,000,000. I stressed the fact that CORE is an organization of volunteers, who are accepted and trusted within the communities most in need. Further, I stated that it is possible to perform this task in whatever buildings and facilities are available, using non-teachers to instruct with the Accelerated Progressive Choice Reading Program, developed by Dr. Myron Woolman of the Institute of Educational Research in Washington.

The fact that millions of Americans see the fruits of our rich, productive society and yet cannot taste those fruits is a violation of the right of all citizens to equal opportunity. Moreover, these millions of economically and socially disfranchised Americans represent an unstable and potentially explosive force within our society. From the point of view of simple justice, economic growth, and social stability, we must attack this problem with all available resources. The social advances made possible by the Civil Rights Act and the promise in the Economic Opportunities Act are like a menu presented to long-hungry diners. These legislative acts must be followed by something tangible or the very hopes they raise will stimulate further disillusionment and resentment. The problem infects every American community and action must be taken wherever the problem exists.

In considering the issue, I am convinced that CORE has only begun to make its contribution. We must help the disadvantaged develop literacy and job skills and a concommitant confidence in their future as Americans.

I have a deep conviction that CORE must participate actively at the community level, lending support to these important programs as they begin to function within our deprived communities. The dropouts, illiterates and the unemployed cannot be helped by law, buildings, money or good intentions. They distrust officials and schools, in whatever guise they appear, and they can only be brought into full and active participation in our society by people they trust using methods of training which are suited to their needs. Above all, there must be mutual confidence between the people who operate the programs and those to whom the training is given.

The prime fact of the war on poverty is that the trainee must not only enlist but actively participate if he is to learn. Learning, as you know, is a personal matter and requires both confidence in the teacher and a willingness to invest oneself in the process sufficiently to succeed. I am convinced that the next step is for organizations such as CORE to move forward into the national arena and if this important step is to succeed, to act as a catalyst for simplifying and accelerating the process of education and training.

Further, it is necessary for organizations such as CORE not only to participate in community education, but also to assist in developing the new educational methods and techniques required for community-action education, as contrasted with public education, which, to date, has been ineffective in coping with the problems rampant in our deprived communities.

While it is the responsibility of the schools to educate, it is our obligation to supplement that education where necessary and to reach those who have failed to respond to the schools. No one can reach the youth on the streets in quite the same manner as another youth or an adult who has come from the same background and environment. CORE feels strongly that the Negro protest organizations along with individual churches, local unions, social clubs and community groups have a unique role to play in motivating and educating those Americans who remain functionally illiterate. Our record shows that we have had astonishing success in motivating and training the very population that is most in need of inspiration, most in need of enrichment, most in need of literacy skills, most in need of jobs. We do not propose a program for non-whites alone. We propose to begin a campaign in which volunteers of all ages, backgrounds and races will be able to offer a unique learning experience to hundreds of thousands and even millions of disadvantaged and underprivileged persons.

We have in the field the structure for putting into effect a large scale literacy program. We have the methodology. With the proper funding we will be in a position to effect substantial literacy programs throughout the rural South and in hundreds of cities and towns. Through coordination of the efforts of private agencies and with the assistance of the federal government we believe we can make great strides toward the elimination of illiteracy in this great nation.

Our objective is to teach people to read and thus provide them with the underpinning required to go on to further educational and employment levels. But we have an even greater objective. Negroes and other members of depressed minority groups have been taught to reject their own potential. Those on the bottom have for their own self-protection become apathetic and lethargic: to try to advance is to be beaten down. Thus, millions of Americans have chosen to accept their inferior status. The militant civil rights campaigns of the past decade have awakened the sleeping aspirations of many of these sullen millions. For the first time we have brought the spark of

life into whole communities. While we have provided the awakening, we must now shift our programs so that we may provide the tools to translate these new-found aspirations into reality.

The ingredients necessary for the successful implementation of a literacy program which can provide reading skills and motivation for further growth are:

1. A population receptive to the idea of learning and self-advancement.

2. A technology which can provide the ability to advance reading skills at a substantial rate and which also has built-in self-motivating factors.

3. A large group of persons able to act as instructors.

4. A structure able to administer and supervise the program.

5. Community facilities available for implementing the program over a long period of time.

6. Funds.

## Population

There is no need to dwell on the need or the receptivity of a large population. The statistical evidence is overwhelming. This has also been dealt with here and in the earlier memorandum.

## Technology

The method developed by Dr. Myron Woolman appears to hold the best possibility for success. It is a programmed approach which has been designed for use by relatively untrained personnel. It incorporates the learning by teaching approach. The content of the reading material can be tailored to meet the peculiar requirements of the southern Negro child and adult, the ghettoized high school dropout or the Appalachian white, and it allows the student to advance as rapidly as his own capabilities permit. CORE has observed the method in operation in the field. Our staff was amazed at the interest, involvement, discipline

and motivation of both instructors and students.

Others who have studied Progressive Choice in practice attest to its striking ability to stimulate and hold the learner. Students almost unanimously ask to spend longer hours on the program than time permits. They take tremendous pride in their accomplishments and in their successes. We are thoroughly convinced that Accelerated Progressive Choice offers the best opportunity for non-teachers to reach and teach the educationally and socially deprived.

Instructors

Many volunteer Literacy Instructors will be drawn from the dropout or potential dropout population itself. Ratired teachers, housewives, student volunteers, church members and workers can also become volunteer Literacy Instructors.

The initial cadre of instructors will come from the active membership of the Congress of Racial Equality, the National Association for the Advancement of Colored People, the Student Nonviolent Coordinating Committee, the Southern Christian Leadership Conference, and the churches. In many cases the instructors will recruit their own students. As students progress in the method they themselves will instruct others just entering the program. With CORE's extensive experience in the utilization of volunteers we will be able to recruit an ever-expanding number of instructors who will have wider and wider outreach.

We have observed student helpers on the junior high school level giving instruction in this method in a public school in North Carolina. It was startling to see that the student helpers were as effective in teaching as were the teachers. If 8th graders are able to teach reading to other 8th graders it becomes obvious that the number of potential teachers is limitless and that the demands of the Woolman method on the instructor do not preclude using youngsters themselves under supervision to teach others. A number of CORE chapters in New York are somewhat acquainted with the literacy program and many of our high school members have come to us asking when they can begin to implement the program in their schools and through their chapters. With the small amount of publicity there has been on the literacy program my office has been flooded with offers of professional assistance, with volunteers who want to become instructors and with inquiries from communities wanting to know when they can begin the program.

Structure

I propose that a Center for Research in Community-Action Education be established in an appropriate university setting. Preliminary discussions have already been carried on with two universities and this proposal has met with initial positive responses. The university would receive and account for funds from all sources, public and private. The Center's sole initial function would be to research, develop and execute the literacy program on a national scale. This aspect of the Center's work shall be referred to as Phase 1.

The Center will require four operational arms: Research, Development, Planning and Community Action. Under Phase 1 the functions of these departments would be:

a. Research Arm: To develop theory and perform experimentation directed to improving the efficiency of the processes of human learning, with emphasis on narrowing the gap between human potential and performance.

b. Development Arm: To design and produce educational materials specific to the requirements for Community-Action Education Programs.

c. Planning Arm: To coordinate the professional, educational governmental, and organizational resources to facilitate work done in the field. Further it would operate as a resource for the other three arms in the Center.

d. The Community Action Arm: This arm would do the work of going out into the communities to carry out the plan of action and use the materials developed through the research and development arms. It would also evaluate and make recommendations for change in the methods of implementation employed by the cooperating agencies.

I further propose, however, that the scope of the University Center eventually be expanded into Phase II. In this second phase the Center should broaden its program to include all aspects of quality, integrated education. For example, Phase II should be concerned with sharply reducing the proportion of dropouts and increasing the ability of students to learn.

The functions of the four departments under Phase II would be expanded to include the following:

a. Research Arm: Research in the whole area of school integration, and other research appropriate to developing quality education within the public schools.

b. Development Arm: Development of proposals at the request of school systems and local organizations for achievment of quality, integrated education, and development of materials and textbooks toward this end.

c. Planning Arm: Communication and coordination of the work being done by community action groups, boards of education, governmental agencies, and various experimental projects. Planning and expediting the transition from community-action education to public school education inasmuch as the success of Phase II will progressively render Phase I unnecessary.

d. Community Action Arm: Act in a consultative capacity to school boards, school supervisors and community groups to assist in the solution of educational and training problems arising from intergroup tensions or desegregation.

It should be pointed out that the expanded scope (Phase II) of the Center is independent of and not a requisite for the national reading program (Phase I). A financial commitment to Phase I implies no such commitment or endorsement of the projected second phase.

Community Facilities

In addition to the University Center which would serve as the research administrative, and supervisory headquarters for the literacy development program, certain community resources will be required. It has been indicated that the body of instructors will be a prime resource provided by the community. Places in which to teach also will be necessary. Church basements, lodges, clubrooms, union halls, plant facilities and community centers will be ideal. In fact, the logic of the program indicates that the more the quarters are unlike a typical school setting, the better.

Funds

The educational crisis facing America requires a massive effort on the part of volunteer agencies. Only the federal government can support such an effort on the scale which is imperative. However, on a large scale the average cost of developing an eighth grade reading level in students beginning near point zero can be less than $50. This low cost will be possible due to the use of volunteer instructors and free facilities.

In most cases the cost to a community or agency desiring to undertake the literacy program should consist solely of the investment of time and energy. The materials, research and supervisory staff would be paid for by the funds made available by the federal government. I am in the process of preparing a budget which will be available shortly.

THE PROGRAM OF ACTION

I would suggest that we begin implementation of the literacy program in Philadelphia or Washington, D.C. We should move next to Pittsburgh and New York City. After that we should expand into the South and as rapidly as possible spread to cities across the nation.

At the beginning we would use the network of CORE chapters, NAACP, Urban League, SNCC and SCLC units and Freedom Schools which already have expressed an interest in the project as the nucleus for implementation. These groups are uniquely equipped to move into this type of community program rapidly and effectively and without necessitating new and elaborate community machinery. But we shall by no means limit participation to civil rights organizations. Already, one of America's major industries has approached CORE about the possibilities of putting the reading method into effect among the workers in its plants.

The Center at the outset will develop facilities to train Literacy Instructors both on its own premises and in the field. In any given city we would start with a cadre of between twenty and fifty Literacy Instructor Trainees. They can be trained as Literacy Instructors in from twenty-five to forty hours of instruction depending upon the number of hours they have available and on their own motivational and educational level. At the end of their training period they will be fully equipped to: 1) instruct in the Accelerated Progressive Choice method, 2) recruit their own students, 3) secure their own facilities in which to carry on their instruction if necessary, and 4) maintain all appropriate records.

As Literacy Instructors they will work largely within their own neighborhoods with students of compatible backgrounds with whom they readily can establish rapport. Each Instructor will be able to teach up to twelve persons in a group. Depending upon their initial level the students can become student-Instructors within a period of 30 to 150 hours of instruction and many of them are expected, at the end of 250 to 300 hours of instruction, to be fully qualified as literacy instructors without having gone through cadre training.

The Community Action arm of the University Center will also develop a large staff of Community Reading Program Consultants whose function will be to investigate, develop and supervise new agencies which can serve as fruitful local instruments for this aspect of the War Against Poverty. Working under the Program Consultants will be teams of paid staff members drawn from the ranks of the Literacy Instructors, who will check on each local Instructor and provide him with methods for continually improving his effectiveness.

Coordinated and planned from the Center, largely utilizing the already existing structures of national and regional organizations, and drawing upon local initiative, the nation-wide literacy program can be functional in a surprisingly short period of time and with an extremely low per capita expense.

I believe that this welding of research, development, and planning to community action represents a major new force in the War on Poverty and the struggle for equality in our nation. This program is, as you know, very much a part of my deepest convictions and I would participate personally and actively in the Center to insure its viability. I intend to seek, and am confident of gaining, the support of all civil rights groups, as well as unions, churches, the business community, and the general public in this task.

Within the framework of a Research Center such as the one outlined, a target on the order of one million literacy trainees appears both practical and feasible. This Center is a vehicle which has not existed to this time, because there was no public requirement to combine research, development and community action. Now, it seems to me, it is a necessary development to help insure the success of the War on Poverty. It utilizes many forces and combines them into a synchronous and functional system.

This new kind of war demands its own special weapons. The Center for Research in Community-Action Education will be a vital addition to our nation's arsenal in prosecuting this war - against poverty and for social justice.

# Appendix C

## Comments on the Center for Community-Action Education Proposal

CORE

THE WHITE HOUSE

WASHINGTON

March 15, 1965

Dear Mr. Carey:

Dr. Warren and I have noted with great interest your letter of March 8, 1965 and the attached draft by Mr. Farmer dated February 3, 1965. We think that it is essential that the National Literacy Program be implemented without delay.

A vast majority of those who are not literate are in this condition because of unequal opportunity and not because of mental retardation. The program outlined in Mr. Farmer's working paper is a good example of what the Office of Economic Opportunity can carry out through its community action, job corps, and VISTA programs.

I want to commend you on giving this fine proposal and suggest that you take it up with Mr. Jack Conway at the Office of Economic Opportunity at your very earliest opportunity.

Sincerely yours,

Edward H. Forgotson

Dear Mr. Carey:

This is in response to your request that I comment on "Proposal for Implementing a National Literacy Program."

I have read the manuscript by James Farmer with great interest. I personally feel that it is not only a good idea but actually essential. It is necessary that we have not one center but probably many centers that will develop the procedures and show the way to many other centers.

First of all I think the problem of motivation is a major one. This is mentioned in the manuscript but I consider it as difficult a problem to solve as that of setting up some instructional materials that can be handled without trained teachers. I do not believe that the manuscript points out how motivation can be obtained. In my experience many of the illiterates are very ashamed of their inferiority in this respect, and tend to run away from any help that they may obtain. What incentives will be used to get them started is one problem that needs to be solved.

If illiterates can be brought in to a center for training, the next problem is to use instructional materials that will show them success and progress from day to day. The achievement of success is in itself an incentive and a very powerful motivating factor. Therefore, the way the program is operated, the feeling of achievement every minute, every hour and every day is essential. Programmed learning, of course, with immediate reinforcement and a step to step progress is a good method. With such materials the job of the teacher would be not necessarily instruction in reading, but supportive and motivational. Thus, the employed personnel and the volunteers that are selected have to be selected with care from this point of view.

Your discussion of the cost of such a program does not impress me. If the job has to be done and can be done, this great country can afford to pay what is needed. Saving of funds at the expense of a good program is self-defeating.

With best wishes for your program, I am

Sincerely yours,

Samuel A. Kirk

Dear Mr. Carey:

I'm very grateful to have had an opportunity to review your plans for a national attack on illiteracy. That seems to me to be a very worthy and legitimate activity for CORE.

I really have nothing to say about the working paper itself except compliments. It's excellent and even practical. Any time there may be group discussions on these plans that are open to the public, I would appreciate an opportunity to sit in to learn more.

Good luck.

Sincerely,

David R. Hunter

Dear Gordon,

I think that CORE has a brilliant idea in its proposed literacy training program. The specific purpose of this study, as I understand it, is to find out whether the idea can be made to work on a large scale.

The key to the study will be, of course, setting up a rigorous experiment that will provide hard data that could be replicated later by other investigators. I would hope that you would use a control group in parallel with your experimental students.

If the study proves successful, you will have data of potentially great value for generalizing this type of work all across the United States and probably in many other countries as well, particularly the underdeveloped ones.

The best of luck, and I hope you will keep me posted on the progress of your experiment.

Sincerely,

Lyle M. Spencer

Dear Mr. Carey:

This is in reply to your letter of March 8 in which you enclosed "Proposal for Implementing a National Literacy Program", prepared by James Farmer.

While the Proposal as a whole sounds like a very worthwhile one, I will comment on only two aspects which fall within my particular technical competence.

First, the choice of The Accelerated Progressive Choice Reading Program developed by Dr. Myron Wollman is, I believe, a good one. I have known Dr. Wollman for some years during and since his employment in HumRRO and have followed his research and development work. All of it has been careful and well-tested as well as ingenious in design. Second, the provision, paragraph 2 - Part II, on research is of vital importance. I would urge that research be directed toward the measurement of literacy, general social competence and attitudes and that these be applied systematically during the course of the implementation of the literacy program. Such systematic study should add much to our knowledge of mental growth and social competence.

I hope that this Proposal will receive favorable consideration.

Cordially yours,

Meredith P. Crawford

Dear Mr. Carey:

I have the copy of the working paper you sent titled: "Proposal for Implementing a National Literacy Program." The overall purpose and design of the program seem to me to be quite sound and are aimed at attacking a very serious problem. My major reservation is that the program will rely solely on the Accelerated Progressive Choice (APC) Reading Program. I think that the APC Reading Program has considerable promise in the area of developing adult literacy. And, I understand that the method has been extensively tested. However, other materials and programs are being developed and tested and should be included in the proposal. I concur with CORE its feeling that the proposal should not be limited to the use of any one technique and assume that this will be taken seriously in the implementation of the proposal.

In the selection of instructors, you might include some kind of commitment to a specific length of time. Our experience with tutors has been that some of the initial enthusiasm and motivation is readily dissipated, especially if achievement results are not readily forthcoming. In the training program for the Literacy Instructors, I would hope that you would include continued in-service training and not simply an initial orientation program. Our experience with Homework Helpers in the Mobilization for Youth Program suggests that the continued weekly meetings with the tutors have been a very important ingredient in whatever success has been achieved.

The overall idea is an exciting and appealing one. I would certainly support its general design and intent despite the caveats I have suggested above. I hope you will keep me informed of future developments.

Sincerely yours,

A. Harry Passow

Dear Gordon:

I went over - with some care - the material that you and Jim Farmer wanted me to look at. It seems to me sound, as you realized I would say, since we have discussed this. As you know, I shall be moving to Washington the first week in April and will be at 1715 "N" Street, N.W. We should be in touch with each other as things go on.

Looking forward to seeing you soon.

Sincerely,

April 5, 1965

Mr. Gordon R. Carey
Educational Consultant
Congress of Racial Equality
Institute of Educational Research
2226 Wisconsin Avenue N.W.
Washington, D. C. 20007

Dear Mr. Carey:

I appreciate very much your sending me a copy of the working paper submitted to the Congress of Racial Equality.

I am, as you know, somewhat familiar with the APC reading program. I have examined the materials carefully, read much of the research that has been done and discussed both theory and methodology with Dr. Woolman. I am very much impressed with this approach to reading and feel that it is particularly well adapted to the kind of program outlined in Mr. Farmer's proposal.

I am very much impressed by the proposal itself. I think the notion of using peers as instructors and developing the program outside of a school setting is a very sound one. I think there is a very good prospect of success and, if successful, the project would make a most significant contribution toward solution of the problems of illiteracy and poverty.

My only reservation would be with respect to the scope of the project in its initial stages. The proposal suggests that at least a score of communities be involved in the initial operational stage. It would seem to me to be advisable to start off on a smaller scale--in four or five communities perhaps--during the planning stage. There will, obviously, be a great many problems to work out in placing such a program into operation and an attempt to begin on a very large scale might jeopardize the success of the project.

I would appreciate very much if you would keep me informed of developments. I certainly hope that something will come of this.

Sincerely,

C. R. Strother

Dear Dr. Carey:

Almost anything which can be done to raise the level of literacy in the nation, and particularly to do so in the large areas of educational blight which affect all races, will be action on the positive side of the ledger of social well being.

The particular proposal which bears CORE's imprint appears, on first reading, to be one of the better proposals for action.

Dear Gordon:

James Farmer's proposal for national literacy program is terrific. I have made comments on the proposal which I have enclosed.

My major suggestion is the addition of at least 1,000 employed nonprofessional tutors in addition to the volunteers. I think the Office of Economic Opportunity might be interested in supporting this dimension of the program.

In connection with the discussion I had with you in New York, I have enclosed a couple of pages on the role of the Civil Rights movement in the present period. I would be very much interested in James Farmer's reactions to these proposals.

Cordially,

Frank Riessman

Dear Mr. Carey:

Thank you for your letter of March 8th enclosing a proposal for implementing a national literacy program.

This program is addressed to one of the most crucial elements in the whole effort to achieve a self-respecting participation by the Negro in American democratic life. In my opinion it is well conceived, and I am particularly gratified to note that you have been working this out with the Institute of Educational Research. I believe their methods and approach are admirably suited to a mass program of this sort.

I hope very much that this program can be implemented. Naturally in the development of such a program you would want to do some pilot programs in order to get the bugs out before the thing is mounted on a nation-wide basis. I assume that this is contemplated.

With best wishes,

Sincerely,

Leonard S. Cottrell, Jr.

Washington, D. C. 20007

Dear Dr. Carey:

I read through the proposal for "Implementing a National Literacy Program" and I am quite enthusiastic about the plans you suggest. I would like to take the liberty of making a few recommendations. For the first year or two, I would suggest that the program be confined to one large metropolitan area such as Washington, D.C. so that the trained field workers could be closely observed and an evaluation could be made of the processes of growth and change both in regard to staff and recepients. It would be very unwise to stay with one technique. I have tremendous respect for Mike Wollman and the technology that he has been developing in the reading area; however, I would like to see the use of alternate techniques with a satisfactory evaluation plan in a few situations. I would hypothesize that some people respond to one technique in a more rapid and efficient manner than they would to other methods. It would be interesting and important to find out what kind of people, with what kinds of skills respond to which techniques; under what circumstance. My last suggestion is that adequate time be allowed for supervision and training of project coordinators so that they can become familiar with the inherent flexibility that can exist in the interpersonal aspects of literacy training and with the multiple strategy that may be indicated in different reading and learning contexts.

Nevertheless, this is an important program and if we here at the Institute can be of help, please let us know.

Best wishes for the success of your work. Perhaps on one of my trips to Washington I could sit and talk with you or some of your staff members and make additional suggestions or elaborate on these brief remarks.

Mr. James Farmer
National Director
Congress of Racial Equality
38 Park Row
New York 38, New York

Dear Jim:

Enclosed are two copies of the proposal as finally revised for submission. Budgets are attached. Copies of the proposal are being sent to Sandy, Office of Education, Howard University, Floyd, etc.

We should submit formally within two (2) weeks but we would like to get additional civil rights names on the Board prior to submission.

Sincerely,

Gordon R. Carey
Secretary-Treasurer

P.S. I hope you can take the NEA speaking engagement. You will receive a letter from NEA shortly. Nancy knows about it.

Mr. Roy Wilkins
Executive Director
National Association for the
Advancement of Colored People
20 West 40th Street
New York, New York 10018

Dear Roy:

I am writing in response to your June 18 letter to Jim Farmer in regard to the Center for Community-Action Education. The Board members at the July 16 meeting expressed their appreciation for your reply and their regret that you were not able to serve personally on the Board of Directors.

I understand that Jim called you last week and discussed the possibility of John Morsell sitting on the Board of Directors as the de facto representative of the NAACP.

We would appreciate very much a letter from you indicating the Association's wholehearted support for the National Literacy Program and the Center for Community-Action Education, and the desire of the Association to cooperate fully in the literacy programs of the Center. If you can do this and appoint John Morsell as your representative on the Board we would be most appreciative. We feel that the role of the Association in the Center's program will be crucial to its success.

I am enclosing two (2) copies of the minutes of the July 16 Annual Meeting and two (2) copies of the Planning and Demonstration Proposal which is being submitted to the federal government.

I want to thank you for taking time from your busy schedule to attend to these matters. I look forward to hearing from you.

Sincerely yours,

Gordon R. Carey
Secretary-Treasurer

Mr. John Lewis
Chairman
Student Non-Violent Coordinating Committee
360 Nelson Street
Atlanta, Georgia

Dear John:

We were most pleased to learn from James Farmer that you had agreed to serve on the Board of Directors of the Center for Community-Action Education.

Your support of the goals and program of the Center is greatly appreciated. It is our hope that the Center will be able to bring literacy skills to at least a million disadvantaged, functionally illiterate Americans. The Center should be able to provide the Student Non-Violent Coordinating Committee and other civil rights groups with literacy programs for use within their own organizational structures.

In order to acquaint you with the activities and plans of the Center to date, I am sending a packet of materials under separate cover. Included will be a copy of the Charter, By-Laws, and Minutes of the two Board meetings which have taken place. Also included is a copy of the proposal for the Planning and Demonstration Phases of the National Literacy Project which is being submitted to the Office of Economic Opportunity this week.

I should like to point out that in recognition of your heavy schedule, and that of other Board members, you can be represented at meetings of the Center by the delegate of your choice. We hope that you will be able personally to attend as many meetings as

feasible, but when this is not possible your delegate will, of course, have full voting rights at Center meetings.

Again let me thank you on behalf of Jim and the Center for agreeing to serve with us on the Board.

Sincerely yours,

Gordon R. Carey
Secretary-Treasurer

Dr. Edward Brice
Director
Adult Education Branch
U.S. Office of Education
7th and D Street, S.W.
Room 5068
Washington, D.C.

Dear Dr. Brice:

I am enclosing a copy of our proposal for the National Cooperative Literacy Program which is being submitted to the Office of Economic Opportunity today. We feel this project can be of the greatest significance to America's struggle against ignorance and poverty.

I trust that you will circulate this proposal within the Department of Health, Education and Welfare as you see fit. Your cooperation in securing federal support for this project will be appreciated by millions of Americans who are now locked in a universe of poverty and degragation by their lack of basic educational skills.

Best personal regards,

James Farmer
President

Enclosure

JF/bb

August 16, 1965

The Honorable Lyndon B. Johnson
President
The United States of America
The White House
Washington, D.C.

Dear Mr. President:

I am enclosing a copy of our proposal for the National Cooperative Literacy Program, the educational project which we discussed. The proposal is being formally submitted to the Office of Economic Opportunity today. I am also sending a copy to the Vice President.

You will please note that the present proposal is limited to a six month Planning period and a twelve month Demonstration phase.

This project has the active support and cooperation of each of the civil rights organizations as well as that of labor and other community agencies. We look upon this undertaking as an important arm of the national effort to eliminate the causes of poverty.

Those who struggled in the streets to achieve first class citizenship for all Americans must now attack the problems of poverty and ignorance. In so doing we can help to realize the promise of America for the poor and the rich of each and every segment of our heterogeneous nation.

We hope that the federal government will support this project. We intend to direct our energies to the long range problems which lie at the roots of poverty.

Sincerely yours,

James Farmer
President

MEMORANDUM

TO: The Board of Directors

FROM: Gordon R. Carey, Secretary-Treasurer

SUBJECT: Executive Committee Meeting

DATE: August 13, 1965

*Gordon Carey*
*James Farmer*
*Floyd McKissick*
*Lyle Spencer*
*Myron Woolman*

At the Annual Meeting Myron Woolman, Floyd McKissick, and Jean Cahn were elected to serve on the Executive Committee for the coming year along with the officers of the Center.

The Executive Committee will be meeting monthly and will carry on the official business of the Center between meetings.

At the Annual Meeting action was taken and is recorded in the minutes of that meeting; "Jean Cahn moved that all Board of Director members may attend and vote at their option. Myron Woolman seconded and amended the motion to read that all Board members receive a notice of executive board meetings. Motion passed as amended."

Therefore each member of the Board of Directors will receive notice of all Executive Committee meetings and we hope that they will be able to attend as many meetings as possible.

The first of the Executive Committee meetings will be held on:

Thursday, August 26, 1965
11:00 a.m.
2900 M Street, N.W.
Washington, D.C.

Please note that as of August 15, 1965, the new address of the Center will be 2900 M Street, N.W., Washington, D.C.

We look forward to seeing you.

August 16, 1965

Dr. Sanford Kravitz
Chief Research Program
and Development
Office of Economic Opportunity
Embers Building
1200 19th Street, N.W.
Room 541
Washington, D.C.

Dear Dr. Kravitz:

Accompanying this letter, I am submitting our applications for OEO support of our proposals for the National Cooperative Literacy Program. I trust that the papers are in proper order. If any additional information is required you can obtain it from Gordon Carey. I understand that he and Dr. Woolman are meeting with you later this week to discuss the proposal at some length.

I appreciate greatly your consideration of this application. We hope that it will be approved by OEO. Utilizing the structure and approach outlined in our proposal I am convinced that the Center will constitute a unique and crucial aspect of the war against poverty.

Copies of the proposal are being sent for informational purposes to the President, the Vice President and the Office of Education.

I look forward to hearing from you.

Sincerely,

James Farmer
President

APR 19 1965

April 15, 1965

James M. Nabrit, Jr.
President
Howard University
Washington, D. C. 20001

Dear Dr. Nabrit:

I would like to thank you for your comments on the draft proposal for the establishment of the Center for Community-Action Education. As you may know, I met with Dr. Nelson several weeks ago to discuss some of the topics raised in your letter of March 23. I am also meeting with Dr. Lewis this week.

Farmer, McKissick and I are quite flexible in regard to the kind of relationship which the University might establish in regard to the Center. I would like, at this time, to inform you of some of the steps that we have taken to get the Center concept off the ground.

First of all, we are not optomistic about getting large federal funding within the next few months. However, we are working with OEO on the preporation of a proposal for a planning grant. We would like to discuss this planning grant with you while it is still in the formative stages.

Because we feel that federal funding may be a good way off we have taken certain actions so that the Center might begin some smaller projects such as the Prince Edward study (see enclosed). Specifically, we have:

1. Incorporated the Center in the District of Columbia. The incorporators are James Farmer, Myron Woolman and myself. (At a later date we might well choose to dissolve the corporation in order to establish a relationship with Howard.)

2. Received a small grant (5,500.00) from the Spencer Foundation in Chicago to begin two literacy projects. One has already begun with the CCNY CORE chapter and the other is about to get underway in Durham, North Carolina. These two projects will involve only a few hundred youth.

3. We have begun conversations with several foundations and large businesses about funding.

4. We have called the first Board meeting of the Center in order to nominate additional Board members, establish by-laws and the like.

We have been advised that our likelihood of receiving substantial federal support will be enhanced by getting projects underway prior to formal application to the government.

I should also like you to know that independent of the Center, the Office of Economic Opportunity is sponsoring a good many research projects throughout the nation to test the literacy methods developed by Dr. Woolman. You will recall that the development of these methods was accomplished by the Institute of Educational Research (IER) with grants from the National Institute of Mental Health and the President's Committee on Juvenile Delinquency.

The $151,000 grant to IER referred to in your letter is one of the studies being made of Dr. Woolman's Progressive Choice Method by OEO. Another is a three year project currently underway in the Model School Division of the District of Columbia. Other OEO projects are either operating, or have been approved, for Boston, Kentucky, Pennsylvania and California. These studies are being done entirely apart from the Center and were, in fact, in the works prior to the meeting with you last year. They are, none-the-less, important to the Center since the Office of Education and OEO are looking to these studies to validate our methods on a large scale. These studies constitute the largest research project ever undertaken in the field of literacy.

Shortly, you will be receiving a formal invitation to serve on the Board of Directors. We would also like you to designate another representative of the University to serve as a Director. We envision the Board to have 15 or 17 members. An Executive Committee consisting of 5 to 7 Directors will also be established and we would hope that youror the Director that you designate could serve on the Executive Committee as well. Other persons to be considered as Directors at the initial meeting of the incorporation will be Leonard Cottrell, Alan Knight Chalmers, Stephan Currier, Jean Camper Cahn, M. L. King,Jr., Walter Reuther, Phillip Stern, Lyle Spencer, Floyd McKissick, Roy Wilkins, and Whitney Young. Your views on these persons, and any additional names that you might consider will be welcomed.

On Tuesday, April 27, following the meeting of the incorporation there will be a reception at the home of Mr. and Mrs. Cahn. An invitation will probably reach you before this letter. We would hope very much that you will be able to attend.

Finally, Floyd McKissick will be in Washington on April 27 and we would like to arrange a meeting with you on that morning if it is at all convenient. In this regard I will telephone your office early next week. At this meeting we could discuss in more detail the points raised here and in your letter.

Sincerely yours,

Gordon R. Carey
Research Coordinator

Attention: Mr. Gordon Carey

COPY

Dear Gordon:

Mary Hatley of the North Carolina Fund arranged an appointment for us to meet with Monroe Neff, Assistant Director, of the North Carolina Department of Community Colleges. This conference is scheduled for 11:00 a.m. Wednesday, April 28, 1965 at North Carolina Fund office in Durham. This is the day after our Board meeting of the Center For Community Action Education in Washington. I am advising you in advance as we will, have to return to Durham the morning after the reception. Incidentally, I got an invitation on yesterday.

It is also necessary that we have a written Proposal in shortly after our conference with Mr. Neff. Miss Hatley visualizes a cooperative program in cooperation with Operation Breakthrough and the North Carolina Department of Community Colleges for setting up and establishing three (3) experimental adult illiteracy training programs with the use of SRA materials.

As you know, the North Carolina Department of Community Colleges already has received a Federal Grant for the purpose of teaching all phases of adult education and it is through this program that our experimental classes can best be set up.

With very kind regards, I am

Yours very truly,

MCKISSICK & BURT

August 16, 1965

The Honorable Hubert H. Humphrey
Vice President
The United States of America
The White House
Washington, D.C.

Dear Mr. Vice President:

I am enclosing a copy of the proposal from the Center for Community-Action Education which is being submitted to the Office of Economic Opportunity today. Also enclosed is a copy of my letter to the President

I want to take this opportunity to thank you for the encouragement, advice and assistance which you gave us in regard to this national literary proposal at our meeting with you in February.

I look forward to participating actively in the program outlined in the proposal to OEO. I trust that the federal government will choose to support it. Your cooperation in this regard will be appreciated by those Americans who are locked in a universe of poverty and degradation by their lack of basic educational skills.

At the February meeting we also discussed the situation in Prince Edward County, Virginia. I have been gratified to see the Prince Edward literacy project get started so rapidly and operate so well. I am particularly grateful for the help and cooperation of Dr. Sanford Kravitz of the Office of Economic Opportunity, who was instrumental in the initiation of the program in Prince Edward County.

Sincerely yours,

James Farmer

THE CENTER FOR COMMUNITY-ACTION EDUCATION
2900 M Street, N. W.
Washington, D. C. 20007

Meeting of the Board of Directors
Executive Group - Center for
Community-Action Education

Held on: August 26, 1965

Place: 2900 M Street, N.W.
Washington, D.C.

Persons in Attendance:

James Farmer
Dr. Stanton L. Wormley
Colonel Robinson (Guest)
Dr. Myron Woolman
Mr. Gordon R. Carey

*Jean Camper Cahn*
*Gordon R. Carey*
*James Farmer*
*Rev. Martin Luther King, Jr., Ph.D.*
*John Lewis*
*Floyd B. McKissick*
*John Morsell, Ph.D.*
*Lyle Spencer*
*Myron Woolman, Ph.D.*
*Stanton Wormley, Ph.D.*
*Jerry Wurf*

James Farmer opened the meeting.

The Minutes of the previous meeting were distributed. Dr. Woolman moved that they be accepted as presented. Gordon Carey seconded the motion. Motion carried.

The next business on the floor was Gordon Carey's report on the status of the National Cooperative Literacy Program proposal. The Center is apparently qualified to receive OEO funds. Jean Cahn has received a letter of sponsorship from HARYOU ACT. Letters are also on file from Roy Wilkins, Dr. Nabrit and Dr. King indicating support. Gordon Carey enumerated the additional Members of the Board who have consented to serve since the last meeting. They are as follows:

Dr. M.L.King, Jr.
Dr. John Morsell
Mr. John Lewis

Gordon Carey informed the group that the proposal has been formally submitted to OEO and that copies have been sent to the President, Vice-President and to Dr. Brice of the Office of Education.

Mr. Farmer explained the background of the proposal. A first memorandum was sent to the President with the suggestion to the President that it would be feasible to combine many new forces in this fight against poverty. A second memorandum was sent to the President after consultation with Dr.Woolman. The third memorandum sent to the President, after conferences with Dr. Nelson and Dr. Nabrit of Howard University, included the thought of possible affiliation with Howard University.

Dr. Edward Brice met with Gordon Carey before the formal submission and made a number of suggestions. The proposal was formally submitted to Dr. Sanford Kravitz at the OEO on Monday August 16, 1965.

Dr. Woolman and GordonCarey discussed the meeting in New York with Mr. Jake Duryea of Pepsi Cola, in reference to backing by major Industry. Dr. Woolman reported on the project in New York with the CCNY group. They had about 100 subjects in their tutoring group. The CCNY students are acting as instructors and doing a good job.

In Philadelphia, the Philadelphia Tutorial Service, headed by Thurman Harrison has a group of 240 subjects with 60 volunteer instructors. They purchased their own booklets but IER has tested the students and conducted orientation of the instructors. The last workshop was unsatisfactory as only 20 people showed up out of the 200 expected.

Floyd McKissick is to formulate the project in Durham, N.C. in conjunction with the business school.

Help has also been given Blyden Jackson in Harlem on the program he is conducting.

The next business to be conducted was discussion of additional nominations to the Board. Cernoria Johnson, Director of the Washington Bureau of the National Urban League was suggested for nomination by Whitney Young. She was nominated by Gordon Carey. Elected.

James Farmer suggested that the balance of the seats on the Board be reserved for representatives of the poor from the following segments of the committee:

1. The poor
2. The Church
3. Education - Dr. Woolman suggested this field be carried from Teachers group
4. Industry

The next business to be discussed was the Advisory Committee. Dr.Woolman moved that a small Advisory Committee be established and a sub-committee formed to define the function, scope and method of nominating members of the advisory committee. Gordon Carey seconded the motion. Motion Carried.

The committee which was formed consisted of Gordon Carey, Jean Cahn, and Dr. Stanton Wormley. Gordon Carey is to convene this committee.

The floor was then opened for additional suggestions for Board Members. Dr. Blake, President of the National Council of Churches was suggested. It was also suggested that three additional members of the advisory committee come from other church groups. Gordon Carey nominated Rev. William Carson Blake to the Board of Directors. Elected.
James Farmer suggested that the member of the poor be left open until committee meets to discuss prospective members.

James Farmer suggested that Gordon Carey call the next meeting when required. Dr. Woolman moved that the meeting be adjourned. Dr.Wormley seconded the motion. Meeting adjourned at 1:20 p.m.

MEMORANDUM

NOV 3 1965

TO: The Board of Directors

From: Gordon R. Carey, Secretary-Treasurer

Subject: Board Meeting

Date: November 2, 1965

*Jean Camper Cahn*
*Gordon R. Carey*
*James Farmer*
*Rev. Martin Luther King, Jr., Ph.D.*
*John Lewis*
*Floyd B. McKissick*
*John Morsell, Ph.D.*
*Lyle Spencer*
*Myron Woolman, Ph.D.*
*Stanton Wormley, Ph.D.*
*Jerry Wurf*

A meeting of the Board of Directors is tentatively scheduled for:

Wednesday, November 15, 1965
11.00 a.m.
2900 M Street, N.W.
Washington, D.C.

Please keep this date open. We will send notice later to confirm the date of the meeting or to cancel it.

Dr. Myron Woolman
Institute of Educational Research, Inc.
2226 Wisconsin Avenue
Washington, D. C.

Dear Mr. Farmer and Dr. Woolman:

It was indeed a pleasure to meet with you, Mr. Carey and Mr. Coleman last Friday. I thoroughly enjoyed talking with you and learning more of your plans and proposals. You know that I am most interested and should like to be of assistance.

After talking with my colleagues, however, I have decided that it would be inappropriate for me to join your Advisory Board. As you are aware, under the Voting Rights Act of 1965, Section 4, questions concerning denial of voting rights may be litigated in the District of Columbia. Conceivably, it might be my function to consider the three judge District Court which would hear such cases. I am sure that you will appreciate my position. Please accept my good wishes for success in your very significant educational projects.

Sincerely,

Remed Ed

Dear Gordon:

As I told Dave the other day, Mr. Farmer will attend the Board m
meeting at 10:00 A.M. on the 15th. He plans to arrive in Washington the evening before, but has not let me know at what time. He will not be in the office between now and then, so I imagine he will call you Sunday to let you know whether or not someone should meet him.

Sincerely yours,

Nancy Stedman
Administrative Assistant

Thanks ever so much for your participation in the meeting with the National Industrial Conference Board. I think that this group can be an invaluable resource and contact with industry for the Center.

I have several things to remind you of and/or bring to your attention:

1) Did you call Dr. Sanford Kravitz or Miss Catherine James?

2) Did we get the letter or telegram from Whitney Young?

3) How will we be handling publicity and public relations for the Center? Is Val handling your personal publicity, and if so, should he handle this as well? It is possible that the Center Proposal could be signed any day now. At any rate, it is going to be signed very, very soon and we need to be prepared. In addition to what you will have to say publicly about the Center, we should have a written press release to be given to the Negro press, etc. We will also need very shortly some kind of public relations brochure, pamphlet or other gadget to publicize the Center - possibly with pictures and the works. How should we proceed?

4) At the White House Conference, I had a long talk with Bill Clay of St. Louis. What would you think of Clay as staff material for the Center? He might be interested in heading up a project in St. Louis.

5) I am now working on an organizational chart and job descriptions. I will get these to you within a few days.

Please call me on any or all of the above. Things will be moving rapidly from now on. Maybe we can set up a schedule whereby you can be here on a regular basis. At any rate, I think we need to discuss staff, public relations and other matters in the very near future.

Sincerely yours,

Gordon R. Carey
Secretary-Treasurer

DEC 30 1965

December 29, 1965

MR. JAMES FARMER
National Director
Congress of Racial Equality
38 Park Row
New York, New York

Dear Mr. Farmer:

This is to confirm my appointment with you on Monday, January 3rd, at 2 p.m. I would like to discuss with you:

a) CORE: As one of the first companies to endorse and implement the principles of Plans for Progress, Western Electric has shown a continuing interest in furthering the achievement level of minority groups. As such, we are preparing a guide for the management personnel of our locations on the various civil-rights groups. This guide will provide an evaluative tool for them in making contributions, joining community-action groups, or settling local civil-rights disputes.

b) The Center for Community-Action Education, Inc.: As you may know, some of WE's locations have initiated their own community job-retraining programs, and the Company plans to launch a new volunteer-action program shortly. Thus, we are interested in knowing how the new group will operate, what essentially will be its philosophy, and how, if possible, could an industrial firm like Western Electric contribute to the program's success.

Sincerely,

J. Hodes

December 30, 1965

Mr. Barry Gordy
2648 West Grand Boulevard
Detroit, Michigan

Dear Barry:

Here is the information on the Center that I promised to send. Enclosed are a copy of the application as it went to the Office of Economic Opportunity and copies of letters from distinguished people who are knowledgeable in the field of literacy. The application is going to be approved in a matter of days by the Office of Economic Opportunity. They want there to be some matching private funds and we are expecting sizable private funds to come in fromiindustry.

I am extremely anxious to have sizeable contributions from Negro businessmen. I'd like you to be the first to put cash on the line. We want to be able to publicize this fact and say to the nation that a distinguished Negro of means has started the ball rolling on remedying the academic skills of minority peoples in our land. Let America follow suit.

My best,

James Farmer
National Director

January 6, 1966

Dr. Myron Woolman
Director, Institute of Educational Research
2900 M. Street, N.W.
Washington, D. C.

Dear Mike:

This letter is a follow-up of our phone conversation of Sunday, December 26, and today. As I indicated then, Dr. King, Rev. Andrew Young and myself were all pleased to know that the Center for Community Action Education is being funded by the Office of Economic Opportunity and that Mr. Jim Farmer will be serving as Director for the Center.

As I mentioned to you, the Citizenship Education Program of the Southern Christian Leadership Conference would be more than willing to conduct the first pilot literacy program here in the South under the auspices of the Center for Community Action Education. We have already discussed Selma, Alabama, as being an excellent sight for a literacy training program since (1) Dallas County has a relatively high rate of illiteracy and (2) SCLC has been involved in a series of programs in Alabama and especially in Dallas County that are relevant to community organization. At the present time SCLC has a strong staff functioning in the Dallas County area.

On January 20, Mrs. Dorothy Cotton and I will be meeting with the Negro leadership in the Dallas County Area to discuss the implementation of the literacy program. We are looking forward to becoming more extensively involved and providing basic and remedial education for disadvantaged citizens in the South and sincerely welcome your interests in working with us.

At the present time the Citizenship Education Program is yet involved in an effort to obtain funds from the United States Office of Education to set up a research and demonstration project in basic education, and this effort could readily dovetail with the efforts and objectives of the Center for Community Action Education under the leadership of Mr. James Farmer.

If I can be of further assistance to you, please feel free to write me.

Respectfully,

Robert L. Green
Education Director

Dear Miss Corbett:

I was delighted to receive your letter of January 24th referring to Mr. Herbert Lennhoff who has expressed an interest in my new Center for Community Action Education.

The Center has not yet gotten off the ground, but we expect the funding to go into effect February 15th or March 1st.

The press stories represented a leak, not a press release. I would appreciate it if you would ask Mr. Lennhoff to write to me s sending a resume. He should send it to me in care of The Center for Community Action Education, 2900 M Street, N.W., Washington, D.C.

We shall shortly be putting together the staff and he will be hearing from us.

Sincerely yours,

James Farmer
National Director

Letter

JAN 27 1966

1223 Woodbourne Avenue
Baltimore 12, Maryland
January 24, 1966

Mr. James Farmer
Congress for Racial Equality
New York, N. Y.

Dear Mr. Farmer:

A friend has asked me to write you about his interest in the new program on literacy and employment which you are to direct.

When you gave the Roosevelt Day Dinner address here in 1964, I spoke to you about V. F. Calverton and the old days here at his home. I am the mother of George's daughter, and because I was teaching in the public schools, I was not often at the week-end meetings there, so you will not remember me. But I have followed your career with interest and admiration since Olson wrote so prophetically of you in 1940 as "the outstanding youth leader of his people." I also cherish your tribute to George in the Memorial Issue

of the Modern Quarterly. I wrote the article on 2110 in that issue, using pseudonym Vera Fulton.

Herbert Lennhoff, husband of a friend, was at that ADA dinner to hear you. Knowing that I had spoken to you that evening, he called me after hearing your recent television interview and reading the New York Times account of your next undertaking. He would like very much to have a part in the program, and asked me to present his name and qualifications to you.

He is at present working in a geriatrics research project at the City Hospitals here. Under the direction of physicians, he set up the program, organized the office, and runs it successfully. He is also a statistician. He is a man of broad liberal views, and is keenly interested in the civil rights movement and the anti-poverty program. He can be reached:

Herbert Lennhoff
4000 N. Charles Street
Baltimore 18, Maryland

All the old 2110 group who are left are very proud of you. George's daughter, Joy, is active in the good causes in Montgomery County, Maryland, her husband Phil Ray, a professor at U. of Md. And I am active in the old spots, but chiefly school integration.

Success in your new undertaking!

With good wishes,
Lola Corbett

**Price $1.00**

# GUIDE FOR TEACHERS: Contributions of Afro-Americans to the American Culture

Theme: "Prominent Persons and Their Contributions"

Pupil's Goal: To understand contributions of the Afro-American and the impact of these contributions upon American culture.

Teachers' Goal: To guide pupils in understanding the acculturative process in America in relation to the Afro-American's presence in the United States.

## FOREWORD

A group of teachers, a librarian and an administrator began working a few years ago to create methods and procedures which would improve the image of, the aspirational level of and knowledge about the heritage of pupils of African descent within the public school classroom. This group, formerly the Negro History Committee has become the Interboro Committee on Afro-American History. As organizer of this committee, which was formed at P.S. 93, Brooklyn, N.Y., in the fall of 1960 , it has been rewarding and challenging to be a part of such an important project. This "Guide for Teachers" represents this writer's role in the committee. Other results of the committee's work are: promotion of the use of Afro-American pictures in classroom charts for general teaching experiences; involving Parent Associations to purchase books, records, pictures for classroom and school library use on a year round basis; projecting historical knowledge of Afro-American history through school assemblies, quizzes, bulletin board projects; and participation in professional meetings. Members of P.S. 93 faculty who initially volunteered leisure time for research and identification of areas are: Alice Finnegan, Lolita Chandler, Charles Chaplin; Phyllis King, Olivia L. Hollis, Aubrey Nicholson, Sylvia Taylor, Beatrice Thompson, Glovinia Wilkinson. Mr. Elias Emanuel, Assistant Principal, developed a very excellent school wide program as described above and has enabled the entire faculty to be alert to opportunities throughout the year for orientation and reinforcement. Members of P.S. 118 Queens, N.Y., faculty who joined in 1962 are: Inez V. Allen, Wynolia W. Pulliam, Christine Williams, Enola E. Phillips, Portia M. Greene, Lois M. Desvigne, Gloria A. McIntyre, Joyce H. Patterson, Marian B. Hassell, Dorothy Ransom. Seymour Fruchter, Assistant Principal of P.S. 118, involved the student General Organization and Parent Association to purchase and mount charts for year round use in each classroom. Mr. Julius Nislow, Principal, P.S. 93, Brooklyn and Mr. Louis Abramowitz, Principal, P.S. 118,Queens endorsed the expansion of curriculum activities to include those developed by the committee.

## ACKNOWLEDGEMENTS

For devoting leisure time to research and expansion of ideas, I am deeply grateful to those professionals listed above. For initial help and constant encouragement, I am indebted to Mrs. Hortense Beveridge, former President of the Brooklyn Branch of the Association for the Study of Negro Life and History, Inc., For typing various portions of this manuscript, Muriel Walker, Nina Perchuk and Nancy Segee were of great assistance. The Parent Association of P.S. 118 Queens assisted in reproducing earlier issues. Joan Baucus executed the cover. Belafonte Presents, Inc., gave specific help in the area of folk music. In December, 1962, a grant for publication was received from the Jamaica Branch, N.A.A.C.P. I am especially indebted to this organization for assistance and for obtaining official approval from Assistant Superintendent Louise T. Ryan for distribution to schools in Queens County, N.Y. "The Snow", "The Game", "Falkes and Drops" and "Snow Prints" reprinted from GLADIOLA GARDENS BY Effie Lee Newsome by permission of Associated Publishers, Washington,D.C. "Val" and "Tommy" from BRONZEVILLE BOYS AND GIRLS by Gwendolyn Brooks, copyright (c) 1956 by Gwendolyn Brooks Blakely reprinted with permission of Harper and Row, Publishers, Inc., N.Y.. Excerpts from "The Seeding" by Paul Laurence Dunbar reprinted by permission of DODD, MEAD AND COMPANY, from THE COMPLETE POEMS OF PAUL LAURENCE DUNBAR, copyright, 1913 by Dodd, Mead and Co., I believe it is important that I express gratitude to my husband, Richard, for he has been patient beyond expectations during the 20,000 hours spent in developing, writing, expanding and distributing this work.

# KINDERGARTEN-GRADE 2

Language Arts

Pupils may be introduced to the poems of Effie Lee Newsome and Gwendolyn Brooks. The selections included below are examples of the style of these two poets.

The Snow - by Effie Lee Newsome
The snow's a courteous visitor.
It brings its blankets as it comes,
And goes to bed right on the ground
It never snores nor makes a sound.

Flakes and Drops - by Effie Lee Newsome
The snow comes down in little flakes
And rain in little drops.
The water helps to swell the lakes
And goes to moisten crops.

Tommy - by Gwendolyn Brooks
I put a seed into the ground
And said, "I'll watch it grow."
I watered it and cared for it
As well as I could know.

One day I walked in my back yard,
And oh, what did I see!
My seed had popped itself right out
Without consulting me.

Pupils may learn the following excerpts from a longer poem by Paul Laurence Dunbar.

The Seedling
As a quiet little seedling
Lay within its darksome bed,
To itself it fell a-talking
And this is what it said:

"I am not so very robust
But I'll so the best I can".
And the seedling from that moment
Its work of life began.

Little folks, be like the seedling,
Always do the best you can;
Every child must share life's labor
Just as well as every man.

The stories of George Washington Carver and of John Henry have been simplified for young children's comprehension:

George Washington Carver

George Washington Carver lived long ago before our parents were born. He was very, very poor. Like most boys and girls he enjoyed watching birds and other animals of the woods. He began studying science when he was young and made up his mind to learn all that he could about plants and animals. He discovered peanut butter could be made from peanuts. He made ink and paste from sweet potatoes. Jan. 5 is "Carver Day" in New York State.

John Henry, Mighty Railroad Builder

John Henry lived long ago when men had to work with their hands very often because there were not many machines to work for them. John Henry was so strong, he could work harder and faster than any other man. He used a hammer to cut through big mountains and to make tunnels for trains. One day a big drilling machine was made. John Henry decided to race this machine. John Henry won the race! He could cut through the mountain faster than a drilling machine.

K-2 (con'd.)

The following poems may be learned by pupils:

Peanuts grow on vines,
They ripen under the ground.
Pretty soon from them we make
Peanut butter for all around.
E. Johnson

John Henry was a strong man
He worked hard every day.
He dug a tunnel with his hammer
Faster than a drill, they say.
E. Johnson

Brother Bear went everywhere
Eating the food of his friends.
They put him to sleep
In order to keep their food
Till the cold winter ends.
E. Johnson

Other Language Arts activities are : creative writing by the pupils, cooperative poems, narrative charts, jingles about G. W. Carver, John Henry and Brother Bear.

Science

Plant sweet potatoes; follow the growth. Inspect peanuts; taste peanut butter. Teacher may have materials for children to see, touch and taste.

Crafts

Make John Henry's hammer out of construction paper or oak tag or laundry cardboard.

Crayon pictures of large tunnel John Henry dug. Paint or crayon the sleeping bear or the animals of the forest he knew.

Physical Activities

Play songs:
Bon-Ton or Sissy in De Barn. "Play Songs of the Deep South" by Altona Trent-Johns, page 2.

K-2 (cont'd)

Reference Materials for Teachers

"The Child's Story of the Negro" by Jane D. Shackelford
"Play Songs of the Deep South" by Altona Trent-Johns
"Gladiola Gardens" by Effie Lee Newsome
"Golden Slippers" by Arna Bontemps
"Bronzeville Boys and Girls" by Gwendolyn Brooks

# GRADES 3-4

It is suggested that teachers utilize the material presented for K-2 as well as that which follows; thus the curriculum will have greater continuity. Sources under "References for Teachers" K-2 are valid for 3-4 teachers' use.

Language Arts

Pupils may learn of the lives of writers as well as of their work.

Paul Laurence Dunbar

Paul Laurence Dunbar was a poet. He wrote of many subjects, often using dialect which is not easily understood today. One of his most beloved is, "The Seedling", which describes nature's wonder of spring and rejuvenation of plant life. Dunbar lived nearly one hundred years ago.

"The Seedling" may be read to the class or learned by the class in whole or in part. See page 156, "The Child's Story of the Negro", for the poem in its entirety.

Phyllis Wheatley

Phyllis Wheatley was a slave girl. She showed talent at an early age, so her owners taught her to read and to write. She could read Latin as well as English. She wrote five books of verse. She wrote a poem in honor of George Washington and in return received from the President an invitation to visit him.

Effie Lee Newsome

Effie Lee Newsome is presently Elementary School Librarian at Central State College, Wilberforce, Ohio. She began writing poetry at the age of seven and has written on subjects children enjoy most: the seasons, toys, games, holidays, nature's mysteries and family life. Here are a few selections suitable for February and March, taken from"Gladiola Garden". Miss Newsome also paints and writes musical compositions.

The Game

I've often seen the snowflakes play
A funny little game of tag,
And dart in such a jerky way
They all get mixed up in their play

I always find it hard to say
Which lead and which ones lag
Their movements are so much the same
I can't find out who wins the game
They never stop to brag.
There really seems no way to know
What's "it" when suddenly - they go!

Snow Prints

Along the paths my overshoes
Make little pits in twos and twos,
But often on that very day
The sunshine melts them all away.

It seems a funny kind of waste,
These footprints getting all erased.
It takes a very ice day
To ever make them really stay.

Grades 3-4 (con'd.)

## Gwendolyn Brooks

Gwendolyn Brooks has written many poems. She is well known. She won the Pulitzer prize for 1954. Here is one of her poems:

### Val

When grown-ups at parties are laughing,
I do not like the sound.
It doesn't have any frosting
It doesn't go up from the ground.

So when my Daddy chased me
Away from the bend in the stair
With a "Get about your business!"
I didn't really care.

I'd rather be in the basement.
I'd rather be outside.
I'd rather get my bicycle
And ride.

The legend of John Henry (who actually lived and was famous for his strength and speed) is one of America's favorites. Music, poetry and stories have been told for generations about John Henry, ,the son of a poor minister,who lived about a century ago. His hard work and determination to be the "best" gave him a place among the immortals.

### John Henry, Mighty Man

John Henry was a healthy little boy. He grew up to be a strong man. His muscles were like steel and he helped to cut the first railroad tunnel through the mountains of West Virginia. The mountains are made of rocks and the rocks had to be drilled through.

John Henry, with his steel pick and iron hammer, became the best "driller" of the countryside. The mountains would tremble and shake when John Henry's hammer struck.

One day a large steam drill was brought to the mountain. This steam drill was a machine which could drill through rocks very rapidly. John Henry decided he would have a race with this machine. Everyone came to watch this race between a man and a machine.

John Henry won. He had drilled deeper and faster than the steam drill.

The folk story of Brother Bear can be read by the pupils themselves, or dramatized as the teacher reads to the class. The story can be found in "Child's Story of the Negro" by Jane D. Shackelford.

## Language Arts Activities

The teacher may read any or all selections to class. Pupils may read poems and stories for themselves.

Creative Writing:
- Write to authors.
- Present oral or written reports.
- Compose class or individual poems.
- Start a picture and news file.
- Children write of their own aspirations.

## Social Studies

The stories of Frederick Douglass, George Washington Carver, Booker T. Washington, Mary McLeod Bethune and Benjamin Banneker, Crispus Attucks, Robert Smalls, are suitable. Excellent short stories may be found in "Child's Story of the Negro" by Jane Shackelford.

## Crispus Attucks, a Hero of the Revolutionary War

For many years, the anniversary of the American Independence was celebrated on March 5th, in honor of the day that the first fighting for liberty took place. The American colonists were growing tired of the British taxation and strict rules, and wished to be independent of Britain altogether.

In 1770, on March 5, a group of soldiers were standing in a place called Boston Commons, in Boston, Massachusetts. Small groups of people stood around talking,many of them angry because the soldiers kept telling them to move along.

One man stepped forth and dared the soldiers. He had become tired of the soldiers bullying people around - for he himself loved freedom more than anything else in the world. He had once been a slave and run away to freedom. His name was Crispus Attucks.

Hewould not move when the soldiers told him to. He and his friends quarreled with the soldiers. Crispus Attucks struck one of the soldiers down with a stick. His friends joined him in daring the soldiers. Crispus Attucks and his four friends were killed by the soldiers' bullets.

There is a statue in Boston Commons in honor of Crispus Attucks and his four brave companions.

## Captain Robert Smalls

There were 186,000 Negro soldiers in the Civil War. Many more served as spies, scouts and guides. No one was more willing to fight than the Negro, for the Civil War was fought because of slavery, and at that time, most Negroes in America were slaves.

Of the 186,000 who fought, there were many who won the highest honor, the Congressional Medal of Honor, for bravery beyond the call of duty.

One of the most exciting stories of the Civil War is about Robert Smalls. Robert Smalls was born April 5, 1839. He was born in slavery and obtained his freedom by impersonating the captain of a southern gun-boat and taking the gun-boat through to a Union port!

Smalls and his companions served as slaves aboard the Confederate gun-boat, "Planter". Smalls studied the manner in which the officers of the boat operated the machinery. One night, when the officers had left the boat, Robert Smalls took charge of the boat and guided it right through the Confederate ports. As hepassed each post, he gave the correct signal, and the Confederate guards thought nothing strange was going on! The clever Robert Smalls pulled the Captain's hat down over his own head and pulled the collar of the Captain's coat around his neck so that his face would not be seen. Fortunately there was fog in the air and Smalls, and his companions, easily slipped the gunboat through the waters to Union territory.

Robert Smalls delivered the gun-boat to the Union lines, won his freedom and became a captain in the Union Navy. Later, he became a Congressman of the United States. He died in 1915.

His adventures are described in "Captain of the Planter" by Dorothy Sterling.

## Matthew A. Henson, Co-discoverer of the North Pole

Matthew A. Henson loved adventure even as a small boy. He joined Admiral Peary's party and made several trips with Admiral Peary to the North Pole region. On the successful trip, which enabled the men to finally reach the Pole, Admiral Peary suffered frost bite. Then Matthew A. Henson went ahead and planted the American flag atop the world. A monument to Matthew Alexander Henson, co-discoverer of the North Pole, stands in Maryland in his honor.

Grades 3-4 (con'd.)

George Washington Carver

George Washington Carver was born a slave. He was very poor. Like most boys and girls, George loved to paint and to look at beautiful plants. He spent much time looking at beautiful plants. He decided to learn all he could about different plants and animals. He worked in many places and studied in several schools. He became famous when he discovered that from the sweet potatoes, more than 100 items could be made: such as, ink, paste, starch, meal, flour, vinegar and shoe blacking.

He made more than 300 different items from the peanuts, such as: milk, shaving lotions, dyes, linoleum, flour, butter (peanut butter), face powder, breakfast foods, and hair shampoo.

All of his life he continued to study and to paint. One of his paintings hangs in the Luxembourg Gallery in Paris. He is known all over the world because of his great work. He lived a useful and good life.

January 5th is "Carver Day" in New York State. Carver Day was establis in 1945 by Governor Thomas E. Dewey.

Frederick Douglass

Frederick Douglass was born a slave, on February 14, 1817. He escaped by masquerading as a sailor. He learned to read and write by himself, for there were no schools for runaway slaves. He had a great desire to help other slaves become free--and a wish to serve America. He became a great writer and orator. He published a paper and wrote stories telling why Negroes should be freed.

Booker T. Washington

Booker T. Washington was born a slave on April 18, 1856. The house in which his family lived had no windows, no light, not even a floor--only the earth beneath their feet. From this poor and deprived home Booker T. Washington aspired to become a learned man. He worked diligently at cleaning, polishing and dusting in order to earn his keep in school. He attended college and was such a brilliant student, his name was suggested for higher honors. He was sent to Alabama and established Tuskegee Institute there. George Washington Carver began his famous scientific work at Tuskegee Institute. Mary Mc Leod Bethune gained hope and confidence by visiting Tuskegee Institute. Booker T. Washington is known all over the world because of his work and his ideas. When you visit New York University's Hall of Fame you will see a bust of Booker T. Washington, famous educator.

Mary McLeod Bethune

Mary McLeod Bethune was born just after all American slaves had been freed. She had sixteen brothers and sisters. The seventeen children worked with their parents to buy the land on which they had lived during slavery. When Mary was just a little girl, because she was unable to read, she was greatly insulted one day by a rich girl who could read. Mary decided that no one would insult her again--she would learn to read too. At that time in history, very few of the former slaves could read and there were almost no schools. Instead of being angry about the rich girl's insult, she decided to learn to read. Instead of fighting the rich girl who had hurt her feelings, she made up her mind to become educated and to help others. Mary finally learned to read and write. Then she decided to devote her whole life to teaching others. She began a school with only one dollar and fifty cents. She baked pies and sold them to workmen. She grew vegetables in the school garden and sold those to people in the community. She taught her pupils to sing beautiful songs--which are still sung today by students in her school. Before she died in 1954, Mrs. Bethune's school, Bethune-Cookman College, was worth over $1,000,000. Imagine, from $1.50 to $1,000,000. Mrs. Bethune received a high honor from the late President Franklin D. Roosevelt and became an advisor to him.

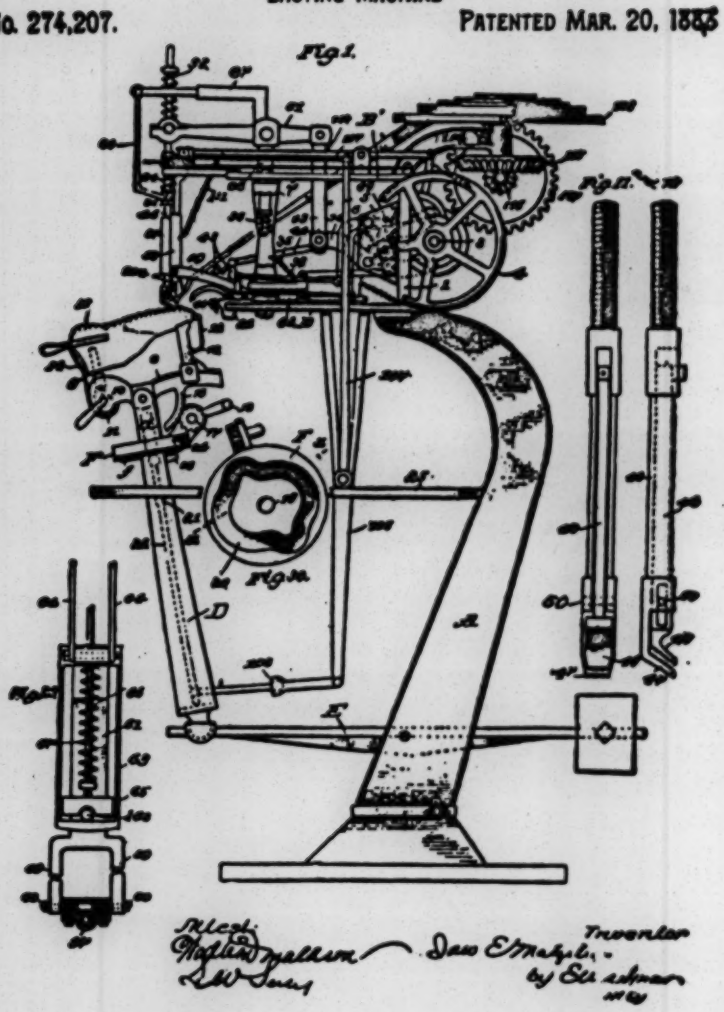
Grades 3-4 (con't)

## Jan Matzeliger

On March 20, 1883, a young man named Jan Matzeliger obtained a patent for an invention called a "lasting machine". This invention of his made the greatest change in the making of shoes.

Jan Matzeliger had worked for a period of time as a shoemaker's helper, or apprentice, in Philadelphia and New York. He was very upset because the work took so long. Shoes had to be put together by hand. Matzeliger worked for eleven years to perfect his invention. This invention of his made the manufacturing of shoes by machine possible.

The United Shoe Manufacturing Company bought his invention and America became the leading country in the industry of making shoes. That is why shoes can be bought so cheaply today!



J. E. MATZELIGER
LASTING MACHINE
No. 274,207. PATENTED MAR. 20, 1883
Fig 1.
Fig II.
Fig III.
Fig IV.
Inventor

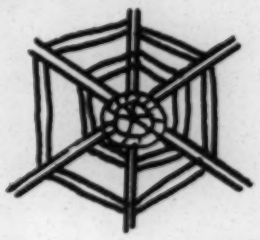
Jan Matzeliger's own drawings of his lasting machine, 1883.

--Hughes, L. and Meltzer, M. A Pictorial History of the Negro in America. New York: Crown Publishers, Inc., 1956, pages 226-227.

Grades 3-4 (con'd.)

Benjamin Banneker

Benjamin Banneker lived almost 200 years ago. His grandmother taught him to read. He attended school in Maryland and spent most of his time studying instead of playing. He enjoyed arithmetic and spent long hours working out difficult problems. When he became a young man he began to experiment with mathematical ideas. He made a clock which ran for twenty years without need of repairs. It is said to have been the first striking clock made in the United States. George Washington called him to work with a group of other men to plan the city of Washington D.C. Washington, D.C. has an interesting feature. All streets radiate from the Capitol. An aerial view of the city has the following appearance:



Pupils might compare a map of Washington, D.C. with a map of New York City.

Science

Plant sweet potato, follow its growth. Inspect peanuts, taste peanut butter.

Discuss Dr. Carver's discoveries made from the sweet potato: ink, paste, starch, meal, flour, vinegar, shoe blacking, - several of the 100 he discovered.

Discuss some of Dr. Carver's more than 300 items made from the peanut: milk, butter, shaving lotion, linoleum, breakfast foods.

Relate the crude materials used by Dr. Carver to some used in the classroom - old jars, blotters, pieces of metal. Emphasize the simplicity of Dr. Carver's laboratory and the inventiveness of his mind.

Observe an ant colony.

Children may become familiar with the name of Charles Henry Turner. His scientific discoveries about habits of crawfish, ant and honey bee are of interest to children and may be presented simply.

Dr. Charles Turner - His Study of the Ants

A man who has learned more about ants than anyone else is Dr. Charles Henry Turner. He studied animal life and especially the social life of the ant. Here is a short story about the ants Dr. Turner observed:

> Ants live in colonies or ant cities. They live in a community as we do. There is a queen ant who lays the eggs. There are nurse ants who take care of the baby ants. There are soldier ants who protect the "city". There are workers who do all of the work. In an ant community everyone has a job to do and cooperates with everyone else.

Crafts

Crayon pictures of John Henry and his hammer.

Paint pictures of the tunnel John Henry dug or the train which went through it.

Construct simple cabin such as the one Booker T. Washington was born in - windowless, floorless.

Dioramas of: an ant colony, the garden in Mrs. Bethune's college showing the various vegetables grown by the pupils of her school or of any of the other materials studied.

Music

Several instruments were brought to the New World by the Negro - banjo, marimba, drums, xylophones. Beautiful music was composed.

"Certainly, Lord"
"Climbing up Jacob's Ladder"
"Swing Low, Sweet Chariot"
"We Shall Overcome"

Playsongs are listed under Physical Activities.

Work songs:

Ballad of John Henry

Folk Songs: (Some of these are based on slave tunes or slave songs and have been modified from time to time).

Blue Tail Fly (Jimmie Crack Corn)
Kemo-Kimo
Buffalo Gals
The Grey Goose
Lullaby
Poor Boy
Shortnin' Bread

Audio-Visual Aids

Film Strip: "Life of George Washington Carver"
Tape: "John Henry and The Steam Drill" - from Tales From the Four Winds
Records: Y.P.F. "Let's All Join In"
F.C. 7752 "The Glory of Negro History"
F.C. 7406 "Follow the Sun", Charity Bailey

Illustrations for Bulletin Board

Dr. George Washington Carver
Mrs. Mary McLeod Bethune
Booker T. Washington
Dr. Charles Henry Turner
Benjamin Banneker
John Henry
Paul Laurence Dunbar
Phyllis Wheatley
Frederick Douglass
Carter G. Woodson

Reference Material for Teachers

Those listed in K-2 and the following:

"First Book of Negroes" - Langston Hughes
"John Henry and the Double Jointed Steel Drill" - Irwin Shapiro
"The Burl Ives Song Book" - Burl Ives
"Bronzeville Boys and Girls" - Gwendolyn Brooks

# GRADES 5-6

Several American Negroes for Study (See calendar, page 1)

**Language Arts:** Langston Hughes, Paul Lawrence Dunbar, Countee Cullen, Phyllis Wheatley, Gwendolyn Brooks, Arna Bontemps, Shirley Graham, Willard Motley.

**Social Studies:** Booker T. Washington, Mary McLeod Bethune, Harriet Tubman, Sojourner Truth, Frederick Douglass, Crispus Attucks, Banjamin Banneker, John Henry, Ralph Bunche, Carter G. Woodson, Paul Cuffe, Robert Smalls, William Carney, Henry Johnson, Matthew A. Henson, Robert Smalls.

**Science:** George Washington Carver (Chemurgy), Charles Henry Turner (marine-biology), Percy Julian (botany), William Hinton (bio-chemistry), Charles Drew (hematology), and Jan E. Matzeliger(invention), Daniel Hale Williams,surgery,

**Arts and Crafts:** George Washington Carver, Henry O. Tanner (painting), E. Simms Campbell (cartoons), Augusta Savage, Romare Bearden (sculptors).

**Physical Activities:** Jesse Owens, Althea Gibson, Jackie Robinson, Roy Campanella, Bill Robinson, Pearl Primus, Carmen deLavallade

**Music:** W. C. Handy, R. Nathaniel Dett, Harry I. Burleigh, William Grant Still (composers); Count Basie, Louis Armstrong, Duke Ellington (instrumentalists); Marian Anderson, Charity Bailey, Josh White, Odetta, Harry Bellafonte, Lena Horne, Ella Fitzgerald (vocalists)

**Theatre:** Sidney Poitier, Ossie Davis, Ruby Dee, Claudia McNeill, Paul Robeson, Ira Aldridge

**Implementing the approach:**

Pupils of grades 5 and 6 should know of individual lives and accomplishments of at least four or more persons from each field of endeavor. This can best be accomplished through research. The teacher may motivate pupils by asking any or all of the following questions:

1. Who was this person?
2. What was his background?
3. How did he receive his education?
4. For what is he famous?
5. What era of American History is represented by him?

The class will be able to discover the answers to these questions through committee work, individual reports, library assignments. Reports may be written or oral - committee or individual. Oral reports afford learning for the entire class and can be followed by discussion periods. Committee work affords the opportunity for group study of an area, each member reading books or sections of books about the contribution and life of one individual. Collating the work and orally presenting group findings assist in the development of cooperative habits and improved speech patterns.

Teachers may read summary stories from prededing sections as introductory material.

## Language Arts Activities

Committee reports on one field, ex: Science, Social Studies.
Individual reports.
Start picture file: daily papers, weekly Negro press, national magazines. (5x8 blank cards and a shoe box are suitable materials for beginning a file).
Original short stories.
Original poems.
Write to authors.
Book reviews.
At conclusion of unit, pupils may write composition describing personal reaction to study, or of own aspirations.
Choral speaking: selections from "Golden Slipper" are good.

**Grades 5-6 (Cont'd)**

Social Studies

Discussion of: pioneers in education: Booker T. Washington, Mary McLeod Bethune
" " pioneers in abolition movement: Frederick Douglass, Sojourner Truth
" " pioneers in recording of Negro history: Carter G. Woodson, Arma Bontemps, Shirley Graham, W.E.B. DeBois
" " pioneers in the westward movement: James Beckwith, Jean DeSaible
" " Military participation inall wars U. S. engaged in, heroes of

Science

Understandings to be developed:
Products of the peanut
Products of the sweet potato
Uses of the soy bean
Establishment of the Red CrossBlood Bank
Ant life in an ant colony

Crafts

Paint the Underground Railroad in action
Paint pictures of individual studied
Clay models of famous person at work
Clay model of John Henry's tunnel
Diorama of ant city
" " Dr. Carver's laboratory
" " garden at Bethune-Cookman College
Paint delivery of gunboat, "Planter", to Union lines during Civil War.

Physical Activities

Dances: May be taught or demonstrated
Cake walk
Charleston
Tap dance - "Dixie" - Physical Activities Book, pg. 152
Bunny hop
Fox-trot

Music

R. Nathaniel Dett, an editor of spirituals, wrote about Negro music:

The American Negro gave the world a great gift of his music. His great-great-grandfather came from West Africa. Over there every town had secret societies in which musicians were trained. They played music and kept repeating and singing their history. To this music they clicked their fingernails, stamped their feet or clapped their hands.

The types of music the American Negro is most famous for are: spirituals, work songs, play songs, blues, jazz. The spirituals were sung in the hope of freedom from slavery. The work songs were sung to keep time with the swinging of arms during work periods. The play songswere mainly danced and sung by children in the fields. Blues and then jazz grew out of the African beat and hope for freedom and finally, happiness.

Spirituals: "Let usBreak Bread Together" - Voices of the World, pg. 179
"Git on Board" - pg. 11
"I've Got a Robe" - Music Across the Country, pg. 134

"Certainly, Lord"
"Go Down, Moses"
"Climb Up Jacob's Ladder"
"Swing Low, Sweet Chariot"
Folk Songs: "Kemo-Kimo"
"Michael Row the Boat Ashore"
"Li'l Liza Jane"
"Buffalo Gals" (based on "Lulby Fan)
"Careless Love"

Songs of the Caribbean:
"Hold 'Em Joe"
" Caucaunne"
"Last Train to San Fernando"

Discuss: drum, banjo, marimba, xylophone, as instruments.

Audio-Visual Aids

Film strips: Life of George Washington Carver
Life of Booker T. Washington

Sound Films: George Washington Carver

Suggested List of Pertinent Books for Classroom or Outside Reading, Research, Committee Activities, Individual or Group Study, and for Reading to Children by Adults

Grades 5-6

Pupils may find these books at any of the Public Libraries:

| TITLE | AUTHOR | READING LEVEL |
|---|---|---|
| First Book of Negroes | Langston Hughes | 4-6 |
| First Book of Jazz | Langston Hughes | 4-6 |
| Famous American Negroes | Langston Hughes | 7 |
| A Pictorial History of the Negro in America | Langston Hughes | 5-6 |
| First Book of Rhythms | Langston Hughes | 4-6 |
| First Book of Africa | Langston Hughes | 4-6 |
| First Book of West Indies | Langston Hughes | 4-6 |
| Booker T. Washington | Shirley Graham | 5-6 |
| George Washington Carver | Shirley Graham | 5-6 |
| There Once was a Slave (Frederick Douglass) | Shirley Graham | 4-6 |
| DeSable, Jean Baptiste Pointe (discoverer of Chicago) | Shirley Graham | 6-7 |
| Your Most Humble Servant (Benjamin Banneker, Mathematician) | Shirley Graham | 5-6 |
| Count of Monte Cristo | Alexander Dumas | 7 |
| The Three Musketeers | Alexander Dumas | 7 |
| Story of the Negro | Arna W. Bontemps | 7 |
| Children of Haiti | Arna W. Bontemps | 7 |
| We Have Tomorrow | Arna W. Bontemps | 7 |
| George Washington Carver | T. A. White | 6 |
| Up From Slavery | Booker T. Washington | 6 |
| Story of George Washington Carver | F. C. Means | 5-6 |
| Cowtail, Switch and Other West African Stories | Harold Courlander | 5-6 |
| Child's Story of the Negro | Jane D. Shackelford | 3-6 |
| Mary McLeod Bethune | Catherine O. Pearee | 7 |
| Harriet Tubman | A. L. Petry | 7 |
| Freedom Train, The Story of Harriet Tubman | D. Sterling | 5-6 |
| It's Good To Be Alive | Roy Campanella | 7 |
| Ralph J. Bunche | Joseph A. Kugelmass | 6-7 |
| The Negro inSports | Edwin Henderson | 6 |
| Lives of GirlsWho Became Famous | Sarah K. Bolton | 6 |
| Lives of Poor Boys Who Became Famous | Sarah K. Bolton | 5-6 |
| Twenty Modern Americans | Alice C. Cooper | 6 |
| Famous American Poets | Laura Benet | |
| Our Negro Brother | Edith Mayer | 7 |
| Great American Negroes | Ben Albert Richardson | 5-6 |
| Marian Anderson, A Portrait | Kost Vehanen | 4-6 |
| Horn of Plenty - Louis Armstrong | Robert Coffin | |
| Paul Dunbar and His Song (Dunbar was a Poet) | Virginia Cunningham | 4-6 |
| Golden Slippers (Anthology of Negro Poetry) | Arna Bontemps | 5-8 |
| Bright April (Story of Negro Girl) | Marguerite DeAngeli | 4-6 |
| Call Me Charley (Negro boy in hostile community) | Jesse Jackson | 3-6 |
| Key Corner (Negro children in rural south) | Eva Knox Evans | 4-6 |
| Lad of Lima (Negro Saint) | Mary F. Windeatt | 5-7 |
| The Negro in American Life (brief text of Negro contributions) | John L. Becker | 5-7 |
| All Brave Sailors: The Story of the SS. Booker T. Washington (exciting high seas adventures) | John Beecher | 5-7 |
| The African Background | Carter G. Woodson | 6-7 |
| Negro Makers of History | Carter G. Woodson | 5-8 |
| Amos Fortune, Freeman | Elizabeth Yates | 5-8 |
| Complete Poems of Paul Laurence Dunbar | Paul Laurence Dunbar | 3-7 |
| Bronzeville Boys and Girls | Gwendolyn Brooks | 3 -6 |

# READING IN HIGH GEAR

## FACT SHEET

### 1. What is Reading in High Gear?

Reading in High Gear is a new program designed to teach culturally disadvantaged adolescents how to read. It is appropriate for use with dropouts and functionally illiterate adults in community-action programs being organized across the nation in conjunction with the War On Poverty and can also be used in a school setting with potential dropouts.

### 2. Who developed Reading in High Gear?

Reading in High Gear was developed by Dr. Myron Woolman, founder and director of the non-profit Institute of Educational Research, Inc. in Washington, D. C. A leading psychologist and learning theorist, Dr. Woolman has done extensive research in the application of programed instruction techniques to difficult learning problems in education, industry and for the Armed Forces.

### 3. Who is publishing it?

Science Research Associates, Inc., Chicago-based educational publishing firm.

### 4. How does the program work?

Reading in High Gear starts at the beginning of the learning-to-read process--with the introduction of the most common letter-sounds and the letter-shapes--and systematically introduces the student to each of the skills he will have to acquire if he is to be able to read effectively. Individual students entering the program may or may not have already acquired a degree of proficiency with one or more of these skills. They are, nevertheless, all required to begin at the beginning. This procedure will tend to fill in the voids that have been left by their previous learning experiences. After the student begins, he is encouraged to proceed on an individual basis, progressing at his own speed and relatively independent of others in the class.

(more)

FACT SHEET - 2

The program is based on the Progressive Choice Reading Method which utilizes several different techniques of programed instruction and elements of both the traditional (phonics) and newer (linguistic) methods of teaching reading.

Emphasis throughout Reading in High Gear is on hearing, speaking and understanding, as well as on the more common visual recognition skills.

Each student first learns to understand the meaning of the spoken word he will ultimately learn to read. He then learns to recognize the shapes and sounds of each of the elements in this word (e.g. letters, consonant compounds) and how these elements are used to form the word. Finally, the student learns to read the word in its printed form.

To accomplish this, Reading in High Gear approaches each new task on five related learning levels:

1. Audial meaning - The student learns to recognize the word(s) he will ultimately learn to read when he hears it spoken. He learns to say the word properly and to understand what it means.

2. Discrimination - The student is taught to recognize and print the shape of the particular letter being studied. The letter-shape being studied is always used in the word(s) introduced at the audial level. Later in the program when all letter-shapes have been learned, the same procedure is followed with whole words.

3. Identification - The student is taught to associate letter-shapes with their appropriate letter-sounds.

4. Compounding - The student learns to print and to sound the new letter-shape when it is compounded with letter-shapes he has previously learned.

5. Visual meaning - The student learns to read the word introduced at the audial meaning level and indicates by printed responses that he knows the meaning of the word.

Throughout the entire process, the student is actively participating and is not permitted to move on to the next step until he has demonstrated proficiency in the earlier one.

(more)

5. How does the program differ from other basic reading programs?

Reading in High Gear has been built specifically to meet the needs of students who, due to circumstance or lack of opportunity, have been unable to attain even a minimum level of reading proficiency in normal school programs. Even the stories, simple in construction, have been written to stimulate and interest the older student. Further, because culturally disadvantaged youth frequently develop anti-social attitudes, the story themes present positive ideas about life and suggest socially acceptable ways of operating effectively.

In addition, the comprehensive Instructor's Manuals that accompany the student materials make it possible for volunteer tutors and others without professional training to use the program effectively in community-action programs being set up across the nation as part of the War On Poverty.

6. Where has the program been used and how sucessful has it been?

Preliminary data from field test programs has been most encouraging. Because the program provides a high degree of motivation for the student by keeping him constantly involved in the learning process, students stick with it.

Studies in which Reading in High Gear is being used are currently underway in the Galena Park, Texas, public schools and in Washington, D. C., under the auspices of the United Planning Organization of Metropolitan Washington.

Earlier studies were conducted in New York City under the auspices of Mobilization for Youth; in Boston, Massachusetts under the auspices of Action for Boston Community Development, and in other communities in the Eastern United States.

In one area, the program has been used for approximately three months with 146 culturally disadvantaged junior high school students. At the beginning of the experiment, the average reading level of these students was at a fourth grade level. After an average time of 51 instructional hours per student, the average reading level jumped to a sixth grade level. A summary of results from this experiment are shown below:

| Gain in Years | Number of Students | Percent of Total Group |
|---|---|---|
| No gain | 8 | 5.5 |
| 0.0 - .49 | 19 | 13.1 |
| 0.5 - .99 | 37 | 25.3 |
| 1.0 - 1.49 | 32 | 21.9 |
| 1.5 - 1.99 | 26 | 17.8 |
| 2.0 - 2.49 | 14 | 9.6 |
| 2.5 - 2.99 | 7 | 4.8 |
| 3.0 - 3.49 | 3 | 2.0 |

(more)

## Cumulative Data on Experiment

81.4% showed gains of from 6 months to 3½ years

56.1% showed gains of more than 1 year

34.2% showed gains of more than 1½ years

16.4% showed gains of more than 2 years

6.8% showed gains of more than 2½ years

2.0% showed gains of more than 3 years

In all, 94.5% demonstrated some measurable gain after an average of 51 hours of study.

6. How long does it take for a student to complete the program?

Normal instructional time required for completing the program is from 150 to 300 hours of instruction.

7. What is Science Research Associates, Inc.?

Science Research Associates, Inc. has long been a pioneer in the development of modern curriculum and guidance materials for all grade levels. SRA's multilevel Reading Laboratory® series, introduced in 1957, is being used this year by more than 7,000,000 elementary and high school students across the country. Its modern mathematics, science, social studies and language arts materials are also widely used. In addition, the company is the largest commercial publisher of standardized tests in the United States, and is contract testing agency for the American College Testing Program, the National Merit Scholarship Corporation and the Betty Crocker "Search for the Homemaker of Tomorrow" scholarship program of the General Mills Corporation.

*Director, Institute of Educational Research*

S R A SCIENCE RESEARCH ASSOCIATES, INC.

READING IN HIGH GEAR
by Dr. Myron Woolman

The Accelerated Progressive Choice Reading Program for Culturally Disadvantaged Adolescents and Adults.

## I. Overview of the Program

READING IN HIGH GEAR has been developed specifically to provide instruction for culturally disadvantaged learners. It is essentially a language arts program for an older population of adolescents or adults. In a traditional school setting it might be labeled "remedial", since it would be used generally with students who have failed to learn to read through the usual instructional methods. In special programs for dropouts or functionally illiterate adults, it would probably be considered a "literacy" program. Because both academic and social rehabilitation are basic goals of the program, it may also be regarded as guidance material.

Based on the new Progressive Choice Reading Method, the program incorporates desirable principles of programed instruction, in that it keeps the student actively involved in the learning process and constantly aware of his progress.

Because it begins at the initial stages of the reading process, READING IN HIGH GEAR is suitable for use even with virtual non-readers. Students who complete the program should be able to function at approximately the eighth grade level in terms of word-attack skills. The materials provide for a very gradual progression through basic reading skills and permit the learner to move at his own rate with relative independence. Normal instructional time required for completing the program is from 150 to 300 hours.

In addition to the programing of basic reading and writing skills, the author has also used story themes designed to effect desirable changes in students' attitudes and healthier social orientation.

Because the program is designed to serve populations both in and out of the school situation, instructor's manuals provide step-by-step procedures, specifying what both the instructor and student should do at every point in the program. Thus the program can be taught effectively even by instructors who are not professionally trained.

Owing to the dissimilarity of the progressive choice technique to other methods of reading instruction, it is not practical to assign grade-level equivalents to the three cycles.

It should be noted that students using READING IN HIGH GEAR will generally have had spotty records of achievement in reading, with significant deficiencies at most achievement levels. Consequently, it is advisable that students enter the program only at the beginning and be allowed to progress as rapidly as possible. This procedure will tend to fill in the voids that have been left by their previous learning experiences.

## II. Content of the Program

The total program is divided into three major cycles and each cycle is subdivided into segments.

Cycle I is a carefully organized presentation of each letter of the alphabet except Q, printed in upper case only, with a single sound assigned to each letter. As students progress through the series of letters, they learn to compound new sounds with those learned previously. Compounds may take the form of actual words or nonsense syllables.

Four student workbooks and two instructor's manuals comprise the first cycle.

Cycle II introduces lower-case counterparts of upper-case letters learned in Cycle I, as well as phonetically consistent vowel and consonant compounds such as oa, ea, au, th, ch, wh and sh. The final e and its function of changing the internal vowel to a long sound is also presented, and students learn the names of the letters.

Two student workbooks and one instructor's manual comprise the second cycle.

Cycle III introduces the variant sounds of consonants, vowels and compounds. At this point students practice alphabetizing and using the dictionary. They also learn to write and read cursive writing.

Throughout the program, words are presented at the "audial level" and meaning is firmly established. The learner is then required to analyze the component elements or compounds, reproduce the sounds accurately, print the symbols and, finally, to handle words effectively at the "visual meaning level". As he becomes familiar with the sounds of elements and compounds, he learns to "generalize" and add new words to his vocabulary.

As learners complete Cycle I they may qualify as student instructors to assist other learners at lower levels. This status factor provides additional motivation, lightens the load of the instructor and contributes to the positive dynamics of the classroom.

## III. The Author

READING IN HIGH GEAR has been developed by Dr. Myron Woolman of the Institute of Educational Research in Washington, D. C. Dr. Woolman is an extremely competent, creative and practical psychologist whose interest in learning theory led him to the development of his Progressive Choice Learning Method on which this program is based. He has adapted the method to a number of different learning systems that have proved most effective.

## IV. Relevant field-test Experience

The Accelerated Progressive Choice Reading Program, on which READING IN HIGH GEAR is based, is currently being field-tested with approximately 150 culturally disadvantaged junior high school students. The six classes range in size from twenty to twenty-nine. Teachers, who did not have previous experience with the program, received a brief orientation program by Woolman's staff.

At the end of the fall semester, students had received approximately 50 hours of instruction. Teachers and administrators were very enthusiastic about the program, and their comments and observations were quite encouraging. Although no definitive data are available at this time, the following are highlights from information obtained at mid-year.

1. Teachers observed that their students were more actively involved and more productive in their reading classes than in reading classes using other materials.

2. Teachers reported that students' attitudes toward reading had improved considerably, and that they had no difficulty holding their attention for periods up to an hour.

3. Other subject-matter teachers of pupils using these materials have noticed an improvement in attitude among some of the students using the program.

4. The reported decline in truancy and absenteeism among students using the program tends to support the teachers' observations.

5. Teachers feel confident that subsequent testing will reveal dramatic gains in reading skills.

6. Teachers also feel that they had been able to implement the program effectively without extensive orientation and in-service training.

V. The following factors are among the advantages of the program for the particular population for whom it has been designed.

1. Relevance to Target Population: READING IN HIGH GEAR is not a "warmed over" product originally designed for a different population. It was developed specifically for the culturally deprived adolescent of the dropout vintage in school or out. Although not aimed directly toward the adult functional illiterate, READING IN HIGH GEAR comes closer to fulfilling the needs of that population than any product currently on the market.

2. Ease of Administration: Many of the special programs for older culturally disadvantaged learners will be staffed by untrained volunteers. For this reason, the Office of Education's special task force indicated in their specifications for materials intended for this group that they include highly detailed guides for instructors. The instructor's handbook accompanying READING IN HIGH GEAR gives step-by-step procedures for administering the program so that it can be taught by untrained instructors.

3. Motivation: Preliminary feedback from experimental programs indicates that reading material based on the Progressive Choice Method has high intrinsic motivation. This is attested to both by the extent to which culturally deprived students stick with it and also the very low dropout rate among students using the method.

4. Small Learning Increments: The materials have been carefully programed in a rigorous skill sequence so that small learning increments are presented to the student in readily digestible units.

5. Ideal Grade-Level Coverage: Although designed for the older culturally disadvantaged learner, READING IN HIGH GEAR makes no assumptions regarding previous reading achievement and therefore starts at the very beginning of the learning-to-read process. Furthermore, it extends upward to the eighth grade reading level, somewhat above the minimum for so-called functional literacy.

6. Diversified Response Requirements: Active learning frequently requires that the learner do something, i.e., that he makes a response. Consistently throughout the READING IN HIGH GEAR program the learner is actively engaged in the learning process through a wide variety of response requirements.

7. Knowledge of Results: An important source of motivation and reinforcement for learning stems from knowledge of the correctness or incorrectness of responses made during the learning act. READING IN HIGH GEAR provides for this type of feedback both through the instructor and through more advanced helping students. The individualized nature of the program requires the students to do considerable independent work, thus freeing the instructor to roam about the classroom and supply this knowledge of results. This also permits more instructor-pupil interaction than more traditional programed instruction.

8. Auditory Discrimination Ability Refined: Proficiency in auditory discrimination correlates very highly with success in beginning reading. Built into the READING IN HIGH GEAR program is the constant requirement to hear and reproduce correctly the spoken form of each word prior to learning to recognize it in print.

9. Visual Discrimination Ability Refined: Many students encounter immediate difficulty in learning to read by the whole-word approach because of the special skill in visual discrimination which that method requires. Woolman's program gives very special attention not only to the visual discrimination of whole word forms, but also to letters and the component elements of letters. This is accomplished through matching exercises, tracing, and unaided writing activities.

10. Motor Reinforcement of Perceptual Learning: Generally, printed word forms are better retained in memory if perceptual learning is accompanied by some motor act such as writing or tracing. Both are provided in READING IN HIGH GEAR.

11. Provision for Incidental Learning of Spelling: Because writing is required to reinforce word-perception ability, students using READING IN HIGH GEAR develop their spelling ability as a subsidiary concomitant to learning to read.

12. Development of Vocabulary Precision: The incidental development of greater precision in knowledge of word meanings is provided for in READING IN HIGH GEAR because the meaning(s) of all words are carefully developed at the auditory level before a student is required to learn its printed form. Also, special vocabulary exercises are included after reasonable word-recognition ability has been developed.

13. Emphasis on Reading Comprehension: Reading for meaning is emphasized throughout the READING IN HIGH GEAR program. Exercises in comprehending facts or in reading critically are frequently combined with vocabulary development by requiring the student to determine word meanings from their use in context.

14. Progress in Learning is Insured: In many reading programs it is too easy for a student to fail to progress and for his failure to go unnoticed until it reaches crisis proportions. In the READING IN HIGH GEAR program this is practically impossible, since learners progress only on the basis of demonstrated proficiency. This is accomplished through evaluation devices that are built into the materials.

15. Provision for Individual Differences: Within each segment of each cycle, suggestions are given to the instructor to be followed in those instances in which students fail to learn from the initial instruction. This provision for the special needs of less able students allows the instructor to provide for individual differences within a class. Also, because students work essentially independently, instruction is highly individualized and each student may work at his own speed.

16. Step-by-step Presentation of New Learning Elements: Too frequently a beginning reader is overwhelmed because too many new elements are presented to him to be learned simultaneously. In the READING IN HIGH GEAR program, however, a learner is required to master only one new learning element at a time. And, as was indicated previously, mastery is required before a student is permitted to progress to a new learning element. This prevents failure from becoming cumulative.

17. Upper-Case/Lower-Case Type Confusion Minimized: When new readers are required simultaneously to learn to recognize both upper- and lower-case type, there is likely to be confusion. Woolman solves this problem by introducing upper-case type first, since the student must also write them and upper case is easier to reproduce (though lower-case type is easier to recognize). When the student has mastered the recognition and reproduction of upper-case type, lower-case is presented.

18. Presentation of Irregular Words Delayed: One very significant cause of initial reading difficulties is the lack of consistency with which various English speech sounds are written. In regard to this problem, Woolman has delayed the presentation of ambiguous graphemes until reasonable mastery of regular sound-symbol relationships has been achieved. (This is also a feature of the new linguistics approach to teaching beginning reading.)

19. Letter Naming is Delayed: If students are required to learn both the sound values of letters and their names, they are likely in some cases to make confused responses. This, in turn, may result in the rather inefficient spelling approach to word recognition. For this reason, Woolman has delayed teaching letter names until their sound values have been learned. When letter names are finally introduced, they are taught functionally in connection with the learning of alphabetizing, dictionary skills, etc.

20. Maximum Discriminability Among Learning Units: One major source of confusion at the initial stages of learning to read is the requirement to discriminate between two learning elements that are very similar (e.g., "an" and "on"). In Woolman's Progressive Choice Learning Method each successive unit to be learned is as dissimilar as possible from the one preceding it.

21. Increased Social Status Awarded for Advanced Students: Students who have a history of failure in learning to read are likely to seek socially unacceptable means of achieving status - within the classroom or outside. In READING IN HIGH GEAR the author has made provisions for students who have advanced into Cycle II to function part time as student assistants. In this capacity they help less advanced students, providing certain of the feedback regarding the correctness or incorrectness of their responses. This technique allows the advancing student to achieve classroom status with his peers in this helping capacity. It also lessens the instructor's load in attempting to give individual attention to students. The assistance given by the helping students is specifically defined and definitely limited.

22. Attitude Changes Programed into the Materials: Very frequently, culturally disadvantaged underachievers develop anti-social attitudes. Recognizing this tendency, Woolman has attempted to engineer his story themes in a sequence moving from hostile aggression to a Robin Hood-like reaction to the "power structure" and ultimately to socially acceptable ways of operating effectively in life adjustment.

23. Built-In Teacher Training Program: As was mentioned previously, many instructors in special programs for dropouts and functionally illiterate adults have not had training in education. Because of this, programed training has been provided for the instructor in the manual in order to raise his level of understanding of the principles involved in teaching reading according to the Progressive Choice Method. This programed in-service training technique is especially valuable because it parallels the instructor's actual use of the method. Further, the specific, step-by-step instructions given for the administration of the program translate these educational principles into their practical application.

24. Special Classroom Facilities Not Required: Because many literacy or basic education programs are not administered by regular school systems, the usual physical facilities and teaching aids are not available. For this reason, READING IN HIGH GEAR has been designed so that it can be used in community centers, YMCA's, church basements, or other unconventional teaching settings.

## VI. Price Information

The following prices have been established for the developmental edition of READING IN HIGH GEAR. These prices should be regarded as tentative. Pricing of the final edition may be modified somewhat.

| | | | |
|---|---|---|---|
| 5-1316 | Student Books (Consumable) - Complete Set | | $ 8.50 |
| 5-1313 | Cycle #1 | $4.25 | |
| 5-1314 | Cycle #2 | $3.00 | |
| 5-1315 | Cycle #3 | $3.25 | |
| 5-1318 | Instructor's Manuals (non-consumable) - Complete Set | | $15.00 |
| 5-1317 | Cycle #1 | $8.00 | |
| 5-1309 | Cycle #2 | $4.00 | |
| 5-1312 | Cycle #3 | $4.00 | |
| 5-1325 | Review Set (includes 1 copy of each student book and each Instructor's Manual) | | $22.50 |

Dear Parents:

Your child receives a poorer education than most white children in this city because he is black. He has fewer books, older schools and less prepared teachers, all of which add to the disadvantage he has because of prejudice against him.

On May 18, as part of the demonstration to demand good schooling for our children, many Negro parents with their children plan to "study-in" in a high quality white school. We ask you to join them.

This will give you a chance to see what is being kept from your child and show that we demand that all New York children receive a decent education before it is too late.

If you wish to join other parents and their children on May 18 in the "study-in" please call the March For Democratic Schools to sign up.

Transportation will be provided and the superintendent of schools has promised your child will be welcomed, placed in a class, and provided with lunch.

Yours for Freedom,

Frederick D. Jones

Dear Friend:

Once more, I want to express to you my personal gratitude, and that of the entire civil-rights movement, for your leadership and participation in the historic March on Washington last August 28th. It was truly a great day for all of us, for freedom, and for America! Without your help, it would not have been possible.

Standing before the Lincoln Memorial, we all vowed that we would not rest until racial justice and equality had become a reality in our country.

I write to you today in the midst of another major crisis in this cause. We need your help, and we need it as a witness to the seriousness of the pledge that we made to each other in Washington to work for racial justice in America.

On Monday, May 18th, there will be a massive MARCH FOR DEMOCRATIC SCHOOLS in New York. The culmination of this demonstration will be a rally at City Hall at 4PM, to put before the Governor, the Mayor and the educational authorities in New York our demand for continuous, round-the-clock negotiations to achieve integrated, quality education for all of New York's school children.

We want to show the city and the country, on May 18th, that neither P. A. T. nor other, similar groups speak for the citizens of New York. We want as large a turn-out of Negro, Puerto Rican, and white citizens as possible. We want every

448

CHECKS TOWARD THE EXPENSES OF THIS PROJECT SHOULD BE DRAWN TO "MARCH FOR DEMOCRATIC SCHOOLS"

man, woman, and child who believes in justice and equality to give us his help at City Hall on Monday, May 18th, at 4PM. James Farmer of CORE, A. Philip Randolph, and Roy Wilkins of the NAACP will speak. There will be other prominent speakers and entertainers, such as Ruby Dee, James Baldwin, and many others.

May I ask you to: Be there on May 18th, and meanwhile get on the telephone to every friend and acquaintance and every Washington marcher that you know, and urge them to join us at the MARCH FOR DEMOCRATIC SCHOOLS. Talk to your organizations, your churches, your unions, your clubs, and bring them, too.

I'll see you at 4PM next Monday at City Hall -- and I expect to see you in the biggest demonstration we have ever had in New York.

Cordially,

Bayard Rustin

Bayard Rustin

P. S. Call me at the number given above if you need leaflets, posters, or other material for the MARCH.

will be coming in to look at our files

Dear Miss Sachs:

There has been much publicity and an endless number of articles in the professional journals regarding mathematics reform in the secondary schools. Mathematics educators have carried on lively discussions about the content of these new programs, but have complacently ignored, or rationalized, the fact that only a small minority of student have been affected by these reforms.

As one part of a doctoral dissertation on some historical aspects of mathematics education in the U.S., I have been investigating the mathematics curriculum of high school in the big metropolitan area. The existing general inequalities of education will no doubt be reflected in the mathematics curriculum.

I have found that up to 1954 the great majority of students in the nation's secondary schools had never gone beyond some rehashed course in arithmetic. If this is still true then the leaders of

mathematics education have ignored the most significant problems. It is my hope that this study will foster a greater interest in bringing quality mathematics education to all students.

I would appreciate your help in the following:

1. Contact with one or two high school mathematics departments in the Harlem or Bedford Stuyvesant areas for the purpose of administering the enclosed questionnaire.

2. Information regarding critical studies of education in the N.Y.C. area. Those factors which affect the general character of the educational system certainly affect mathematics education. The Public Education Association report: "Reorganizing Secondary Education," is an example of such a study. I am interested in studies of the vocational school, testing, etc - the many administrative devices which tend to deprive students of a quality education.

I know how the civil rights struggle absorbs all your time, but I hope you will consider this project worthy of your assistance. If possible, I would appreciate discussing some of these problems with you.

Sincerely yours,

Joseph Fishman

JUN 8 1964

230 Thompson Street
New York 12, New York

Dear

Enclosed is a questionnaire which I hope will elicit the information needed to evaluate the present position of the mathematics curriculum in your school. Several other high schools in the New York City, Westchester, Long Island, Connecticut area are providing similar data. Of course the study will not identify any particular school. In addition to this empirical investigation, data will be sought from the U. S. and State Departments of Education and other important sources.

This is one part of a study which seeks to evaluate the effectiveness of the present mathematics reforms in respect to its correcting the inadequacies of past practices in mathematics education. The study is particularly concerned with the quality of mathematics education provided the non-college bound student; the percentage of students enrolled in such courses as general mathematics, commercial mathematics, etc., and the extent to which the content of these courses has changed.

The statistical information is important. The study is concerned with the trends in the percentages of students taking courses in mathematics. (A study made in 1954 indicated that in the previous three decades there was a decrease in the enrollment of students in academic mathematics courses and an increase in enrollments in the general mathematics courses. New York State at that time reported that 11.4 per cent of high school students had taken plane geometry and 9 per cent had taken intermediate algebra.)

It would be appreciated if you would send me the information regarding the description of your school immediately, and I hope that you will have time to fully answer the rest of the questionnaire by early June.

At your request, I will be glad to forward to you a summary of my findings.

Thank you.

Yours truly,

Joseph Fishman

# MATHEMATICS CURRICULUM QUESTIONNAIRE

A. Describe the school. (Name; address; the number of students; the economic, cultural, racial background of the students; the primary academic and/or vocational aims of the school, etc.)

B. What changes in the mathematics curriculum have taken place in the last ten years?

1. For the college-bound student.
   a. In respect to the number of courses offered.
   b. In respect to the content of the courses. (Please forward the courses of study and titles of texts for each course.)
   c. In respect to the percentage of students taking the various courses. (If you do not have specific data for each of these years, please provide as close an estimate as possible.)
   d. In respect to any special programs for these students (track system, honor classes, clubs, program help classes, etc.)
   e. In respect to the general scope (content and years) of mathematics education.

Refer to enclosed form. I will calculate percentages.

2. For the non-college bound student.
   Apply the same criteria as the above (a-e).

3. To what extent do students change from non-academic to academic programs?

c. To what extent has the mathematics reform programs affected the curriculum?

1. The use of materials published by S.M.S.G., U.I.C.S.M., C.E.E.B., The Advanced Placement Program or any other reform programs.

2. The use of texts which are based on these programs.

3. The percentage of students in classes using these materials.

# SOME SIGNIFICANT ASPECTS OF THE TEACHER PERSONNEL, PUPIL PERSONNEL AND VOCATIONAL PROGRAMS OF THE GRAND RAPIDS PUBLIC SCHOOLS

A Report Of The

Education and Recreation Committee

To The

Grand Rapids Human Relations Commission

June, 1962

## PREFACE

The purpose of this Report is to acquaint the Grand Rapids Human Relations Commission with a number of significant aspects of the Pupil Personnel, Teacher Personnel and Vocational Programs of the Grand Rapids Public Schools.

The Education Committee held a series of carefully planned meetings with Mr. Raymond Boozer, Director of Teacher Personnel and with Mr. Donald Fink, Director of Pupil Personnel and Mr. Bernard Kennedy, Director of Vocational Education to assemble the material contained in this report.

We hope the report will serve to clarify many questions relative to these programs of the Board of Education and that it will enable us to recognize more fully some of the problems faced by school administrators.

SPECIAL EDUCATION COMMITTEE MEETING WITH MR. DONALD FINK,
PUPIL PERSONNEL DIRECTOR OF THE BOARD OF EDUCATION

TUESDAY, JANUARY 23, 1962

AGENDA

I. Who are our counsellors? How are they selected? What is their background and training? What is the pupil-counsellor ratio? Is the number of counsellors adequate?

II. What is the division of counselling time with respect to subject matter covered in interviews? (academic - behavior - personal problems, etc.) Is there adequate time for counselling?

III. Is it a function of the counsellor to advise students about scholarships, colleges, etc.? Negro students complain that counsellors do not have information about Negro colleges. Is this a valid complaint? There are also complaints that counsellors often do not recommend subjects related to the selected career of the student. In general, are counsellors able to correctly inform students on subjects related to their chosen career? Do counsellors ever advise a student to drop out of school?

IV. How is it determined which students should be advised to go to college, and who determines this? Is there race and/or class distinction? Is it determined by apparent ability to finance college study, or by some other criteria?

V. Do those who are responsible for counselling work with agencies, organizations, or civic groups (Urban League, labor unions, MESC, etc.) to determine latest information on occupational opportunities, status of merit employment, new counselling information, etc.? Is adequate attention given to new trends in labor needs, overcrowded professions, or other current considerations? What contacts do counselors or those responsible for counselling have with apprentice programs and apprentice groups? What information is given on apprenticeships?

VI. What are national standards in counselling? How do we compare with the national standards?

# PUPIL PERSONNEL PROGRAM

1) Mr. Fink distributed to all members of the Committee a list of all personnel serving as counsellors in the Grand Rapids public schools. (see attached list). He pointed out that the pupil counsellor ratio is 396 pupils to (1) counsellor in grades 10 through 12. Mr. Fink also stated that there are full time counsellors in all of our high schools, but in the Junior College all counsellors also have teaching responsibilities. According to Mr. Fink, the number of counsellors is inadequate, but this is due to a budgetary problem. He further stated that more counsellors alone will not solve all the problems. In the Junior High Schools the pupil-counsellor ratio is more than 500 pupils to (1) counsellor. This weakness is recognized by the Board of Education.

2) Mr. Fink stated that each pupil in all High Schools is limited to one-half hour per school year of counselling time.

3) Mr. Fink stated that all counsellors have had graduate training and are experts on school curricula and available subjects. Negro colleges are not recommended to Negro students because often, these schools are inferior to others and because of the easy availability of the colleges in Michigan. The source work, "College Entrance Counsellor", which is used by all counsellors, contains all colleges in the United States that are either "approved" or "accredited". Mr. Fink stated that counsellors never advise students to drop out of school. However, students often drop out of school without notifying the school officials. (Union High School has a higher drop-out rate than South High School).

4) The counsellors in the school system have all been cautioned to treat the students with potential college ability as if theywere going to college. Because of the increasingly high college entrance requirements, the colleges themselves are determining who goes to college rather than the student, counsellor, or other factors.

5) Mr. Fink and his counsellors do work with referral agencies. He mentioned the Family Service Agency and the Child Guidance Clinic. They also work very closely with MESC on employment trends. A great deal of material is sent to the schools by MESC but due to a time problem, much of this material is not read. Mr. Fink suggested that we contact Mr. Bernie Kennedy in order to get specific information relativeto the school apprenticeship program. He did not feel competent to discuss this program in detail. He did state, however, that this was an important school area of responsibility and that he recognized the problems in relation to Negroes inherent in this program.

6) Michigan does not require State certification for school counsellors. In Grand Rapids, 15 semester hours on the graduate level in counselling and guidance is required of all applicants for appointment as a school counsellor. Teacher training precedes counsellor training and all counsellors in Grand Rapids have taught school for at least three years. There are 27 counsellors including Junior College in Grand Rapids. We are attempting to build the best counselling program in this part of the country. Our educational counselling program is very adequate. Our vocational counselling program needs improvement and efforts are being made to do this. Personal counselling is not adequate, but some attention is given to it.

BOARD OF EDUCATION
COUNSELLORS FOR THE 1961-62 SCHOOL YEAR

| | | Years Teaching Exp. |
|---|---|---|
| Central | I-Mr. Wesley Perrin - Head Counsellor | 6½ |
| | I-Miss Lucille Meyering | 30½ |
| | Mr. Albert Ritsema | 5½ |
| Creston | Mr.Lowell McDougal - Hd.Counsellor | 34½ |
| | I-Mr. Donald Black | 8½ |
| | Mr. David Hager | 1½ |
| | Mr. Richard Janke | 1½ |
| Ottawa | I-Mr.Robert VanderMolen Hd.Counsellor | 10½ |

SPECIAL EDUCATION COMMITTEE MEETING WITH MR. RAYMOND BOOZER,
TEACHER PERSONNEL DIRECTOR OF THE BOARD OF EDUCATION

WEDNESDAY, DECEMBER 13, 1961

AGENDA

I. What special problems do you have in recruiting teachers for the Grand Rapids school system? Which, if any, of these problems are related to the $4400 starting salary?

II. Do you have difficulty in finding teachers who are willing or who are qualified to take assignments in the so-called "problem schools"? Is this related to our starting salary or are other factors involved?

III. In what areas of the country and at what schools do you concentrate your recruiting efforts?

IV. What is the policy and what are the practices of your department in hiring graduates of Calvin and Aquinas Colleges?

V. We note that progress has been made in the assignment of non-white teachers to Junior and Senior High Schools where there is small or no non-white enrollment. However, 37 of the 38 non-white elementary teachers are assigned to schools with more than 70% non-white enrollment. Why does this pattern of assignment prevail? Does it affect your hiring policy?

## TEACHER PERSONNEL PROGRAM

1) Mr. Boozer reported that 1155 prospective teachers were interviewed for the 1961-62 academic year. Of this number, 150 were hired. 15 were non-white. Mr. Boozer stated that there was a critical need for qualified elementary school teachers. He also stated that the Grand Rapids public schools cannot use applicants who major in non-teachable subjects. He stated that the $4400 starting salary in Grand Rapids for new teachers is not a deterrent for attracting good applicants. Grand Rapids does not compete for teachers with large metropolitan communities like Detroit and Chicago. The Grand Rapids starting salary is adequate for the competition in western Michigan.

2) Mr. Boozer pointed out that the objective in the Grand Rapids public schools is not only to attract qualified new teachers, but also to retain them in the system for a long period of time. With this in mind, the Board of Education has put the emphasis on raising the maximum * salary for each classification rather than raising the minimum salary. For a B.A. degree, the maximum salary is $7,150 annually. For teachers who have a Masters degree, the maximum salary at the present time is $7,450 annually. New teachers are expensive the first year. They need the assistance of visiting teachers and often, in addition, they need consultation on their day to day classroom problems. No assignments are given at interview time to attract candidates even though elementary teachers are needed. Mr. Boozer stated very candidly that because of this policy, we often lose good elementary teachers to nearby areas. Problem schools according to Mr. Boozer, are extremely difficult to staff, but this is not due to race.

E.G.: The Coldbrook school incident which was widely publicized is harmful to recruiting efforts in Grand Rapids.

Because of transportation problems, teachers sometimes request an assignment in the general area of their residence. Recruiting is done between February 1 and May 1 of each year; assignments are made in late July or early August. There is a big personnel turnover in fields which attract women:

E.G.: Home Economics, Physical Education and English.

* The salary schedule for all degree classifications was amended upward by the Grand Rapids Board of Education on Monday, March 12, 1962.

Mr. Boozer stated that there is a dire need for strong teachers in our Junior High School program. We need people dedicated to this age level rather than people accepting Junior High assignments while waiting for a Senior High School vacancy. Assignments are made on the basis of interest and general qualifications of the applicant, while at the same time recognizing the needs of each school and each community.

3) Thirty-five (35) different colleges and universities in the States of Michigan, Wisconsin, Minnesota, Indiana, Illinois, Ohio and Kentucky, are canvassed annually. Interviews of prospective candidates are held on the college campus for prospective teachers out of the state. Of the 150 teachers who were hired in the 1961-62 academic year, 39 states are represented.

4) The policy relative to graduates of Calvin and Aquinas Colleges is the same as that for other colleges and universities. No preference is shown by the Board of Education. In the 1961-62 academic year, 17 Calvin graduates and 13 Aquinas graduates were hired. Graduates of these two schools go to the Board of Education for interviews. Mr. Boozer does not go to the campus of these schools to seek applicants. This is due to the respect of the Board of Education for the teaching needs of parochial schools.

5) Last year there was a Negro teacher in every High School including Creston and Union High. Two Negro teachers resigned at the end of August for personal reasons. The major problem in recruitment of non-white teachers is the fact that Mr. Boozer and Dr. Pylman do not see enough qualified non-white teachers during the recruiting period. The better non-white applicants for teaching positions are people who come to the Board of Education on their own, seeking positions. In the 1961-62 academic year, 15 Negro teachers were hired.

"We place individual teachers where they have the potential for doing the most good for the boys and girls in our Grand Rapids schools. In doing this, we take into consideration a person's academic preparation, his personality, his professional training and his preference for an assignment. This preference would include the grade or subject area and socio-economic type community to which he is best prepared. Obviously, race per se has no bearing on assignment consideration. The assignment with the greatest potential for the boys and girls and for the individual himself is the prime consideration."

Mr. Boozer stated further:
"We presently have non-white teachers in buildings which draw from almost exclusively white neighborhoods."

In respect to the initial assignment of beginning teachers, Mr. Boozer stated:

> "We do attempt to give a choice as to grade level and geographical preference. In our appointment letters we do not specify a particular building or grade assignment except late in the recruiting season when we would hire a person to replace a late resignation."

Mr. Boozer emphasized the fact that a white or non-white teacher would not be assigned into a building in which he would not have the opportunity to achieve his greatest potential.

6) The administrators of the Board of Education are anxious to be cooperative with the HRC and they welcome periodic meetings and conferences with them relative to the schools. A discussion relative to the counselling program in the public schools was lengthy and very revealing. Mr. Boozer suggested that an early meeting with Mr. Donald Fink to discuss this concern was desirable. Mr. Boozer denied emphatically the allegation that a large number of southern white teachers are being recruited. He stated that only two teachers from the South (Kentucky) were hired in the 1961-62 academic year. Both of these teachers were non-white.

SPECIAL EDUCATION COMMITTEE MEETING WITH MR. BERNARD KENNEDY,
DIRECTOR OF VOCATIONAL EDUCATION OF THE BOARD OF EDUCATION

WEDNESDAY, JUNE 6, 1962

AGENDA

I. How many students are currently involved in vocational programs?

II. At what age or grade level can students enter the vocational program?

III. Are all students eligible? If not, how are they selected?

IV. What kinds of training are available?

V. What part do the employers play in the selection of students for placement?

VI. Are non-public schools involved in the program?

VII. Negro students often have problems in finding employment. Are any special efforts made on behalf of Negro students?

VIII. If a potential employer says "we will not take Negro students", what does the coordinator do?

IX. Are there any trends in training toward new occupations, skills and industries?

X. Are records kept which indicate how many students stay with the placement or field of work?

XI. Many people have indicated a need for re-establishing a vocational school in this community. Would you care to comment on this?

XII. Do you feel that the vocational training program comes under the jurisdiction of the F.E.P.C. law? Can a student-worker, refused employment because of race or creed, file an F.E.P. claim?

## VOCATIONAL PROGRAM

1) Mr. Kennedy differentiated between the Vocational Program and the Apprenticeship Program of the Board of Education. The Apprenticeship Program is only one of the many vocational programs sponsored by the Board of Education. He also explained that all shop classes are not vocational courses and cited the Board of Education's broad industrial arts program as an example.

   a. Industrial Arts Program
   There are 3,657 students enrolled. The program provides exploratory experiences in different areas and is not considered to be vocational as its purpose is not the development of salable work skills.

   b. Cooperative Training Program
   There are 260 students enrolled. Students attend school part time and work part time.

   c. Trade Opportunity and Trade Preparatory Programs
   There are 110 students enrolled.

   d. Junior College Technical Program
   There are 256 students enrolled.

   e. Apprenticeship Program
   There are 360 students enrolled. High school graduation as well as certain course requirements are mandatory for admission to this program.

   f. Evening Vocational Program
   There are 562 adults enrolled. The total number in the numerous vocational programs operated by the Board of Education is 1,548.

2) The trade preparatory program is for 11th and 12th graders and because of prerequisite courses few exceptions can be made. There are no grade restrictions on the trade opportunity program. The cooperative training program is designed for 12th graders but exceptions are made when circumstances seem to justify them. There are no grade or age restrictions on the other programs.

3) The trade opportunity program provides training for slow learners and for students who have had poor scholastic records. Students enrolling in the trade preparatory

courses must have shown aptitude and interest in the area and be recommended by their industrial arts instructor. Cooperative training students must be enrolled in the proper related courses and work on a supervised part time job.

4) Trade Opportunity Courses: Machine Shop, Shoe Repair
Trade Preparatory Courses: Electricity, Furniture Technology, Machine Shop, Printing
Cooperative Occupational Training: Distributive Education, Office Occupations, Trade and Industrial Occupations
J.C. Technical Programs: Electronic Technology, Mechanical Technology, Practical Nursing
Adult Program: Wide range of different courses

5) "Application for apprenticeship training may be made to an employer direct, to the local labor union in the trade selected for a career, to a local joint apprenticeship committee or to the local state employment service office."[1]

Applications are carefully screened and only the most qualified are accepted. Training is available in tool and die making, electricity, etc. Salary scale is from $2.50 to $3.20 per hour. This rate increases when the apprentice becomes a journeyman. Standards are established by the Local Bureau of Federal Apprenticeships. There are two (2) Negroes currently enrolled in the program serving their probationary period. Few Negroes have applied for admission to the program. In the co-op program employers request students for job openings. The faculty sends three or four applicants. The employers make the final selection.

6) Non-public school students are eligible for the day vocational program. However, very few are enrolled because of their own school schedules. In the adult evening vocational program everyone is eligible after payment of a nominal fee.

7) No special efforts are made on behalf of Negro students because preferential treatment would be unfair to white students.

8) The position of the program coordinator is to send several qualified applicants when jobs are available. The final decision is left to the employer.

[1] Apprentice Training - U.S. Department of Labor - 1959, p.8.

9) Mr. Kennedy and his staff work with the Employer's Association and Chamber of Commerce Committees to determine any new trends in training requirements. They are also working with the Michigan Employment Security Commission Office in determining ways of implementing training programs for the Manpower Development and Training Act of 1962.

10. No accurate records have been kept, but an attempt will be made to maintain records in the future for students who do not go to college. This is done now for students who do go to college.

11. Research indicates that the trend in the United States is toward comprehensive high schools rather than separate schools for academic and vocational training. Most educators feel that it is unwise and unnecessary to separate high school students because their life's goals are not the same. In answer to a question concerning the closing of Davis Vocational and Technical High School, the following statistics were presented.

    1. Davis Tech enrollment was steadily declining
       1941-42 - - 924 students (Highest in last 8 years)
       1942-43 - - 872 students
       1943-44 - - 734 students (Lowest enrollment in city)
       a. Ottawa Hills High School had the next lowest enrollment with 1269 students (about 172% of Tech's enrollment)

    2. Total Davis Tech enrollment approximately 700 students
       Approx. 200 students in vocational & technical programs
       Approx. 500 students in academic programs
       b. Only 2/7 of student body were enrolled in vocational and technical courses.

    3. Very high operating cost per pupil at Davis Tech
       Average yearly cost per pupil at Tech - $148.39
       c. Central High School had the next highest yearly per capita cost of $ 95.00 (about 64% of Tech's cost)

    4. As students came to Tech from all sections of the city, they could be housed very easily in their area high schools.

    5. A good vocational program could be provided for more Grand Rapids students by inaugurating adequate and certified vocational courses in our other five high schools.

12) Mr. Kennedy was unable to respond to this question. Mr. William Layton, Regional Director of the Michigan Fair Employment Practices Commission was interrogated on this matter and he stated categorically that the vocational programs are covered by the Fair Employment Practice Law. (Act 251 - Public Acts of 1955).

# INTRODUCTION

The Detroit Board of Education, desirous of having Detroit schools provide educational opportunities equally for all pupils, regardless of race, color, or creed, has stated on several occasions over the past years that this policy should govern the organization, operation, and provision of facilities of the school system. More than two years ago it established a Citizens Advisory Committee on Equal Educational Opportunities to recommend ways in which the Detroit school system could achieve greater equality of educational opportunity for all.

The Committee in its examination expressed various concerns touching many parts of the complex school system which enrolls approximately 290,000 pupils. These concerns resulted in 187 recommendations which dealt with the instructional program, the organization of the schools, school personnel, school relationships, and the school plant.

The Board of Education, upon receipt of the report in March 1962, studied and discussed it, and within three months took the following action:

| | |
|---|---|
| Recommendations approved without change | 140 |
| Recommendations amended and approved | 22 |
| Recommendations deferred pending further study | 25 |
| Recommendations disapproved | 0 |
| Total | 187 |

The Superintendent has prepared for the Board of Education this report so that the 16,000 employees of the school system and the community may have a comprehensive, yet compact, view of the major concerns of the Committee and what is being done within the school system to move forward in carrying out the recommendations.

Rather than report at this time in detail on each of the 187 individual recommendations, we have tried to highlight seven areas which we believe are of high priority to the Committee. On these we have noted what is being done or is planned in 1962-63. The report thus considers the following major areas of Committee concern:

A. That educational offerings be available equally to all and equivalent in standards of quality.

B. That recruitment, hiring, assignment, and advancement must comply with fair employment practices, and in turn provide throughout the city a school staff, equivalent in quality and sensitive to the needs of each neighborhood.

C. That school organization and administration should assert and demonstrate that equal opportunities shall be provided to all pupils and

shall aid all to gain experiences with others beyond their immediate neighborhood, social, racial, and economic background.

D. That school building facilities, equipment, and supplies be augmented and be made available equally for all children.

E. That there should be more effective communication and understanding between the community and the school system staff, and among the members of the school staff.

F. That there is the need to establish and expand programs to compensate for the handicaps in learning due to physical, mental, economic, or cultural handicaps.

G. That research, experimentation, and evaluation be continued and be encouraged to improve all aspects of the school system operations.

The Board of Education, the Committee on Equal Educational Opportunities, and the school system administration are all seeking to meet these needs. They recognize that some changes are necessary to accomplish these objectives. They recognize that educational changes take time. They also recognize the urgency in large cities today for immediate and continuous progress toward providing equal educational opportunities for all. This report indicates steps taken and planned to enable the Detroit school system to affect to a greater degree the welfare of the city in a constructive and positive manner.

The sections below indicate for each of the seven committee concerns and needs: (1) specific school programs and provisions to attain the objective; (2) reference to the Equal Educational Opportunities recommendations which deal with these concerns; and (3) notations as to whether the provisions are in operation, are to be expanded, or are to be started in 1962-63, or if additional funds are needed to institute or expand the program. Your questions and suggestions are invited.

## APPENDIX

**Special Notation to Equal Educational Opportunity Committee Members:**

This is a brief outline of the Detroit School System program to respond to the dramatic challenges of these times as presented by your Committee. Most of the parts of this Program are now and have been under way for some little while. What the Detroit School System is doing in response to the Report of the EEO Committee has by necessity been presented in rather compact form. There are two specifics, however, emphasized as being indicative of the Board's attitude:

*First.*—The Board of Education is reporting back to you and seeking your counsel — not three years after the Report was submitted — but five months after the Report reached Board and Staff.

*Second.*—The following statement of the Superintendent on Non-Discrimation in the Schools is being distributed to all school personnel and is being publicized throughout the Community:

"DETROIT PUBLIC SCHOOLS

"Statement Concerning Non-Discrimination in Schools

"The Board of Education has completed a careful consideration of and taken action on the Report and Recommendations of the Citizens Advisory Committee on Equal Educational Opportunities in the Detroit Public Schools.

"The actions taken by the Board of Education reaffirm the belief and commitment of the Board that the citizens of Detroit want the opportunities of free public education to be made available equally to all children of the city. The actions further reiterate the adherence of the Board of Education, the Superintendent of Schools, and the staff of the Detroit Public School System to these principles, and to the desire to seek their fulfillment in practice:

"1. That all children shall be provided equal educational opportunities throughout the school system, regardless of their race, creed, color, or country of national origin.

"2. That all children shall have the opportunity to participate in any program offered as part of the curriculum of the Detroit Public Schools, regardless of their race, creed, color, or country of national origin.

"3. That all employees of the school system shall have equal opportunities for employment, assignment, and advancement without reference to race, creed, color, or country of national origin.

"Printed copies of the Report and Recommendations of this Committee on Equal Educational Opportunities, together with the materials presented by the school staff for Board consideration and the action of the Board on each recommendation, are being made available to all school employees. It is expected that these materials will be read by school employees, and they are commended for reading by all Detroit citizens.

"Understanding of these materials and cooperative endeavor of school employees and citizens of the community to carry out the adopted recommendations is necessary in order that steady progress continues to be made toward realizing full equality of educational opportunity for all Detroit children.

"S. M. Brownell
*Superintendent of Schools*"

This Statement accurately reflects the Board of Education convictions and it states the position of the Detroit Public School System.

The Board, in presenting this report, seeks your reactions and ideas, for by frank and friendly exchange of ideas the School System will improve and our community remain strong.

SUBJECT: **Progress in Reading**

FROM : Superintendent of Schools

TO : All Principals

DATE : August 21, 1962

Educational research stresses the strong relationship that exists between the ability to read well and success in school.

Recognizing this fact, we propose that during the school year 1962-63 special emphasis be placed on the reading program. Each principal, as the educational leader of his school, is expected to develop with his staff a program to strengthen the reading work now being carried on in his school. This will involve:

a. An appraisal of reading progress in the school:

b. An analysis of any shortcomings:

c. Development of a plan that you propose to take within your school to improve reading:

d. Reporting of this plan to the Superintendent not later than December 1, 1962.

I will welcome suggestions from you as to steps and measures that central administration should take to further progress in your school in reading improvement. In June of 1963 we will ask for a progress report for the year.

Our recent experience with the parent-teacher conference has indicated that through the collective efforts of our staff we have made considerable progress in that area. We feel confident that this can and needs to be done in the field of reading as well. This request is not the result of dissatisfaction with the work of our staff but is based upon the concern that all of us have for a better educational program. I feel certain that our total educational staff with its professional zeal and know-how can effectively raise the educational level of all children in our community.

## Letter Concerning Position on Non-Discrimination

Dear _____:

The Detroit Public School System appreciates the value of its cooperative relationship in educational programs with many firms and agencies. It assumes that as one of the organizations or agencies with whom a cooperative relationship exists you are aware that Detroit Public Schools have a policy that all educational opportunities shall be available equally to qualified pupils, regardless of race, color, or creed.

To avoid any misunderstanding the Board of Education has approved the sending of a letter to all concerns with whom it operates on a cooperative basis calling attention to the Board of Education all inclusive policy of non-discrimination. This policy would require withdrawal of the Detroit Schools from any program in cooperation with any government agency, any employer, any union, or any other group in which there was discrimination because of race, color, or creed.

We are asking you to provide the enclosed statement as a record of our mutual understanding. We would appreciate it being completed and returned to the office of the Superintendent of Schools, 5057 Woodward Ave., Detroit 2, Michigan, at your earliest convenience.

Thank you for the opportunity to cooperate with you in an educational program which we hope is of mutual value to all concerned.

Sincerely,

## Certificate of Non-Discriminatory Practice

To:
Detroit Public Schools
Schools Center
5057 Woodward Avenue
Detroit 2, Michigan

We, the undersigned, as President, or Secretary of

_____, hereby certify that

the _____ does not discriminate

on the basis of race, color, creed, or country of national origin in the conduct of any program in which we may be in any way engaged in cooperation with the Detroit Public School System.

SUBJECT: **Assignment of Student Teachers**

FROM : S. M. Brownell

DATE : August 16, 1962

Dear _____:

Since 1959 it has been the practice of the Detroit School System to assign student teachers to schools in all parts of the City. We have found this practice desirable both for our pupils and your student teachers.

Please notify your staff and student body of this policy. We shall be glad to cooperate with the personnel of your college to see that student teachers have experiences which give them rich preparation for later teaching. We wish to have schools throughout the city benefit from the contributions made by your student body.

Sincerely,

## Proposed Plan for Coordinating Relationships and Activities between the Board of Education, the United Community Services, and the City of Detroit

**WHY?**

Several citizens committees in Detroit have stressed the need for greater coordination among the various agencies or departments of the City of Detroit, the Board of Education, and the United Community Services. This need has also been apparent to staff members of the above three bodies for some time. The challenge facing a large city today, plus the pending state and national legislation, fortifies even more the need for closer planning and coordination.

**PROPOSAL:**

It is proposed that the Mayor, Superintendent of Schools and the Director of United Community Services each appoint a representative from their respective staffs (someone who reports and is responsible to the chief executive officer of each body) and that these three act as a clearing and coordinating group—in an advisory capacity only for those agencies reporting directly to the Mayor, the Superintendent of Schools, or related to the Director of United Community Services. This committee of three is an *expediting* and not *decision-making* body. When issues involving these three bodies cannot be resolved at department levels, they will be referred to the committee of three who will in turn make recommendations to their respective heads.

**PURPOSE:**

1. To eliminate duplication in activities;
2. To avoid conflicting operations;
3. To make certain that the various activities in the above three divisions are in keeping with the over-all objectives of the three groups;
4. To exchange research and relevant data; and
5. To facilitate each other's activities by adapting existing policy to the needs of other agencies.

**HOW WILL THIS COUNCIL OF THREE FUNCTION:**

1. The three will meet regularly and exchange data on those aspects carried on or planned by each of the agencies which may involve or affect the other two.
2. The three will compile a roster of personnel and activities involved currently in inter-related committees, studies, etc., and attempt to coordinate these as well as to recommend to the Mayor, the Superintendent of Schools, or the Director of United Community Services better utilization of our respective manpower.

3. As new committees or proposals for studies, etc., are established which may affect the other two groups, all will be apprised of these plans so that cooperative efforts could be completed rather than each group going off in its own direction, often duplicating the other's activities.

4. When matters arise where prevailing machinery and procedures seem to block the resolution of problems arising, this group will consider ways and means to facilitate progress.

SUBJECT: **Need for Inter-group Relations Education**

FROM : S. M. Brownell

DATE : August 16, 1962

Dear_____:

The Detroit Board of Education has recently received a report from the Citizens Advisory Committee on Equal Educational Opportunities, appointed by the Board over two years ago. This committee stresses the need for greater emphasis at the college and university level upon inter-group relations. Our citizens believe that the teacher training curricula should include courses which provide future teachers and school administrators with a better understanding and greater sensitivity to human and inter-group relations.

I have been authorized by the Board of Education to transmit this recommendation to you. Cognizance of this recommendation may help to justify your existing program in the field of inter-group relations or it may lead to greater emphasis in this area.

Thank you for your cooperation.

Sincerely,

APPROVED BY THE DETROIT BOARD OF EDUCATION
December 18, 1962

SUBJECT: The Treatment of Minorities

FROM : Superintendent S. M. Brownell

TO : Members of the Board of Education

DATE : December 18, 1962

To the Board of Education:

I recommend that the Board adopt the following as a statement of policy, and that copies be sent to all schools and departments, the Curriculum Council, committees for selection of books and other instructional materials, publishers of school books, and to producers of other instructional materials.

The Treatment of Minorities in Textbooks and Other Instructional Materials

The Detroit Board of Education is committed to a policy of having the schools contribute in maximum degree to understanding and good will among different racial, religious, and nationality groups.

Criticisms have come to this Board to the effect that some textbooks in use today do not present a balanced and satisfactory picture of all groups in American life. This condition prevents all children from acquiring an adequate understanding of America's growth and development. Progress has been noted in this regard in recent years, but the progress is small and much yet remains to be done. Investigation by staff members of the Board of Education tends to support the need for textbooks and other instructional materials that portray American life in a more adequate manner.

The Detroit Board of Education is directing its textbook selection committees and committees for the review of audio-visual aids to make sure that all textbooks, supplementary books, library books, and audio-visual aids are consistent with the human relations policy of the schools and that these materials do contribute significantly to understanding and good will among different racial, religious, and nationality groups. The content, the illustrations, and the general tone of all instructional materials to be used in the Detroit schools should be such as to constitute fair treatment for all groups in our society.

The Detroit Board of Education calls upon publishers of books used in schools and the makers of audio-visual and other instructional materials to recognize this concern as they revise or develop books and materials. The Board reaffirms its position that materials purchased for use in the Detroit schools shall be consistent with its stated objectives and policies with regard to fair and adequate treatment of all groups in the American culture.

# THE HUMAN RELATIONS PROGRAM

# of the

# DETROIT PUBLIC SCHOOLS

September, 1963

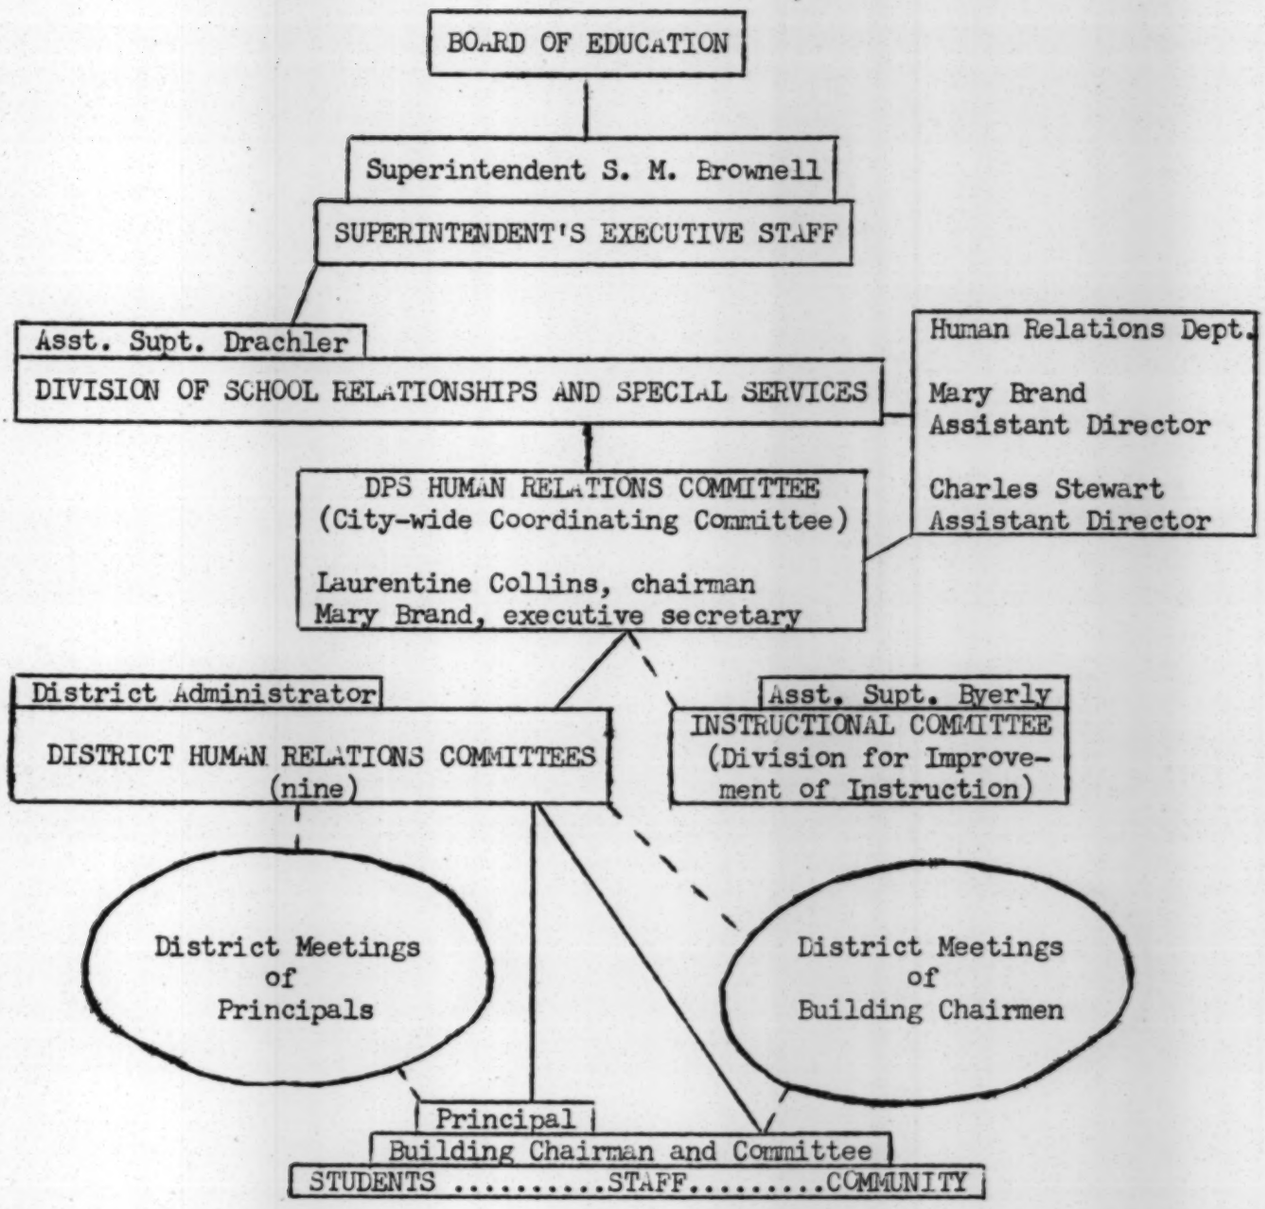
Following is an outline of the structure and organization of the Detroit Public Schools Human Relations Program as it began operating September, 1961. This material supersedes that published on pages 14-19 of THE HUMAN TOUCH.

Changes are a result of several recommendations made by the Citizens' Advisory Committee on School Needs and others made by participants in the Human Relations Workshop held in the summer of 1960. These recommendations were studied and discussed by the Coordinating Committee, the Superintendent's Executive Staff and other responsible persons before action was taken.

It is hoped that the new structure will facilitate the work of the human relations program and will intensify our efforts to provide education in democratic living for our boys and girls.

STRUCTURE - HUMAN RELATIONS PROGRAM

Detroit Public Schools
1963-64



# ORGANIZATION AND FUNCTION

Each of the groups and individuals listed on the previous page has a specific role to play in the Human Relations Program of the Detroit Public Schools. These roles are, of course, related and interdependent, since it is through the cooperative efforts of many persons that a program of this nature is able to function effectively.

## BOARD OF EDUCATION

The Board of Education provides a framework of policy under which the human relations program operates, as well as the necessary personnel and facilities. Members of the Detroit Board of Education have demonstrated their concern for the program through their official actions and through their activities as individuals.

Officially, the Board has made a number of significant policy statements and has approved or accepted several administrative reports and publications which reflect the goals of the program. Examples of such action may be found in the official Board Proceedings, the CAC Report, the Administrative Handbook, The Human Touch and other publications.

Individual members of the Board have often participated in the activities of the program.

## SUPERINTENDENT OF SCHOOLS

The Superintendent, as the executive officer of the Board of Education, gives support and leadership to the human relations program. He appoints the chairman and several members of the Coordinating Committee, attends many functions sponsored by this committee and lends the support of the schools to programs of other community agencies which have similar objectives and interests.

## SUPERINTENDENT'S EXECUTIVE STAFF

Under the leadership of Superintendent Brownell, the Executive Staff reviews progress in human relations education as in all other areas of the school program. Reports of activities and recommendations regarding policy are usually channelled through this group to the Board of Education and to the various schools and departments.

## DIVISION OF SCHOOL RELATIONSHIPS AND SPECIAL SERVICES

The Division of School Relationships and Special Services has been given the responsibility for the general supervision of the human relations program. The chairman and executive secretary of the Coordinating Committee are members of this division and thus can work closely with related departments to develop a pervasive human relations emphasis in our schools.

## COORDINATING COMMITTEE

The Detroit Public Schools Coordinating Committee on Human Relations functions as the coordinating agency for all of the officially designated human relations committees within the school system. It meets monthly to review progress, assess problems, share information and supervise the planning of city-wide activities such as the annual October Workshop and the March Institute.

Membership on the Coordinating Committee consists of nine principals and nine teachers representing the nine administrative districts, one representative from the Division of Improvement of Instruction, one district administrator and five members-at-large appointed by the Superintendent to represent various other departments. The chairman is appointed by the Superintendent from the Division of School Relationships and Special Services and the staff person assigned to this division for work with the human relations program serves as executive secretary of the committee.

The Coordinating Committee is a member agency of the Coordinating Council on Human Relations which is sponsored by the City of Detroit Commission on Community Relations. This creates a close relationship between the schools and other social agencies concerned with intergroup relations.

## INSTRUCTIONAL COMMITTEE

The Instructional Committee is composed of representatives from several of the departments of the Division for Improvement of Instruction and serves as a human relations committee within that division. This committee is primarily concerned with the curriculum and instructional materials. Members help in the selection of appropriate and representative books, preview newly produced audio-visual materials, prepare bibliographies and work with teachers and principals to develop good human relations through the various subject matter fields.

## DISTRICT ADMINISTRATORS

The district administrator, as the chief administrator of the district, has the responsibility for the functioning of the human relations program within his district. He provides leadership and guidance to the schools of the district and to the human relations committee in solving problems and in planning a program of human relations education for both teachers and students. He usually serves as an ex-officio member of the human relations committee.

## DISTRICT HUMAN RELATIONS COMMITTEES

Each of the nine administrative districts has a human relations committee to plan and coordinate the human relations program within that district. The structure and operating procedures of these nine committees vary from district to district, since each was organized to meet the individual needs of the area it serves. Each district committee, however, is represented on the Coordinating Committee by both a teacher and a principal.

The district committee plans at least one district-wide human relations activity each year. It also schedules and plans regular meetings of building chairmen and serves as a two-way channel of communication between the city-wide Coordinating Committee and the schools of the district.

## THE SCHOOL PRINCIPAL

The principal is responsible for the organization and function of the individual school human relations program.

In his role of professional leadership, the principal stimulates interest in human relations education, encourages attendance at activities sponsored by the program, examines the curriculum and teaching methods for human relations implications, gives democratic guidance to the school human relations committee and helps to create a school climate where both teachers and students can function most effectively.

In his role of community leadership, the school principal interprets the goals of the human relations program to the community, encourages parent-group participation in the program, assesses community sensitivities and works toward the democratic solution of school and community problems.

### District Meetings of Principals

In each district, principals regularly attend administrative meetings which are scheduled by the district administrator. At these meetings, the principal representative to the Coordinating Committee will often report on the activities of the human relations program and will channel information through the principals to the schools in the district.

## THE BUILDING CHAIRMAN AND THE SCHOOL COMMITTEE

Most principals prefer to delegate some of their responsibility for the human relations program to the building chairman and the school human relations committee.

The Detroit Plan calls for a human relations teacher/chairman in each school building. The chairman may be elected, appointed by the principal or selected on a volunteer basis, but it is important that he be a person with leadership ability who is known and accepted by the school staff and who has a sincere interest in the human relations program.

The building chairman works with the principal and the school human relations committee to identify and solve human relations problems, to develop a human relations emphasis in the curriculum and to provide experiences for the staff and student body which will increase understanding. He is the official school representative at district and city-wide human relations meetings and serves as a valuable communications channel by reporting back to the total staff.

District Meetings of Building Chairmen

The human relations committee of each district plans for regular meetings of building chairmen. In some districts, these are held monthly; in others, every other month or several times a year.

At these meetings, the building chairman receives orientation to the needs of the human relations program and to current problems and progress. He becomes acquainted with literature, materials and techniques which will help him function in his leadership role. These meetings also serve as an important channel of communication in the human relations program.

It is important that the building chairman either attend or be represented at every meeting and that information received be shared with the staff.

STUDENTS, STAFF AND COMMUNITY

Within each individual school community, as well as in the city as a whole, there are many agencies, both governmental and social, concerned with the development of a more democratic society. These groups offer valuable assistance to the human relations program through the provision of speakers, literature, audio-visual aids and consultant services.

Support for the objectives of our program is also often found in individuals within the community - the local businessman or labor leader, the professional person, the religious leader, a member of the parent group. These persons can be very helpful in the solution of school and community problems.

Many teachers who have no official ties with the formal human relations program do an excellent job of promoting good human relations in their classrooms and in their contacts with other teachers and the community. The non-teaching staff also plays an important role in the development of a school climate in which good human relations is a key factor. The total school staff functions as a team in this area as in all others.

Most high schools, many junior high schools and some elementaries have organized student human relations clubs. Other schools have student councils or similar groups which also function to promote good human relations. Young people, on the whole, are highly receptive to the ideals of the human relations program and are often very helpful in finding the solution to a local school or community problem.

The entire program of human relations education in the Detroit Public Schools is geared to the improvement of educational opportunities for the boys and girls of our city. The program is effective only when its values, goals and activities extend into the daily classroom experience of our students.

# the urban school

## summer evening classes for high school students

*An opportunity for young people to:*
*Improve Study Skills in English, Science, Mathematics, Social Problems*
*Meet and Work With Good Teachers*
*Get to Know and Work with Students of Different Races and Backgrounds*

*June 30 — August 13, 1964*
*Tuesday, Wednesday and Thursday*
*Evenings, 6:00 - 8:30 P.M.*

*The Urban School*
*151 Commonwealth Ave., Boston, Mass.*

# "what is the urban school?"

The Urban School was formed to give high school students from the "inner city" of Boston and the "outer city" of Boston suburbs a chance to meet and learn together in a stimulating, educational and intellectual climate. It will use a pleasant, well equipped school building (The Commonwealth School), for this meaningful activity.

Through imaginative classes, taught by excellent teachers who love their profession, it will enrich the lives of its students, increase their educational skills, and sharpen their awareness of the realities of American life.

The Negro student from Roxbury or the South End needs to feel that he can receive what society offers and that he can contribute the best which is in him. This means an education which can give him **skills** to run a power lathe, operate a computer, write a good business letter or be a doctor. This means **ideas** about himself and about society. This means the **spirit** to fight for what he knows is right.

The white student from other parts of Boston and its suburbs needs to supplement his education with a realistic knowledge of urban life. This means learning more about: the process of social change, the problems of minorities, and a better understanding of other young people from different backgrounds.

These skills and values are not fully taught and understood by our public and private schools. The Urban School feels that it can play a useful role in education and in living by providing them to eager young people who seek to learn more and grow into productive maturity.

# what will young people learn at the urban school?

At The Urban School Summer Evening Program boys and girls of high school age will work with teachers who can reach out in imaginative ways to reveal new dimensions to their subjects.

Not only will teachers use the classrooms to ignite new and deeper interest in learning, but the Arts Festival on the Common and the symphony concerts on the Esplanade. And they will use the concrete world of poverty and discrimination — only half a mile away — because education is what one sees with one's own eyes as well as what one reads in books.

**Classes**

1. **English** — The main emphasis will be on reading and writing — to increase efficiency and deepen comprehension. Remedial work on a tutorial basis will also be offered.

2. **Social Problems** — Issues of urban life, social change and the role of the Negro in American history will be stressed. Most of the writing in English classes will use this as a base. Speakers prominent in city life will be invited weekly to talk on politics, housing, economic development and other relevant issues.

3. **Mathematics and Science** — The imaginative handling of mathematical and scientific problems will be stressed. Tutoring in the basic skills of mathematics will be offered.

# who is eligible to study at the urban school?

Boys and girls of high school age, residing in the Greater Boston area, are eligible to enroll for the Summer Evening Program at The Urban School. We ask only for a reasonable intelligence, a desire to learn and a willingness to get along with other people.

The student who wants to get the depth of understanding and skill which he doesn't get in his regular school, or who is hampered in getting better grades because of reading or writing problems, or wants to sharpen his knowledge before entering college or post-high school technical school, will find that The Urban School can help him achieve these goals.

Classes will be held from June 30 to August 13, 1964.

Class evenings will be Tuesdays, Wednesdays, Thursdays, from 6:00 P.M. to 8:30 P.M.

**Remember: You can hold a job during the daytime and still take advantage of The Urban School program by attending classes for three evenings during the week.**

The fee is $5.00 for the entire program. This includes two dollars for registration and three dollars for snacks.

**Application Procedures:** To apply for The Urban School Summer Evening Program, just fill out the application form on the next page, detach it from this folder and mail it to us. Postage is prepaid. We will then contact you for an interview with school officials.

file NORM

TWIN CITIES CHAPTER

of

CONGRESS ON RACIAL EQUALITY

February 19, 1964

For the purpose of these discussions and negotiations the Minneapolis Board of Education and its Administration is not asked to find nor admit discrimination, however the materials which are presented disclose a very serious situation which should be resolved at this meeting.

It is this organizations belief that over a period of years a pattern evolved which allowed 'something to go wrong' in the evaluations of Negro applicants. As indicated in a previous statement: The first stage in ascertaining the validity of the accusations against the Minneapolis School Board was for CORE to evaluate the material assembled by the Executive Secretary of the Minneapolis FEPC. The data presented here is evidence that was in existence at the time Mrs. Annie McNair, Mrs. Artis Hopkins and Mrs. Marjorie Owens made their complaints in April 1963. These facts were brought out at various times during the four lengthy public hearings. While it is impossible to supply you with all the information collected from the personnel files by the FEPC, members of the Board are urged to immediately secure the files referred to and read all material in context.

It is requested that:

- Mrs. Annie McNair receive a contract for the 1964-65 school year,
- Mrs. Artis Hopkins be assigned approximately 45 substitute teaching days, during February, March, April

and May of 1964 and receive a contract for the 1964-65 school year,

- Mrs. Marjorie Owens receive a long call substitute assignment for the remainder of the school year, and be provided helping teachers, and be given a contract for 1964-65.
- Mutually satisfactory procedures shall be arrived at for the evaluations and ratings of these teachers during their probationary period.

These requests are made in an effort to terminate a mutually undesirable situation.

SUMMARY OF QUALIFICATIONS OF MRS. MCNAIR AND SELECTED COMPARISON

OF WHITE TEACHERS WHO RECEIVED CONTRACTS TO TEACH BASIC BUSINESS

Mrs. Annie McNair, Age 28

Scholastic Attainment: A B.S. in Business Education and a minor in Elementary Education, 1956. A Master's Degree in Secondary Education in 1958.

Minnesota Certification: Certified to teach Business subjects in grades 7-12.

Grade average: 2.77

Practice Teaching Ratings: Average to above average.

Past Teaching Experience: 1 year of High School - General Business.

Ratings from Past Teaching Experience:

Personal qualifications - above average
Instructional ability - In this area received two superior ratings in 1) Planning of classroom activities and 2) Organization of classroom activities.
Professional attitudes and competence - above average.

Ratings by Minneapolis Interviewing Committee:
Received an A rating by both interviewers who commented as follows:

Dr. Roessel: (1) "A real lady, poised and fine appearance. Very pleasant voice and mannerisms with slight but pleasant accent. Quoted psychological principles and they were well applied. Accepted in this area. Is substitute teaching. This enriches one experience. Seems to be a highly intelligent person. Spoke of going on for a doctorate in her area.

Mrs. McNair was quite nervous during the interview but made in general a very favorable impression. She seemed highly motivated in a desirable way.

I WOULD ENJOY HAVING HER ON MY STAFF."

Dr. M. Nelson (2) "Poised even though tense and nervous. Well groomed. 'A real lady.' Intriguing dialect. Excellent voice and diction. She h a s learned her psychology well asn showed good understanding of the problem of individual differences.

Plans to work toward a doctorate. Has a real purpose in life.

Mrs. McNair is a serious minded dedicated person. She wants to teach. I feel she would be an asset to our schools."

Both interviewers recommended that the "applicant be placed on the eligibility list for a position in the Minneapolis Schools. I would be glad to have this candidate placed in my building or department in case a suitable vacancy should exist." And gave her an overall rating of A. Mrs. McNair applied for a teaching position on December 16, 1961.

December 18- filled out substitute form.

January 23, 1962 - Interview with Personel Directop who rated her satisfactory.

March 5 - was placed on the substitute list.

April 17 - Interviewed by the Committee.

April 24 - Recieved eligibility letter which states she will be on the list of qualified candidates for three years. She has never been notified that her name has been removed.

April to June - Filled many short call assignments. Although there are no evaluations of these assignments, her performance must have been satisfactory since she was asked to take a difficult long call assignment for the fall.

August 29 - Assigned long call to Edison High to teach five classes of Basic Business.

December 3 - Interviewed by Assistant Director of Personnel who gave her a B rating and commented: "Would like regular teaching next year. Impressive, poised person - seems able to assess her qualifications without bias. I hope there will be work for her, either substitute or regular."

January, February and March, 1963 - Mrs. McNair continued to ask for a contract. On April 3 she filed a complaint with the FEPC. On April 5 she received her first evaluation from Minneapolis public schools. The principal stated, "Should not be used as a substitute in Minneapolis schools. Doubt whether she is strong enough for Minneapolis schools."

Comparison A, Age 45

Scholastic Attainment: Eveleth Junior College two years, 1935. Attended University of Minn. 1962-63, No evidence of degree.

Minnesota Certification: None.

Grade Average: 2.44

Practice Teaching Ratings: Above average.

Past Teaching Experience: None

Professional Attitudes and Competence - Not rated.

Ratings by Minneapolis Interviewing Committee: Received B+ rating by one and a B by the other.

Comparison A submitted her application on March 25, 1963. Noted on applications she expected to get degree in August 1963. On June 25, 1963 she received a contract for $4900.

Comparison B Age 47

Scholastic Attainment: B.S. in Business from St. Theresa College, Winona, Minnesota 1940.

Grade Average: 2.77

COMPARISON B (cont.)

Practice Teaching Rating: Average.

Past Teaching Experience: None. Worked one month as Census taker in 1960. 1960-62 worked part time at Donaldson's mail order desk.

This person was hired as a substitute with no teaching experience.

and a gap of 22 years from graduation to teaching employment.

Ratings by Interviewing Committee:
Recieved a B rating by one and a C rating from the other.

Comparison B submitted her application in April 1962. On April 19 she was sent a letter saying her name was not being placed on the eligibility list. On April 25 she came in to see the Personnel Director and he accepted her for substitute teaching. On June 7, 1963, recieved a contract for $5100.

COMPARISON C

Scholastic Attainment: B.S. in Business from the University of Minnesota in 1962. No minor.

Grade Average: 2.63 (two failures, five withdrawals and two incompletes.)

Practice Teaching Ratings: Excellent.

Past Teaching Experience: None.

Ratings by past employers: None.

Ratings by Minneapolis Interviewing Committee: Received one B+ two B's and two B-.

Applied for teaching position in March, 1963. August 7, 1963 was sent a contract for $4900.

COMPARISON D

Scholastic Attainment: B.S. in Business from Macalester in 1961.

Grade Average: 3.08

Practice Teaching Ratings: None.

Past Teaching Experience: None.

Ratings by past employers: None.

Ratings by Minneapolis Interviewing Committee: Recieved two A's, one B and one C.

Comments by the interviewers:

"Good prospect after she has had some training.... No teaching minor but willing to teach in Junior High."

Applied for teaching position in April while a student at Macalester. June 21, 1961, sent contract for $4500. July 21, 1961 certified to teach Business subjects. August 4, 1961, recieved B.S. from Macalester. Jan. 1962 - resigned. May 10, 1962 - wrote letter asking to come back in fall. June 15, 1962, sent contract for $4700. September 13, 1962 - Resigned.

QUESTIONS AND OBSERVATIONS

1. Do the qualifications of the above comparisons represent "the best qualified person available to fill the position?"

2. Since Mrs. McNair was on the eligibility list, why wasn't she given a contract in filling the position at Edison?"

3. Why was this difficult assignment left on a long call basis rather than a regular position?

The Director of Personel has stated that "she did teach a subject where more students with learning difficulties are normally assigned."

On January 9, 1963 the principal visited Mrs. McNair's

Basic Business class which he taught. He then stated, "I do not know whether I have accomplished anything or not. Let's face it, you cannot motivate some of them. I feel the class was more responsive to your teaching than to mine."

4. The principal stated that he "did not plan to continue with five classes of Basic Business assigned to one teacher next year." and that "she (Mrs. McNair) might have been a better teacher in another situation."

Why wasn't her teaching of April, May and June of 1962 evaluated against this unusual assignment where Mrs. McNair had to contenc with adverse factors, such as:

a) class and pupil overload
b) pupils with disciplinary problems assigned to her when other teachers would not cope with them. (These pupils were later expelled)
c) inadequate physical facilities - crowded classroom, not enough text books, etc.

5. Why was there no written evaluation of her work by her work by her principal until after she filed with the FEPC?

6. Have other candidates been removed from the three-year eligibility list when highly recommended by individuals such as Drs. Nelson and Roessel?

7. Will the Board assemble a complete list of the qualifications of each individual (by code identification) hired under contract in Business Education from August 1961 through August 1963? Taking Mrs. McNair into consideration, this will permit the Board to determine whether the most qualified candidates have been given contracts.

SUMMARY OF QUALIFICATIONS OF MRS. HOPKINS AND SELECTED COMPARISONS OF TEACHERS WHO ARE WHITE WHO RECIEVED CONTRACTS TO TEACH PHYSICAL EDUCATION

Mrs. Hopkins first appealed to the President's Committee on Equal Opportunity, Washington D.C. Her husband is in the United States Air Force. Her appeal to the President's Committee was for the removal of a derogatory reference which was submitted by an unauthorized person. The secretary to a Superintendent, whose name Mrs. Hopkins gave as a referent, intercepted the reference request from the Minneapolis personnel office and wrote a vindictive bigoted leter. Mrs. Hopkins felt that once this reference was removed she would be considered for a regular teaching position.

On February 27, 1963, the President's Committee, in referring the matter to the Minneapolis FEPC, said that it was "a question of rectifying a false and degrading reference," and that, in the Committee's opinion, the local agency could resolve the matter without formal or extensive proceedings.

When the FEPC Executive Director conferred with the Personnel Director who agreed that (1) the reference was derogatory and negative; (2) that the

referent was not in a position to file such a reference; and (3) that her reference should be removed from Mrs. Hopkins' file. These conferences extended overa period of three or four months and finally, in the presence of the FEPC Executive Director, the letter was removed by the Personnel Director.

From the time (August 22, 1962) that Mrs. Hopkins applied for a teaching position in the Minneapolis schools until April 1963, she was interviewed by six persons in the school administration and it is clearly evident that their evaluations were influenced by the unauthorized reference given by a clerical person. All authorized references by her principals and superintendents in eight years of successful teaching rated her <u>above average</u>.

<u>Although the letter was removed, the evaluations referring to it still remain in Mrs. Hopkins' file.</u>

> October 1, 1962--interviewed by M. Olsen who rated her unacceptable and stated, "On the basis of her references, I told her we could not offer her a position."

At the time that Miss Olsen made the above decision there were only two references on file--one from a superintendent who rated her <u>above average</u> and stated he would rehire Mrs. Hopkins, and the biased reference from an unauthorized person. Is it possible that Miss Olsen could have assigned more significance to the clerk's reference than to the superintendent's?

October 15, 1962 - a reference by the principal in the school from which the derogatory reference came rated Mrs. Hopkins above average in two areas and average in the third area.

October 31 - interviewed by Miss Kidd who rated her unacceptable and stated "I talked to her about...events that led to unsatisfactory recommendations. I would recommend very limited service until she has proven herself."

Again the clerk's letter seems to carry more weight than that of principal or superintendent.

April 10 and 11, 1963 - Mrs. Hopkins was interviewed by four more of the administrative personnel, including the Director of Personnel, who as he indicated on the record 'lectured' her.

Previous to the time of this interview with the Personnel Director, Mrs. Hopkins had not alleged discrimination (she wanted the letter removed from her file) but after the following session, which the Personnel Director recorded as follows, she filed a formal complaint with the FEPC.

Mrs. Hopkins has felt that we were discriminating about employing her. This is evidenced by the fact that she appealed to the Fair Employment Practice Commission.

I asked her to tell me what she would find different in a good physical education program and I let her choose whether she wanted to discuss a Jr. High or Sr. High program. Her answer, "Equipment." (Q.)"What do you mean equipment?" (A.)"Showers, they must have showers." I waited - (Q.)"Is showers the only equipment they need?" (A.)"Showers isn't equipment -- basketballs, volleyballs and game equipment -- that's all." I waited. "They need a good

curriculum." (q) What would that be? (a.) I guess I mean they need a good teacher.

When I told her that this is the reason that we were not employing her, I told her I realized I was being blunt but I felt that I needed to be since she apparently felt that we were discriminating against her. "In the whole conversation, you have not related a single idea that would differentiate between a strong or a weak program." After this lecture I gave her an opportunity to clarify her answers -and she could not.

The Personnel Director stated to the FEPC on November 25, 1963, that Mrs. Hopkins was "interviewed by six individuals and everyone rated her unacceptable on the basis of preparation and qualifications." On the other hand, in his general statement at the same meeting, he said, "whether a person has a 2.01 or 2.77 or any other grade average is of little significance. However, for secondary school applicants we look at the extent of training in the field they are prepared to teach ... cultural subjects studied ... and diversity of interest."

In the same statement, the Personnel Director negates the value used against Mrs. Hopkins: "There is no way to measure the value of these. A person needs to know the evaluator in order to put any significance to the report. Generally speaking, evaluators are inclined to give strong evaluations ... Many large firms no longer call for written references because of their unreliability. Chicago schools do not ask for them at all. We use them. They give us clues for further follow up ... "

Does this use of subjective evaluations open the door to discrimination?

PREPARATION AND QUALIFICATIONS OF MRS. HOPKINS AND OTHERS (CONTINUED)

Mrs. Artis Hopkins: Age 33

Scholastic Attainment: B.S. in Physical Education and a Minor in Elementary Education

Graduate Study in:
Student Personnel Work
Health Education
Research Methods in Physical Education
Supervision in Health & Phy Ed
Implementation of Elementary Teaching
Health Education Workshop (1957)
Testing in Phy Ed (1959)
Health Education Workshop (1959)
Testing in Physical Education (1958)
Advanced Elementary Curriculum Construction
Human Development

Minnesota Certification: Certified to teach Physical Education and Health, grades 1-12; limited certification to teach elementary.

Grade Average: 3.02

Previous Teaching: 8 years

Ratings from Past Teaching Experience:

Personal qualifications - Above average
Instructional ability - Above average
Professional attitudes and conpetence - Above average
"Would rehire."

Ratings by Minneapolis Interviewing Committee: Recieved a rating of "D" (unacceptable) by four interviewers.

Interview comments state:

"Mrs. Hopkins has no special health minor. No water saftey instruction. Is not a qualified First Aid instructor." And yet there are three white

teachers with lesser qualifications who were hired under contract in the same field and who did not health minors. Their minors were in history, speech, and biology, and they were not certified to teach health, as Mrs. Hopkins is.

Comments regarding one of these white teachers who received a contract and who had had no experience teaching health and who had had no Water Safety instructions: "Has no practice teaching health. Plans to get Water Safety instruction this summer. Do give consideration."

Mrs, Hopkins applied for a regular teaching position August 22, 1962. On October 11, 1962 she received a rejection letter. On November 2, 1962 she was placed on the substitute list. During the period of December10, 1962 to April 3, 1963, while substituting, she received seven evaluations from principals. Two principals asked she be given preference on all substitute calls; five asked that she be assigned to their building again. All seven felt they had not observed her sufficiently to recommend her for employment. All comments were very favorable. After "proving herself" she again for a contract and received none. She then filed a complaint with the FEPC.

COMPARISON A: Age 22

| | |
|---|---|
| Scholastic Attainment: | B.S. in Physical Education, Minor Speech and Drama. NO HEALTH MINOR |
| Grade Average: | Unable to average, no transcript in folder |
| Practice Teaching Rating: | Average and below average |
| Past Teaching Experience: | None |

Ratings by Past Employers (in teaching) None

Memo from Director of Physical Education Program: "See no evidence of Health or Safety Education Teaching or experience. Question Water Safety requirement. Has excellent references,* except in her Junior High School student teaching experience--the only teaching she did on her own."

Ratings by Minneapolis Interviewing Committee: Received an "A" rating by all three interviewers. One interviewer commented: "Has had practice teaching health. Plans to get Water Safety Instructions this summer. Do give consideration."

Comparison A applied for regular teaching position on January 19, 1962. March 17, 1962 was interviewed. March 22, 1962 was sent a contract for $4700. (despite no health minor, no water safety instruction, poor practice teaching rating and no Minnesota Certificate.)

*non-teaching

Comparison B: Age 26

Scholastic attainment: B.S. in Physical Education, Minor History

Grade Average: 2.45

Practice Teaching Rating: Superior

Past Teaching Experience: Had taught in Minneapolis Schools 2 years before maternity leave.

Comparison B was assigned long call to Minnehaha and Greely schools in January 1962, six months before Mrs. Hopkins applied. Office Memo: "This gal"s child is only 5 months old. In view of the P.E. shortage shall we place her on the substitute list?"

On May 14, Bernice Voight, principal at Minnehaha wrote this evaluation of her work:

> "She needs to spend much more time in preplanning, organization and preparation of her work for her classes. She relies on the knowledge of the classroom teacher rather than studying her own course of study. She lacks the zip and forcefulness necessary to make a good phy ed teacher in the elementary school. I am sorry but I felt this was just a "job" to her, and she puts forth little effort to meke a good program for children. Her Monday lessons do not contain activities that a teacher could continue to develop the rest of the week. She has a nice personality. The faculty accepted her as a person, but were disappointed in her accomplishments with children."

Miss Voight did not recommend her for a contract and would accept her as a substitute only if no others were available.

She below:

(check one) As a substitute

_____ 1. Be given preference on all substitute calls.
_____ 2. Be assigned to my building again when a substitute is needed.
_x_ 3. Not be assigned to my building unless no other substitute is available.
_____ 4. Should not be used as a substitute in the Minneapolis Schools.

(check one) If this teacher applies for regular position

_____ 1. I would recommend he/she be employed as such.
_____ 2. I do not feel I have observed sufficiently to judge.
__X__ 3. I doubt whether he/she is strong enough for Minneapolis.

Compare this evaluation with Mrs. Hopkins" evaluations which were all favorable, both in comments and ratings (see pp. 13-14).

An office memo in May states that her evaluation from Greeley was returned at the principal's request. Mrs. Anderson, principal at Greeley, then submitted the following evaluation:

> "...Equipment has been rather carelessly taken care of and Mrs. B has shown little initiative in improvement and understanding of the program at the elementary level. She spent no time in excess of the prescribed school day.... More time spent in planning and preparation and organizing equipment would be helpful." However Mrs. Anderson checked as follows:
>
> (check one) As a substitute
>
> _____ 1. Be given preference on all substitute calls.
> __X__ 2. Be assigned to my building again when a substitute is needed.
> _____ 3. Not be assigned to my building unless no other substitute is available.
> _____ 4. Should not be used as a substitute in Minneapolis Schools.
>
> (check one) If this teacher applies for regular position
>
> __X__ 1. I would recommend he/she be employed as such.
> _____ 2. I do not feel I have observed sufficiently to judge.
> _____ 3. I doubt whether he/she is strong enough for Minneapolis.

On May 25, 1962 this teacher recieved a contract for $5100.

Was comparison B a good candidate? The Personnel Director has said, " We do not have positions for all <u>good</u> candidates who apply." ( FEPC Hearing, November 25, 1963)

QUESTIONS AND OBSERVATIONS:

1. Why was the unauthorized letter by a vindictive clerical person in a southern community recognized and placed in Mrs. Hopkins' file at all?

2. Why did the Assistant Personnel Director record that it was on the basis of this letter that Mrs. Hopkins was being denied a contract?

3. Why was no significance attached to the seven (7) favorable evaluations by Minneapolis principals?

4. Why were other teachers with less preparation, less experience and poorer evaluations given contracts?

5. After the letter was removed, why wasn't there an objective evaluation instead of the Personnel Director's interrogation of Mrs. Hopkins' qualifications and teaching practice, (see pp. 11-12) especially since there was a dearth of Physical Education teachers according to Dr. Starr?

SUMMARY OF QUALIFICATIONS OF MRS. MARJORIE OWENS AND COMPARISONS.

Mrs. Marjorie Owens: Age 54

Scholastic Attainments: B.S. in Elementary Education 1954

Minnesota Certification: August 1961 received Minnesota certificate to teach in any Elementary School or Junior High School in the State of Minnesota.
Major Elementary Education, minor English

Grade Average: 2.61
Teaching Experience: 31 years continuous teaching

Ratings from Past Teaching Experience: (three references received all concurred in ratings.)

Personal qualifications: Average
Instructional Ability: Above average
Professional attitudes and competence: above average
All three referents said they would rehire

Ratings by Minneapolis Interviewing Committee: Received one C- rating, three D ratings.

Mrs. Owens applied for a regular teaching position on August 18, 1961. On September 22, she was placed on the substitute list. December 19, 1961 to June 19, 1962 she was assigned a mentally retarded class at Grant School. On April 12, 1962, the principal at Grant stated, "Has delightful relationship with these highly stimulated pupils ... She does not seem to understand the philosophy of a sound Social Studies Program."
September 5, 1962 to December 26, 1962 was assigned the third grade at Willard School. Principal asked that she be assigned to her building again and stated, "Mrs. Owens has the children do much creative work with paper. She has a warm personality

to which children respond well. This has resulted in several very nervous children becoming more relaxed and more friendly toward others. There is a permissive comfortable atmosphere in the room always...she has a kindly gracious manner and is very cooperative...seems to be well liked and highly respected by the staff. She appreciates suggestions and tries to carry them out...it could be that her background of training (in the South) is so different from that of the North that it is hard for her to really understand with limited guidance."

In February and March of 1963 Mrs. Owens received two more evaluations. Both principals asked that she be assigned to their buildings again, and stated: "Positive attitudes toward children... Enjoys children and has a fine way with them. She works well with underprivileged children. Adapted to a difficult room during her stay here."

On March 30 she asked for a contract and was interviewed by a committee of three, all of whom gave her a D rating.

Committee's Comments: "Southern drawl would be difficult for children... Slow speech - some differences in language (Southern)...I'm sure she would have problems with children because of her ineffective approach to them. Did not indicate any depth or understanding of subject matter,

teaching methods or children." It is difficult to understand how the interviewer arrived at the above conclusion when she had before her the principals' evaluations which commented positively on her understanding of children.

On April 17, Mrs. Owens was rejected for a contract. On May 9 she filed a complaint with the FEPC. July 30, assigned long call to third grade at Grant School to begin teaching September 3. On September 19 was replaced by comparison A.

Comparison A: Age 26
Scholastic Attainment: B.S. in Elementary Education, 1958
Minnesota Certification: Minnesota Certificate expired 1961
Grade Average: 2.43
Past Teaching Experience: 3½ years
Ratings from Past Teaching Experience: None requested by Personnel Office
Ratings By MInneapolis Interviewing Committee: Interviewed by only one person; received a C+ rating
Comments by Interviewer:

> Could be more explicit. Uses slangy expressions. Somewhat traditional. She SEEMS ACCEPTING OF CHIL-RENand tries to provide work to meet the various levels of ability. SHE WILL NEED HELP IN ESTABLISHING DEFINITE PURPOSES IN SOCIAL STUDIES.

Comparison A applied for a regular teaching position on August 28, 1963, was interviewed on September 5, received a contract for $5500 On September 11, and replaced Mrs. Owens on September 16, 1963, exacrly two weeks after she applied.

Attention is directed to what seems to be a double standard here. Mrs. Owens' replacement "<u>seems</u> to <u>accept</u> children" and will "need help in establishing a social studues program," and "tries to provide work to meet various levels of ability." Mrs. Owens was not dealt with so kindly in exactly these three areas. Evaluators said she didn't "understand the philosophy of a sound social studies program" and should"try to provide work to meet the various levels of ability," and "no allowances made on help given." "Seems to accept children is a rather dubious recommendation for Mrs. Owens" replacement at Grant.

Comparison B Age 27

Scholastic Attainment: B.S. in Elementary Education

Grade Average : 2.1

Practice Teaching: Average

Past Teaching Experience: 1 month, 4th and 5th grades. Principal shated he would not rehire and further stated, "It became evident even before school opened that he was having difficulty planning for the class. Despite all the help he received he was unable to plan and carry out an educational program. His inability to know what to do in the classroom upset him so much that after only seven days he was on the verge of a nervous breakdown and asked to be released."

Ratings from Past Teaching Experience:

Personal qualities: Below average
Instructional Ability: Average
Professional Attitudes and Competence: No rating

Ratings from Minneapolis Interviewing Committee: Received a C rating by the one interviewer who saw him.

Comparison B applied on November 29, 1962 and taught as a substitute for two months, during which time he received two evaluations from principals, neither of whom recommended him for a contract but said they had not observed him sufficiently. On February 28, 1963 he received a contract for $ 4800.

Comparison C: Age 27

Scholastic Attainment: B.S. in Elementary Education 1962.

Grade Average: 2.14

Practice Teacher Ratings: Below average by two principals where "At no time during his work with me did he give indications of being prepared to handle the position of a total class over a prolonged period of time.... Not prepared to assume the position of a classroom teacher." St. Paul school principal would not recommend him for teaching: "Seems to have the wrong attitude toward teaching. Does not want to put enough effort into adequate preparation and planning."

Ratings from Past Teaching Experience: None

Rating by Minneapolis Interviewing Committee: C rating by the only interviewer who saw him. Comment: " Principal at Greeley is interested in having him teach at Greeley."

Comparison C applied for a regular teaching position on November 16, 1962. On December 2, he recieved a contract for $4700. On February 15, 1963 an un-signed evaluation from Greeley recommending him for 1962-63 contract stated: "Has shown promise and is anxious to improve." March 27, 1963 contract renewed for 1963-64. April 11, 1963 Minnesota Certificate granted.

<u>This teacher was given two contracts before obtaining a Minnesota certificate</u>.

The Personnel Director wrote in the statement of November 25, 1963, "He will never knowingly settle for a mediocre of just barely average teacher."

1. Do comparisons A, B and C represent the "best available teachers?"

   (All have C ratings and critical interview notes. B and C have negative references and below average ratings.)

2. What is the justification for giving comparisons B an C contracts at the same time Mrs. Owens was denied a contract?

Since Mrs. Owens was replaced on her long call assignment (September 1963) after only two weeks of teaching, let's take a

look at some of the teachers who were allowed to continue in their long call assignment:

Long Call Teacher A: Age 24 (elementary)

Scholastic Attainment: No Degree

Grade Average: No Transcript

Practice Teaching Rating: Below Average

Past Teaching Experience: None

A applied on November 16, 1962 and was interviewed by M. Olson who gave him C rating and commented: "Mr. A. will need more than the usual amount of help given to new teachers. I feel he will need to spend some time learning the curriculum for the 5th. grade." On Dec. 12, 1962 he was assigned long call to Hiawatha and on March 22, 1963 the principal commented:"Tries hard to learn" and recommended him for contract. At than time Mr. A was teaching on a Limited Certificate which states:" The holder of this certificate accepts with the knowledge than when qualified teachers are available he or she will have no right to hold a position in Minnesota Schools." (These certificates are issued for one year and Mr. A's expired at the end of his long call assignment at Hiawatha, June 21, 1963) A letter dated July 3, 1963, from Mr. A to Miss Olson said, "I did not register in time to complete my degree this summer. Will I still be able to teach at Hiawatha this year?" Miss Olson replied in a July 18 letter:"Yes, you will be able to teach at Hiawatha this fall.Request another limited certificate." There was no certificate in the file as late as Sept. 18, 1963. Mr. A is presently teaching at Hiawatha, no certificate and no degree.

Long call teacher B - Age 58 (elementary)

| | |
|---|---|
| Scholastic Attainment: | Two years College (1925) |
| Grade Average: | No transcript on file |
| Past Teaching Experience: | Stated she had 2 years experience |
| Ratings from Past Teaching Experience: | None on file |

Began teaching April 25, 1958, as short call substitute. The first few evaluations were fairly good and allowances were made for age, lack of experience, and the 33 years since her 2 years of college,however the good evaluations did not continue.

Thirteen evaluations from principals show:

Five were unable to observe and were non-committal
Two - satisfactory
Five - very poor - "Do not assign to my building again."

In 1959 she was assigned long call and continued for 1960, 1961 and 1962.

On March 29, 1963 the principal at Lind School where teacher B taught 1st grade wrote a long narrative evaluation concluding with, "Many of the children she has had this year could have done as well at home. Her working relationship with the other three first grade teachers can no longer be termed a relationship. I would not like to have her in the building again. She has caused teachers and administrative staff many frustrations."

There is nothing in the file to indicate concern on the part of the personnel office and on June 13, 1963 she was sent a substitute form which she signed for long call, and apparently recieved a long call assignment for 1963-64.

Long call teacher C - Age 56 (elementary)

This teacher received a B.S. in Elementary Education about 1920 (which gives some doubt as to age as given above)

She had very poor references from past positions.

In 1954 she was employed by Minneapolis Schools as a substitute and received poor evaluations from Minneapolis principals who indicated: "Do not assign to my building again."

This teacher was given a long call assignment for 1963 - 64 to teach grades 3 and 4 at Blaine.

Long Call teacher D--age 59 (elementary.)

Long Call substitute teacher D has a two-year diploma from Minot State Teachers College. She did substitute teaching in St. Louis, and was rated "satisfactory" (but as the Director of Presonnel says, "referents tend to overrate".)

There is one Minneapolis interview blank in the file which is not dated and does not carry the name of the interviewer but merely this comment: "Mrs. D has had many years of experience in Southeastern areas. Likes to teach reading." With this strong(?) interview she was assigned long call to the first grade at Grant on September 4, 1962.

On March 28, 1963, the principal at Grant wrote this evaluation: "Maintains rigid control over students. Classroom feeling of boredom, fatigue, and disinterest. She teaches because she needs an income. She doesn't reflect on the needs of children." Do not assign to my building again-not strong enough for Minneapolis.

On April 25, 1963, the Personnel Office sent her a substitute teaching form for 1963-64 which she signed and returned.

Long Call teacher E--age 60 (elementary). This teacher taught in rural schools from 1920 to 1956. In 1944 she received a two year diploma from Eau Claire Teachers College. In April and May, 1962, the principals at Hawthorne and Bremer schools wrote on their evaluations: "Mrs. E maintains discipline in a manner which causes children to dislke her," and "she has very poor relationships with students...I do not believe she hears well because she is always accusing the wrong person." More than twenty times principals have asked that she not be assigned to their buildings again, and have recommended that she not be used as a substitute, and yet this teacher is still

filling long and short calls.

Long Call Teacher F (elementary)

Teacher F has a 2 year diploma. From September 1961 to June 1962 she taught long call at Washington and evaluating her teaching for the year the principal commented: "I have talked with her time and again about the importance of keeping the children in the classroom or knowing were they are at all times... The pupils seem to have no respect for her... Mrs. F seems to be insecure on her job."

For the 1962-63 year she was assigned long call at Grant. This teacher file contains poor evaluations over a period of time yet she recieved long call assignments. It does not take an expert in education to see a double standard here. The foregoing examples (there are many more) have lesser qualifications, and definitely lower teaching ability than either Mrs. Owens or Mrs. Hopkins and yet Mrs. Owens was replaced and Mrs. Hopkins denied employment. Twenty-five teachers presently employed whose files potray the kind of teacher described in these six examples can be found in the Personnel Department.

A survey of long call substitutes in the elementary schools shows approximately 93 teachers filling these positions and of that number 35 have degrees and 58 do not. Surely Mrs. Owens and Mrs. Hopkins are better than at least two of these non-degree teachers.

If the Board of Education is interested in a breakdown by grade on the above, totals can be furnished, including the names of retired teachers who are

serving as substitutes.

Examples of substitute teachers in secondary schools:

Substitute teacher G - age 27 (Junior High) Graduated from University of Minnesota in 1958 as a C minus student. He did no teaching until 1962. He has a Minnesota certificate to teach sociology, history and political science. Reference William Swain, assistant professor of sociology, University of Minnesota makes this statement: "He is not the type I would prefer to have teach my own children."

On February 27, 1962, he was interviewed by the Director of Personnel. His comments appear in toto:"Well-dressed, polite, polished. I asked him about teaching." Following this interview, he was assigned to Sheridan Junior High. In his evualation, the principal at Sheridan states:"Had little knowledge of subjec matter and teaching techniques. Minimum amount of time spent in preparation. Had to speak to him about getting to school on time." The principal stated:"Do not return to my building."

From other principals: Should have added training before he would be acce acceptable to me. Do not return to my building." "He is not strongly masculine." "Lacks ability to control students-lack of organization of subject matter. We would do well not to encourage this applicant further. Do not assign to my building. Question if he should be used as a substitute. Not strong enough for Mpls." (This last evaluation came from the principal at Edison)

In respect to these six evaluations from junior and senior high principals the assistant Director of Personnel very tolerantly notes on an office memo:Mr. G will grow with experience. At the present time ranks as an average substitute teacher." (Then Mrs. McNair and Mrs. Hopkins are very much above average) "Since he has been on short calls it would be unrealistic to rate him in comparison with regular teachers."

If substitute teachers are not rated in comparison to regular teachers, how can they decide if and when they should have a contract. Note the casual way in which the Edison principal's evaluation is treated in

this instance and how his one non-committal evaluation of Mrs. McNair was regarded and even his telephone comments about Mrs. McNair were recorded. Mrs. G was asked to substitute for 1963-64.

Substitute Teacher H - Age 60

This teacher recieved an A.B. degree in 1928 and has been teaching Business courses in the Minneapolis schools since 1959. In her files are 29 lengthy evaluations from principals. These evaluations site so many immpossible situations that would take too long to describe here - everything from criticizing the regular teachers to brawls during which students broke typewriters. Many of the twenty-nine evaluators ask that she not return to their buildings. Letters and memos indicate difficulties between her husband and the school personnel office. Mrs. H is still teaching.

Substitute I - Age 55

B.S. from University of Minnesota in 1929 with a major in Physical Education and Sociology.Has a limited certificate. No previous teaching experience. No transcript. In 1954 she was interviewed by one person in the Minneapolis personnel office who rated her average and she was then employed as a substitute teacher. From that time until 1962 she recieved fair evaluations,. However, they would not recommend her for contract. On September 14, 1962 she recieved this evaluation from the principal at Ramsey Junior High where she was teaching Physical Education. "No initiative. More interested in full hours and in lunch time than in doing a good job. Do not assign to my building again. Do not believe she is strong enough for Minneapolis. May 1963 - another evaluation from the same principal again asking that she not be assigned to his building. Nothing in the file to indicate concern or remedial action by the personnel office. Miss I is still teaching.

Substitue J, age 60. BS in Social Studies in 1925, no references, no past teaching experienece, no transcript in file. On September 19, 1955, applied, and was interviewed by R. Dahlen who evaluated her in this manner: "Up and coming woman-see no reason why we should not use her as a sub."

During 1955 and 1956 Mrs. J received six evaluations which were mildly critical but made allowances for her inexperience. In 1957, principals from Phillips and Ramsey Junior Highs and West High made these evaluations: "Poor, don't return," and "Poor. Class deteriorated from day to day, even though we assisted her from the office and other teachers stood by to help. Do not assign," and, "Not capable or well prepared. Knew little about teaching. Adapted poorly. Do not assign."

Four evaluators, one from Ramsey, one from West, and two from Lincoln asked that she not return to those schools with the following comments: "Talks too much. The older kids see through her. She talks too much among the faculty. In 9th Grade Civics has to call for help. Do not assign," and "Not very successful in controlling behavior. Acceptance by faculty doubtful. Very talkative, seems compulsive. Do not assign," and "Talkative beyond reason and sociability. Voice not pleasant; irritating tendency to dominate informal situation. Do not assign," and one that simply said, "Do not assign."

From 1958 to the present, seven more principals asked that she not return to their schools with such comments as,"Has difficulty relating to students-inflexibility," and "I do not believe much constructive work work was accomplished in Mrs. J's classes. She has lax discipline and appears to be content with a 'holding operation'."

In January, 1962, the Director

of Personnel had a conference with Mrs. J and his entire record of the counseling session is as follows: "Because I had received complaints about Mrs. J in evaluations, I called her in to discuss some of these with her. I told her she was antagonizing fellow workers in her contacts with them. She seemed appreciative." Contrast this with the indulgence to and tolerance for poor poor teaching methods and disciplinary practices with the severely critical analysis to which the teaching programs of Mrs. Hopkins, Mrs. Owens and Mrs. McNair were subjected.

The pattern of discrimination in hiring policies is strikingly revealed when the qualifications of the following Negroes employed on a short-call basis are examined. These applicants have not only been denied contracts; they have also been denied long-call substitute assignments and have been limited to short-call.

Substitute K

Scholastic Attainment: B. S. in Education in 1948.
Two majors: Industrial Arts, Biological Sciences
Minor: Physical Education

Teaching Experience: 10 years in a Midwestern city of 20,000 population. During this time, he was a principal, assistant principal, a high school and elementary teacher and an education coordinator for the elementary schools of the city.

References from past teaching: Twelve outstanding references, such as

From a superintendent: "Mr. K is without a doubt the finest man that I have ever known. He has the respect of the people (sic) of this city," and

From a superintendent of schools: "His contract will be renewed for as long as he wants to stay here," and

From the elementary consultant: This "school system was fortunate

indeed to have a faculty member such as Mr. K. The good success which our school attained was due in part to the fine work done by Mr. K. We feel sure that any school system which employes Mr. K would be fortunate. We will be sorry to lose him."

Mr. K received a special citation from the president of his college, which is a Midwest state college. All references rated this candidate above average and superior.

Prior to applying for a position in Minneapolis, he received a Minnesota certificate to teach industrial arts and biological sciences in grades 7-12. This certificate is still current.

In September 1956, he submitted his application and in December he was interviewed by an interviewing committee who gave him a rating of two C"s and a D with these reasons: "Background should be broader."

"Qualified for woodwork only."

"Only two fields he could teach-woodwork and drawing."

Note that he holds a Minnesota certificate for the field of Industrial Arts and Biological Sciences. The Committee's reason for not recommending Mr. K for a contract was that he lacked training.

In September, 1957, Mr. K applied for substitute teaching and was interviewwd by the Director of Personnel:"Working with a construction company. Very fine records-good. He is only interested in long call. He will call us if interes interested in short call." Mr. K actually wanted a regular job which the Personnel Director knew and he also knew a man of this caliber would not want the uncertainity of short call substituting. However, Mr. K felt that he could prove himself by taking some short calls and on October 18, he received this evaluation from the principal at South High where Mr. K was assigned to teach commercial subjects: "Established excellent rapport. Easy control. Very fine attitude toward work. Accepted by faculty. He has taken classes for which he was not qualified but did an excellent job. Ask that Mr. K be given preference on all aubstitute calls because of his superior ability."

From the principal at Sanford where he taught Physical Education:Very good. Assign here again."

Following these evaluations, he was again rejected for a contract on January 28, 1958.

On February 7, 1958, the principal at Grant where Mr. K taught 5th grade made this evaluation: "Outstanding

In fact, no substitute has ever come to my attention who did as good a job in such a short time. A brief case was full of excellent material, especially in science slides, microscope, etc. Excellent relationships to school. Careful to carry out responsibility for pupils in halls, etc., as set by building policy. Has made himself a part of the staff. Ask that Mr. K be given preference on all substitute calls."

Following this demonstration of ability in assignments out of his field, the Personnel Office returned Mr. K's transcript to him, which seems indicative of no employment. Although Mr. K is employed, he still wishes to teach and applies each year for a position. But apparently this fine teacher is lost to the Minneapolis school system.

Substitue L, age 26. Graduated in 1960 from a Midwestern University with a BS in Education and a minor in science.. Worked his way through school and along with another job held the position (as an undergraduate) of a lab instructor in the Graduate School of Anatomy. Practice teaching ratings were above average and superior. Received Minneapolis certificate to teach Science, grades 7-12. Mr. L applied for a regular position on Nov. 6, 1962, and was interviewed by the Assistant Director of Personnel who rated him satisfactory and commented: "Sound thinker. Impressed me as having considerable capability. I explained that since he was qualified for Junior High School he would have a tough time being hired as a regular teacher."(?)

On feb. 15, 1963, he was assigned one day's teaching at Nokomis, science and math. Principal asked that he be assigned to his school again. March 19, an evaluation from the principal at Edison where Mr. L taught biology: "Better than average. He was here previously in Machine Shop," (no evaluation on

this assignment) "in which he was not prepared. No serious problem occured but I could not pass judgement on this service since he was out of his field. Assign to my building again."

April 2, 1963 - evaluation from Folwell where he taught Science: "Effective command of the classroom situation... displayed interest and enthusiasm for teaching. Assign to my building again."

There were three more assignments where he taught Science and Mathamatics and the principals asked for him again.

On May 27 he was given a three week assignment teaching Algebra and Math at Marshall. At the end of the period the principal sent this evaluation to the personnal office: "Mr. L did an excellent job. He was conscientious, hard working and well prepared. He had to work especially hard because Algebra was not his major field. But he came through. The students liked him and he worked hard at all times. He seemed to fit in well with our faculty group. He went about his work in a quiet well organized manner. He did well in a difficult situation. On the basis of his work here I recommend him for a regular position."

On June 1, 1963 an interviewing committee gave him two D ratings and one B. One interviewer who gave him D ratings commented: "Not at all articulate - seems fearful to express an idea. Confused. Interesting person to talk to - has wide range of interests. Lacks force of personality to organize and effectively direct a good class program. Did not know what level he wished to apply for. Lacks force of personality to control student groups. Indicated uneasiness with discipline. I suggest he be retained as a sub until we can observe him in the teaching position."

Mr. L had eleven evaluations from Minneapolis principals prior to his interview. None indicated inability to control and several commented on good control.

The other interviewer who gave him a D commented: "Cautious. Definite speech impediment. Very near to getting an M.A. degree. Should be continued as a sub and interviewed at a future date." The consultant who gave him a B rating made this comment: "Mr. L is a fine, mature gentleman who has a good philosophy of education. He used good techniques in his teaching. He appears well prepared in biology and chemistry. He needs experience with an understanding principal." Mr. L was then interviewed by the Director and Assistant Director of Personnel (making six interviews the same day) who quizzed him on technical aspects of science and gave him C and D ratings with this conclusion: "Not well trained for biology or general science. Didn't know monocots or dicots."

Mr. L. is getting a few short call assignments, yet he is clearly far superior to those substitute teachers whose qualifications we have examined and, indeed, far more qualified than many teachers granted contracts. Despite the fact that he was continually assigned out of his field, he received eleven favorable evaluations, including one recommending that he be given a contract. The long period of trial as a substitute which he has been forced to endure is in striking contrast to the speed with which many others have received contracts - none of whom were subjected to six interrogations in a single day.

The above materials represent a portion of the relevant factual basis for the position of CORE. We submit this for your review and action. We request a further meeting before February 23, 1964, when we will have a special membership meeting.

COrtlandt 7 - 6270
April 25, 1962

TO: CORE Chapters
FROM: Norman Hill, Assistant to the Director, Program Department

National CORE urges all chapters on Thursday, May 17 in their respective cities to organize demonstrations (marches and/or poster walk) on Republican and Democratic Party headquarters or an appropriate Federal building in your locale.

The focus of these demonstrations is the May 17 anniversary date of the Supreme Court decision in 1954 declaring segregation in public schools unconstitutional. Now 8 years later only 7% of the Negro children covered by the decision attend desegregated schools. Over 2,800,000 Negro students are still segregated. The States of Alabama, Mississippi and South Carolina have completely defied the Supreme Court edict. The bills sponsored by Senator Clark and Congressman Celler calling upon all communities which maintain segregated schools to submit a desegregation plan by 1963, are stalled with little congressional support and no pressure from President Kennedy, despite the 1960 Democratic Party platform pledge

> "that every school district affected by the Supreme Court's decision should submit a plan providing for at least first step compliance by 1963," and the Republican plank stating that, "we believe that each of the pending court actions should proceed as the Supreme Court has directed and that in no district should there be any such delay."

1. Protest lack of progress on school desegregation
2. Urge support and passage of the Clark-Celler bill
3. Emphasize that your effort is part of nationwide demonstrations on Thursday, May 17

Dem. St Party those members of the nat'l Cong'l D. party from NY.

FOR IMMEDIATE RELEASE

ATTN: Marvin Rich

## Cross-Country Demonstrations Protest Inaction By Both Parties On Schools

New York, New York, May 17: May 17, 1962, the eighth anniversary of the historic Supreme Court decision outlawing school segregation, was observed by Congress of Racial Equality (CORE) groups across the country with protest demonstrations at both Republican and Democratic headquarters.

Picket signs and leaflets pointed out that only 7% of Negro children covered by the decision now attend desegregated schools and that over 2,800,000 Negro students are still segregated. They protested the fact that legislation calling upon all communities with segregated schools to submit a desegregation plan by 1963, has been stalled with little congressional support and no pressure from the President.

In Washington, James Farmer, national director of CORE headed picket lines at national headquarters of both major parties and served on delegations which went inside to present CORE's protest to Republican and Democratic officials. Sizeable CORE demonstrations were conducted at headquarters of the two parties in New York, Los Angeles and San Francisco, with smaller protest actions in other cities.

The leaflets emphasized the discrepancy between the inaction of both parties on this issue and the 1960 platform pledges. In that year the Democratic Party pledged "that every school district affected by the Supreme Court's decision should sumbit a plan providing for at least first step compliance by 1963." The Republican Party platform asserted: "We believe that each of the pending court actions should proceed as the Supreme Court has directed and that in no district should there be any such delay."

###

Statement of Norman Hill, Assistant
to the Program Director, CORE -
the Congress of Racial Equality
before the Committee on Education and
Labor of the U. S. House of
Representatives, June 15, 1962,
Washington, D. C.

MR. CHAIRMAN AND MEMBERS OF THE COMMITTEE:

My name is Norman Hill and I am the Assistant to the Program Director of the Congress of Racial Equality whose office is located in New York City, at 38 Park Row. I wish to thank the Committee for this opportunity to appear and to present testimony on the urgent need for the passage of a bill providing for the desegregation of public schools and requiring every school board which has failed to achieve desegregation in its schools to adopt and file a desegregation plan of first step compliance with the Secretary of Health, Education and Welfare.

The Supreme Court in 1954 in the case of Brown v. Board of Education of Topeka declared that enforced racial segregation in public education is a denial of equal protection under the 14th amendment.

Yet today, eight years after this historic decision, 2,800,000 Negro children in the South still attend segregated schools. In the states of Alabama, Mississippi and South Carolina, no effort has been made to comply with the Supreme Court ruling. According to the U.S. Commission on Civil Rights in 1960-61 only 7% of all Negroes in public schools in the 17 southern states attended school with white pupils. The public schools in Prince Edward County, Virginia have been closed since September of 1959 in defiance of a court order. Tuition grants involving state and local funds have been used to circumvent the Supreme Court decision. In Louisiana measures have been taken by the executive and legislative

branches of the government to maintain segregation despite a Federal court order. Accompanying the defiance on a state level were civic disorder and a boycott of the public schools serving as the foci of the controversy. A further indication of the breakdown of law and order were the harassment and economic reprisals directed against the few whites who attempted to comply with the Federal order.

Such evidence clearly manifests the urgent and immediate need for further steps on a federal level -- namely the enactment of a public school desegregation bill. The relevant and pressing question is: how to extinguish public school segregation. Open defiance continues. Progress is excruciatingly slow. Millions of minority group children are suffering under an inferior physical and psychological educational environment, are experiencing an incalculable harm which may never be undone.

Granting the existing widespread school segregation is in the South, it is in reality a national problem, a cancer of the North as well as the South. On May 17, 1954 the Supreme Court held that "separate educational facilities are inherently unequal," thus clearly encompassing segregation de facto as well as de jure. Examples of segregation in northern and western school systems occur by official action in the form of gerrymandering, zoning, selection of sites for schools and staffing and by culpable inaction, particularly in view of widespread residential segregation.

In reiterating support for a public school desegregation bill, I would cite Title II providing for grants to school boards and local

governments to facilitate desegregation and Title III authorizing technical assistance by the Secretary of Health, Education and Welfare for desegregation problems. These provisions are the means by which desegregation can occur and at the same time maintain and improve the quality of education. Concurrently the passage of a bill providing for the desegregation of public schools and requiring every school board which has failed to achieve desegregation in its schools to adopt and file a desegregation plan of first step compliance with the Secretary of Health, Education and Welfare is a recognition of the necessity and urgency of school desegregation, a realization of the importance of avoiding the compounding of existing inequalities in facilities, staffing and quality of education resulting from segregation.

Millions of minority group children, North and South, await fulfillment of the 1960 Democratic Party platform pledge, "that every school district affected by the Supreme Court's decision should submit a plan providing for at least first step compliance by 1963," and the Republican plank stating that, "We believe that each of the pending court actions should proceed as the Supreme Court has directed and that in no district should there be any such delay." The time is now!

1962 Convention

# OPERATION TRANSFER

On May 17, 1954 the Supreme Court of the United States declared racial segregation in public education a denial of equal protection under the 14th amendment. Yet today, eight years after the historic decision, 2,800,000 Negro children in the South still attend segregated schools. In 1960-61 only 7% of all Negroes in public schools in the 17 southern states attended desegregated schools. Alabama, Mississippi and South Carolina have completely defied the Supreme Court edict.

Granting the existing widespread school segregation in the South, it is in reality a national problem, a cancer of the North as well as the South. The Supreme Court has said that "separate educational facilities are inherently unequal," thus clearly encompassing segregation de facto as well as de jure. In Chicago, Englewood, New Jersey and Berkeley, California San Francisco, Syracuse CORE groups have pinpointed and are fighting de facto segregation.

Progress in school desegregation has slowed down considerably. To give the problem a new and greater sense of urgency, we propose that "Operation Transfer" be initiated by as many CORE Chapters as is feasible this fall in the following manner:

1) Be thoroughly informed

   a) Extent, nature and means of segregation

      1. De facto or de jure
      2. Percentages of white and non-white schools within the community

3. Location of schools and zoning system applied
4. Pupil placement and transfer procedures
5. Teacher and administrator quality and assignment by comparison of schools within the system

   a) Percentage of teachers on substitute or temporary assignment
   b) Turnover of administrators and teachers in "difficult" schools
   c) Percentages of non-white teachers and administrators and where assigned
6. Physical plant facilities - Condition and age of building

b) Know key legal decisions

1. Brown vs. Topeka Bd. of Education (Supreme Court decision outlawing segregation in public schools)
2. New York City decision supporting Supreme Court ruling that "separate educational facilities are inherently unequal"
3. New Rochelle, New York decision declaring the arbitrary fixing of school zones to maintain segregation illegal
4. Recent decision of southern Federal district court ruling against pupil placement law reinforcing segregation.

2) Seek support and cooperation of all groups interested in integration and educational reform, obtaining public statements if possible.

3) Begin organizing parents well ahead of day of registration and the opening of school.

   a) Public meetings or rallies may be appropriate for initiating "Operation Transfer."

   b) The best and most effective organizing will be done by face-to-face contact. Talk with parents in their homes. Hold small neighborhood meeting to build parents' morale and increase their understanding.

   c) If at all possible, involve parents who are willing to use nonviolent action techniques and committed to school integration in CORE group.

4) Be sure those parents who are committed to an attempt to transfer children know the procedure and have all the necessary information --birth certificates, etc.

5) Determine area in which school transfers would be most feasible -- from a Negro or predominantly Negro segregated school to nearest white or predominantly white school.

6) Be prepared to follow up school transfer attempt, possible in stand-in form, by other direct action techniques.

   a) Confrontation of school board officials at Board of Education meetings and hearings -- possible stand-in or sit-in.

   b) Consider sit-ins in school in which transfer is attempted

   c) Mass demonstrations and picketing where appropriate -- school, Board of Education, City Hall

   d) Stay-out with proper organization and preparation

      1. Community support
      2. Schooling arrangements for pupils staying out -- facilities and teachers

Prepared by Norman Hill, Assistant to the Program Director
for the Convention Workshop on School Desegregation.

# OPERATION TRANSFER

To dramatically highlight the problem of school desegregation and give it a new and greater sense of urgency, we recommend the following to CORE Chapters:

I. Investigation and determination of the existing situation in public education in your community where feasible.

II. Seek support and cooperation of all groups interested in integration and educational reform, obtaining public statements if possible.

III. Confront school authorities with facts of segregated education -- school composition, facilities, and staff -- but not for so long a period as to delay necessary involvement and interest in effective direct action.

IV. Begin organizing parents well ahead of day of registration and the opening of school.

A) Public meetings or rallies may be appropriate for initiating "Operation Transfer."
B) The best and most effective organizing will be done by face-to-face contact. Talk with parents in their homes. Hold small neighborhood meeting to build parents' morale and increase their understanding.
C) If at all possible, involve parents who are willing to use nonviolent action techniques and committed to school integration in CORE group.

V. Be sure those parents who are committed to an attempt to transfer children know the procedure and have all the necessary information - birth certificates, etc.

VI. Determine area in which school transfers would be most feasible -- from a Negro or predominantly Negro segregated school to nearest white or predominantly white school.

VII. Be prepared to follow up school transfer attempt, possible in stand-in form, by other direct action techniques.

A) Confrontation of school board officials at Board of Education meetings and hearings -- possible stand-in or sit-in.
B) Consider sit-ins in school by children and parents in which transfer is attempted.
C) Mass demonstrations and picketing where appropriate -- school, Board of Education, City Hall
D) Stay-out (taking pupils out of school) with proper organization and preparation
    1. Community support
    2. Schooling arrangements for pupils staying out -- facilities and teachers

BACKGROUND INFORMATION ON CORE'S SCHOOL BOND CAMPAIGN

Public school integration in the South is proceeding at a snail's pace. The December, 1962 meeting of the National Action Council authorized the staff to initiate a national project aimed at challenging the legality and financial support of segregated education.

Money to build and expand schools is generally raised by selling school bonds. The federal government helps subsidize these bonds by not collecting income tax on interest from them. CORE contends that this money cannot constitutionally be used for segregated schools and we feel that the federal government should not subsidize segregation in this manner.

One aspect of our program is to challenge the federal tax exemption of those bonds which are used to support segregation. Another approach will be to challenge the right of the school districts to raise and expend money for segregated schools.

Still,a third angle (and one which will involve most of the nonviolent direct action) will be that of asking the financial institutions not to underwrite and handle these segregated bonds. A word of explanation at this point is required.

After a school district has decided to raise funds by issuing bonds they call for sealed bids from investment houses interested in handling and selling them. The financial house which will charge the least is normally awarded the issue. This house in turn sells the bonds to individuals, insurance companies and other firms. We are asking that the investment houses not bid on the issues and are appealing to the public in general and to other firms not to buy the bonds if they are to be used to further segregation.

Most of the school bond issues are underwritten by large financial institutions which are located primarily in the North. Thus, it is northern institutions and northern money which provide the majority of the funds to perpetuate segregation. If school integration is to become a fact in the South, we will need concerted action on the part of northern CORE chapters as well as those in the South. Segregation is truly a national problem and this becomes increasingly clear as we see the role which northern capital plays in financing illegal segregation in the South.

OUTLINE FOR ACTION PROJECT ON DE FACTO SEGREGATED SCHOOLS:

1. Get a racial census of your schools. Your school department or other agency may have this information. If not, do an informal census yourself. One way is to have two people watch children at dismissal time, one counting whites, the other, minority group children. You don't have to count them all---a sample of 50 to 100 should give you a fair idea of the approximate proportions.

2. Determine which schools are de facto segregated. Remember, a predominately white school is just as segregated as one with an undue proportion of Negroes or Orientals. No hard and fast number can be used to determine a de facto segregated school, but consider these factors:
   (a) proportion of minority school children to white school children in the total community (see U. S. census figures).
   (b) It is better to have a very flexible range of the acceptable proportions.
   (c) Studies show that when a school contains over 35% or so Negro children, white parents tend to panic, and begin leaving thus raising this percentage very quickly.

3. Familiarize yourself with the legal principles applicable in your area. Try to work with a lawyer if possible. In any event, read the leading cases on the subject (see bibliography), and remember the law is not yet definitive or finalized on the subject. In California, be sure to study the applicable regulations of the State Board of Education. Intentional districting of children into schools made up predominately of the same racial group is clearly illegal, but often not easy to prove. Even without any intent by a school board to promote segregation by districting, you can still do something.

4. School boards are interested in educational values of any new policies adopted. Learn the educational advantages of integrated schools (see bibliography).

5. Be familar with problems of textbook contents, teacher placement, compensatory education, intergroup relations and similar problems which are racially connected (see bibliography).

6. Learn about the members of your school board. If any are sympathetic, talk to them informally. They will be valuable in helping you plan your formal approach to the entire board.

7. Talk to your school superintendent about how schools are districted and other pertinent problems.

8. Where possible, get maps showing the boundaries of all the schools in your community. If these are not available for distribution, you can often copy those the school board has, or photograph them. Also, get U. S. census tract maps for your area which shows population distribution by age and race. Comparisons of these maps will give much information on the racial composition of the schools.

9. With or without the help of an ally on the school board, learn the procedures and practices of the board in your community. It is a very good idea to have representatives of your group attend all board meetings, even though nothing of particular significance to your program is on the agenda. The board and the community will learn that you are concerned with what goes on in the schools.

10. Contact all other groups, including churches, in your community who are likely to share your general point of view. It is probably not a good idea to work together as one group, because many seperate voices are more impressive. It is good, however, to coordinate your efforts, e. g. all groups to make presentations to the board at the same meeting.

11. Plan your presentation to be made to the board very carefully. It should be written and enough copies made for all board members, press and interested citizens.

12. Both before and after your presentation, try to place you position clearly before the public. This can be done by newspaper articles, radio and television interviews, speakers sent to churches, PTA, civic and fraternal groups. Do not overlook neighborhood associations and chambers of commerce. Although they are not usually allies, it helps for them to see you are human and reasonable.

13. Read the sample presentations made in San Francisco and Berkeley by CORE and other groups for ideas. But put as much local information in your presentation as possible.

14. Try to enlist the support of community leaders, including your Mayor and elected officials.

15. Negotiation may be a length process, but it is important to maintain as much good will as possible. However, if you reach the point where further attempts at persuasion appear futile, traditional CORE protest action is appropriate--picketing, sit-ins, boycotts.

RE: Recommended Program for School Desegregation

The urgency and pace of efforts to obtain school desegregation has now achieved greater intensity. Sit-ins have occurred in Chicago,,Illinois and Englewood, New Jersey. The spirit and substance of the Supreme Court decision of 1954 is now being tested in the North where school segregation exists in many areas in fact, but not by law. The court ruling on the New Rochelle case held that the "neighborhood school" concept is not valid where it is used to perpetuate segregation.

Enclosed is a program guide for school desegregation. We recommend that a discussion be initiated in your CORE chapter and other appropriate community groups to determine its applicability to your local situation. If your CORE chapter is involved in action in this area or begins such a program, please keep the Program Department informed.

## RECOMMENDED PROGRAM FOR SCHOOL DESEGREGATION

I Conduct Investigation and Research, inquiring through other interested organizations and agencies wherever possible to build community contact and collect necessary information in these major areas:

a) Percentages of white and non-white Schools Within System. (New York uses 85% as the determinant of segregation in a particular school.)

b) Locations of Schools and Zoning System Applied (Gerrymandering. The arbitary fixing of school zones to maintain segregation was declared illegal in New Rochelle.)

c) Pupil Placement and Transfer Procedures - Administrative policy may use other standards other than race, (I.Q., academic standing, travel distance to school) to reinforce segregation. Predominantly or all Negro classes may be transfered ~~as a class~~ and set aside as a class in a predominantly or all-white school.

d) Teacher and Administrator Quality and Assignment - Comparisons of schools within system. (Percentages of teachers on substitute or temporary assignment, turnover of administrators and teachers in "difficult" schools, percentages on non-white teachers and administrators.)

e) Curriculum - Examination of instructional materials for cultural bias and inadequate or distored presentation of minorities.

f) Guidance and Treating - What is the percentage of "drop-outs"? Are students being assisted toward higher academic standards.

g) The Physical Plant Facilities - Inferiority of a particular school (general condition and age of buildings) in contrast with the rest of the system.

II To utilize this information in a positive educational program by the examination of existing programs. Some programs will be particularly applicable to recently desegregated schools.

a) Ability Grouping, either by schools, programs within individual schools, classes within schools, or groups within classes.

b) Supervised Home Study - At times the academic gap between Negro and white students will be too great and immediate corrective steps must be taken (home tutoring programs have been essential to desegregation in parts of Texas and Maryland.)

Other policies would be applicable also to northern and western school systems.

c) Open Enrollment - The free choice of schools. In the few cities where this has been attempted varying limitations were placed on the freedom of choice. (In Baltimore overcrowded schools were limited to students from the immediate neighborhoods, in New York particular

-OVER-

"receiver" schools were designated for transfers from segregated schools.) Where open enrollment has been tried it has definitely hastened desegregation.

Recent Supreme Ct. decision

d) Pupil Placement and Selective Transfer - These procedures have again varied, but as in open enrollment the specific method is secondary to the result. Does the policy definitely end segregation? Pupil placement and selective transfer have been used both to aid and prevent desegregation. (Both Detroit and New York have used buses to transfer students from overcrowded schools. Detroit authorities transferred students from downtown Negro schools to suburban Negro schools, New York transferred children in a policy of integration.)

e) Rezoning and Location of New Buildings - These policies have also been varied, new buildings may be located in white, Negro or fringe areas. Zoning can create or eliminate segregation.

f) The Integration of Educational Staff - This is an area often overlooked, integration of the entire school system does not necessarily follow desegregation and must be specifically demanded.

g) Guidance and Academic Excellence - There are several programs that are worthwhile examing, they can only be listed here: The Phelps-Stokes Project, the St. Louis Banneker Group Program, New York Higher Horizons and Demonstration Guidance Project, Dillard University Program.

h) Redistribution of Pupils by Grade - Attendance at a particular school is determined by grade level not area of residence, ie, all children in grades 1-3 might attend same school. Examples are Princeton and Morristown, New Jersey.

III A Definite Local Program should be formulated, following examination of the school system and the available programs. Once this has been done, a community mobilization effort must be initiated, seeking the support and cooperation of all groups interested in educational reform. One of the immediate objectives should be the formation of a parent-action group willing to use direct, non-violent methods, and committed to the goal of true integration.

IV Direct, Non-Violent, Action Techniques such as sit-ins, stay-outs, mass demonstrations and picketing can be used where appropriate, emphasis must be placed on building community support and exerting pressure on the school authorities. Obviously power to make these decisions are in the hands of the school authorities, but it is the community both local and national that will decide the issue of segregation.

SCHOOL

# MINUTES

## MEETING OF THE STEERING COMMITTEE
## NATIONAL STUDENT FEDERAL AID TO EDUCATION CONFERENCE

Washington, D. C.
February 8, 1964

The ninth meeting of the Steering Committee of the National Student Federal Aid To Education Conference was called to order at 2:25 p.m., in the Allan Room of the National Education Association, Washington, D. C., by Chairman Pat Clary. Those who were in attendance introduced themselves. Members of the Steering Committee attending and the organizations they represented are as follows: John Jacobsohn, B'nai B'rith Hillel Foundations; Bill Miller, Campus Americans for Democratic Action; Patrick Clary, College Young Democratic Clubs of America; Randy Burkett, National Student Christian Federation; Paul Goodberg, Student Civil Liberties Coordinating Committee; Dean L. Conrad, Student Religious Liberals; Joel Sharkey, United States National Student Association; Dean Gottehrer, United States Student Press Association; Joseph Fallon, United States Youth Council; and Erin Clary, Secretary of the Conference. Others in attendance included Mr. Richard M. Carrigan (National Education Association), Peter Kimmel (representing the Student Association of The American University), J. Albert House (National President, Young Democratic Clubs of America), Ken Lester (National Chairman, College Young Democratic Clubs of America), Duncan McConnell (representing the Law Students Civil Rights Research Council), Fred Ricci, Michael D. Shagan, Allan S. Feirman, and Larry Eiker.

National Co-Chairman Clary, on behalf of National Co-Chairman Tim Ryles and Executive Director James Hunt, expressed regret that they were unable to attend the meeting and gave their best wishes to the Steering Committee

Upon motion duly made, seconded, and unanimously carried, the minutes of the previous meeting were approved as reported. Upon motion duly made, seconded, and unanimously carried, the agenda for the meeting was approved with the following order of business: remarks by Philip DesMarais, Deputy Assistant Secretary of Health, Education and Welfare; financial report by National Co-Chairman Clary; discussion on Conference legislative activities since April 1963 General Conference Meetings; report by Dean L. Conrad, Chairman of special interim Committee on Sponsoring Organizations; consideration of the revised proposed Outline of Administrative Organization for the 1964 General Conference Meetings of the National Student Federal Aid To Education Conference; elections to fill vacancies in Offices and Executive Committee; report on National Student Conference on Religion and Race; report on United States Youth Council First Annual National Youth Conference on Human Rights; consideration of Resolution on the Committee on the National Student Legislative Conference; other business; and adjournment.

The Chairman annouced that apparently Mr. DesMarais had been delayed, and, if he should arrive during the meeting, with the consent of the body he would address the Steering Committee at that time.

The Chairman then presented a financial report to the Steering Committe Upon motion duly made, seconded, and unanimously carried, the financial report, as reported and as annexed hereto, and the expenditures therein contained, were approved.

Chairman Clary then proceeded to report on the three meetings of the Executive Committee held since its creation at the last meeting of the Steering Committee. A motion was made and seconded that the minutes of the Executive Committee meetings, as reported, be approved. After discussion on the legislative activities of the Conference and the relationship between the organs of the Conference (the General Conference, the Steering Committee, the Executive Committee, and the Officers) as they related to previous actions of the Executive Committee, and upon additional motion duly made, seconded, and carried by a two-thirds vote, the pending question (motion calling for approval of the minutes of the Executive Committee meetings) was laid on the table.

Dean L. Conrad, Chairman of the special interim Committee on Sponsoring Organizations, reported that the Conference currently had twenty Sponsoring Organizations: American Podiatry Students Association, B'nai B'rith Hillel Foundations, Campus Americans for Democratic Action, College Young Democratic Clubs of America, Congress of Racial Equality, Methodist Student Movement, National American Indian Youth Committee of Arrow, Inc., National Association for the Advancement of Colored People Youth and College Division, National Federation of Catholic College Students, National Student Christian Federation, National Student Young Women's Christian Association, North American Student Cooperative League, Student Civil Liberties Coordinatin, Committee, Student Nonviolent Coordinating Committee, Student Religious Liberals, Students for a Democratic Society, United States National Student Association, United States Student Press Association, United States Youth Council, and Young Christian Students, National Staff. (Later during the meeting. as hereinafter noted, it was announced that Law Students Civil Rights Research Council was thereby affiliating as a Sponsoring Organization.)) Committee Chairman Conrad further reported that B'nai B'rith Young Adults, National Newman Club Federation, and Student National Education Association had withdrawn as Sponsoring Organizations since the last Steering Committee meeting, and he proceeded to read letters from the last two organizations named. He also announced that Students Civil Liberties Coordinating Committee had recently affiliated as a Sponsoring Organization. He further reported that letters had been sent to all national fraternities and sororities as well as to other organizations inviting them to become Sponsoring Organizations of the Conference; some response was received, although none of them was represented at the present Steering Committee meeting. National Co-Chairman Clary regretfully announced that because of commitments with respect to th

forthcoming national political campaign Mr. Conrad was retiring as Committee Chairman and as the representative to the Steering Committee of the Student Religious Liberals, and Chairman Clary thanked Mr. Conrad for his outstanding work on behalf of the Conference during the months since its formation.

The Steering Committee then proceeded to consideration of the revised proposed Outline of Administrative Organization for the 1964 General Conference Meetings of the National Student Federal Aid To Education Conference, for the adoption of which a motion was made and seconded. After discussion, a motion was made and seconded to suspend the rules to consider the proposed Resolution on the Committee on the National Student Legislative Conference, whereupon the motion was withdrawn with the consent of the body. Thereafter, upon motion duly made, seconded, and carried by a two-thirds vote, the rules were suspended for a discussion, until 4:45 p.m., on the relationships between the organs of the Conference. During the discussion it was generally agreed that the Steering Committee should be a year-round body carrying on an educational legislative program on behalf of the Conference's policy on Federal aid to education. It was further agreed that the Executive Committee should carry on only what activities are specifically delegated by the Steering Committee. Considerable discussion ensued on the role to be played at General Conference Meetings, with differing opinion expressed as to whether the General Conference Meetings should include policy-making (plenary) sessions. Considerable discussion also ensued, with varying opinions expressed regarding who the participants should be at such General Conference meetings. It was agreed that the Committee on Rules and Order of Business (which hereafter was created) should consider and make recommendations to the Steering Committee concerning these and other issues relating to the role of the Conference and of its component parts. Upon motion duly made, seconded, and unanimously carried, the discussion was continued until 5:00 p.m.

During the above-mentioned discussion, Duncan McConnell, Field Representative of the Law Students Civil Rights Research Council, announced that his organization was thereby affiliating with the Conference as a Sponsoring Organization.

Chairman Clary the called a five-minute recess. After the meeting was called back to order, the Chairman announced that the pending question was the motion to adopt the said Outline of Administrative Organization. A motion was made and seconded to postpone until the next meeting, but, after discussion, was defeated. Upon motion duly made, seconded, and unanimously carried, the pending question was divided (according to the Roman numerals). After discussion and upon motion duly made, seconded, and carried, consideration of part I, as annexed hereto, was postponed to the next meeting. Upon motions, and amendments thereto, duly made, seconded, and carried, parts II, III, IV, V, and VI were adopted as annexed hereto. Thereafter, the suggestions was made that the Committee on Congressional Liaison and the Committee on Public Relations continue to function beyond the General Conference Meetings in 1964.

Chairman Clary then called a five-minute recess. After the meeting was called back to order, the following resignations by Officers were announced: Patrick C. Clary, as National Co-Chairman; Erin M. Clary, as Secretary; and James B. Hunt, Jr., as Executive Director. One vacancy on the Executive Committee, the position previously held by Tim Manring, was also announced.

Chairman Clary then declared nominations open for the position of National Co-Chairman as Chairman of the Steering Committee, and John A. Jacobsohn was nominated. Upon motion duly made, seconded, and unanimously carried, John A. Jacobsohn was elected National Co-Chairman by acclamation.

Chairman Clary then declared nominations open for the position of Secretary, and Ken Lester was nominated. Upon motion duly made, seconded, and unanimously carried, Ken Lester was elected Secretary by acclamation.

Chairman Clary then declared nominations open for the position of Executive Director, and Joseph A. Fallon was nominated. Upon motion duly made, seconded, and unanimously carried, Joseph A. Fallon was elected Executive Director by acclamation.

Chairman Clary then declared nominations open for the vacant position on the Executive Committee, and Joel Sharkey was nominated. Upon motion duly made, seconded, and unanimously carried, Joel Sharkey was elected to fill the vacant position on the Executive Committee.

Chairman Clary then declared nominations open for Chairman of the Committee on Sponsoring Organizations, and Howard Wachtel was nominated. Upon motion duly made, seconded, and unanimously carried, Howard Wachtel was elected by acclamation.

Chairman Clary then declared nominations open for Chairman of the Committee on Finance. Upon motion duly made, seconded, and carried, it was decided that the position of Chairman of the Committee on Finance would be left vacant to give the newly elected National Co-Chairman, John Jacobsohn, an opportunity to work in the area of finance.

Chairman Clary then declared nominations open for Chairman of the Committee on Rules and Order of Business, and Dean Gottehrer and Duncan McConnell were nominated, the latter of whom declined the nomination. Upon motion duly made, seconded, and unanimously carried, Dean Gottehrer was elected by acclamation.

Chairman Clary then declared nominations open for Chairman of the Committee on Resolutions, and Joel Sharkey was nominated. Upon motion duly made, seconded, and unanimously carried, Joel Sharkey was elected by acclamation.

Chairman Clary then declared nominations open for membership on the Committee on Rules and Order of Business. Michael Shagan, Duncan McConnell, Joel Sharkey, Patrick Clary, and Bill Miller were nominated. Upon motion duly made, seconded, and unanimously carried the foregoing five persons were elected members of the Committee on Rules and Order of Business by acclamatio

John A. Jacobsohn then reported on the National Student Conference on Religion and Race, on the steering committee of which he was a representative of B'nai B'rith Hillel Foundations. Joseph A. Fallon, Administrative Affairs Vice President of the United States Youth Council, then reported on the Council's First Annual National Youth Conference on Human Rights.

Chairman Clary then handed the gavel to Chairman-elect Jacobsohn and introduced the proposed Resolution on the Committee on the National Student Legislative Conference. After discussion and upon motion duly made, seconded, and unanimously carried, the said Resolution was adopted, as annexed hereto. After discussion and upon further motion duly made, seconded, and unanimously carried, selection of the Chairman of the Committee on the National Student Legislative Conference was postponed until the next meeting of the Steering Committee.

Chairman-elect Jacobsohn then returned the gavel to Chairman Clary. Upon motion duly made, seconded, and unanimously carried, the next meeting of the Steering Committee was set for Sunday, February 23, 1964, at 2:00 p.m., at a place to be set by National Co-Chairman-elect Jacobsohn.

Joel Sharkey then called for a unanimous vote of thanks and commendation to Retiring National Co-Chairman Patrick Clary, who in turn extended thanks and commendation to his wife Erin, the Retiring Secretary.

Upon motion duly made, seconded, and unanimously carried, the meeting was adjourned.

Respectfully submitted,

ERIN M. CLARY, Retiring Secretary

KEN LESTER, Secretary-elect

NATIONAL STUDENT FEDERAL AID TO EDUCATION CONFERENCE

Financial Report

Statement of Income and Expenses
For Period Covering Autust 1963 through January 1964

| | | |
|---|---|---|
| Income: | | |
| Remainder from registrations of April 1963 General Conference Meetings | $30.00 | |
| Contribution of Student Religious Liberals to expenses for April 1963 General Conference Meetings | 25.00 | |
| Contribution of Student Religious Liberals for operating costs* | 5.00 | |
| Contribution of Rev. Earl Brill on behalf of National Student Christian Federation for operating costs* | 5.00 | |
| Total Income | | $65.00 |
| Expenses: | | |
| Payment to Roberts & McInnis for mimeograph paper for April 1963 General Conference Meetings | $ 4.85 | |
| Payment to Shoreham Hotel Corp. for charges for April 1963 General Conference Meetings | 49.80 | |
| Payments to Mayfair Thermographers (White Plains, N.Y.) for 500 letterheads and delivery charges | 8.29 | |
| Payment to Roberts & McInnis for long distance telephone call on telephone no. 202-628-0032 to Mayfair Thermographers (White Plains, N.Y.) | 1.10 | |
| Payments to Postmaster, Washington, D. C., for rent of Post Office Box 28005, Central Station, Washington, D. C. 20005, for period covering October 1, 1963, through March 31, 1964 | 6.00 | |
| Payment to Gist and Chairs, Inc. for electronic stencil of letterhead | 2.06 | |
| Payment to International Industries (Culver City, California) for rubber stamp and pad | 1.85 | |
| Total Expenses | | 73.95 |
| Net Loss | | $ 8.95 |

Unpaid Liabilities**

| | | |
|---|---|---|
| Payment by personal check to National Student Federal Aid To Education Conference by National Co-Chairman Clary for advance for Conference's operating expenses | $5.50 | |
| Payment by personal check to Roberts & McInnis by National Co- Chairman Clary for mimeograph paper | 4.85 | |
| Total Unpaid Liabilities | | $10.35 |

* These two amounts represent the only payment received in response to the Executive Committee's request of August 9, 1963 for a contribution toward the Conference's operating expenses of at least $5.00 from each Sponsoring Organization, of which request all Sponsoring Organizations were notified by means of the October 16, 1963 Memorandum- Report of the Officers. However, the College Young Democratic Clubs of America, through the office of its Executive Secretary, has made numerous non-monetary contributions of mimeograph paper, envelopes, duplicating, and postage, which are not included in this Financial Report.

** These liabilities do not include approximately $20.00 personally paid by National Co-Chairman Clary during the above-stated period only for postage and photocopying, since no claim for reimbursement therefor is being made.

IV. Statement of Predicted Necessary Costs

V. Division of Committee Responsibilities

VI. Records of First General Conference Meetings

## I. PURPOSE AND PRINCIPLES:

The purpose and principles of the 1964 General Conference Meetings of the National Student Federal Aid To Education Conference contain the following essential elements to which the Steering Committee will adhere in making the appropriate plans and arrangements:

- The Conference continues to maintain its nature and activity on a strictly nonpartisan basis.
- The Meetings will provide an educational experience for the participants, increasing their understanding of the problems in American education and their relationship to Federal legislative action.
- The student delegates will individually visit their Senators and Representatives in Congress for the purpose of expressing their views as constituents on Federal legislation relating to education.
- The Conference will attempt to attract a maximum number of participants representing the broad base of the student population in the United States as a means of assuring accurate representative student opinion.

## II. SPONSORING ORGANIZATIONS:

A. Definition of Sponsoring Organization. A Sponsoring Organization contributes personnel and financial assistance, assists in planning and determining Conference activity, and/or makes other contributions to the Conference. However, status as a Sponsoring Organization does not imply approval of or support for the total policy of the Conference on Federal aid to education.

B. Method of Co-Sponsorship. Any national student organization, or other national organization with a major student membership, may affiliate with the Conference as a Sponsoring Organization by communication with a National Co-Chairman or other officer of the Conference and by selection of a representative to the Steering Committee. Any Sponsoring Organization may withdraw its co-sponsorship by similar communication.

## III. ADMINISTRATIVE STRUCTURE:

A. Steering Committee. The Steering Committee (composed of one voting representative from each Sponsoring Organization) shall be the supreme general supervisory body for planning the 1964 General Conference Meetings.

B. Executive Committee. The Executive Committee (composed of the two National Co-Chairmen, the Secretary, the Executive Director, and three other members elected by and from the Steering Committee), when mandated by the Steering Committee, shall conduct the business of the Conference between meetings of the Steering Committee for planning the 1964 General Conference Meetings.

C. Officers:

1. National Co-Chairmen. The National Co-Chairmen (the Chairman of the Steering Committee and Executive Committee and the Presiding Officer of General Conference Meetings) shall be the chief executive officers for planning the 1964 General Conference Meetings.

2. Secretary. The Secretary shall maintain the records of the plans for the 1964 General Conference Meetings.

3. Executive Director. The Executive Director shall be the staff coordinator of all planning procedures for the 1964 General Conference Meetings and shall be the administrative officers to whom all Committees of the Conference shall be responsible.

D. Committees. Areas of particular responsibility will be assigned to Committees. Committee Chairmen will be selected by the Steering Committee, and the other Committee members will be selected by the individual Committee Chairman, with the exception that the members of the Committee on Rules and Order of Business shall be selected by the Steering Committee. (Any Committee Chairman, who is not a member of the Steering Committee prior to his selection, will thereby become an ex officio nonvoting member of the Steering Committee.

1. Basic Committees. The Basic Committees, whose operations will begin immediately upon the adoption hereof, include:

   a. Committee on Sponsoring Organizations;
   b. Committee on Finance;
   c. Committee on Rules and Order of Business;
   d. Committee on Resolutions.

2. Functional Committees. The Functional Committees, whose planning will begin immediately after the adoption hereof but whose full-scale operations will begin at a later date, after the selection of a date for the 1964 General Conference Meetings, include:

   a. Committee on Program Arrangements;
   b. Committee on Workshops;
   c. Committee on Registration;
   d. Committee on Housing;
   e. Committee on Congressional Liaison;
   f. Committee on Public Relations.

IV. STATEMENT OF PREDICTED NECESSARY COSTS:

| | |
|---|---|
| Duplicating expenses | $400.00 |
| Printed stationery (letterheads and envelopes) | 150.00 |
| Printed Programs | 100.00 |
| Postage expenses | 500.00 |
| Physical accommodations | 100.00 |
| Transportation expenses | 150.00 |
| Staff Salaries (Executive Director and stenographer) | 600.00 |
| Total | $2,000.00 |

V. DIVISION OF COMMITTEE RESPONSIBILITIES:

A. Basic Committees:

1. Responsibilities of the Committee on Sponsoring Organizations:

a. Communicate with present Sponsoring Organizations to insure maximum participation in 1964 Meetings;

b. Attempt to enlist new additional Sponsoring Organizations.

2. Responsibilities of the Committee on Finance:

a. Survey and estimate costs and collect income to cover expenses of 1964 Meetings from the following sources:

(1) Sponsoring Organizations;
(2) Student delegate fees for 1964 Meetings;
(3) Other organizations and institutions.

b. Maintain financial records of all income and expenditures.

3. Responsibilities of the Committee on Rules and Order of Busines

a. Investigate and make initial proposals to the Steering Committee on date, place, etc. of 1964 Meetings;

b. Prepare and submit to Steering Committee proposed Resolution on Rules and Order of Business for 1964 Meeting

c. Prepare and submit alternatives to the Steering Committee on the nature and relationship of the various organs of the Conference.

4. Responsibilities of the Committee on Resolutions:

a. Conduct research and obtain resource materials on Federal aid to education and prepare positions papers;

b. Prepare drafts of resolutions containing alternative positions and statements of previous policies of the Conference on Federal aid to education for use by the Committee on Workshops.

B. Functional Committees:

1. Responsibilities of the Committee on Program Arrangements:

a. Obtain speakers for General Conference Meetings;

b. Make physical arrangements for headquarters hotel including:
(1) Large room for General Conference Meetings;
(2) Rooms for Workshops;
(3) Any other necessary facilities;

c. Prepare materials for mailings to potential delegates:
(1) Assist Sponsoring Organizations in preparing and sending their preliminary mailings to their members;
(2) Prepare necessary materials for General Mailing to potential delegates (to be made, if possible, by Sponsoring Organizations) contents of General Mailing to include:
(a) Letter on Conference stationery inviting students and particularly suggesting that delegates write to their Senators and Representative in advance for appointments;
(b) Tentative schedule for Conference;
(c) Resource materials;
(d) Information on Washington, D. C., etc.;
(e) Pre-Registration Blank(s);
(f) News release, prepared by Committee on Public Relations;

d. Finalize Conference Program:
(1) Determine final decisions on events and their schedule;
(2) Arrange for printing of Conference Program.

2. Responsibilities of the Committee on Workshops:

a. Obtain Workshop leaders:
   (1) Student chairmen (one for each Workshop)
   (2) Resource personnel (one for each Workshop);

b. Collect and organize data (proposed resolutions, or policy statements) from Committee on Resolutions for use in Workshops;

c. Organize Workshops and make Workshop assignments at Registration.

3. Responsibilities of the Committee on Registration:

a. Carry out Pre-Registration:
   (1) Prepare Pre-Registration Forms;
   (2) Receive and process Pre-Registration Forms returned by out-of-town delegates who pre-register by mail:
      (a) Report requests for housing to Committee on Housing.
      (b) Report all pre-registrants to Committee on Congressional Liaison;

b. Prepare Kits to be distributed to delegates at Registration, contents of Kits to include:
   (1) Name badge;
   (2) Conference Program;
   (3) Resource materials;
   (4) Workshop(s) assignment;
   (5) Housing assignment, if any;
   (6) Map of Washington, D. C., etc.;

c. Register delegates:
   (1) Arrange for registration table in lobby of headquarters hotel (through Committee on Program Arrangements);
   (2) Register delegates, distributing Kits and collecting registration fee;

d. Prepare follow-up questionnaire to be sent to delegates after General Conference Meetings.

5. Responsibilities of the Committee on Congressional Liaison:

a. Arrange for automobiles or buses to transport delegates from headquarters hotel to Capitol Hill;

b. Prepare map and enter on it all pre-registrants by Congressional Districts, as reported by the Committee on Registration, and enter on map all delegates at Registration;

c. Assist in making appointments with Congressmen and Senators:
   (1) Maintain records of appointments made by delegates;
   (2) Request carbon copies of letters from delegates to Congressmen and Senators requesting appointments;
   (3) Arrange for letters to Congressmen and Senators from Conference announcing visits by student constituents;

d. Compile and report results of delegates' appointments and visits with Congressmen and Senators.

6. Responsibilities of the Committee on Public Relations:

a. Publicize Conference nationally:
   (1) Place news stories on wire services;
   (2) Send news releases to contacts in all 50 states;

b. Publicize Conference on college campuses in Washington, D. C. area:
   (1) Fliers to be distributed;
   (2) Posters to be made;
   (3) Announcements for student and other radio stations;
   (4) News releases for student newspapers and metropolitan newspapers;

c. Arrange for photographs to be taken of delegates at Conference and follow-up publicity.

VI. RECORDS OF FIRST GENERAL CONFERENCE MEETINGS:

Permanent files have been organized, reorganized, and maintained for the Conference. The following represents a list of the three divisions within the file system and the subtitles of the individual file jackets. The records of the 1963 General Conference Meetings will be invaluable for use in planning the 1964 General Conference Meetings.

A. Current Records:

1. Minutes of General Conference Meetings
2. Minutes of Steering Committee Meetings
3. Minutes of Executive Committee Meetings
4. General Correspondence
5. Legislative Correspondence
6. Records of Legislative Activity
7. Mailings to Steering Committee, etc.
8. Current Address Lists
9. Current Governing Rules, etc.
10. Financial Records
11. Records of Account in The Riggs National Bank
12. Checkbook for The Riggs National Bank
13. General Promotion Materials
14. Committee on the National Student Legislative Conference
15. Miscellaneous

B. Plans for 1964 General Conference Meetings:

16. Documents: Outline of Administrative Organization
17. General Correspondence
18. Mailings
19. Committee on Sponsoring Organizations
20. Committee on Finance
21. Committee on Rules and Order of Business

STEERING COMMITTEE
NATIONAL STUDENT FEDERAL AID TO EDUCATION CONFERENCE

RESOLUTION ON THE
COMMITTEE ON THE NATIONAL STUDENT LEGISLATIVE CONFERENCE

WHEREAS, effective cooperation in the area of Federal aid to education among national student organizations has been evidence by and through this National Student Federal Aid To Education Conference; and

WHEREAS, the Steering Committee of the National Student Federal Aid To Education Conference recognizes the need for organized national student activity on other critical legislative issues of national concern; and

WHEREAS, the Officers of the National Student Federal Aid To Education Conference have proposed the formation of a committee to consider the merits of the expansion of the National Student Federal Aid To Education Conference into, or the creation of, a National Student Legislative Conference; be it therefore

RESOLVED, that the Steering Committee of the National Student Federal Aid To Education Conference hereby establishes the "Committee on the National Student Legislative Conference," the purpose of which shall be to study and evaluate the proposal for the National Student Legislative Conference and thereafter report its findings to this Steering Committee; and be it further

RESOLVED, that the said Committee on the National Student Legislative Conference shall be composed of the chief executive officer or his representative of each of the Sponsoring Organizations and the present and past Officers of the National Student Federal Aid To Education Conference, and that the chairman of the said Committee on the National Student Legislative Conference shall be elected by this Steering Committee.

ADOPTED this 8th day of February, A. D. 1964.

FROM: Norman Hill / Program Director
RE: Proposed Educational Series for Chapters

As the momentum of the civil rights movement increases and increased militancy and sense of urgency spreads through the minority community, CORE continues to grow at a more rapid rate. We welcome this development.

The national staff is also aware of its responsibility as our chapters become numerous and more and more people join our ranks of active members. We feel a greater obligation to better service our chapters, to aid in developing clear project objectives, to provide more training in nonviolent tactics and CORE philosophy, to facilitate an understanding of meaningful civil rights program and to develop strong groups by advising local chapter leadership and membership in organizational techniques

Enclosed is a brief outline of a series of classes currently being conducted by Philadelphia CORE. We urge your chapter to seriously consider a similar effort. The Program and Organization Departments will be happy to assist you in structuring such a series and make suggestions as to resource people, discussion leaders and lecturers.

We would appreciate your reaction to this proposal for the future effectiveness and growth of CORE nationally and locally is largely dependent on the quality and strength of our chapters.

GEORGIA: Atlanta - Atlanta U. chain; Harold Jackman Collection (Countee Cullen papers); Atlanta Life Insurance Co.; Southern Christian Leadership Conference Hqts.; Student Non-Violent Coordinating Committee Hqts.; Atlanta Daily World offices; Birthplace of Walter White, late NAACP exec. sec'ty. Albany - site of Albany Movement; Albany State College - Althea Gibson's and Wilma Rudolph's alma mater. Savannah - Carver Savings Bank

ILLINOIS: Chicago - Memorial plaque to Jean Baptiste Pointe DuSable, founder of Chicago, in heart of Windy City near site of his home, "Kinzie Mansion." Offices of Chicago Defender and Ebony Magazine; Provident Hospital, founded by Dr. Daniel Hale Williams; Victory Monument.

KANSAS: Beeler- George Washington Carver homestead. Nicodemus - ghost of all-Negro town. Kansas City - Douglas State Bank.

KENTUCKY: Berea - Berea College. Churchill Downs - Kentucky Derby, where famous jockey Isaac Murphy won a record 3 winners (1884, 1890, 1891). Hodgenville - 3 mile so. is 117 acre-Abraham Lincoln National Memorial Park. Louisville - Louisville Defender.

LOUISIANA: Delta - Birthplace of Mme C.J. Walker, cosmetics pioneer. New Orleans - Rampart St., stomping grounds of many jazz greats (King Oliver, Sidney Bechet, Louis Armstrong, etc.); Louisiana Weekly; Xavier U.

MARYLAND: Annapolis - Naval Academy; Plaque honoring Matt Henson who accompanied Admiral Peary on every expedition and was first man at North Pole. Bucktown - Dorchester County, Harriet Tubman birthplace. Baltimore- Afro-American; Morgan State College. Tuckahoe County - Birthplace of Frederick Douglass.

MASSACHUSETTS: Boston -Boston Commons' Crispus Attucks monument (erected in 1888). Bunker Hill Monument. Brookline - Famous tenor Roland Hayes' home. (B. in Curryville, Ga.) Cambridge - Harvard's Phillis Wheatley folio. Great Barrington - Birthplace of Dr. W.E.B. DuBois; log cabin-study of James Weldon Johnson, 1st NAACP exec. secty. New Haven- Yale U's Van Vechten Collection. New Bedford- Where Paul Cuffee son of African and Indian, owned a fleet of ships.

MICHIGAN: Battle Creek - Grave of Sojourner Truth. Detroit - Sojourner Truth Memorial (Originally called "Emancipation") Muhammad's Mosque #1 & University, 11529 Linwood Ave., Marshall - Triangle Park site of cabin of Adam Crosswhite, fugitive slave in famous 1847 case to return him to Kentucky. Mackinac Is. - Meeting place of Moral Rearmament group.

MISSISSIPPI: Alcorn - Alcorn A. & M., founded by 1st Negro U.S. Senator Hiram R. Revels; Jackson - Focal point of Miss. NAACP anti-jimcrow drive; Pineywoods School; Holly Springs - Miss. Industrial College; Tougaloo - Tougaloo Southern Christian College. Mound Bayou - All Negro town.

MISSOURI: Diamond-George Washington Carver National Monument; Jefferson City - Lincoln U.

NEBRASKA: Nr. Omaha-Boys Town.

NEW HAMPSHIRE: Jaffrey - Amos Fortune grave

NEW JERSEY: Newark - Newark Herald News

NEW YORK: Auburn - Home of Harriet Tubman preserved by AME Zion Church; Plaque to her in Auburn Courthouse. Irvington - Villa Lewaro, $250,000 home built for late Mme. C.J. Walker. Designed by Vertner Tandy; New York City - Bleeker & Mercer Sts. vic., African Grove, first Negro theatre in America; Lafayette Theatre - 7th Ave. & 132nd St., playhouse of original Lafayette Players (Rose McClendon, Abbie Mitchell, etc.) converted to Williams Institutional Church; Tree of Hope - 7th Ave. Hamilton Grange - 141st Street & Convent Ave.; 125th Street & 3rd Ave. - site of only public school in Harlem in 1853; Strivers Row - West 138th St., locale of many affluent Harlemites in early Twenties; Victory Mutual Life Insurance Co., East 125th Street; United Mutual Life Insurance Company, Lenox Ave.; Abyssinian Baptist Church - pastorate of Cong. Adam C. Powell; Amsterdam News, 8th Ave. bet. 125th & 126th Sts.; N.Y. Courier, East 125th St.; Brotherhood of Sleeping Car Porters, 217 W. 125th St.; Fraunces Tavern, Broad & Pearl Sts., George Washington dined there; Schomburg Collection, N.Y. Public Library's depository of "books by and about the Negro; "Dark Towers", 108 W. 136th St., one of the homes of A'Leilia Walker, granddaughter of Mme. C.J. Walker, and the scene of the Black Renaissance, the flowering of Negro artists and writers; Liberty Hall - a great zinc-roofed structure built by Marcus Garvey on 138th St.; 245 Williams St., African Free School #1, 1st real effort at education for Negroes started by Manumission Society in 1786 and precursor of N.Y. Public School System; Orange Street (now 42 Baxter St.), home of N.Y. African Society for Mutual Relief, founded by Peter Williams and others in 1808, 40th Street site of N.Y. Times, (bet. 6th & 7th Aves.) was originally Abyssinian Baptist Church and sold for $190,000; Carver Federal Savings & Loan, West 125th Street; St. Patrick 's Cemetery, Mott Street - Grave of Pierre Toussaint, one of 1st successful hairdressers. He was born in Santo Domingo, Haiti; AME Zion Church organized in 1796 by Peter Williams and others and built with his financing at Church & Leonard Sts.; St. Philips Church, now at 215 W. 133rd St., was opened on the site of the present Criminal Courthouse, Center St., in 1818 by Peter Williams, Jr., Charles C. Seifert Library, 203 W. 138th St.; Colloden Point, L.I.- Where Mutineer Joseph Cinque and crew docked L'Amistad, slave ship they took over; Saratoga-Springs and Racetrack (Isaac Murphy won 49 of 51 races there!) N. Elba - John Brown grave; Stony Point - Garrison of 600 men captured from British in 1779 thro' spy operation of Pompey. He was made a free man. Verplanck - Home of Edward Johnson, 1st Negro N.Y. Assemblyman.

NORTH CAROLINA: Charlotte-Carver College; Charlotte Post; Concord - Barber Scotia College; Durham - Mechanics & Farmers Bank, North Carolina Mutual Life Insurance Co.; Elizabethville - Elizabeth City State Teachers College; Salisbury - Livingston College; Raleigh - St. Augustine College; Shaw Univ.

OHIO: Cincinnati - Dumas House, 1st Negro Hotel in U.S., Harriet Beecher Stowe House. Dayton - 219 N. Summit Street, Last home of Paul Lawrence Dunbar; Columbus - First Baptist Church founded February 14, 1829, one of 1st interracial churches.

OKLAHOMA: Boley - Farmer's State Bank. N. Tulsa - First Baptist Church, Oklahoma Pl. & Greenwood Ave. Wilberforce - Wilberforce U. & Central State College.

PENNSYLVANIA: Chester - Lincoln University; Philadelphia - Bethel AME Church, founded by Richard Allen in 1794; Pittsburgh - Pittsburgh Courier. Phila. Citizens & Southern Bank. Montgomery County - James Bland grave monument erected to composer of "Carry me Back to old Virginny" by group of white Virginians.

RHODE ISLAND: Battle of Rhode Island, 1776
Negro troops turned back the Hessians 3 times.

SOUTH CAROLINA: Orangeburg - South Carolina State; nr. Charleston - Site of Cato Insurrection, 1st large slave uprising, 1740; Charleston-Denmark Vesey uprising 1822; Robert Smalls captured a Confed. gunboat and delivered it to Union forces. Columbia - Victory Savings Bank, Citizens' Savings Bank, Meharry Medical School.

TENNESSEE: Nashville - Fisk U.; Memphis - W.C. Handy Park; Tri-State Bank

VIRGINIA: Danville - First State Bank, Richmond- Virginia Union; Consolidated Bank & Trust Co.; Petersburg - Virginia State; Nr. Richmond - Gabriel Prosser Insurrection; Dismal Swamp - Nat Turner Rebellion 1831, Newport News - Crown Savings Bank. Hampton - Hampton Institute

WEST VIRGINIA - Harper's Ferry - John Brown's Raid, October 16-18, 1859.

James Farme r, National director
CORE
38 Park Row
New York 38, N. Y.

JAN 7 1964

Dear Mr. Farmer:

I don't have the name or address of the head of the New York City chapter of CORE, so I'm asking that you get this letter to him as well as do anything that you at the national office can do to make this situation better.

A proud member of CORE for several years, I got a terrible shock the other day when I read in the newspaper that CORE in NYC was demanding that Dr. Calvin Gross be dismissed as superintendent of schools. This hurts for two reasons. First, I hate to see this wonderful organization hurt our wonderful cause by failing to understand and trying to hurt anyone, especially its friends. This is going against the spirit of love and understanding which has characterized CORE and made it so successful.

Second, I hate to see CORE miss a chance to have such capable help. If you could ever have a fine friend to work with, it is Cal Gross. I worked with him closely as a principal in a district where he was the superintendent, and I know that his heart and mind are in the right place, working for what we -- and he -- believe in.

It so happens that before he came to our virtually all-white suburban district, I had tried to hire a Negro teacher and been turned down. When he came, I tried again and was able to get one hired, the first of several. He is on the right side; you can depend on that. —

There is mo question that New York City has real problems of school segregation which spring from housing segregation. Reasonable men of good will can differ widely on what is the best way to handle this in the best interest of all children. I would suggest that often we need to be reminded that two wrongs don't make a right, that, for instance, with education money so hard to come by, it may not make sense to hurt everyone's education by sinking too big a chunk into transportation because of housing segregation, or other ways that those closer to the situation may see that children may be hurt by some massive changes.

In any cas e, Ne w York City is lucky to have the fine, honest, selfless, dedicated, unprejudiced superintendent it has in Cal Gross, and CORE hurts its cause if it can't work with such a man. CORE must learn to work with such a ma n, giving him credit for wanting to do wha t is best, listening to what he believes is best, telling what you believe is best, and helping to build the cooperative spirit which has characterized CORE's work, and which is so necessary in improving the problems housing segregation has imposed on the schools.

Please, help our cause, yours, America's , and the world's, by working with rather than against such dedicated men as Cal Gross.

Sincerely,
Sanger B. Steel

CORE's policy statement

## The Negro in American History Textbooks

The undersigned, American historians and members of the History Department of the University of California, Berkeley, have been asked to review the American history textbooks that are most widely used in California from the standpoint of their treatment of Negroes. Attached are individual reports on the two state-adopted textbooks used in grade five, the three state-adopted textbooks used in grade eight, and the two high school textbooks reported to be most widely used in the state. These reports disclose an unhealthy condition in California education.

We are concerned first of all <u>as historians</u> that the history taught in our schools should accurately reflect the best findings of current scholarship. Professional scholars are aware that historical "truth" is an elusive quality. Well into the twentieth century professional scholars themselves were affected by the emotional aftermath of the Civil War, and there was a "northern" and a "southern" interpretation of such sensitive matters as slavery and Reconstruction. In the late nineteenth-century mood of national reconciliation, based on a widespread assumption of racial superiority among whites in both North and South, the "southern" view tended to prevail; and the deference of textbook publishers to the special sensitivities of the southern market has caused it to continue by and large to prevail in textbooks until this day. Meanwhile several generations of scholars, freer of sectional emotions and racist assumptions, through their researches and writings developed a substantially different understanding of many of these matters. Most of the textbooks we have examined reflect views on racial and sectional themes that have been rejected or drastically modified by the best of current historical scholarship.

We are additionally concerned <u>as citizens</u> because these historical distortions help perpetuate and intensify the pattern of racial discrimination which is one of our society's most serious problems. We are concerned not only because much of the material in these books is bad history, but additionally because it is a kind of bad history that reinforces notions among whites of their superiority and among Negroes of their inferiority.

Admittedly there is a danger in assessing historical writing in terms of its social consequences. A laudable desire to combat racism, and especially to bolster self-respect among Negro students, might result in exaggerating Negro contributions and the heroic qualities of Negro figures. In our view this would be an equal distortion of historical truth, and in the long run would fail to have the desire social effects.

We do feel, however, that the seriousness of the problem of racism underscores the textbook author's responsibility to portray the Negro's role in American life fully, accurately, and without either sentimentality or condescension. There should be a conscious effort to portray outstanding Negro figures selected by the same criterion of historical significance applied to non-Negro figures. Even those textbooks that now make some effort in this direction tend to single out men like Booker T. Washington and the minor scientist George Washington Carver, whose attitudes about race relations are least disturbing to conservative whites. Equally or more worthy of inclusion by the standard of historical relevance are men like Denmark Vesey, Nat Turner, Frederick Douglass, W. E. B. DuBois, and the Rev. Martin Luther King.

Always and everywhere our children should be told the truth, and the whole truth, as near as the best current scholarship can bring us to this elusive quality. This means, among other things, not obscuring the harsher aspects of the truth--the fact that Negroes entered American society as slaves, the brutalities of slavery, the racism of the Reconstruction and post-Reconstruction era, and the continuing depth and harshness of the problem of segregation and discrimination.

In the light of these general principles, the greatest defect in the textbooks we have examined is the virtual omission of the Negro. As several of the individual reports point out, the Negro does not "exist" in the books. The authors of the books must know that there are Negroes in America, and have been since 1619, but they evidently do not care to mention them too frequently. In one book there is no account of slavery in the colonial period; in a second, there is not a single word about Negroes after the Civil War; in a third (composed of documents and substantive chapters), the narrative does not mention Negroes in any connection.

As Ralph Ellison's novel, Invisible Man, demonstrates, whites frequently do not "see" Negroes. But Negroes are Americans, their history is part of American history. They need to be "seen" in textbooks. The space given Negro history will, of course, depend in part on the nature of the textbook, and minimum standards of coverage are proposed later in this report. What is especially important is that the discussions of Negroes appear as an integral part of the book. Perfunctory or casual treatment may imply that Negroes are not part of America.

Important aspects of Negro experience, of course, depart from that of many other groups in America. Negroes were not just another immigrant group: no other group could be so readily identified by its color, no other group was so systematically enslaved, and no other group has been subjected to as persistent and virulent discrimination. From the seventeenth century to our own day, Negro life has been filled with violence.

These facts highlight another failing of these textbooks that is almost as distressing as the invisibility of Negroes in them. All the texts play down or ignore the long history of violence between Negroes and whites, suggesting in different ways that racial contacts have been distinguished by a progressive harmony. The tone of a textbook is almost as important as anything it has to say. In their blandness and amoral optimism these books implicitly deny the obvious deprivations suffered by Negroes. In several places they go further, implying approval for the repression of Negroes or patronizing them as being unqualified for life in a free society.

We should now like to suggest in some detail the substantive and interpretive elements relating to Negroes that should be included in textbooks covering the whole period of American history. These suggestions do not reflect any effort to give a special emphasis for the purpose of present-day social effects, but only what is necessary for portraying accurately the Negro's role as understood by current scholarship. We regard the suggested content as an indispensable minimum at the junior high level. Some compression would doubtless be necessary at the elementary level, while high-school treatment should be expanded beyond our suggested content.

Early in the seventeenth century Negroes were brought by force from Africa to the English colonies, and over the next fifty years whites in the colonies reduced them to a slavery that was inherited and perpetual. The Negro incurred debasement because he was different, particularly because he was "heathen," black, and helpless. Other colonials entered types of servitude, but their arrangements were usually contractual, their rights were protected by the state, their physical and moral treatment was much better, and their status was temporary. Not even the American Indian, whose exploitation began in the seventeenth century, was reduced to slavery on a substantial scale. Textbooks should tell this story from its African beginnings, through the slave trade, to the enslavement of the Negro.

As the history of the origin of Negro slavery is important, so also is an understanding of slavery as a mature institution in the eighteenth and nineteenth century. Students should know that it existed in the North until after the Revolution. Textbooks should supply the most important statistics, for example, that in 1860 there were four million slaves in the United States, virtually all located in the South. Although a majority of southern whites held no slaves, one out of every two persons in the South's fourteen million people was either a slave or a member of a slaveholding family.

There should be a full account of the life of the slave, starting from the fact that he was an article of property held for the profit that could be gained from his labor. Recent scholarship has shown that slaves labored in southern factories as well as fields. They were often overworked, and customarily housed, clothed, and fed at only a subsistence level. As a result the slave was often ill, and his life expectancy was shorter than that of the whites around him. His master could punish or sell him at will, and could even kill him with near impunity, since slaves were not allowed to testify against white men. The informal character of slave marriages made for an unstable family life; and the whole pattern of debasement under slavery inflicted psychological and sociological scars from which Negroes still suffer.

Understandably the slave resented, even hated, his condition, though he usually disguised his real feelings by subservient behavior designed to protect him from the master's power. Students should be told that slaves often ran away, committed sabotage, and plotted revolts, and that on one occasion a slave, Nat Turner, led a bloody general insurrection against the masters.

Slavery's moral and social evil did not go unremarked in the colonial period. The Quakers, for example, insisted that slavery violated both human dignity and divine law. Not until the Revolution, however, did most Americans become sensitive to the discrepancy between slavery and their professed ideals as embodied in the Declaration of Independence. All the states north of Deleware put the institution on the road to extinction, slavery was banned from the Old Northwest, and the Constitutional Convention opened the way for abolition of the slave trade after 1808. Even in the upper South, where the tobacco economy was languishing, liberal leaders hoped that the gradual operation of economic forces would eventually permit the abolition of slavery. Instead the developing cotton market revived plantation agriculture. Slaves proved so productive in southern cotton fields that slaveowners shut their ears to any criticism of the institution until the Civil War brought its demise.

Meanwhile antislavery sentiment was growing in the North. Even here racist assumptions caused free Negroes to be segregated and discriminated against; but after 1830 a vocal abolitionist movement had increasing effect.

The efforts of the abolitionists, who included a substantial body of northern free Negroes, deserve serious and sympathetic exposition in textbooks. They are often derided for their occasional extravagance and for their internal disagreements, yet the fact is that they performed an immense service in educating Americans to the moral evils of slavery.

Abolitionists are frequently blamed for the Civil War by people who also insist that slavery had nothing to do with the coming of the war, that indeed the South fought to preserve state rights. Most scholars today agree, however, that slavery, and especially the issue of extending slavery into the territories, was fundamental. Certainly a careful appraisal of the slavery issue in national politics should be included in any textbook covering this period.

When the Civil War came, some 200,000 Negroes participated in the fighting that resulted in their formal emancipation. Following the war they also took an important part in the struggle over southern Reconstruction, which determined whether their emancipation was to be nominal or full. Reconstruction is a controversial issue in American history. The best scholarship today portrays sympathetically the radical Republicans in Congress, who opposed Lincoln's and later Johnson's plans for bringing the southern states back into the Union as quickly and painlessly as possible under conservative white leadership. The radicals, this scholarship holds, operated from mixed motives: to be sure they were interested in maintaining their political advantage, but they also wished to reform the structure of southern life. They especially wanted to help the Negro make himself a full partner in a free society.

It is in treating the Reconstruction state governments in the South that the older scholarship is most distorted by racist assumptions and most pernicious in its present-day effects. Modern scholarship overwhelmingly rejects the myth of Reconstruction as a saturnalia of misgovernment and corruption by ignorant and/or venal carpetbaggers, Negroes, and scalawags. Though the Reconstruction regimes had their quota of corruption, as did most other American governmental units in this period, the student needs to know that the radical Republican experiment for a time made progress toward a healthy reconstruction of southern society, that many Negroes served ably in the Reconstruction governments, and that the Reconstruction governments had many constructive accomplishments, particularly the extension of the public school system, and the protection of equal civil and political rights of all.

The experiment in Reconstruction failed after a few years, owing to a growing northern indifference which permitted conservative southern whites to regain control by violence, through such agencies as the Ku Klux Klan. Soon Negroes had been reduced to a kind of unofficial slavery. The vote was taken from them, first by trickery and intimidation and later by amendments to the state constitutions. Denied economic opportunity, many were exploited as share croppers, and others in menial jobs. By the end of the century they were born and reared in segregated communities, and lived and died in a state of inequality, isolated from the mainstream of American life. Southern state laws and a disastrous Supreme Court dicision, Plessy v. Ferguson, helped encase them in segregation.

Segregation and violence continued to characterize race relations in the South during the first half of the twentieth century. The hundreds of lynchings which used to occur annually have almost disappeared, but bombings, burnings, and shootings have increased. A more important change has been the movement of millions of Negroes to the cities and to the North. Here repression has been somewhat more subtle but only somewhat less damaging. Employers and unions relegate most Negroes to menial jobs. They are segregated into ghettoes, where they pay high rents for slum housing. Segregated housing means in turn segregated and inferior schools.

The other side of the story is the increasingly vigorous effort, especially by Negroes themselves, to change the situation. The growing Negro vote in crucial northern cities and the cold-war campaign to win the support of the uncommitted nations of the world has made the federal government more responsive to the plight of Negroes. Prodded by the National Association for the Advancement of Colored People (NAACP), the federal courts began to declare in the 1930's and 1940's against racial discrimination in voting, jury service, and educational opportunities. This movement culminated in the Brown decision of 1954 outlawing racial segregation in the public schools. Meanwhile the executive branch of the federal government had begun to move against segregation and discrimination in the armed forces and in civil service employment. Some state legislatures acted against discrimination in housing and employment, and Congress took its first cautious steps since Reconstruction to advance civil rights.

In the years since the Brown decision a civil-rights mass movement has taken shape among Negroes, utilizing the tactics of non-violent direct action to demand immediate and full equality in all areas. The Reverend Martin Luther King led Negroes of Montgomery, Alabama, in a year-long boycott of the city's segregated bus system. Negro college students launched "sit-in's" throughout the South in a movement that ended segregation at lunch counters and other public facilities in hundreds of southern communities. "Freedom riders" gave effect to court decisions outlawing segregation in transportation facilities. By 1963 mass demonstrations for equality in public facilities, jobs, education, and housing had spread from the South to many northern cities and over 200,000 people joined a "March on Washington" in support of President Kennedy's proposal that Congress pass a substantial civil-rights bill. These efforts were pursued in the face of mob violence, the arrests of thousands of demonstrators, the assassination of an NAACP leader in Mississippi, and the death of four Negro girls in the bombing of a Birmingham church.

This civil-rights revolution seems to us to be one of the major historical events of the mid-twentieth century and to demand full treatment in any American history textbook. The gains that have been made should be described realistically and not as an ode to the inevitable justice and progress of the democratic system. It should be made clear that the outcome of the civil-rights struggle is still in doubt, and that the inequalities are so great as to defy quick remedy by even the most vigorous effort.

In the midst of this civil-rights revolution, historians and educators have a clear responsibility, at the very least, to see to it that the role of Negroes in American life is taught fully and accurately. We have tried to indicate what a minimally full and accurate textbook account should be.

Surely the state of California can no longer tolerate textbooks that fall far short of this minimal standard.

Kenneth M. Stampp, Chairman
Winthrop D. Jordan
Lawrence W. Levine
Robert L. Middlekauff
Charles G. Sellers
George W. Stocking, Jr.

Miriam E. Mason and William H. Cartwright, Trail Blazers of American History (Boston: Ginn and Co., 1961). A supplementary textbook for grade five.

This book is a series of biographical stories about twenty-five outstanding Americans, arranged topically-chronologically so as to provide a general account of American history. The authors have made a special effort to include minority groups, devoting one of their stories to George Washington Carver and making clear the moral basis of the opposition to slavery. Yet even this well intended effort leaves a great deal to be desired.

The basic problem is that Negroes are completely invisible except in the Carver story and in the section on the Civil War, where the existence of slavery could hardly be ignored. The unit on colonization has a story on John Smith and the founding of Virginia, which might well have discussed the introduction of slavery. But instead readers of this book get the impression that the settlers of colonial America were entirely from Europe. As far along as p. 91, in the introduction to the unit on the Revolution, the following language is used: "You have learned how it happened that Europeans came to live in America . . . At first the colonists thought of themselves as Englishmen, not Americans." This unit discusses Washington's boyhood on a plantation (he "lived on a large farm called a plantation", p. 116) and his later management of Mount Vernon without any reference to the presence of slaves.

In fact Negroes or slaves are not mentioned at all in the book until p. 187, where Lincoln encounters slavery on his trip to New Orleans. This is in a unit on the Civil War consisting of stories about Lincoln and Lee. This unit emphasizes that both Lincoln and Lee opposed slavery, implies that Southerners maintained the institution because they "depended upon slaves to do the work" on their cotton plantations, and even suggests the worst aspects of slavery by reporting that in New Orleans young Lincoln "saw Negroes chained together." This section continues (p. 187): "Abe was a kind-hearted young man. It made him feel sad to see the slaves. 'I do not believe in slavery,' he thought. 'It must be hard to be a slave, even if your owner is kind. It would be terrible not to be free.'" (The suggestion that owners were usually kind is made again when Lee is reported as saying to his wife [p. 202], "They are our slaves, and we take good care of them. But if anything should happen to me, I would like to have our slaves set free.")

Yet even the Civil War section suffers from the book's persistent dodging of conflict and controversy, its unflagging commitment to a thesis of harmonious progress. The unit on the Civil War is introduced by the following statement (p. 183): "As our country grew, people in different parts of it came to have different ways of thinking about some of their problems. These differences led to quarrels and finally to another terrible war. This was called the War between the States. But when the war was over, men and women in all parts of the country worked together again to make America great and strong." (Cf. p. 192, "This war is now known as the War between the States or the Civil War.")

It should be no surprise then that the Negro drops completely from view with the Emancipation Proclamation, not to reappear at all except in the Carver story. Here again the ugly realities of race relations are completely obscured. It is explained several times that Carver had great difficulty finding a school he could go to and a college he could go to, but there is no explanation of why he had difficulty. Tuskegee is described (p. 250) as "a college in Alabama especially for Negro students," with no further explanation. The only general statement about the conditions of life for Negroes is a statement imputed to Carver (p. 251): "Many people of my race are poor. They have little to eat." The only statement suggesting a "race problem" is quoted from a citation in praise of Carver (p. 253): "'You have done much for the white people as well as for the Negroes,' he was told. 'You are a bridge between the two races.'"

While recognizing the authors' praiseworthy effort to include an outstanding Negro, I question whether Carver is the most appropriate figure to use. Carver deserves to be held up for emulation on account of his moral qualities, but the contention that his scientific work was distinguished or had any substantial effect on southern agriculture is by and large a sentimental myth. Moreover both his Tuskegee connection and the story line of his life are implicit arguments for Booker T. Washington's questionable philosophy of race salvation through humility and hard work.

The basic fault of this book, as of many others, is its effort to purvey a sweetness-and-light picture of American history that is both false and vicious in its effects. Children, both black and white, need to know that through the institution of slavery Negroes were a major element in American life from the very beginning. They need to know what slavery was like before the Civil War and what it has been like to live under the "new peculiar institution" of segregation and discrimination since the Civil War. They need to know that Negroes, despite the handicaps imposed upon them, produced leaders who fought for justice and quality. For the purposes of this book a figure like Frederick Douglass would have been much more representative of what has been best and most important in American Negro life.

Charles G. Sellers

Edna McGuire, The Story of American Freedom (New York: The Macmillan Co. 1961). A basic textbook for grade five.

Since my comments will serve only as partial basis for a later integrated report it seemed appropriate to offer them in unintegrated topical form.

SLAVERY:

Despite the suggestion on p. 229 that slavery was "a way of life", it is in fact treated in narrow, sterile and naively economic terms as a labor system pure and simple. Witness the definition on p. 161: "Such a system of securing workers through ownership is called slavery." The major account of its development (229-30) is couched in a similar framework: "A new country needs workers. . . . [The English] met this need in two ways. . . . [Although the first Negroes were bound servants], slavery later became common. . . . Slavery increased in the South, where it met a need for workers . . . [on] large plantations where only one crop was grown. . . . [The cotton gin increased the need for workers, which] brought an increase in slavery." The information offered as to its extent is at best misleading. The statement that it was "accepted in the South" is supplemented by the fact that many Southerners did not own slaves and that there were 18,000 free Negroes in New Orleans alone. Since this is the only numerical statement having to do with slavery in the whole book, one cannot help wondering if it was not intended to minimize the magnitude of the problem. As to the character of the slave system as "a way of life", we are given no more than incidental clues On p. 149 we are told that Negro women and children rode in wagons to Mississippi while the slave men walked; on p. 165, that Negro slaves sometimes ran away to Florida; on p. 230, that slaves "often ran away." But there is no inkling of the reasons why they might have run away, no mention of the slave trade, of the problems of discipline and order, no indication that Negro resistance to slavery ever took any other form than individual escape, no suggestion of the social or psychological meaning of slavery either for the Negro or the Southern white beyond the idea that the difference in labor systems was at the root of sectional conflict.

ABOLITION, CIVIL WAR AND RECONSTRUCTION:

One feels that this book treads a very narrow course between a dominant traditional concern for Southern prejudices and a dawning consciousness of the commercial significance of Negro-liberal sensitivities. If there is no attempt to justify slavery in other than economic terms, no repetition of the customary suggestion that Negroes worked better in the sun, neither is there any adequate indication of the moral implications of slavery. True, at one point it is suggested that "many people thought slavery was wrong" (p. 230), but we are given no clue why. And far from indicating that opposition to slavery expressed the moral spirit of our modern democratic-industrial culture, the book suggests in effect that the Northern opponents of slavery were irresponsible trouble-makers whose views had no relation to the irresistable moral currents of their time: "Many people thought that slavery was right. But certain other people thought that slavery was wrong" (p. 220) "Some Northerners [by attacking it]. . . stirred up differences between the American people." (p. 230) Indeed, the only person who would seem to be permitted a legitimate and intense moral opposition to slavery is R. E. Lee, who, for reasons unknown, "hated slavery" and freed his own slaves. (p. 240)

A similar excessive concern for Southern feelings is evident in regard to the war which began in 1861: "It is called the War Between the States. It is often [but not in this book] called the Civil War." (p. 229) This of course exactly reverses the priorities of actual historical and even popular usage. The distortion is minor, but nonetheless indicative. As to the war itself, my main observation would be that there is no mention whatsoever of the considerable Negro participation in the Union armies.

The rather confusing one-page discussion of Reconstruction and after (p. 244) perpetuates a number of traditional anti-Radical views: the men "who wanted to punish the South" passed laws "neither wise nor generous" and "several years of confusion followed". There is no mention of Black Code or Ku Klux Klan. Both the public school system and the breakup of the plantation system are by implication incorrectly attributed to the Redeemers. The New South is created in a phrase, the post-Reconstruction fate of Negroes disposed of with the laconic suggestion that they "learned to take care of themselves."

THE NEGRO IN MODERN AMERICA:

Once slavery is disposed of on p. 244, the treatment of the Negro changes radically. He disappears completely as the focus of a moral or social problem. There is no mention of the Jim Crow system, of the school segregation cases, or of the modern Negro movement for equality, though the book (published in 1961) carries right on up through Khrushchev to Castro. On the other hand, it is only after the Civil War and the abolition of slavery that Negroes emerge as distinguishable human individuals. Even so, only three Negroes are actually named in the whole book: Percy Julian and G. W. Carver, who receive brief biographies, and B. T. Washington, who is mentioned in the second of these as the founder of Tuskegee. But if Julian and Carver are "sympathetic" characters touched by the heroic aura surrounding all scientists in our society, their biographies are virtually devoid of specifically racial significance. And whether by chance or design, these two are juxtaposed in separation from the biographies of white scientists. (pp. 298-300)

BEYOND THE TEXT ITSELF:

In this lavishly illustrated book, there is only one picture (of the Tuskegee laboratory on p. 300) which contains people who are obviously Negro. There is also on p. 345 a small picture entitled "Negroes permitted to vote by Constitutional amendment--1870" in which two of the white-skinned figures might be identified as Negro by their costume and slightly Negroid characteristics. But beyond this, the Negro is invisible, even in the scene of life on a tobacco plantation. (p. 93) In the numerous exercises at the ends of chapters and sections, I was able to find less than a handful of questions or activities which related to the Negro. On p. 165, "slavery" is one of a list of words to master--but one looks in vain for the words "segregation", "discrimination", or "integration", though they are no more difficult than many others in the book. Aside from a general "How did each event pictured help democracy grow?" under the aforementioned picture on p. 345, the only "question for thought" having to do remotely with the Negro is one on p. 245: "Why did slavery grow in the South and die out in the North?" In the context provided, this question can only help to reinforce a generally amoral approach to slavery and its consequences. In the sections "Making History Live," the only suggestion relating to the Negro is one on p. 279 that students learn some of the "beautiful songs called spirituals" which "the Negroes have given us" (consider the implication of the phrasing). Among the many books suggested for "good readers", there is not one whose title indicates any relation to the Negro, unless it be Carl Sandburg's Abe Lincoln Grows Up.

INTERNAL EVIDENCE OF POSSIBLE ALTERNATIVE APPROACHES:

When I read the unelaborated suggestion on p. 175 that "their neighbors objected to certain Mormon beliefs", it occured to me that much of the treatment of the Negro might be explained simply as product of a general desire to avoid any potential controversy. But in this text, at least, this is not the case. The section between pages 305 and 316, "Life in Modern America", is in effect a discussion of a series of social issues in industrial America. If the treatment is insipid, the issues are nevertheless posed in normative terms (e.g., immigrants lived in "crowded, dark houses" and were sometimes "forced to work for very low pay", p. 307). If most of the problems are now safely in the past of historical consensus, some of them are still matters of current debate: e.g., that of adequate schools for America's growing population. It certainly would have been possible to include in this chapter, perhaps under the section "Saving America's Human Wealth," some treatment of the problems of integration.

Other alternatives are suggested by the treatment of the American Indian. (see esp. pages 253-57) An attempt is made here to present the Indian in both cultural and moral terms. "To understand the Indians on the last frontier, you need to know something of early Indians"---and we are given a picture of the variety of Indian cultural forms. There is some suggestion of the history of violence and double-dealing which reduced the Indian to reservation life, and even a discussion of present social prpblems in this historical context: "Some Indian tribes have a difficult time today. They cannot make a living on their lands. Their people have not had the training or help to make it possible for them to earn the things they need." The justice of the Indian resistance to the white advance is explicitly posed as a "question for thought". Students are elsewhere urged to choose among individual Indian chiefs as subjects for library research and class report (p. 279) While the role of the Negro and the Indian in American history and their positions in modern life are in many respects quite different, the utility of analogous approaches would seem obvious, both in more accurately portraying the Negro's historical role and in giving to both Negro and white children the sense of respect for self and fellow citizen which underlies the creation of a broader national identity.

George W. Stocking, Jr.

Harriett M. Brown and Joseph F. Guadagnolo, America Is My Country: The Heritage of a Free People (Boston: Houghton Mifflin Co., 1961). A supplementary textbook for grade eight.

About half of the book is devoted to teaching children how "We Americans Honor the Symbols of Our Democracy (the flag, the American eagle, the Statue of Liberty, etc.); which are "The Patriotic Landmarks and Monuments Every American Should Know" (Washington Monument, Lincoln Memorial, Mount Vernon, etc.); which are the best-known "Patriotic Poems and Songs for Americans" ("Old Ironsides," "I Am an American," etc.); and which are "The Patriotic Holidays that Americans Celebrate."

The substantive chapters are the following:

1. What It Means to Be an American
3. Our Documents of Freedom
4. Uncle Sam's Government in Washington
5. Washington, Capital of Our Nation
7. Great Americans Express the Spirit of Our Nation
10. Good Americans Make Democracy Work

How the Negro fares in these six chapters is easily described: he doesn't exist--he is never mentioned. He doesn't appear in the index; and, although the book is profusely illustrated, he does not appear in any of the photographs. The explanation for this is not white chauvinism but timidity--the desire not to offend anyone. Since this book was published in 1955, it was still possible not to be too concerned about offending Negroes.

Actually, the book exudes a vague sort of good will toward all men. On page 3 there is this statement: "We Americans are different in a very important way from the people of most countries. . . . [Unlike other countries] we Americans do not come from one national stock. We are descended from people of many nationalities--English, Scotch, Irish, German, Scandanavian, Italian, Polish, Russian, and so on. . . . We believe that our country is stronger and richer and more vigorous because our people come from many lands." The omission of Negroes, Asians, and Indians in this statement is an example of the timidity characteristic of this book.

On pages 7-8 is this statement about equality: "Under our Constitution and our laws all citizens have equal rights. . . . It makes no difference what a man does for a living, to what race or religion he belongs, or how much money he has--he is the equal of any other citizen in the eyes of the law. . . . We Americans believe that everyone should have an opportunity to get an education and a job, and the chance to make a decent life for himself and his family. We have done a great deal to make these things possible for all Americans. Although some of our people still do not enjoy equal opportunities, we are working toward our ideal of 'liberty and justice for all.'" Again, timidity accounts for the vagueness of this statement.

In Chapter III, which deals with "our documents of freedom," one statement (page 55) concerning "what we should know about our Constitution" declares: "We should know that no American can be refused the right to vote because of race, religion, or color." This, of course, is a vague and inaccurate reference to the Fifteenth Amendment. The following "documents of freedom" are

completely ignored: Thirteenth Amendment; Fourteenth Amendment; Lincoln's Emancipation Proclamation; the Supreme Court decision of 1954.

Chapter 7, "Great Americans Express the Spirit of Our Nation," is a medley of well-known quotations from Lincoln, Webster, Washington, Patrick Henry, etc. A portion of Lincoln's second inaugural address is included, with the passage referring to slavery omitted. Indeed, there is no quotation with any reference to slavery, to emancipation, or to the post-Civil War struggle for civil rights.

Chapter 10, "Good Americans Make Democracy Work," devotes more space to how to fight communism than to any other topic. One might expect at least a brief discussion of the problem of race relations in this chapter, but the authors ignore the problem. On page 207 they make this astonishing statement: "Today almost all men and women over twenty-one have the right to vote, regardless of their race or their color or whether they are property owners." But elsewhere in this chapter there are additional vague statements which are good in themselves but are not related to anything specific. On page 208: "We believe that every person deserves respect as a human being, no matter who he is. We believe in fair play and in justice for all." On page 209: "Respect for the rights of others is part of our way of life in our democracy." On page 218: "We know that there is still room for improvement in our democratic way of life. . . . Citizens may . . . criticize our democracy because there are still Americans who are not given equal rights in the community where they live. . . . However, "we do not condemn the game of football because of the errors and fumbles a team makes."

At the very end of the book are two relatively bold statements, if still somewhat vague:

Page 220: "We are a land of many races and nationalities, and we are proud that this is so. This is the wonderful and different thing about America. . . . There is no room in our way of life for racial prejudice. We are all Americans, living and working together in this great democracy of ours."

Page 222: Part of "A Pledge for Americans": "I will judge a person by what he is, not by his race or religion. I will not let prejudice affect my ideas of justice and fair play."

Rebekah R. Liebman and Gertrude A. Young, The Growth of America (Englewood Cliffs, N.J.: Prentice-Hall, Inc., 1959). A supplementary textbook for grade eight.

COLONIAL PERIOD

The first mention of Negroes in this book is with relation to their introduction into Va. "as slaves" in 1619. There is no mention of where they came from nor is the continent of Africa mentioned once in this book. At no time in the discussion of slavery is there any attempt to explain what slavery actually was or how it differed from other labor systems such as indentured servitude which receives several paragraphs. The reasons given for the introduction of slavery are wholly economic: "No one person could do by himself all the work that was necessary for growing crops on such a large piece of land, so the southern planter had slaves to help him." (p. 78) There is no attempt to explain why slavery was wholly Negro slavery. This seems to be taken for granted. In the rather extended discussion of the colonial plantation economy there is no direct description of the life and condition of the slaves though there is a strong intimation that it was quite decent.

> The slaves did most of the work, but the plantation owner worked too. . . . He had to see that his family was well provided for and also that there was enough food and clothing for his slaves. Not many planters neglected their slaves, since each one represented a great deal of money. . . . The planter's wife . . . saw to it . . . that the health of her family and of the slaves was good. (pp.78-79.)

The only comment that can even remotely be construed as a criticism of slavery is this stark one-sentence paragraph which appears in a discussion of colonial education: "For the slave population there was no education." (p. 86) There are no reasons given for this nor are the consequences of the lack of education pointed out. There is no further mention of slavery or the Negro during the colonial period or the Revolution or the early national period though in the section on Ante-Bellum America there is mention of the fact that the Northern states abolished slavery (no dates or reasons are given) and that such leaders as Washington, Jefferson, Franklin, Madison, and Henry opposed slavery (again no reasons are given).

ANTE-BELLUM PERIOD

The treatment of slavery in the section dealing with the causes of the Civil War (which is quaintly titled "WE DECIDE TO SEPARATE and then to UNITE") is as vague as it was in the earlier parts of this text. Again there is absolutely no description of slavery as an institution or a way of life and the term "slave" itself is nowhere defined. All that is mentioned is that the South was convinced that slavery was absolutely necessary to the maintenance of their economy and a group of people in the North called abolitionists felt that slavery was an evil. But there is not even a hint of the reasons for the latter's antipathy to slavery. Indeed, if anything, the author's treatment of slavery can be called favorable. In a sub-section entitled "UNCLE TOM'S CABIN CAUSES TROUBLE" they have this to say of Harriet Beecher Stowe's novel:

> It told of the sufferings of the slaves of the South and of the cruelty of the slave owners.

> Actually Uncle Tom's Cabin was not a fair nor a truthful picture of the conditions of the slaves. Although some slaves may have been badly treated, for the most part, they were not.
>
> Slaves represented a great deal of money to their owners, and their owners took care of them. There was also in many cases a close feeling between the slaves and their masters which the Abolitionists did not understand. (p. 288)

The treatment of the events leading up the Civil War is generally brief and inadequate. The Dred Scott Decision for instance is described as follows:

> The Supreme Court of the United States decided two things: (1) that Dred Scott was still a slave, and (2) that a slave owner had a right to take his slaves to any part of the country where there were no laws against slavery. (p. 290)

The part of the decision which most upset the North -- that Congress could take no action with relation to slavery in the territories -- is completely ignored.

CIVIL WAR AND RECONSTRUCTION

The treatment of the Civil War (which in these pages is almost invariably called The War Between the States) focuses mainly upon military events though this novel and fanciful account of the origins of the Emancipation Proclamation is given:

> During the war the people of the South had been using their slaves to do many jobs which helped in the war effort. They cooked for the army, dug trenches, drove wagons.
>
> The leaders in the North said that something should be done to stop this use of slaves. Lincoln's answer was the Emancipation Proclamation. (pp. 307-309)

There is no mention of the participation of the Negro in the Northern war effort.

The brief treatment of Reconstruction is the standard anti-Radical Republican pro-Southern Democrat account. Again there is no attempt to describe the condition of the freedmen. The 13th and 14th Amendments are mentioned without comment and the 15th is described with an obvious lack of approval:

> The right to vote or to hold office was not given to the leaders of the Confederacy. However, the Negroes were given these rights, although few of the Negroes could read or write; and none had any experience in government. (pp. 318-319)

There is no description of the advances in civil rights made under the Reconstruction governments though the corruption of the Carpetbaggers is vaguely described. There is also this totally amoral account of the K.K.K.:

> The purpose of the Ku Klux Klan was to frighten the Negroes and the people who were in control of the Southern state legislatures. The organization lasted for a time; but as the Southern states became once more part of the Union, <u>there was no longer any reason</u> for the existence of an organization such as the Ku Klux Klan. (pp. 319-320) (Italics mine)

Why there was no longer any reason for the Klan and precisely what happened to the Negro after Reconstruction is not explained. Indeed, this is the last mention of the Negro in this text. Although the book was published in 1959 and mentions events as recent as the launching of American space satellites in 1958, there is not one word about the civil rights movement, the migration of Negroes to the North, the condition of Negroes in the 20th Century, or the Supreme Court's 1954 Brown decision. After Reconstruction the Negro, who was treated vaguely enough up till then, becomes wholly invisible.

The striking things about this volume is the dehumanized way in which Negroes are treated. They are mentioned only in the institutional setting of slavery, and there inadequately, but never as human beings; their way of life, their problems, their gains, their struggles, are totally ignored. Not one Negro individual is named with the exception of Dred Scott. Words like "segregation" "desegregation" "integration" do not appear once anywhere in this account. In a book which has two or three illustrations on every page, there are only two illustrations depicting Negroes, both of them during slavery.

It should be mentioned that the authors are not morally obtuse or unwilling to take a stand on every issue. Thus they criticize the manner in which the Mormons were treated and describe their hardships (p. 263); they describe the often inhuman conditions of early factories, the plight of the workers and justify the rise of labor unions (pp. 275-276); the American Indians are treated sympathetically and the treatment accorded them by the white settlers is criticized (p. 336); the immigrants are treated with a bit less sympathy but at least their plight is described (pp. 360-361). The authors' treatment of the Negro therefore is not typical of their treatment of a number of other groups which have been victims of intolerance. The Negro above all is singled out not only for unsympathetic and inadequate treatment but for non-treatment.

Lawrence W. Levine

Mabel B. Casner, Ralph H. Gabriel, Edward L. Biller, and William H. Hartley, Story of the American Nation (New York: Harcourt, Brace & World, Inc., 1962). A basic textbook for grade eight.

While the treatment of Negroes in this eighth-grade American history textbook may be faulted at almost every turn, virtually all the myriad failings derive from four inter-related presuppositions.

The most pervasive and insidious (because least conscious) assumption is that Negroes are not Americans; they do not share in the Story of the American Nation because, evidently, they are not part of the "American people." This assumption colors every mention and non-mention of Negroes in the book. It is responsible for the failure to describe the African cultural background (though the civilizations of China and Japan are fulsomely portrayed, pp. 508-9) and for the absence of any discussion of Negro acculturation. (There were "Jewish people" and Roman Catholics, but "most people of the English colonies were Protestants," p. 87.) It is responsible for the implicit exclusion of Negroes from the "people of many countries"--the French, Scotch, Irish, Scotch-Irish and Germans are mentioned--who "move[d] to America's communities, seeking freedom and land "and who, living together, beg[a]n to create American ways of life," partly through "marriage between people of different nationalities" (pp. 92-4). Thus "the melting pot" is endorsed while the most important element in the process is ignored and, thereby, implicitly disapprobated. Similarly, during Reconstruction "the people of the South found themselves opposing the governments of their own states" (p. 426); this assertion is the more striking because the authors are usually careful to qualify, as in the unexceptionable assertion on the same page that Southern Republican Congressmen "did not truly represent the majority of the Southern people." One of the most unfortunate reflections of this exclusion of Negroes from the body national is the necessary and drastic depersonalization of Negroes. In the colonial period, while they are described as raising crops, working "as butlers, cooks, and gardeners" and "in shops," they are first introduced as one of "two different kinds of workers [who] were found [in order] to solve the labor shortage" (pp. 72-3). After Eli Whitney invents the cotton gin, "slaves" are "owned" and "slave labor" is "depended upon" and "needed," but the slaves don't do anything (p. 343). There is no description of life in slavery or of Negro resistance to it. The same tendency is evident with individual Negroes. Nat Turner (who "led a Negro rebellion in Virginia") is one of three individuals mentioned in a section describing Abolition (pp. 309-10); the other two, Garrison and Yancey [sic], are listed in the index; Turner is not. Later, B. T. Washington "opened Tuskegee Institute" (p. 431) and is admitted to the index. Finally, there is a picture and caption showing "Nkrumah of Ghana" speaking before the U.N. (p. 683). These three and Dred Scott are the only individual Negroes so much as mentioned in the text itself. On the other hand, three others are the subjects of books listed as enjoyable for further reading. A biography of Harriet Tubman is noted as the story of an underground railroad conductor (whose color is not specified, p. 319); Washington's Up From Slavery is a "description of a Negro boy's struggle and triumph" and "gives a good picture of Negro development after the war" (p. 435); a book on Ralph Bunche is also included (see below).

The second of the inter-related bases of approach is the felt necessity of avoiding any implication that racial differences have produced strains in American culture. This principle of avoidance concerns the Negro primarily and perhaps exclusively: witness the endorsement of racial pluralism and harmony in the section entitled "The population of Hawaii includes several races

of people--all now United States citizens" (p. 694). Sometimes the resultant faults are minor (relatively), as in the failure to indicate that the Spanish introduced Negro as well as Indian slavery (p. 33) and in omission of the racial element in the proslavery argument (p. 310). But this avoidance also results in omissions which produce serious distortion, as in the extended account of the Dred Scott decision where the court is presented as ruling that a slave was not a citizen while nothing is said of the court's decision on citizenship of Negroes (pp. 391-2). For a time, during Reconstruction, especially when the Klan terrorizes "Negro voters" and "Southerners struck at the Negro" (p. 428), Negroes as such--rather than as slaves (for there is no discussion of Negroes who were not)--became a factor in the story. But then, almost predictably, they simply drop from view, appearing neither as an issue nor as share croppers, much less as the targets of legislators or as migrants to Northern cities. They are finally resurrected, by implication rather than by name, in 1954 when the Supreme Court opines that the "segregation of races in the public schools" is "contrary to the Constitution." Just why this decision was made and why newspaper reporters had waited for it "for months" we are not told. Sectional differences in response to the decision are handled by reference to "Louisville" and "Baltimore" and "some communities." Still more remarkable is the ensuing discussion of two civil rights acts, in which "civil rights" are not described, the term Negro is not mentioned, and one waits until almost the end before the element of "race" is so much as referred to (pp. 689-90). Finally, the recommendation of a biography of Ralph Bunche describes him as "raised in poverty and in the midst of ugly discrimination" but does not identify him as a Negro. This reference to racial discrimination is the most direct in the book; it also seems to be the only one.

Tightly linked with unwillingness to acknowledge race as a factor in American history is an apparent subservience to Southern sensitivities on the subject. Indications turn up at every hand. Among them, in addition to many cited above, are the treatment of Abolition (the extent, motivation, and arguments of which are accorded less space than the Southern proslavery defense, pp. 309-11), the incorrect suggestion that opposition to slavery began "in the early 1800's" (and therefore, by implication, had no connection with the founding of the nation and the ideals of the Revolution and the Founding Fathers, p. 309), the literally invariable use of the ingenius "War Between the North and the South," and, inevitably, the unflattering presentation of the Radical Republicans.

Finally, the treatment of the Negro in this book is strongly colored by blandness, timidity, and an underlying determination to present life as pretty. In fact, of course, much of the Negro's experience in America has been far from pretty, and by implying otherwise this book distorts an important aspect of the American past.

Winthrop D. Jordan

Mabel B. Casner and Ralph H. Gabriel, The Story of American Democracy (New York: Harcourt, Brace and Co., third ed., 1955). A high school textbook.

These remarks are merely by way of supplement to my report on the eighth-grade textbook, Casner and Gabriel, Story of the American Nation (1962). The two books are substantially similar. Although the older book is used in the eleventh grade, it does not appear to be appreciably more sophisticated than the newer version; indeed the commercial publisher refers to the newer book as the "successor" of the older. While the newer book appears to be essentially an up-dated and more sprightly version of the older, there are important differences between the two in their treatment of the Negro which suggest that some of the newer book's deficiencies may have derived from an unwillingness to arouse certain Southern sensibilities.

Thus, though the older version is on most counts unsatisfactory in much the same ways as the newer, it includes several brief sections on the Negro which were altered or struck during revision. In contrast to the newer, it offers a picture of Crispus Attucks on a page headed "Patriots from many peoples" with the notation, "a Negro of Massachusetts, [who] was the first to die for American liberty" (p. 133); a not unfavorable reference to Uncle Tom's Cabin (p. 358); the assertion that "As time passed, the Klan fell into the hands of men who used it for selfish purposes" (p. 389); and a review question asking the student to think "What changes have taken place in the South since the end of the war . . . in the lot of the Negro" (p. 395). In the process of revision, too, the title of one chapter has been changed from "Americans Seek the Goal of Equal Opportunity" to "Americans Improve and Enrich Their Ways of Life." A section on ante-bellum theater and music in the older book, which included a discussion of "Negro spirituals" summarized by the statement that "The Negroes made the first important contribution to American music" (pp. 293-95, 297) has been discarded in the newer version. Gone (in the interests of factual accuracy?) is the statement re nullification, "In our day, nearly everybody accepts the power of the Supreme Court to decide whether or not a law is in accord with the Constitution" (p. 273). Gone too is the categorical statement, "The democratic ideal of equality left no room for slavery. . . ." (p. 297). Finally, the newer version contains nothing so explicit and forceful as the following: "For what is democracy but belief in the dignity of every individual human being, famous or unknown, whatever his color, race, or religion?" (pp. 658-59).

All in all, one gains the impression that The Story of American Democracy provides a more satisfactory treatment of Negroes in American history than does Story of the American Nation (1962), but also that the older book is far from faultless in this respect since it contains so many of the defects which appear in the newly revised version.

Winthrop D. Jordan

Ralph V. Harlow and Ruth Elizabeth Miller, Story of America (New York: Henry Holt and Co., revised ed., 1957). A high school textbook.

GENERAL COMMENT

This book contains few of the crudities that textbooks sometimes offer about Negroes. At times it shrinks before the tender sensibilities of the South, as, for example, in its elaborate explanation of why it refers to the Civil War as the "Civil War" ("The most common [name] but not the most correct") and as the "War Between the States." (p. 211) It sometimes strives to be fair in treating controversial points either by maintaining a gray impartiality or by belaboring both sides (the true and the good, it seems to assume, in such cases, are always in the middle, half-way between the two sides). There are some striking omissions -- the NAACP is not mentioned, nor are most Negro leaders in the nineteenth and twentieth centuries, and most court cases affecting Negro civil rights are ignored. And clumsy organization robs the book of some of its limited force (examples appear below).

After saying all this, I would still say that this text is much better than several others I examined. Despite omissions it makes a serious attempt to trace a variety of Negro experience. And in the process it shows that the Negro has suffered in America but it does not romanticize him.

SLAVERY

The book assumes that the origins of Negro slavery were solely economic: because land was cheap in the colonies and white labor expensive, it holds, Negroes were imported. This emphasis upon slavery as an economic institution is maintained throughout the book. There is no suggestion that slavery developed over a period of time until it was recognized in law in the 1660's nor is there a hint that the Negro's color contributed to his enslavement. (The book may intend to suggest that the unfree status of Negroes gradually hardened into slavery, for it refers to the human cargo of 1619 as "the first Negro servants," but thereafter it uses the word "slaves.") Slave life is ignored in the book and nothing is said about the psychological and social effects of the institution.

In most places the treatment of slavery is factual, though no facts are given about broad areas of slavery. There is one admirable assessment of slavery: "The benefits of slavery were all on the side of the owners. As the anti-slavery speaker said, nobody ever asked to be a slave . . . [and, the text concludes] nothing could make up for the loss of freedom. . . ." (p. 130)

This passage occurs in a chapter on nineteenth-century America. Nothing comparable is said about slavery in the colonial period. In fact slavery in the colonial period is treated in a chapter that presents colonial life as one of unrestrained achievement. The colonial period is a period of progress, of material advance; plantations served colonial enterprise and slaves served on plantations. In this context, which exudes utilitarian values, slavery may appear to the uncritical reader as an eminently useful -- and good -- institution.

The account of the colonial period may lend itself to a second inference (perhaps incompatible with the one above). The tone of the discussion of the colonial period is one of relentless optimism. Colonial America was a going concern, as those section headings suggest: "Ability counted more than birth in America," "A sturdy middle class developed," "Colonists could better themselves," "Royal governors had a hard time." "Free American air" is contrasted with the stuff unfree Europe breathed. The setting is one described by Turner, and in it slavery by implication appears as an aberrant condition of relatively little importance. And although success is attributed in large part to American opportunity, at one point race is credited in a disucssion of craftsmen like Benjamin Franklin -- "men of good racial stock and ability." (p. 29)

ABOLITION, CIVIL WAR, RECONSTRUCTION, THE NEW SOUTH:

Although the book's treatment of slavery is unsatisfactory, the worst of it may be cancelled out by the discussion of the anti-slavery movement. "Here," the discussion begins, "was a system [slavery] that denied all the values of the American system to millions of Americans. Slaves had no share in economic opportunity, no part in politics, no rights to education, and not much chance at moral improvement. Slavery was completely out of line with American ideals." (p. 151) But in its account of the anti-slavery movement, the book gives the impression that it was unfortunate that anyone insisted too strenuously that these American ideals should be extended to Negroes. Moderate men who "tried to end slavery by appealing to the American sense of fair play" are contrasted favorably with abolitionists, "men who thought they could get results by making everybody angry." (p. 152) To incite hatred was the intention of the abolitionists, according to the text. Although the text does not advocate the view attributed to the South -- that "the real danger to the welfare of the United States came not from slavery, but from abolitionists" -- it evidently admires a statement cited from Daniel Webster "that abolitionists accomplished nothing good or useful."

In a chapter heading the book makes obeisance to the argument that state rights "led to" the Civil War, but the substance of the chapter itself focuses on the problems of slavery, and especially the extension of slavery into the territories. The book fails to discuss any aspect of the part of Negroes in the War.

Although the discussion of Reconstruction relays several bankrupt views, at one point implying, for example, that two disgruntled leaders, Sumner and Stevens, were largely responsible for post war policy, for the most part it is detached and informed. It provides a detailed description of the "black codes," which are described as appearing as "slavery in disguise" (p. 236); it points out that although Negroes held offices they never controlled the government of any state; it shows that Congress attempted to protect Negroes and to elevate their social status; and it suggests that the motives of the Radical Republicans were mixed and included a desire to aid Negroes in the South. The treatment of the Ku Klux Klan is less satisfactory, implying in a muddy passage that the "Fourteenth Amendment" forced Southerners to create it. Its terrorist activities are described, however.

The Negro's position in the "New South" is rendered in detail and with considerable sensitivity. The book probably over-emphasizes the extent to which Negroes participated in the wealth of the New South. But it is more perceptive in its treatment of the denial of equality to Negroes. ("Southern whites refused to admit Negroes to any kind of equality." p. 250). The repressive techniques employed to maintain white supremacy are catalogued; the failure to observe the Fourteenth Amendment is described; and Jim Crow laws are listed. A striking passage penetrates the basis of the surface harmony in southern life. "White families employed Negro servants and nurses, and the relationship was kindly and pleasant on both sides--provided always that no one raised the issue of equality. White people patronized the shops and stores Negroes ran, provided only whites were served. Negro clergymen, doctors, lawyers, and teachers worked only among their own people. If Negroes made no attempt to change this system there was usually no trouble." (p. 251)

TWENTIETH-CENTURY NEGROES:

Negroes are scanted in the second half of the text; and there is no recognition of the importance of post Civil War racial conflict. With the exception of Jack Johnson and Joe Louis, the boxers, no Negro is mentioned nor are Negro problems noted until post-World War II America is treated. The problem Negroes faced in getting a living in the postwar period are only acknowledged. Negro sharecroppers are singled out as a deprived group, and the text notes that President Truman's Civil Rights Commission reported "that a good many Americans still found their color, their religion, or their national origin a barrier to bettering their social and economic positions." Civil rights, the text suggests, remained a crucial issue.

Finally, the Brown Case gets adequate treatment in the book. The decision is briefly described and Southern resistence is noted. Unfortunately the Brown case is treated without any reference to earlier Court cases; and the discussion fails to mention either the court's contention that separate facilities are inherently inequal or its use of sociological data.

Robert L. Middlekauff

## The Panel

Professor Winthrop D. Jordan. Mr. Jordan, a colonial historian, taught at Brown University and was a Fellow at the Institute of Early American History and Culture, Williamsburg, Virginia. He has written several articles on slavery and the Negro in colonial America, including "Modern Tensions and the Origins of American Slavery," Journal of Southern History, and "American Chiaroscuro: The Status and Definition of Mulattoes in the British Colonies," William and Mary Quarterly. He is the author of a forthcoming book to be entitled White Over Black: The Development of American Attitudes Toward the Negro, 1550-1812.

Professor Lawrence W. Levine. Mr. Levine teaches recent United States history at the University of California. Before assuming his position at Berkeley, he served on the faculties of City College of New York and Princeton University. He has written a book on William Jennings Bryan which will be published next year. Mr. Levine is currently studying Negro protest movements in the twentieth century.

Professor Robert L. Middlekauff. Mr. Middlekauff taught colonial history at Yale University before joining the faculty of the University of California. As H. F. Brinton Fellow at Yale, he wrote a prize winning dissertation which has been printed by Yale University Press as Ancients and Axioms: Secondary Education in Eighteenth-Century New England. Mr. Middlekauff is now engaged in research for an intellectual biography of New England's famed Mather family.

Professor Charles G. Sellers. Mr. Sellers has written numerous articles for scholarly journals, is the author of a biography of James Knox Polk, and has edited The Southerner as American, a collection of essays. He is a member of the Executive Committee of the Mississippi Valley Historical Association, a professional society of American historians, and of the Board of Editors of the Journal of Southern History. Mr. Sellers has been a Professor at Princeton University and a Fellow of the Center for Advanced Study in the Behavioral Sciences, Stanford. He is now on leave from the University of California as a Guggenheim Fellow.

Professor Kenneth M. Stampp. Mr. Stampp is chairman of the panel. He teaches the history of the Civil War and Reconstruction at the University of California and is the author of The Peculiar Institution, the definitive work on slavery in the United States. He is on the Executive Committee of the Pacific Coast Branch of the American Historical Association. Formerly Mr. Stampp taught in the South, served on the Executive Committee of the Mississippi Valley Historical Association, and was a Guggenheim Fellow. He was also Harmsworth Professor of American History at Oxford University and Commonwealth Fund Lecturer at the University of London.

Professor George W. Stocking, Jr. Mr. Stocking, a student of American social and cultural history, is a Fellow of the American Anthropological Association. He has written articles on the ideas of race and culture, and presently holds a fellowship from the American Council of Learned Societies to complete a book on Race and Culture in American Social Science, 1890-1915.

# Memorandum

To: Mr. James Farmer, National Director
Mr. Marvin Rich, Community Relations Director
Mr. Norman Hill, Program Director

From: Benjamin A. Brown, Chairman, CORE Southern Education Project

Subject: Proposal for a Program of Negro History in CORE Chapters

In recent weeks as the success of the CSEP program for supplying general books, equipment and now specialized books on Negro history, literature and culture has become known, there has been increased inquiries pouring in to me requesting information about CORE's Negro history program, how a group should go about setting up such a program, and suggestions, on learning that there was no CORE program for Negro history, to set up such a CORE program. We have, of course, been undertaking such a program for our Southern centers through our current drive to collect books on Negro and African history, literature and culture. The CSEP proposes that CORE consider undertaking a Negro history program to meet the rising demands of the Negro people to see their own image in the historical struggle for freedom and equality. This program could be easily spearheaded by the CORE Southern Education Project through its growing bibliographies from numerous sources on Negro life and history, and by expanding our program to include all CORE Chapters. We feel that CORE should heed the demands of the rising tide of Negro pride in their strength and the growing appreciation of their worth as Afro-Americans with a proud historical heritage of creativity and struggle for first class citizenship. Just as we have proven ourselves with other CSEP projects, we feel, so could we with this project.

"You cannot drink from the spring high up on mountain unless you climb for the water."

– Charles C. Spaulding

# NEGRO HISTORY GUIDE

## for Teachers

contributions of Afro-Americans to the American culture

Grades: Kindergarten- 6th grade

# Revised Negro History Guide for Teachers, with Suggestive Areas for Classroom Teaching

**Theme:** "Prominent Persons and Their Contributions"

**Pupils' Goal:** To understand contributions of the Negro and the impact of these contributions upon American culture.

**Teachers' Goal:** To guide pupils in understanding the acculturative process in America in relation to the Negroes' assimilation in the United States.

---

## Foreword

This teachers' guide is not complete and not meant to be prescriptive. It is intended to be a suggestive guide for teachers' use. Current research and future findings will be of value in expanding this guide. We hope that those who use the guide will find it helpful in assisting pupils to understand the uniqueness of the American culture. Within America's "symphony of people", there is to be found history and accomplishment of all its various ethnic groups.

Members of the original committee were staff members of P.S. 93. The guide is the result of a cooperative venture of the following:

Edwina C. Johnson, teacher, Chairman
Elias Emanuel, Assistant Principal
Alice Finnegan, Librarian
Lolita Chandler, teacher
Phyllis King, teacher
Aubrey Nicholson, teacher
Sylvia Taylor, teacher
Beatrice Thompson, teacher
Glovinia Wilkinson, teacher

## Acknowledgements

The committee is indebted to the National Association for the Study of Negro Life and History, Brooklyn Branch, for the generous use of their books, pictures, pamphlets, records and clippings as well as their constant encouragement.

We wish to thank Belafonte Presents, Inc. for specific help in the area of folk music.

The committee expresses appreciation to Mr. Julius Nislow, Principal P. S. 93, for his approval of the initial project, and Mr. Louis Abramowitz, Principal, P. S. 118 for his encouragement.

The Parent Association of P.S. 118 assisted in the preparation of the reprints.

The printing of the revised edition was made possible through a grant from the Jamaica Branch of the N.A.A.C.P.

K-2 (cont'd)

REFERENCE MATERIALS FOR TEACHERS:

"The Child's Story of the Negro" by Jane D. Shackelford
"Play Songs of the Deep South" by Altona Trent-Johns
"Gladiola Gardens" by Effie Lee Newsome
"Golden Slippers" by Arna Bontemps
"Bronzeville Boys and Girls" by Gwendolyn Brooks

GRADES 3 - 4

It is suggested that teachers utilize the material presented for K-2 as well as that which follows; thus the curriculum will have greater continuity. Sources under "References for Teachers" K-2 are valid for 3-4 teachers' use.

LANGUAGE ARTS

Pupils may learn of the lives of writers as well as of their work.

Paul Lawrence Dunbar

Paul Lawrence Dunbar was a poet. He wrote of many subjects, often using dialect, which is not easily understood today. One of his most beloved is, "The Seedling", which describes nature's wonder of spring and rejuvenation of plant life. Dunbar lived nearly one hundred years ago.

"The Seedling" may be read to the class, or learned by the class in whole or in part. See page 156, "The Child's Story of the Negro", for the poem in its entirety.

Phyllis Wheatley

Phyllis Wheatley was a slave girl. She showed talent at an early age, so her owners taught her to read and to write. She could read Latin as well as English. She wrote five books of verse. She wrote a poem in honor of George Washington and in return received from the President an invitation to visit him.

Effie Lee Newsome

Effie Lee Newsome is presently Elementary School Librarian at Central State College, Wilberforce, Ohio. She began writing poetry at the age of seven and has written on subjects children enjoy most: the seasons, toys, games, holidays, nature's mysteries and family life. Here are a few selections suitable for February and March, taken from"Gladiola Garden". Miss Newsome also paints and writes musical compositions.

The Game

I've often seen the snowflakes play
A funny little game of tag,
And dart in such a jerky way
They all get mixed up in their play

I always find it hard to say
Which lead and which ones lag
Their movements are so much the same
I can't find out who wins the game
They never stop to brag.
There really seems no way to know
What's "it" when suddenly - they go!

Snow Prints

Along the paths my overshoes
Make little pits intwos and twos,
But often on that very day
The sunshine melts them all away.

It seems a funny kind of waste,
These footprints getting all erased.
It takes a very ice day
To ever make them really stay.

The following poems may be learned by pupils:

Peanuts grow on vines,
They ripen under the ground.
Pretty soon from them we make
Peanut butter for all around.
E. Johnson

John Henry was a strong man
He worked hard every day.
He dug a tunnel with his hammer
Faster than a drill, they say.
E. Johnson

Brother Bear went everywhere
Eating the food of his friends.
They put him to sleep
In order to keep their food
Till the cold winter ends.
E. Johnson

Other Language Arts activities are : creative writing by the pupils, cooper.tive poems, narrative charts, jingles about G. W. Carver, John Henry and Brother Bear.

## Science

Plant sweet potatoes, follow the growth. Inspect peanuts, taste peanut butter. Teacher may have materials for children to see, touch and taste.

## Crafts

Make John Henry's hammer out of construction paper or oak tag or laundry cardboard.

Crayon pictures of large tunnel John Henry dug. Paint or crayon the sleeping bear, or the animals of the forest he knew.

## Physical Activities

Play songs:
Bon-Ton or Sissy in De Barn. "Play Songs of the Deep South" by Altona Trent-Johns, page 2.
Willowbee (First Version). "Play Songs of the Deep South," pg. 14
Chickama, Chickama-Craney Crow. "Play Songs of the Deep South pg.32
Skip to My Lou (formerly "Poor Lolette") - "Physical Activities Curriculum Bulletin #9, pg. 54
Shoo Fly - "Physical Activities Curriculum Bulletin", pg. 88

Big Muscle Activity.

Pretending to be John Henry, swinging his mighty hammer, in rhythm.

## Music

Folk songs
"There's a Little Wheel A-turning" - "Music Through the Year", pg.83
"Skip to My Lou"
"Chickama, Chickama"
"Jimmy Crack-corn" (Blue Tail Fly)
"John Henry"
"Shoo-Fly"

## Audio-Visual Aids

Filmstrip: "George Washington Carver"
Tape"John Henry and the Steam Drill" - from Tales from the Four Winds
Records: Y.P.R. 403-A "Let's all Join In" (includes John Henry)
F.C. 7406 - "Follow the Sun" - Charity Bailey
Illustrations for Bulletin Board: John Henry at Work
George Washington Carver
Brother Bear and Forest Friends

## Gwendolyn Brooks

Gwendolyn Brooks has written many poems. She is well known. She won the Pulitzer prize for 1954. Here is one of her poems:

### Val

When grown-ups at parties are laughing,
I do not like the sound.
It doesn't have any frosting
It doesn't go up from the ground.

So when my Daddy chased me
Away from the bend in the stair
With a "Get about your business!"
I didn't really care.

I'd rather be in the basement.
I'd rather be outside.
I'd rather get my bicycle
And ride.

The legend of John Henry (who actually lived and was famous for his strength and speed) is one of America's favorites. Music, poetry and stories have been told for generations about John Henry, who lived about a century ago, the son of a poor minister. His hard work and determination to be the "best" gave him a place among the immortals.

### John Henry, Mighty Man

John Henry was a healthy little boy. He grew up to be a strong man. His muscles were like steel and he helped to cut the first railroad tunnel through the mountains of West Virginia. The mountains are made of rocks and the rocks had to be drilled through.

John Henry, with his steel pick and iron hammer, became the best "driller" of the countryside. The mountains would tremble and shake when John Henry's hammer struck.

One day a large steam drill was brought to the mountain. This steam drill was a machine which could drill through rocks very rapidly. John Henry decided he would have a race with this machine. Everyone came to watch this race between a man and a machine.

John Henry won-he had drilled deeper and faster than the steam drill.

The folk story of Brother Bear can be read by the pupils themselves, or dramatized as the teacher reads to the class. The story can be found in the Language Arts of K-2.

### Language Arts Activities

The teacher may read any or all selections to class. Pupils may read poems and stories for themselves.

Creative Writing:
- Write to authors
- Present oral or written reports
- Compose class or individualpoems
- Start a picture and news file
- Children write of their own aspirations

### Social Studies

The stories of Frederick Douglass, George Washington Carver, Booker T. Washington, Mary McLeod Bethune and Benjamin Banneker, Crispus Attucks, Robert Smalls, are suitable. Excellent short stories may be found in "Child's Story of the Negro", by Jane Schackelford.

## Crispus Attucks, a Hero of the Revolutionary War

For many years, the anniversary of the American Independence was celebrated on March 5th, in honor of the day that the first fighting for liberty took place. The American colonists were growing tired of the British taxation and strict rules, and wished to be independent of Britain altogether.

In 1770, on March 5, a group of soldiers were standing in a place called Boston Commons, in Boston, Massachusetts. Small groups of people stood around talking, many of them angry because the soldiers kept telling them to move along.

One man stepped forth and dared the soldiers. He had become tired of the soldiers bullying people around - for he himself loved freedom more than anything else in the world. He had once been a slave and run away to freedom. His name was Crispus Attucks.

He would not move when the soldiers told him to. He and his friends quarreled with the soldiers. Crispus Attucks struck one of the soldiers down with a stick. His friends joined him in daring the soldiers. Crispus Attucks and his four friends were killed by the soldiers' bullets.

There is a statue in Boston Commons in honor of Crispus Attucks and his four brave companions.

## Captain Robert Smalls

There were 186,000 Negro soldiers in the Civil War. Many more served as spies, scouts and guides. No one was more willing to fight than the Negro, for the Civil War was fought because of slavery, and at that time, most Negroes in America were slaves.

Of the 186,000 who fought, there were many who won the highest honor, the Congressional Medal of Honor, for bravery beyond the call of duty.

One of the most exciting stories of the Civil War is about Robert Smalls. Robert Smalls was born April 5, 1893. He was born in slavery and obtained his freedom by impersonating the captain of a southern gun-boat and taking the gun-boat through to a Union port!

Smalls and his companions served as slaves aboard the Confederate gun-boat, "Planter". Smalls studied the manner in which the officers of the boat operated the machinery. One night, when the officers had left the boat, Robert Smalls took charge of the boat and guided it right through the Confederate ports. As he passed each post, he gave the correct signal, and the Confederate guards thought nothing strange was going on! The clever Robert Smalls pulled the Captain's hat down over his own head and pulled the collar of the Captain's coat around his neck so that his face would not be seen. Fortunately there was fog in the air and Smalls, and his companions, easily slipped the gunboat through the waters to Union territory.

Robert Smalls delivered the gun-boat to the Union lines, won his freedom and became a captain in the Union Navy. Later, he became a Congressman of the United States. He died in 1915.

His adventures are described in "Captain of the Planter", by Dorothy Sterling.

## Matthew A. Henson, Co-discoverer of the North Pole

Matthew A. Henson loved adventure even as a small boy. He joined Admiral Peary's party and made several trips with Admiral Peary to the North Pole region. On the successful trip, which enabled the men to finally reach the Pole, Admiral Peary suffered frost bite and Matthew A. Henson went ahead, and planted the American flag atop the world. A monument to Matthew Alexander Henson, co-discoverer of the North Pole, stands in Maryland in his honor.

## George Washington Carver

George Washington Carver was born a slave. He was very poor. Like most boys and girls, George loved to paint and to look at beautiful plants. He spent much time looking at beautiful plants. He decided to learn all he could about different plants and animals. He worked in many places and studied in several schools. He became famous when he discovered that from the sweet potatoes, more than 100 items could be made: such as, ink, paste, starch, meal, flour, vinegar and shoe blacking.

He made more than 300 different items from the peanuts, such as: milk, shaving lotions, eyes, linoleum, flour, butter (peanut butter), face powder, breakfast foods, and hair shampoo.

All of his life he continued to study and to paint. One of his paintings hangs in the Luxembourg Gallery in Paris. He is known all over the world because of his great work. He lived a useful and good life.

January 5th is "Carver Day" in New York State. Carver Day was establis in 1945 by Governor Thomas E. Dewey.

## Frederick Douglass

Frederick Douglass was born a slave, on February 14, 1817. He escaped by masquerading as a sailor. He learned to read and write by himself, for there were no schools for runaway slaves. He had a great desire to help other slaves become free--and a wish to serve America. He became a great writer and orator. He published a paper and wrote stories telling why Negroes should be freed.

## Booker T. Washington

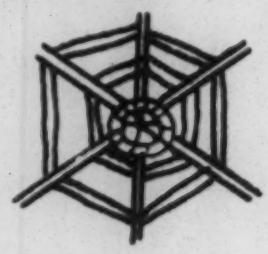
Booker T. Washington was born a slave on April 18, 1856. The house in which his family lived had no windows, no light, not even a floor--only the earth beneath their feet. From this poor and deprived home Booker T. Washington aspired to become a learned man. He worked diligently at cleaning, polishing and dusting in order to earn his keep in school. He attended college and was such a brilliant student, his name was suggested for higher honors. He was sent to Alabama and established Tuskegee Institute there. George Washington Carver began his famous scientific work at Tuskegee Institute. Mary Mc Leod Bethune gained hope and confidence by visiting Tuskegee Institute. Booker T. Washington is known all over the world because of his work and his ideas. When you visit New York University's Hall of Fame you will see a bust of Booker T. Washington, famous educator.

## Mary McLeod Bethune

Mary McLeod Bethune was born just afterall American slaves had been freed. She had sixteen brothers and sisters. The seventeen children worked with their parents to buy the land on which they had lived during slavery. When Mary was just a little girl, because she was unable to read, she was greatly insulted one day by a rich girl who could read. Mary decided that no one would insult her again--she would learn to read too. At that time in history, very few of the former slaves could read and there were almost no schools. Instead of being angry about the rich girl's insult, she decided to learn to read. Instead of fighting the rich girl who had hurt her feelings, she made up her mind to become educated and to help others. Mary finally learned to read and write. Then she decided to devote her whole life to teaching others. She began a school with only one dollar and fifty cents. She baked pies and sold them to workmen. She grew vegetables in the school garden and sold those to people in the community. She taught her pupils to sing beautiful songs--which are still sung today by students in her school. Before she died in 1954, Mrs. Bethune's school, Bethune-Cookman College, was worth over $1,000,000. Imagine, from $1.50 to $1,000,000. Mrs. Bethune received a high honor from the late President Franklin D. Roosevelt and became an advisor to him.

Benjamin Banneker

Benjamin Banneker lived almost 200 years ago. His grandmother taught him to read. He attended school in Maryland and spent most of his time studying instead of playing. He enjoyed arithmetic and spent long hours working out difficult problems. When he became a young man he began to experiment with mathematical ideas. He made a clock which ran for twenty years without need of repairs. It is said to have been the first striking clock made in the United States. George Washington called him to work with a group of other men to plan the city of Washington D.C. Washington, D.C. has an interesting feature. All streets radiate from the Capitol. An aerial view of the city has the following appearance:



Pupils might compare a map of Washington, D.C. with a map of New York City.

SCIENCE

Plant sweet potato, follow its growth. Inspect peanuts, taste peanut butter.

Discuss Dr. Carver's discoveries made from the sweet potato: ink, paste, starch, meal, flour, vinegar, shoe blacking, - several of the 100 he discovered.

Discuss some of Dr. Carver's more than 300 items made from the peanut: milk, butter, shaving lotion, linoleum, breakfast foods.

Relate the crude materials used by Dr. Carver to some used in the classroom - old jars, blotters, pieces of metal. Emphasize the simplicity of Dr. Carver's laboratory and the inventiveness of his mind.

Observe an ant colony.

Children may become familiar with the name of Charles Henry Turner. His scientific discoveries about habits of crawfish, ant and honey bee are of interest to children and may be presented simply.

Dr. Charles Turner and His Study of the Ants

A man who has learned more about ants than anyone else is Dr. Charles Henry Turner. He studied animal life and especially the social life of the ant. Here is a short story about the ants Dr. Turner observed:

> Ants live in colonies or ant cities. They live in a community as we do. There is a queen ant who lays the eggs. There are nurse ants who take care of the baby ants. There are soldier ants who protect the "city". There are workers who do all of the work. In an ant community everyone has a job to do and cooperates with everyone else.

CRAFTS

Crayon pictures of John Henry and his hammer.

Paint pictures of the tunnel John Henry dug, or the train which went through it.

Construct simple cabin such as the one Booker T. Washington wasborn in, windowless, floorless.

Dioramas of: an ant colony, or the garden in Mrs. Bethune's college showing the various vegetables grown by the pupils of her school, or of any of the other materials studied.

MUSIC

Several instruments were brought to the New World by the Negro - banjo, marimba, drums, xylophones. Beautiful music was composed.

"Certainly, Lord"
"Climbing up Jacob's Ladder"
"Swing Low, Sweet Chariot"

Playsongs are listed under Physical Activities.

Work songs:

Ballad of John Henry

Folk Songs: (Some of these are based on slave tunes or slave songs and have been modified from time to time).

Blue Tail Fly (Jimmie Crack Corn)
Kemo-Kimo
Buffalo Gals
The Grey Goose
Lullaby
Poor Boy
Shortnin' Bread

AUDIO-VISUAL AIDS

Film Strip: "Life of George Washington Carver"
Tape: "John Henry and The Steam Drill" - from Tales From the Four Winds
Records: Y.P.F. "Let's All Join In"
F.C. 7752 "The Glory of Negro History"
F.C. 7406 "Follow the Sun", Charity Bailey

"The Burl Ives Song Book" - Burl Ives
"Bronzeville Boys and Girls" - Gwendolyn Brooks

## GRADES 5 - 6

**Several American Negroes for Study** (See calendar, page 1)

**Language Arts:** Langston Hughes, Paul Lawrence Dunbar, Countee Cullen, Phyllis Wheatley, Gwendolyn Brooks, Arna Bontemps, Shirley Graham, Willard Motley.

**Social Studies:** Booker T. Washington, Mary McLeod Bethune, Harriet Tubman, Sojourner Truth, Frederick Douglass, Crispus Attucks, Banjamin Banneker, John Henry, Ralph Bunche, Carter G. Woodson, Paul Cuffe, Robert Smalls, William Carney, Henry Johnson, Matthew A. Henson, Robert Smalls.

**Science:** George Washington Carver (Chemurgy), Charles Henry Turner (marine-biology), Percy Julian (botany), William Hinton (bio-chemistry), Charles Drew (hematology), and Jan E. Matzeliger(invention), Daniel Hale Williams,surgery.

**Arts and Crafts:** George Washington Carver, Henry O. Tanner (painting), E. Simms Campbell (cartoons), Augusta Savage, Romare Bea rden (sculptors).

**Physical Activities:** Jesse Owens, Althea Gibson, Jackie Robinson, Roy Campanella, Bill Robinson, Pearl Primus, Carmen deLavallade

**Music:** W. C. Handy, R. Nathaniel Dett, Harry I. Burleigh, William Grant Still (composers); Count Basie, Louis Armstrong, Duke Ellington (instrumentalists); Marian Anderson, Charity Bailey, Josh White, Odetta, Harry Bellafonte, Lena Horne, Ella Fitzgerald (vocalists)

**Theatre:** Sidney Poitier, Ossie Davis, Roby Dee, Claudia McNeill, Paul Robeson, Ira Aldridge

**Implementing the approach:**

Pupils of grades 5 and 6 should know of individual lives and accomplishments of at least four or more persons from each field of endeavor. This can best be accomplished through research. The teacher may motivate pupils by asking any or all of the following questions:

1. Who was this person?
2. What was his background?
3. How did he receive his education?
4. For what is he famous?
5. What era of American History is represented by him?

The class will be able to discover the answers to these questions through committee work, individual reports, library assignments. Reports may be written or oral - committee or individual. Oral reports afford learning for the entire class and can be followed by discussion periods. Committee work affords the opportunity for group study of an area, each member reading books or sections of books about the contribution and life of one individual. Collating the work and orally presenting group findings assist in the development of cooperative habits and improved speech patterns.

Teachers may read summary stories from prededing sections as introductory material.

**LANGUAGE ARTS ACTIVITIES**

Committee reports on one field, ex: Science, Social Studies.
Individual reports.
Start picture file: daily papers, weekly Negro press, national magazines. (5x8 blank cards and a shoe box are suitable materials for beginning a file).
Original short stories.
Original poems.
Write to authors.
Book reviews.
At conclusion of unit, pupils may write composition describing personal reaction to study, or of own aspirations.
Choral speaking: selections from "Golden Slipper" are good.

## SOCIAL STUDIES

Discussion of: pioneers in education: Booker T. Washington, Mary McLeod Bethune
" " pioneers in abolition movement: Frederick Douglass, Sojourner Truth
" " pioneers in recording of Negro history: Carter G. Woodson, Arma Bontemps, Shirley Graham, W.E.B. DeBois
" " pioneers in the westward movement: James Beckwith, Jean DeSaible
" " Military participation inall wars U. S. engaged in, heroes of

## SCIENCE

Understandings to be developed:
Products of the peanut
Products of the sweet potato
Uses of the soy bean
Establishment of the Red CrossBlood Bank
Ant life in an ant colony

## CRAFTS

Paint the Underground Railroad in action
Paint pictures of individual studied
Clay models of famous person at work
Clay model of John Henry's tunnel
Diorama of ant city
" " Dr. Carver's laboratory
" " garden at Bethune-Cookman College
Paint delivery of gunboat "Planter", to Union lines during Civil War.

## PHYSICAL ACTIVITIES

Dances: May be taught or demonstrated
Cake walk
Charleston
Tap dance - "Dixie" - Physical Activities Book, pg. 152
Bunny hop
Fox-trot

## MUSIC

R. Nathaniel Dett, an editor of spirituals, wrote about Negro music:

> The American Negro gave the world a great gift of his music. His great-great-grandfather came from West Africa. Over there every town had secret societies in which musicians were trained. They played music and kept repeating and singing their history. To this music they clicked their fingernails, stamped their feet or clapped their hands.
>
> The types of music the American Negro is most famous for are: spirituals, work songs, play songs, blues, jazz. The spirituals were sung in the hope of freedom from slavery. The work songs were sung to keep time with the swinging of arms during work periods. The play songswere mainly danced and sung by children in the fields. Blues and then jazz grew out of the African beat and hope for freedom and finally, happiness.

Spirituals: "Let usBreak Bread Together" - Voices of the World, pg. 179
"Git on Board" - pg. 11
"I've Got a Robe" - Music Across the Country, pg. 134
"Certainly, Lord"
"Go Down, Moses"
"Climb Up Jacob's Ladder"
"Swing Low, Sweet Chariot"

Folk Songs: "Kemo-Kimo"
"Michael Row the Boat Ashore"
"Li'l Liza Jane"
"Buffalo Gals" (based on "Lulby Fan)
"Careless Love"

Songs of the Caribbean:
"Hold 'Em Joe"
" Caucaunne"
"Last Train to San Fernando"

Discuss: drum, banjo, marimba, xylophone, as instruments.

## AUDIO-VISUAL AIDS

Education - New York

9/62

SCHOOL INFORMATION

NEW YORK CITY:

OPEN ENROLLMENT PLAN

which enables children to transfer from crowded schools to under-utilized schools. Transfer will be freely given.

No transfer should be revoked unless by request of parent, or if child creates a "hazard" on the buses which are used to transport him to the school which is out of his area.

In case of trouble, the assistant superintendent of the borough is the only one who could order a "recall" of the transfer, and this is the person to see.

Main office of Board of Education (Superintendent Turner) feels any other reasons for recalling transfer "highly irregular." They seem to be completely sympathetic to the idea of open enrollment and want to comply.

of Schools

August 23, 1963.

Hon. James E. Allen, Jr.
Commissioner of Education
State Education Department
Albany 1, New York

Dear Dr. Allen:

With this letter I am transmitting to you, on behalf of the Board of Education, the report on integration in the New York City Schools which you requested on June 14, 1963.

The report will speak for itself, but I think you will recognize that it represents the most comprehensive effort to achieve maximum integration, both on the basis of past performance and future commitments of any city school system in the country. We have planned carefully and thoroughly, using the best advice we could get, to move toward complete ethnic integration to the limit permitted by feasibility and sound educational practice.

I should like to invite your attention particularly to our new free choice transfer policy and to the various kinds of urgent attention which have been directed toward developing real instructional excellence in schools where de facto segregation still exists.

Our plan represents all possible steps we have been able to devise, short of the compulsory interchange of Negro and white students between distant communities.

We expect that other new ideas of merit may be presented, and we shall welcome them. In addition we plan to keep our timetable up to date and to add new programs as rapidly as they are adjudged feasible. Your own suggestions will be appreciated.

Sincerely,

Calvin E. Gross

CEG:al

# PLAN FOR INTEGRATION

In the years since the historic 1954 decision of the United States Supreme Court, and even earlier, the New York City Public Schools have pursued earnestly their commitment to the objective of racial integration in the schools. Much has been accomplished. Nevertheless our midsummer 1963 stocktaking makes it clear that much more has to be done. Our past programs and activities were appropriate for their time, but we now propose to embark on a new series of endeavors which we hope will hasten the day when our city is completely integrated and all of our children will enjoy equal educational opportunity. We believe that school integration is an important part of our pursuit of excellence for all children.

We wish we were able now to provide not only the dates for each new step in our integration plan but also the date by which all our schools will have been desegregated. However, the complicated interrelationships of life in our City require that such a comprehensive program and timetable be developed jointly by all the many agencies whose activities affect integration. The Board of Education will take leadership in urging city-wide participation in the preparation of such a plan and timetable for integration.

In the meantime, we shall move ahead with attacks on four major fronts:

On the moral front the professional staff of the school system commits itself to pursue vigorously the unequivocal integration policy established by the Board of Education. We shall establish procedures to enlist a like commitment from civic and community groups in every part of the City.

On the desegregation front we shall develop and apply programs which will achieve ethnic integration to the extent permitted by feasibility and sound educational practice.

On the instructional front we shall move with imagination and energy to give every child the kind of education which is his birthright especially if he has been denied equal opportunity up until now. By raising children's aspirations and then establishing instructional programs to fulfill them we shall strive to provide a broad and thorough educational background for the new career and academic opportunities which will be opening to them. We shall work towards securing more college opportunities for Negro and Puerto Rican high school graduates.

On the job front we shall strengthen our program to prepare students with more precision for the job opportunities which will be offered by New York City industry and commerce. We shall insist that all our graduates be dealt with justly.

## I. PROGRAMS FOR IMMEDIATE ACTION IN SEPTEMBER 1963 OR SHORTLY AFTER

### A. On the Moral Front

1. Strong new top-level administrative impetus for accelerated integration. Continuous development of plans and updating of timetable. Strengthened staff in Central Zoning and Human Relations units. Both units to maintai direct liaison with the Superintendent of Schools.

2. Personal copies of the Board of Education's recently reaffirmed policy on integration to be distributed to every employee in the school system and made subject of conferences and other appropriate follow-up activities.

3. Strong enforcement of contract provisions against discrimination. All reasonable steps to bar contracts for construction, building repairs and maintenance, or purchase of textbooks, school supplies and equipment from concerns and unions that practice discrimination in employment.

4. Closer cooperation with the City Commission on Human Rights to promote integration goals.

5. Human relations training for teachers and supervisors. To be offered this fall in each field superintendent's area using materials and teaching guides developed in cooperation with colleges and employing additional specialists as instructors of pre-service and in-service courses, conferences and seminars.

6. Parent and community education. Human relations programs, workshops and seminars in each field superintendent's area, particularly designed to advance integration goals. Information to communities about human relations programs in the schools.

7. Extended use of group discussion techniques to promote integration. To promote identification, study and solution of integration problems through such techniques as those used by the Panel of Americans.

### B. On the Desegregation Front

1. Open Enrollment. As a transition fron the present Open Enrollment Program to the Free-Choice Transfer Program (described below), upward adjustment to be made in the utilization percentage of schools providing opportunity for integrated learning. Approximately 2,000 junior high school pupils heretofore unable to transfer as of September, 1963, because of lack of space, to be recanvassed for immediate placement.

   Meanwhile, this September, 4,000 additional pupils to be assigned under the existing Open Enrollment program, bringing the cumulative total of pupils in the program to more than 14,500, exclusive of the 2,000 to be recanvassed.

2. Zoning Changes. 100 new changes, all conforming to policies promoting integration, and twelve providing large numbers of children with a newly integrated situation. 644 high school zoning variances to improve ethnic balance. First open enrollment children to arrive in senior high schools by virtue of promotion from receiving junior high schools.

Constant and detailed consideration by the staff and the Board of the integration recommendations of the Central Zoning Unit with regard to the selection of school sites.

3. Systematic central and neighborhood collaboration among school staff and civil rights and community groups in planning and executing new programs of integration and instruction. Monthly meetings of Superintendent of Schools and his staff with civil rights and human relations groups. Exploration and application of integration measures for local areas by district councils of parent and community groups in the area of each field superintendent, working through the local school boards.

4. Use of consultants. Expert assistance from colleges and elsewhere to help solve both general problems and particular local situations.

5. Recruitment of more Negro and Puerto Rican teachers. Intensified efforts to attract minority group candidates, both within the City and outside. More Future Teacher Clubs in secondary schools with large numbers of Negro and Puerto Rican students. Conduct of examinations for teachers in central strategic locations outside New York City. New York University Study of Teacher Personnel Practices to guide future procedures.

6. Effort to increase the number of Negro and Puerto Rican Supervisors. New York University Study of Personnel Practices to serve as a guide for the development of procedures.

Professional seminars for teachers preparing for promotional examinations. At least two of these in areas of minority group concentration.

C. On the Instructional Front

1. Crash remedial programs. Afternoon and Saturday morning tutorial programs for pupils who need extra help or a place to do homework, and for dropouts.

2. Additional personnel and instructional materials for both sending and receiving schools in the Open Enrollment and Free Choice Transfer Programs.

3. Teaching about minority group contribution to American history and culture. To be stressed in all areas of teaching. Expedited development of new city-wide materials of instruction. Cooperation with colleges in producing readers oriented to urban living and social studies texts describing the actual part played by minority groups in the development of American history and culture. Expanded criteria in library book selection to reflect life in an integrated, democratic society.

4. Full complement of teachers in September. Written acceptances for all positions received as of August 1. From 10 to 25 supernumerary teachers assigned to each field superintendent as a pool ready for reassignment to schools as needed on opening day of school.

5. A City-wide, systematic Aspirational Inventory for all junior high school students. To identify the educational and vocational plans of students on an individual school and city-wide basis. This Occupational Index to serve as a guide in curriculum planning, student counselling and in helping pupils to raise and fulfill their aspirations.

6. Full five hours for first grade. More than half (of the first grade pupils approximately 46,000) to be put on a five-hour day in September.

7. More classes and services for socially maladjusted pupils. Increase in number of "600" schools, Junior Guidance Classes in elementary schools, Career-Guidance classes in junior high schools, and work-study as well as manpower development and training programs in secondary schools.

8. Review of policy on intelligence testing. To insure that group test intelligence scores do not militate against either pupils' self-images or their optimum teaching and learning programs.

9. Evaluation of the Higher Horizons Program. A comprehensive evaluation.

10. College opportunities for Negro and Puerto Rican Pupils. Conferences between Board of Education and Board of Higher Education to explore ways of increasing opportunities for minority group high school graduates to attend the city colleges.

D. On the Job Front

1. Extension of junior high school guidance services. To acquaint students, especially members of minority groups, with new opportunities for careers in business and industry, particularly some of the less frequently selected skilled trades in the construction industry.

2. Job Placement. Better year-round placement and guidance services in every high school, particularly to expedite contacts with employers seeking minority group graduates of trade courses, commercial courses, etc.

3. Dropouts. One high-ranking official to expand and coordinate all new and existing programs designed to anticipate and meet special needs of dropouts.

4. Liaison with trade unions. More comprehensive working relationships with the trade unions which represent crafts taught in vocational high schools, to insure placement of students. Cooperation with agencies and civic and labor groups to prevent discrimination in employment. Active participation in stepping up apprenticeship training and equalizing job opportunities for Negroes and Puerto Ricans.

## II. PROGRAMS TO BE PUT INTO EFFECT IN FEBRUARY, 1964 AND SEPTEMBER, 1964

Some of what we should like to do now cannot be set in motion until detailed plans have been made while school is in session. We shall inaugurate several actions now and put them into effect in February, 1964 at the change of semesters and in September, 1964.

### A. February, 1964

1. Free-Choice Transfer Policy. The basic purpose is to further integration by permitting any child in a school with a certain high percentage of Negro and/or Puerto Rican enrollment to transfer, at his parents' request, to any other school in the city where there is space available, on a first-come, first-served basis. The plan will apply to elementary, junior high and senior high schools. "Space available" will be defined on the basis of more than 100% capacity, probably at or near the city-wide index for overcrowding. This will provide more transfer space, since school utilization in Negro and Puerto Rican areas now runs as high as 130% of capacity.

   Transportation will be furnished free, by bus when feasible or by common-carrier tickets.

   After experience has been gained, the percentage of Negro and/or Puerto Rican concentration which qualifies a school will be lowered progressively. Once a school qualifies, any student in it may apply for transfer. The same opportunity will be offered to children in schools having an equivalent percentage of white concentration.

   Certain restrictions will necessarily prevail. For example, children now in the last grade of a school should not transfer during that year. Any children now participating in the Open Enrollment Program should continue during the remainder of the 1963-64 school year.

2. Junior High School Joint Zoning Pattern. At least one pair of junior high schools to be ready in February, 1964 for a joint zoning pattern with their cluster of feeding elementary schools. Other pairings under development. In the joint zoning pattern, two junior high schools in close proximity to each other divide the total population in the districts of the schools for maximum integration.

### B. September, 1964

Rezoning in Critical Fringe Areas - The Princeton Plan. Taking into account the necessity of community discussion and preparation, several other possibilities may be ready for inception in September, 1964. Urgent special attention will be given to rezoning opportunities in several critical fringe areas. For example, we see the possibility of introducing the Princeton Plan or adaptations in three or four locations in several boroughs, to be applied either to pairs of schools or multiple school composites. Under the Princeton Plan, two or more schools in close proximity are so organized that each building is used for certain grades for all pupils in the districts of the two or more schools, with the total encompassing all elementary grades for all pupils of these districts.

## III. OTHER ACTION BEYOND THE 1963-64 SCHOOL YEAR

A. Expansion of Pre-Kindergarten education.

B. Balanced ethnic distribution of teachers.

C. Substantial increase in programs to raise educational standards.

1. Reduction of class size

2. Equitable distribution of the best teachers

3. Intensified remedial programs

4. Introduction of effective new instructional techniques

D. Improvement of licensing and personnel procedures.

E. Elimination of elementary school classes in junior high schools to accommodate more Free-Choice Transfer pupils.

## IV. PROPOSALS FROM VARIOUS SOURCES FOR FURTHER STUDY

A. Educational Park - Several schools on a single large site providing unusual opportunities for integration and for the flexible use of a variety of educational practices.

B. High School de-zoning

C. "Reverse Open Enrollment"

D. Establishment of special-purpose integrated schools in de facto segregated areas.

## V. COST

We estimate that at least ten million dollars will be required to take major steps during the first year.

If the state were to revise its financial aid formulas to reflect adequately the unusual educational needs of our city's children and the effects of municipal overburden on big-city taxpayers, then the New York City Schools would receive several hundred million dollars more annually from the state.

We should be spending at least one hundred million dollars a year more on Item III, C. above, "Substantial increase in programs to raise educational standards," referring in this context of course only to de facto segregated schools.

The major items within the ten million dollars estimated are as follows:

| | |
|---|---|
| Strengthening the Central Zoning Unit | $40,000 |
| Strengthening the Human Relations Unit | $40,000 |
| Textbooks and Other Materials to Teach Minority Contributions to American History and Culture | $860,000 |
| Human Relations Courses | $5,000 |
| Personnel for Enforcement of Non-Distrimination Policy in Construction and Purchasing | $20,000 |
| Additional Transportation for Open Enrollment | $100,000 |
| Teacher Recruitment and Examination Outside New York City | $50,000 |
| Courses for Teachers Seeking Advancement | $10,000 |
| Crash Remedial Programs In All Special Service Schools | $3,000,000 |
| Full Complement of Teachers in "District Pools" To Eliminate "uncovered" classes | $2,200,000 |
| Aspirational Inventory of Junior High School Pupils | $75,000 |
| More Classes for Socially Maladjusted Pupils Additional "600" school | $135,000 |
| Junior Guidance Classes in Elementary Schools | $310,000 |
| Career Guidance Classes in Junior High Schools | $240,000 |
| High School Work-Study Programs | $25,000 |
| Evaluation of Higher Horizons Program | $40,000 |
| Added Jobs Placement Services and Liaison with Trade Unions | $20,000 |
| Increased Personnel in Open Enrollment and Free Transfer Schools | $3,000,000 |

## VI. PROGRESS IN INTEGRATION DURING PAST FEW YEARS

In the application of its policies of integration, the Board of Education has pursued two major courses of action, each complementary to the other:

A. To promote ethnic integration wherever possible.

B. To achieve equality of educational opportunity when, as a result of the operation of forces beyond its control, ethnic integration has not been possible.

These efforts toward integration have been summarized on a number of occasions within recent years. Eight of these reports would seem to provide a good over-view of these efforts:

"Toward Greater Opportunity," June 1960, (enclosure "D")

"Integration Progress Report, October 4, 1962" (enclosure "E")

"New York City Programs for the Educationally Disadvantaged," February, 1963 (enclosure "F")

"Report of the Committee on Integration, Part I," February 1963 (enclosure "G")

"Central Zoning Unit Annual Report 1961-1962" (enclosure "H")

"The Open Enrollment Program in the Elementary Schools," June 1961 (enclosure "I")

"Annual Report 1955-56 - Part II, Puerto Rican Children" (enclosure "K")

Final report on Puerto Rican Study - "The Future Is Now" 1958 (enclosure "L")

Programs toward integration are in a continuous process of improvement and expansion. Those which will have outlived their usefulness will be discarded.

Among the highlights of the advances toward integration set forth in these reports are the following:

ON THE MORAL FRONT

Establishment of Human Relations Unit

Establishment of Education Information Services and Public Relations Unit

Cooperation with special community projects: Mobilization for Youth, Associated Community Teams, Harlem Youth Opportunities Unlimited.

## ON THE DESEGREGATION FRONT

Creation of Central Zoning Unit; maintenance of ethnic data for pupils.

Establishment of ethnic integration as one of the cardinal principles of zoning

Open Enrollment program and Building Utilization program, which resulted, between 1958 and 1962, in the transfer of almost 60,000 children for better integration. (enclosure "I")

Establishment of ethnic integration as a cardinal principle in site selection.

Acceleration of building program in areas on the fringes of heavy concentrations of Negro and Puerto Rican pupils.

A census of teachers, in order to determine the over-all distribution of ethnic groups.

Strengthened coordination between Central Zoning Unit and Office of School Planning

Development and extension of extra-curricular and interscholastic programs leading to improved integration of pupils.

## ON THE INSTRUCTIONAL FRONT

Puerto Rican study of education of non-English speaking children.

Organization of Demonstration Guidance Project to salvage academic potential of disadvantaged pupils. Extension into Higher Horizons program.

Establishment of Teacher Recruitment Unit.

Acceptance of principle of special and additional services for disadvantaged children as necessary for equality of educational opportunity.

Expansion of programs for dropouts and potential dropouts, and creation of new programs for such pupils.

Expansion of special programs for children with serious problems--Junior Guidance classes, Career Guidance classes, "600" schools, Early Identification and Prevention, All-Day Neighborhood Schools, Pre-Kindergarten Classes and others.

Special programs, in cooperation with colleges and universities, of training teachers for service in the inner city (both pre-service and in-service).

Administrative devices to improve and equalize quality of teachers in all schools.

Efforts to secure instructional materials which will be appropriate for children in big-city schools, and which will give all children adequate information concerning the contributions to our American democracy of all ethnic groups, and particularly of Negro and Puerto Rican groups.

## ON THE JOB FRONT

**Development of programs to increase employment opportunities of pupils and former pupils**

The Cooperative Education Program, enabling high school students, sixteen years of age and over to obtain employment and job training while attending school. Students in school in alternate weeks, and employed full time duringweeks not in school. Central job placement through the Cooperative Education Office. Students placed in jobs in commerce, industry and municipal departments.

The School to Employment Program, in fifteen schools, providing a work experience program for potential dropouts. Students in school in the morning and in part-time jobs in the afternoon. Special curriculum materials. Placement by the teacher-coordinator of the program in each school.

The Youth Employment Service of the New York State Employment Service, with representatives in over forty high schools. Testing and placement of graduates and dropouts.

Increased coordination among schools, official labor agencies and equal opportunity organizations, such as the Urban League.

## VII. STATEMENTS OF POLICY

On December 23, 1954, a resolution was unanimously approved by the Board of Education which stated clearly that its policy and program was to devise and put into operation a plan which would prevent the further development of racially homogeneous schools, and integrate the existing ones as quickly as possible. The intent of that resolution is well expressed in the following excerpts:

> ". . . We, therefore, interpret the May 17th decision of the United States Supreme Court as a legal and moral reaffirmation of our fundamental educational principles."
>
> ". . . the Board of Education of the City of New York is determined to accept the challenge implicit in the language and spirit of the decision of the United States Supreme Court. We will seek a solution to these problems and take action with dispatch implementing the recommendations resulting from a systematic and objective study of the problem here presented." (Enclosure "B")

On June 26, 1963, the present Board of Education unanimously reaffirmed its commitment to the objective of racial integration in the schools, and set forth its responsibilities to its pupils, its personnel, and to the communities in the furtherance of its integration policies. This most recent resolution stated:

> "Our schools must not be neutral in the struggle of society to better itself. We must not overlook the harmful effects of discrimination on the education of all children. Moreover, within the limits of our control, we must not acquiesce in the undemocratic school patterns which are a concomitant of segregated housing. Furthermore, we must continue our policy of not tolerating racial or religious prejudice on the part of any member of our staffs. If education is to fulfill its responsibility, it must recognize that the school world has a significant influence on each child's attitudes and affects the future of democracy..." (enclosure "C")

## VIII. NUMBERS OF SCHOOLS WITH 50% OR MORE NEGRO AND/OR PUERTO RICAN ENROLLMENT

| | Elem. | | Jr. HS | | Acad. HS | | Voc. HS | |
|---|---|---|---|---|---|---|---|---|
| BOROUGH | Total Schools | 50% or More | Total Schools | 50% or More | Total Schools | 50% or More | Total Schools | 50% o More |
| Manhattan | 97 | 74 | 24 | 20 | 10 | 6 | 10 | 7 |
| Bronx | 100 | 49 | 27 | 13 | 9 | 1 | 4 | 4 |
| Brooklyn | 193 | 77 | 46 | 20 | 20 | 3 | 9 | 3 |
| Queens | 156 | 26 | 31 | 3 | 14 | 0 | 5 | 1 |
| Richmond | 32 | 0 | 3 | 0 | 4 | 0 | 1 | 0 |
| Total | 578 | 226 | 131 | 56 | 57 | 10 | 29 | 15 |

An analysis of this table is attached (enclosure "A") giving the name, type and location of these schools, and the number and percent of children in each ethnic group.

Schools

November 7, 1963

Mrs. Judith Milkman
244-17 61st Avenue
Douglaston, New York

Dear Mrs. Milkman:

Integration in New York City schools can only be approached sucessfully on two levels; that is to raise the integration problem along with a program designed to raise the quality of education in New York schools generally, therefore, CORE is for integration being a prime factor in zoning and re-zoning, districting and redictricting, site selection for new schools, staffing of every phase of administration add teaching, and the curricula which reflects the constitution of all races with historical and current authenticity. Because we feel that a school should be an integral part of the community in which it is located, in order to be most repponsive to the needs of parents and children, we feel that a crash financial program to raise the quality of education in all schools, particularly those located in the ghetto would be more effective than mass bussing.

Sincerely,

Norman Hill
Director
PROGRAM DEPARTMENT

NH/ss

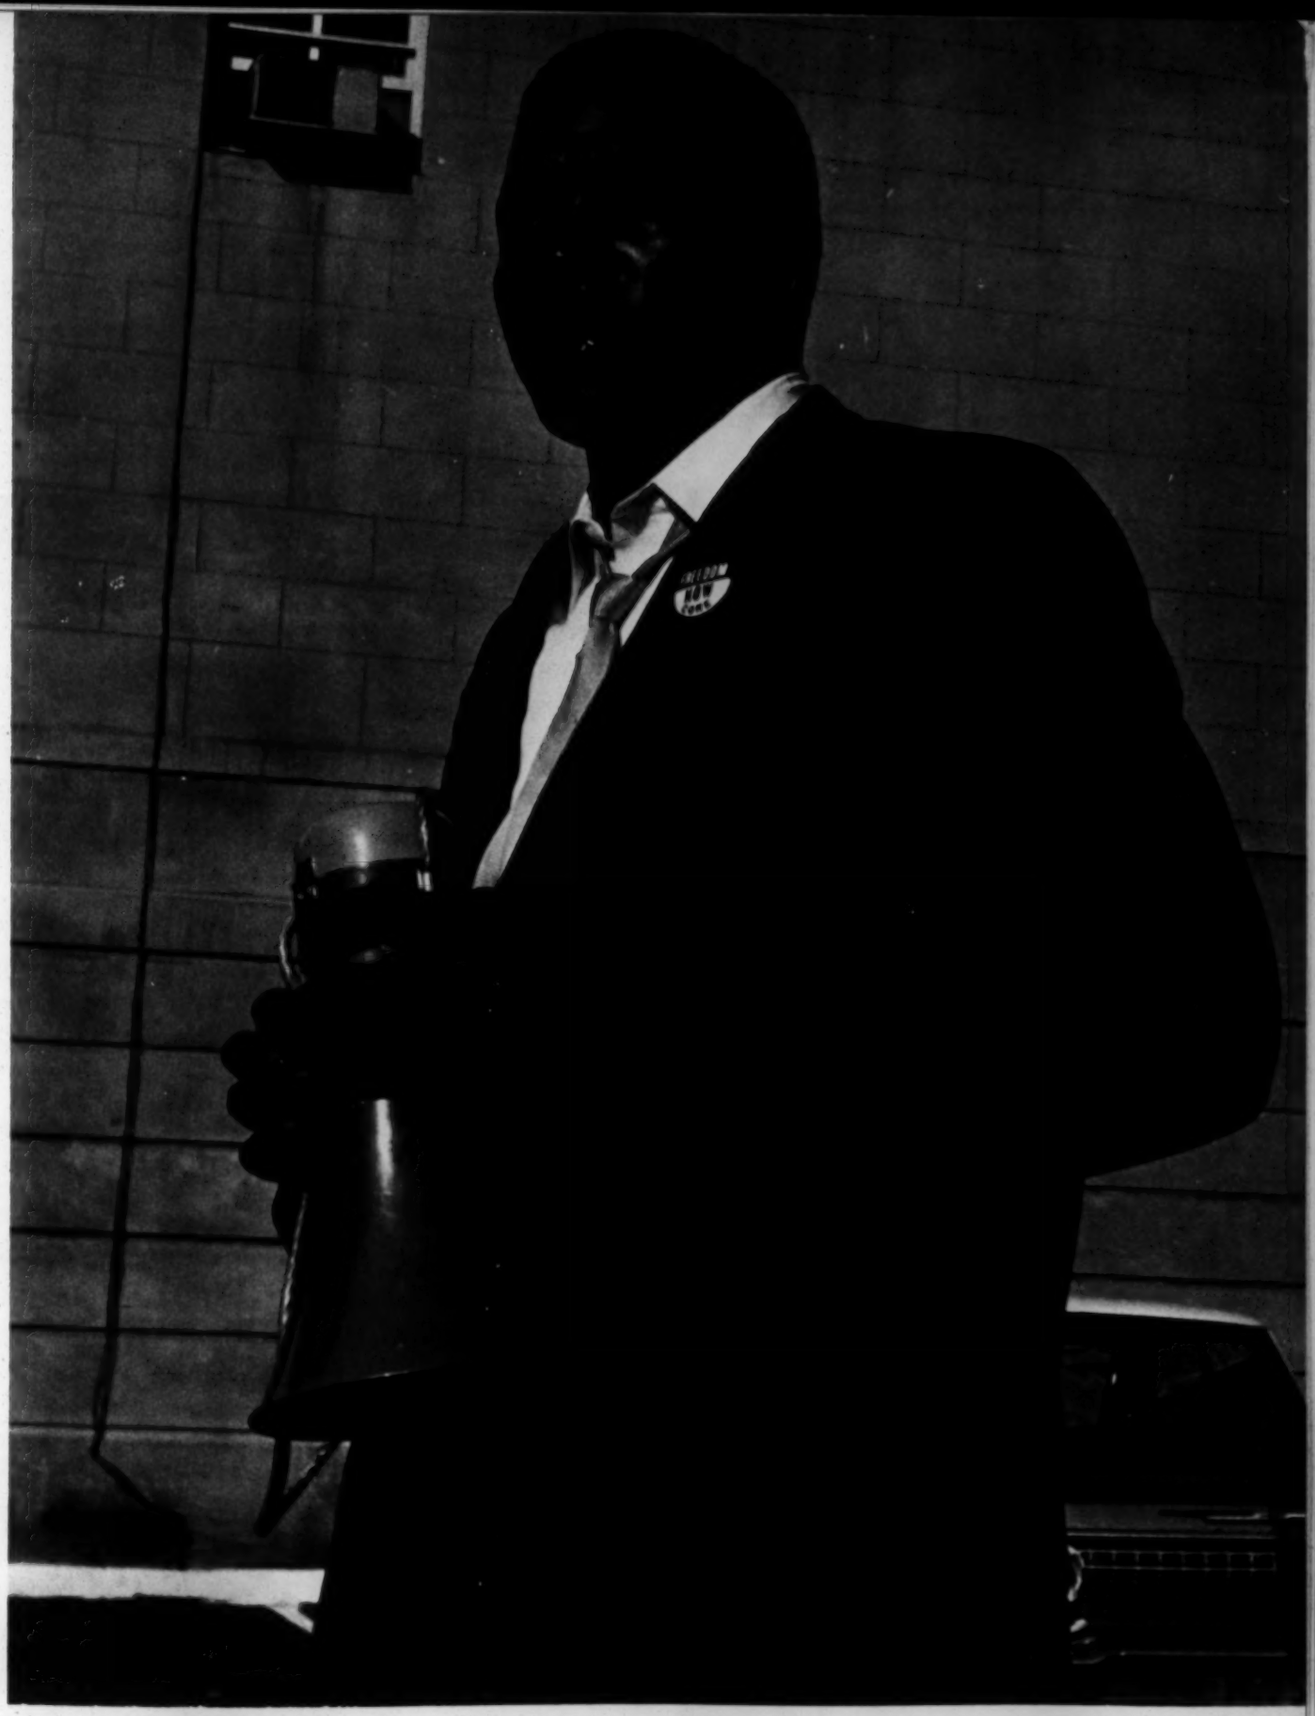
It is necessary to recognize as false, myths
that have survived so long and have contributed
so much to the divisiveness among our people.

*(Commissioner J. Edward Conway, New York State Commission for Human Rights. The statement was made at a public meeting on housing in Syracuse, New York, October 2, 1963 at the Syracuse Press Club.)*

**IN MEMORIAM**

JOHN FITZGERALD KENNEDY
1917 - 1963

Bruce Thomas
CORE
Chairman



This magazine is dedicated to informing citizens in Syracuse. It was edited and published by the Syracuse Committee on Racial Equality (CORE) and its costs are being met entirely by voluntary contributions from Syracusans. To help meet the printing debt and costs of publication, and for additional issues, you may send a check to CORE (Magazine), 609 East Adams, Syracuse, New York, 13202. Additional copies: 50 cents, or 35 cents in bulk over 100. Editor: Robert O. Blanchard, with assistance from Edwin Day, and the CORE Information Committee. Photographs by: R. Hammond. Other snapshots from anonymous Syracuse citizens.

One hundred persons were jailed in Syracuse in connection with Civil Rights demonstrations in September, 1963.

Physicians, unemployed laborers, several housewives, scores of university professors and graduate students, two members of the Mayor's Commission on Youth, a minister, a labor leader, and the director and some staff members of the Youth Development Center were among those who were jailed.

Hundreds more picketed, donated money, painted picket signs, staffed the CORE office, spoke before civic groups, participated in mass meetings, bought newspaper space and participated in many other forms of commitment.

They acted because there was and is widespread racial discrimination and bigotry in Syracuse. They acted because the city government and business community did and will not act in any meaningful way to eliminate discrimination – especially in the relocation of hundreds of Negro families displaced by Urban Renewal projects. They acted because most of the mass media managers in the city have been unfair and openly hostile to relevant discussion of social injustices in Syracuse.

It is difficult to communicate sincere beliefs in an atmosphere of fear, hostility and ignorance, abounding with myths. It is difficult to communicate when there is no charity towards the motives of those who protest injustice.

Only after the demonstrations there was some public dialogue, as the following quotations demonstrate:

"A significant segment of the Syracuse community has tended to dismiss student supporters of civil rights demonstrations as...uninformed and irresponsible faddists. In response to these allegations, we, the undersigned students (300 names) of LeMoyne College, issue this declaration of the basic factors which influenced our own support of these protest actions....."

(*Source*, a public statement which also appeared in a quarter-page advertisement in the Syracuse *Post-Standard*.)

"We are in full agreement with the objectives, the direct non-violent action methods and the sense of urgency of the Syracuse civil rights protest movement. Civil disobedience is a time-honored method for rectifying unjust forms of law and order, and as such it respects and fulfills the fabric of law and order. We uphold disciplined, non-violent civil disobedience as a legitimate form of civil protest."

(*Source:* a public printed statement, part of which appeared in a *Post-Standard* news story, signed by 18 Syracuse Protestant Ministers.)

"The Catholic Interracial Council agrees with the aims of the protesting organizations. We, too, over the years, have fought to educate Syracusans to the truth of the race problem and to persuade them to a just solution.

"So long as the present attitude of racial prejudice continues, the Urban Renewal program is both villain and victim for the only way it can be implemented is by continuing a pattern of racial segregation.

"...We specifically urge that a program include scattered site public housing, stringent code enforcement by prosecution, the granting of enforcement powers to the Mayor's Commission in order to make it an effective instrument."

(*Source:* a public statement by the Catholic Interracial Council as reprinted in the Syracuse *Post-Standard*, October 21, 1963.)

"We, the undersigned citizens of the Syracuse area, (75 names of prominent citizens) resolved that a just and democratic community be achieved in fact – NOW – know that:

"The civil rights protest now taking place in city is based on real grievances.

"The city's proposed plans for rehousing families displaced by the present Urban Renewal program are inadequate and are perpetuating the present segregation housing pattern....."

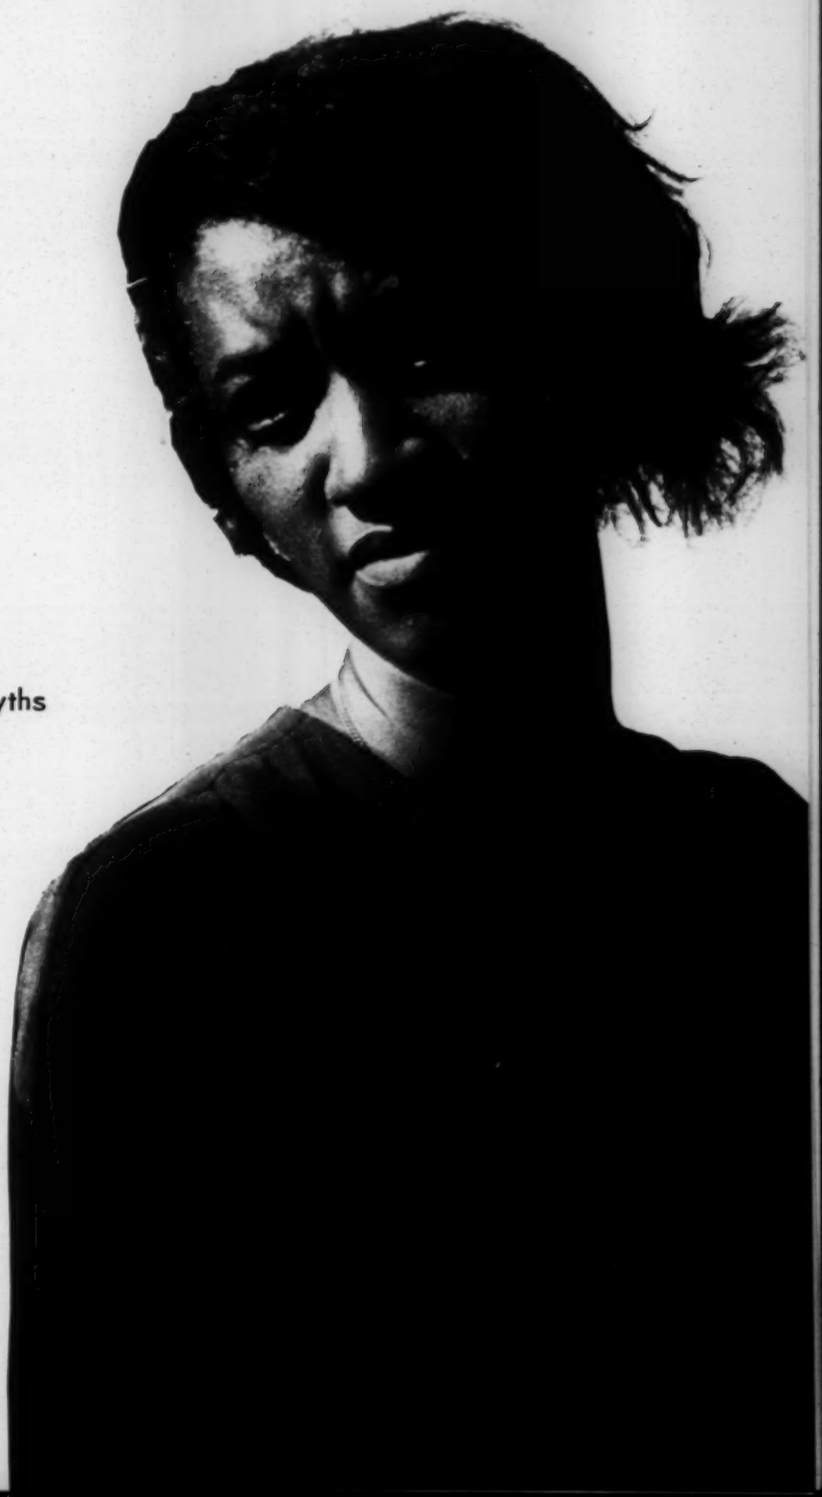
(*Source:* a September 25 *Herald-Journal* advertisement.)

There was other support. But the largest obstacles to meaningful discussion of and progress in racial equality in Syracuse cannot take place until some basic myths are challenged.

This publication is an attempt to challenge some myths – myths which barricade communications, myths based on error, and myths perpetuated on the vehicles of stereotypes, slogans and catch phrases distributed in an information monopoly.

This publication cannot "answer" or "eliminate" the myths, or even challenge all myths which appear in Syracuse media daily. But this publication hopefully is a beginning, a cry in a moral wasteland where, outside of some Syracuse churches and several public meetings, there has been no relevant cry at all.

All photographs in this publication were taken in Syracuse, New York, United States of America, August and September, 1963, the 20th Century, A.D.



**ASSERTION:** "The Syracuse community, both from a public and private standpoint, is not anti-Negro."

*(**SOURCE:** Joseph V. Ganley, reporter, Syracuse Herald-American, September 22, 1963.)*

**REPLY:** "There is discrimination against Negroes in private housing. No one denies that fact categorically. Syracuse is not 100 per cent 'open occupancy' city."

*(**SOURCE:** Same reporter, same article, same issue, three paragraphs below.)*

**ANOTHER REPLY:** "CORE last night presented about 20 grievances (Editor's Note: that is, 27 formal complaints, properly filed) to representatives of the Mayor's Commission on Human Rights and the State Committee (sic) for Human Rights.

"CORE said that 44 apartment houses were visited last week by Negroes and white members of the civil rights group. Of these, 27 landlords or 61 per cent of those visited, either refused to rent to Negroes or discriminated in price. (Ed's Note: that is, cited a higher rent figure to the Negro than to the white applicant.)

"Hale (executive secretary of the Mayor's Commission on Human Rights)...told CORE members that the city commission, under state law, cannot accept grievances that have been filed with other agencies or in court."

*(**SOURCE:** Syracuse Post-Standard, November 4, 1963. Editor's Note: The September demonstrations were conducted because the Mayor would not agree to give enforcement, subponena and injunctive powers to his proposed Human Rights Commission. CORE protested that the commission would be ineffective without such powers and that without such powers there was no need for a city commission. CORE, in its negotiations with the Mayor, insisted that the State Commission for Human Rights could do everything and more than his proposed commission and that his aggressive leadership against discrimination, not an empty gesture and toothless city commission, is what Syracuse needed. For more information, write CORE for its newsletter "In the Wind", Volume I, Number 1.)*

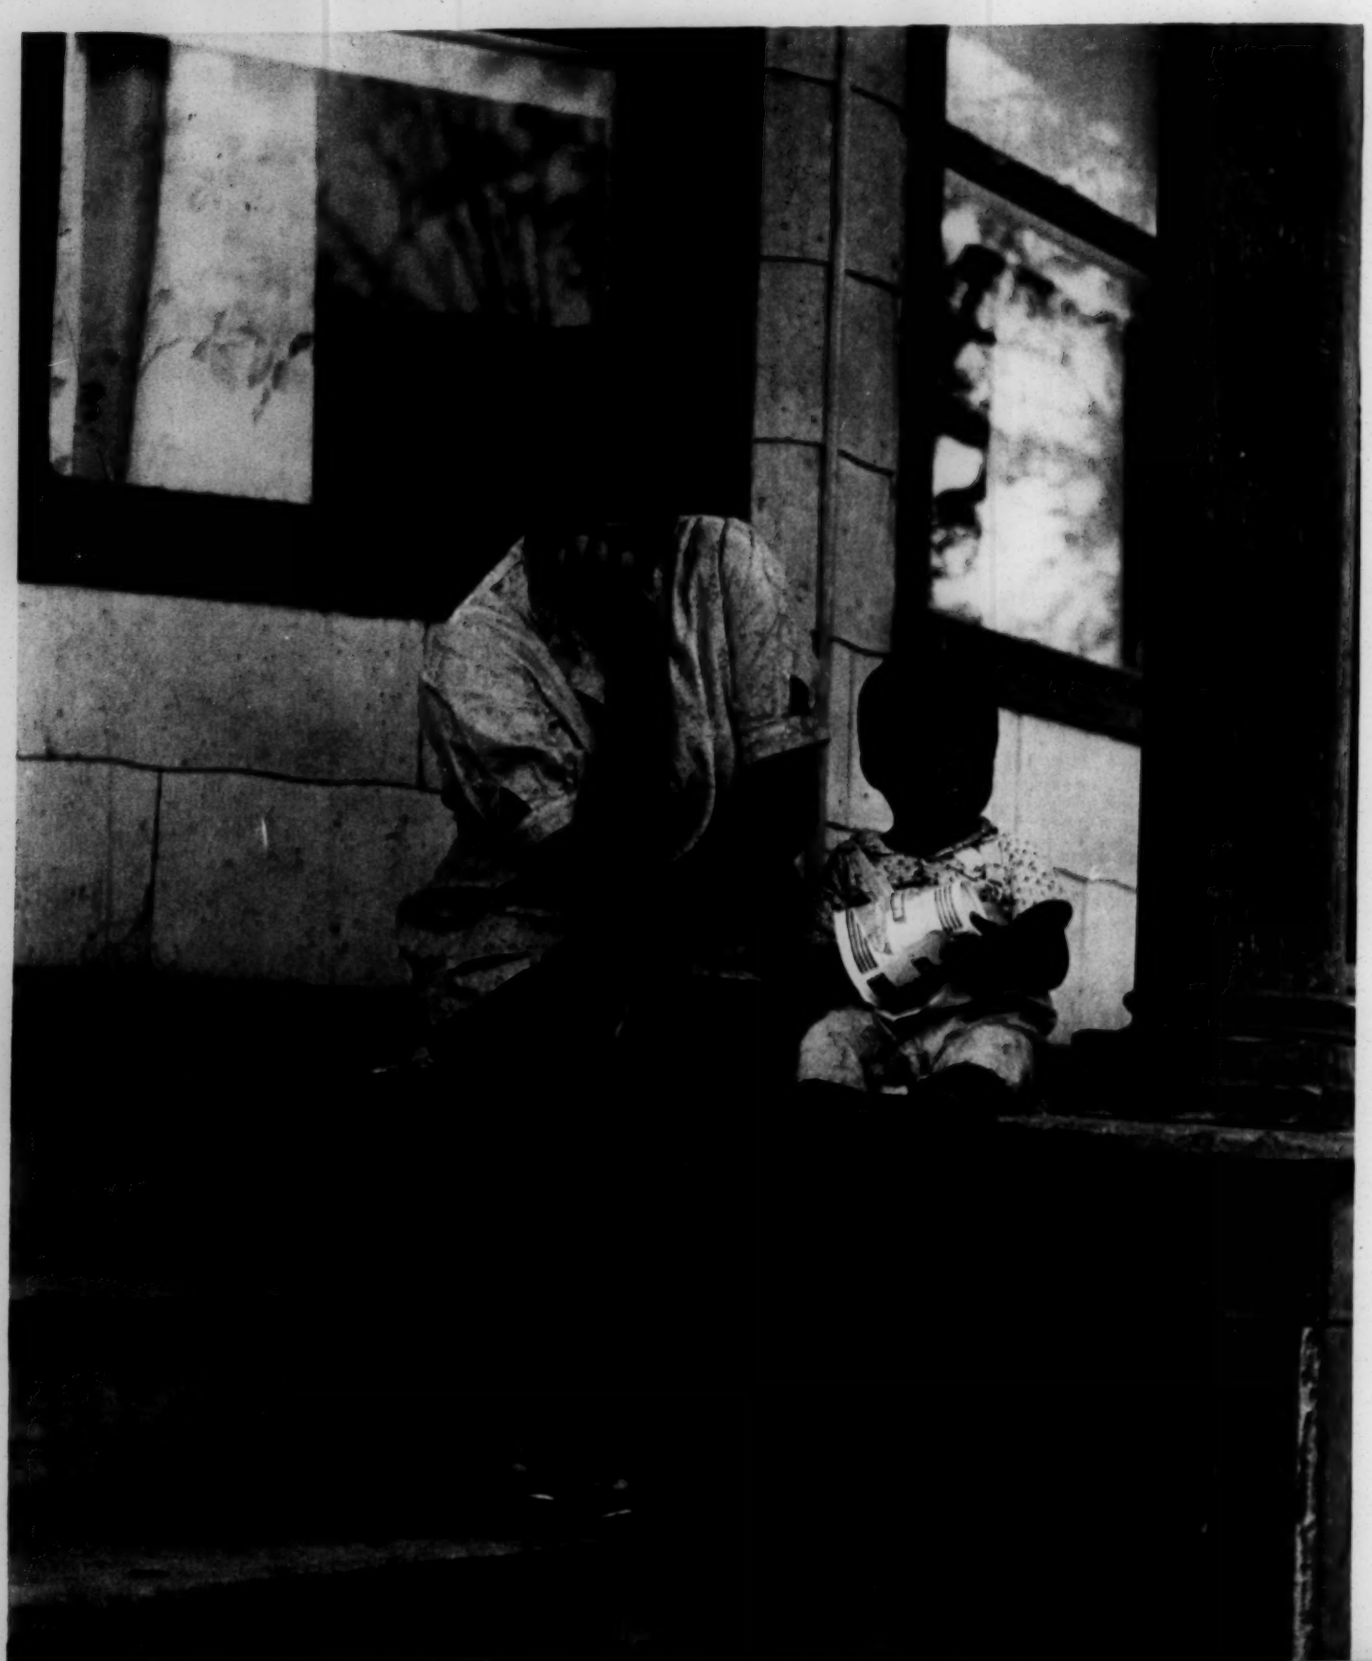
**ASSERTION:** "The cold fact is that Syracuse has an excellent story to tell on relocation and urban renewal – as good if not better than any northern city of its size."
*(**SOURCE:** Syracuse Herald-Journal editorial, September 21, 1963.)*

**REPLY:** "Forty-one per cent of all the housing complaints filed in up-state New York in 1962 came from Syracuse. This trend continues, in 1963, with 43 per cent of all up-state housing complaints received through July 31, originating in the city of Syracuse.

*(**SOURCE:** Commissioner J. Edward Conway, State Commission for Human Rights: public meeting on housing, October 2, 1963, Press Club Auditorium, Mid-Town Plaza, Syracuse – as printed by the State Commission on Human Rights. Editors Note: Copies of the statement, which included the above quotation, were distributed to the members of the press in the auditorium. Neither Syracuse newspaper has published these remarks.)*



**ASSERTION:** "In short, Syracuse has an all around record for fine performance in its integration effort that is not excelled anywhere in this country."

*(**SOURCE:** Syracuse Herald-American editorial, September 15, 1963.)*

**REPLY:**

September 17, 1963

Dear Editor:

"Syracuse has as fine a record for relocating families forced out of homes by urban renewal as any city in the United States." If this statement, and others like them in Sunday's editorial, is true (and I for one would like to see it proven) then it is a sorry indictment indeed for the entire nation.

Have you ever inquired into the real difficulties met by the Relocation Office in trying to find adequate housing outside the center of the city for dislocated Negro families? Have you or has any high official in the city administration ever volunteered through your own church to help a Negro family find new housing?

I have done this for the past year and I know from meetings with other church relocation committees that we have all had the same experience. It is not a pretty picture.

We have gained a little insight into what it means to find an apartment suitable in every way only to have the door slammed in our face when we told the landlord that the prospective tenant is a Negro. We realize not that it is not enough for a Negro family to be educated, financially able, and neat – they should also be white, or all the other qualities do not count.....

Until we are able to face up to the fact that Syracuse, with its relatively small Negro population, is not one iota better than any other metropolitan area and earnestly seek to remedy our situation now, we are simply passing the problem on to the next generation and this coming generation may not be satisfied with peaceful picketing or non-violent civil disobedience.

*(**SOURCE:** Mrs. W. C. deVries in a copy of a letter to the editor of the Herald-American, never published.)*

**ANOTHER REPLY:** "...After more than 50 fruitless visits and another 50 leads, at least, we found a nice, clean, large, reasonable apartment whose owner would accept children and people of any race or creed...It was a double happy ending to our quest together. But what concerns me... are the number of people who said – and would say – 'Sorry. No place for them....' We can understand the basis on which Communists point the finger and report on the treatment given to one-tenth of the population in a so-called religious nation."

*(**SOURCE:** The Rev. Leon D. Sanborne, as published in An Aid to Relocation: Sponsorships, pp. 7-10, published by the Department of Urban Improvement, 211 E. Water St., Syracuse, N. Y. For other similar cases, consult that publication.)*

**ASSERTION:** "This chore (of relocating Negro families) was taken on at a time when there was a massive wave of in-migration of Negroes to Syracuse from the deep South.

"This wave more than doubled the Negro population in the city... Despite the housing problems posed by this influx of Negroes, who for the most part came from agrarian sections of the South and most (sic) accustom themselves to urban conditions, the city has continued its efforts to wipe out slums."

*(**SOURCE:** Syracuse Herald-American front page article on urban renewal by Joseph V. Ganley, September 22, 1963. For other references to "the influx" of Southern Negroes in the Syracuse Herald-Journal, read the following editorials: "A Hoodlumism Review," December 2, 1962; "On Being a Racist," June 21, 1963; and "To Consolidate Gains," September, 1963.)*

**REPLY:** "I have found that in some quarters it is believed that Syracuse had an over-whelming in-migration of Negroes from the South. (Census figures) show that 39 per cent of the city's non-whites were born in New York State; 72 per cent were living in Syracuse or Onondaga County in 1955; only 18 per cent were residing in a different state or abroad in 1955, and have settled in the county or the city since that date. These recent arrivals comprise 13 per cent of the total of the non-white population and account for 23 per cent of the increase of non-whites recorded in the period from 1950 to 1960. Obviously, these figures do not suggest extensive in-migration from the South or from any other area."

*(**SOURCE:** Commissioner J. Edward Conway, State Commission for Human Rights at the October 2, 1963 public meeting on housing cited above. Neither was this statement published in either local newspaper.)*

**ASSERTION:** "This wave (of Negro in-migration from the South) more than doubled the Negro population in the city. Specifically, U.S. census figures report that in the 10 years 1950-1960 the non-white population increased by 7,223, from 5,058 to 12,281."

*(**SOURCE:** Herald-American, front page story, September 22, 1963.)*

**REPLY:** "Apparently 'Negro' and 'non-white' are used interchangeably. This is a gross error. The U.S. census publication for Syracuse (from which the reporter apparently drew his figure of 12,281) states (on page 3): "Negroes and persons of 'other races' taken together constitute 'non-white' persons." More accurately, Negroes constitute 11,210 persons in the city of Syracuse, the other 1,071 being 'other races.'

While these 'other races' constitute a relatively small proportion of the total non-white population, their inclusion with the Negro total is quite misleading – particularly when applied to the census maps. The heading at the top of the maps (published September 22, on the front page of the Herald-Journal) lables it The Negro Movement: 1950-1960. The legend at the bottom of the maps, however, indicates that they refer to the non-white population.

....Very closely allied to this is the legend indicating the number of persons per census tract. It would appear that the purpose of these gradations was to convey the impression that Negroes live in almost all parts of the city.

A closer examination, and a more accurate interpretation of census data, proves this impression is false. According to (the reporter), with the exception of census tracts 1 and 26, which are largely industrial, there are only four tracts in 1960 with no Negroes. In actuality, this refers to non-whites.

If one looks at census tracts without Negroes, the figure for the city is 12 out of 61, or roughly 20 per cent.....

Thus, if a single Japanese war bride or Onondaga Indian lived in a particular tract, the tract would be colored gray, conveying the impression that anywhere from 1-99 Negroes lived there!

**ASSERTION:** "They (the Negroes) are fully enfranchised American Citizens up here, entitled to every privilege their pocketbooks will permit."

*(**SOURCE:** Syracuse Herald-Journal editorial, "To Consolidate Gains," Fall, 1963.)*

**REPLY:** "In March, 1962, Capt. James Anderson of 101 Medora Place, a physician assigned as an examining officer at Syracuse's Armed Forces Recruiting Station, filed a complaint with the (State Commission for Human Rights) charging that...(a prominent attorney)...had refused to rent an apartment to him. Dr. Anderson is a Negro.

At a hearing **a year later** (EMPHASIS BY THE EDITOR) before the commission...(the attorney) admitted that he refused to rent the apartment to Dr. Anderson and said he did it because the doctor is a Negro."

*(**SOURCE:** Syracuse Post-Standard, November 4, 1963, p. 6., "Court Requires Attorney Rent to Negroes".)*

**ANOTHER REPLY:** "The belief that most Negro families cannot afford to live outside the 15th Ward is contradicted by the facts of Negro family income when related to the average rents prevalent in thirty-five outer tracts (located a mile and a half radius from the center of the 15th Ward, or Negro ghetto).

"In 1960 there were 1,902 Negro families living in the 15th Ward. More than half of these families had incomes of over $4,000.

Assuming 20 per cent of income is spent for rent – and Negroes are forced to spend nearly 25 per cent of their income for private rentals in the 15th Ward – **983 Negro families could have afforded to live in the outer tracts."**

Specifically, 302 families with incomes of $4,000 to $5,000 could afford to live in 8 tracts where median rents ranged from $67 to $83; 277 families with incomes of $5,000 to $6,000 could afford to live in 12 tracts where median rents were $83 to $100; 240 families who earned $6,000 to $8,000 could afford to live in 12 tracts where median rents were $100 to $133; and 164 families with incomes over $8,000 could have afforded to live in the two highest rental tracts in the city."

*(**SOURCE:** Albert C. Ettinger, field representative, N. Y. State Commission for Human Rights; as quoted in letters-to-the-editor column, Syracuse Post-Standard, September 29, 1963. This letter was also sent to the Herald-Journal, but never published.)*

**ASSERTION:** "There will always be substandard housing in every community, a condition urban renewal aims to correct. But officials will tell you something we all know – that, like every other race and nationality, Negroes prefer to live with their own people."

*(**SOURCE:** "The Truth About Relocation," Syracuse Herald-Journal editorial, September 21, 1963.)*

**REPLY:** "The assertion that Negroes prefer to live together is frequently made by descendants of nationality groups who did in fact prefer to live in close proximity because of their distinctive cultural backgrounds, particularly with respect to a foreign language and/or a "minority" religion.

"In this regard it might be pointed out that the culture of the American Negro is more Anglo-Saxon than that of any minority group except the English. Fear of prejudice and discrimination are effective deterrents to "pioneering" with respect to many Negroes.

But the whole argument is really beside the point. There can be no objection to persons who wish to live in enclaves, but they certainly should not be required to do so by discriminatory restrictions of the housing market."

*(**SOURCE:** Albert C. Ettinger, field representative, New York State Commission for Human Rights; as published in the letters-to-the-editor column, Syracuse Post-Standard, September 29, 1963. This letter also was sent to the Herald-Journal, but it has never been published.)*

**ASSERTION:** "I have statements from Syracuse businessmen and officials who testify that George A. Wiley has shown no interest in facts in any discussion."

*(**SOURCE:** Executive editor, Herald Journal editorial, September 15, 1963.)*

**REPLY:**

*Dear Mr. Wiley:* *August 20, 1963*

*As a member of the Educational Committee of the Syracuse Area Council of the State Commission for Human Rights, I should like to express my appreciation for the excellent work you have been doing on the problem of de facto segregation.*

*I am sure that contributions such as the one you have made will ultimately be the most important and influential factors in the furtherance of the cause of racial understanding.*

*I am happy to know, also, that the work of your fine committee is continuing. I feel certain that your initial contribution is the start of a series of helpful and progressive steps which will be of great assistance in our community.*

*Very truly yours,*

*William F. Walsh*
*Mayor*

(This letter from Mayor William F. Walsh, on the Mayor's official stationery, is on file at 609 East Adams, Syracuse. Dr. Wiley is CORE community relations director and an Assistant Professor of Chemistry at Syracuse University.)

**"From here on, what happens depends on whether a little group of radical crackpots is really determined on fomenting trouble."**

*(**SOURCE**: Syracuse Herald-Journal editorial, September 15, 1963, referring to the protest demonstrations in Syracuse, New York. The picture above was taken in front of Syracuse City Hall during the same demonstrations. Similar sentiment has been frequently expressed by Radio Station WOLF.)*

## EDITOR'S NOTE

**Robert C. Weaver, Administrator of the U.S. Housing and Home Finance Agency, Washington, D.C., is quoted in this publication because of the ringing endorsement one of his speeches received from the *Herald-Journal*. On June 18, 1963, in an editorial responding to published criticism of its editorial policy as "racist," the Newhouse newspaper said in part:**

**"Next Sunday the *Herald-American* (the Sunday *Herald-Journal*; Syracuse is a monopoly newspaper town) will publish in full a speech made by Robert C. Weaver, Housing Administrator of the United States (sic), before the Fund for the Republic in Chicago. Mr. Weaver is a Negro and a brilliant man.**

**"In my opinion, this speech is the best exposition of the hopes and aims of the American Negro today that has been made in years by anyone."**

**What better source than this speech, praised by the *Herald-Journal*, to retort the *Herald-Journal*?**

**Weaver's speech, in part can be found in *The Negro as an American*, published by the Center for the Study of Democratic Institutions.**

**ASSERTION:** "And so came the Polish folks and the Italians and the Jewish citizens-to-be in large numbers....And none of our newcomers created slums or complained they were being poorly treated." (***Herald-Journal** editorial, June 21, 1963.)*

**REPLY:** Implicit,...is the assumption that Negroes can lift themselves by their bootstraps, and that once they become brown counterparts of the white middle-class Americans, they will be accepted on the basis of individual merit. Were this true, our race problem would be no more than the most recent phase in the melting-pot tradition of the nation. But in comparison to the earlier newcomers from Europe, the later ones who are colored face much greater impediments in moving from the slums or from the bottom of the economic ladder and also have fewer resources to meet the more difficult problems confronting them." *(Robert C. Weaver, in a speech praised by the **Herald-Journal**.)*

**ASSERTION:** "Each (immigrant) group had its national organizations – singing societies, social and religious organizations, neighborhood clubs." *(**Herald-Journal** editorial, June 21, 1963.)*

**REPLY:** "One of the most obvious examples of the Negro's lack of internal resources is the absence of widespread voluntary organizations. As we know, such organizations contributed greatly to the adjustment and assimilation of European immigrants. Both the Negro's heritage and the nature of his migration in the United States have militaged against the development of similar institutions for Negroes.

"Slavery and dependence upon whites that continued after the Civil War stifled self-reliance. Movement from the rural South to northern cities was far different from immigration for Europe to the New World. This internal migration was not a real break with the past, as it was with the Europeans, nor were those who participated in it subjected to feelings of complete foreigness. Thus, the Negro tended to preserve his old institutions when he moved from one part of the nation to another. The European immigrant, on the other hand, created new ones. Most importantly, the adjustment of non-whites to an urban environment today is happening at a time when public agencies are rapidly supplanting voluntary organizations." *(Robert C. Weaver in a speech praised by the **Herald-Journal**.)*

**ASSERTION:** "Certainly enough progress in racial equality has not been made in the last 100 years, but amazing advances in the economic and social position of our colored population have been recorded none the less." *(Herald-Journal, editorial, May 9, 1963)*

**REPLY:** "Of course there are those who observe that the average income, the incidence of home ownership, the rate of acquisition of automobiles, and the like among Negroes in the United States are higher than in some so-called advanced nations. Comparisons like this mean little...As he has so frequently and eloquently demonstrated, the Negro in America is an American. His status, no less than his aspirations, can be measured meaningfully only in terms of American standards.

"Viewed from this basis, what are the facts?

"Median family income among non-whites was slightly less than 55 per cent of that for whites in 1959; for individuals, the figure was 50 per cent.

"Only a *third of the Negro families* in 1959 earned enough to sustain an acceptable American standard of living. Yet this involved well over a million Negro families, of which 6,000 earned $25,00 or more.

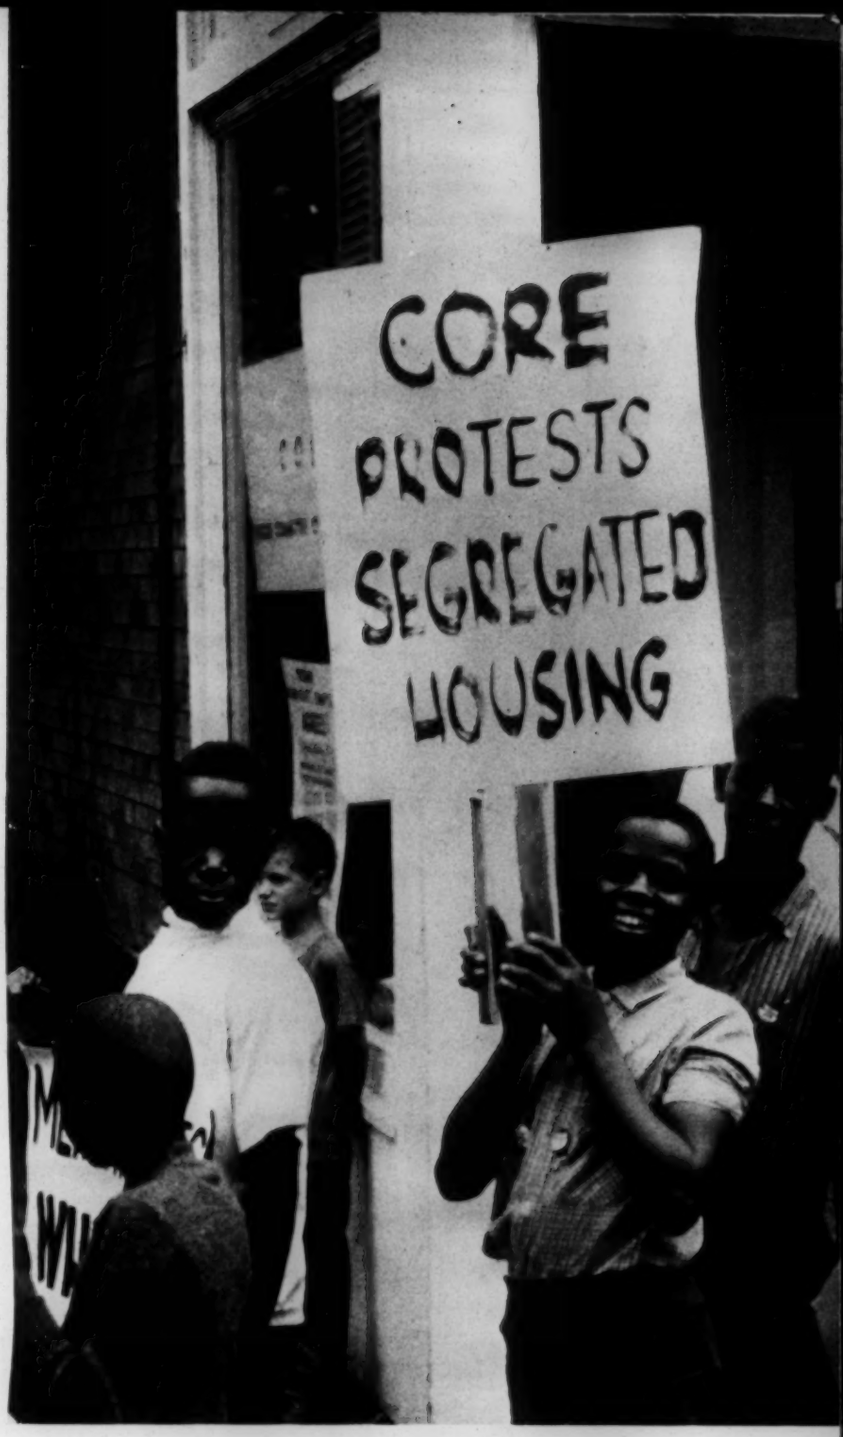
"Behind these figures are many paradoxes. Negroes have made striking gains in historical terms, but their current rate of unemployment is well over double that among whites. More than two-thirds of our colored workers are still concentrated in five major unskilled and semi-skilled occupations, as contrasted to slightly more than a third of the white labor force.

"Despite the continuing existence of color discrimination even for many of the well prepared, there is a paucity of qualified Negro scientists, engineers, mathematicians, and highly trained clerical workers. Lack of college-trained persons is especially evident among Negro men. These figures show why:

"In 1959 non-white males who were high school graduates earned, on the a v e r a g e, 32 per cent less than whites; non-white male college graduates earned 38 per cent less.

"The absence of economic rewards for higher education for men goes far in accounting for the scarcity of male college graduates among non-whites and the high rate of drop-outs."

***(SOURCE:** Robert C. Weaver, in a speech praised by the Herald-Journal.)*



**ASSERTION:** Why then should not Negro leaders express pride in their race and instill that pride in their race and instill that pride in their children instead of coming into court with the camouflage that their future depends on sitting next to a white in school." *(Herald-Journal editorial, "To Consolidate Gains," Fall, 1963.)*

**REPLY:** "It must be recognized that the Negro cannot suddenly take his proper place among whites in the adult world if he has never lived, played, and studied with them in childhood and young adulthood." *(Eli Ginzberg, The Negro Potential, as quoted by Robert C. Weaver, in a speech praised by the Herald-Journal.)*

**ANOTHER REPLY:** "The challenge frequently thrown to me is: Why don't you go out to the Negro community and exhort Negro youths to prepare themselves for present and future opportunities?....

"Many of the youth whom I am urged to exhort come from broken homes. They live in communities where the fellow who stays in school and follows the rules is a "square." They reside in neighborhoods where the most successful are often engaged in shady – if not illegal – activities. They know that the very policeman who may arrest them for violation of the laws is sometimes the pay-off man for the racketeers. And they recognize that the majority of society, which they frequently believe to be the "enemy" condones this situation. Their experience also leads some of them to believe that by getting the kind of job the residents in their neighborhood hold is merely a commitment to hard work and poverty. For almost all of them, the precepts of Ben Franklin are lily-white in their application." ***(SOURCE:** Robert C. Weaver in a speech praised by the Herald-Journal.)*

**ASSERTION:** "CORE has done much to dramatize the problems of the Negro in Syracuse, and no one will deny that these are very real and urgent. But the methods they have chosen have done more to lose them popular sympathy than to gain public support. Nothing is won by creating conflicts."

*(**SOURCE:** Syracuse Post Standard, September 14, 1963.)*

**REPLY:** "I must confess that over the last few years I have been gravely disappointed with the white moderate. I have almost reached the regrettable conclusion that the Negro's great stumbling block in the stride toward freedom is not the White Citizens Councilor or the Ku Klux Klanner, but the white moderate who is more devoted to "order" than to justice; who prefers a negative peace which is the absence of tension to a positive peace which is the presence of justice; who constantly says, 'I agree with your goal, but I can't agree with your methods of direct action!' Shallow understanding from people of good will is more frustrating than absolute misunderstanding from people of ill will."

*(**SOURCE:** Martin Luther King.)*

**ASSERTION:** "Picketing in northern cities could develop into much worse incidents—which is what the forces of violence undoubtedly hope for." (*Syracuse Herald-Journal*, editorial, May 29, 1963)

**REPLY:** "Many white Americans are perplexed, confused or antagonized by the persistent pressure of Negroes to break down racial segregation. Few pause to consider what involuntary segregation means to its victims. To the Negro, as an American, involuntary segregation is degrading, inconvenient, and costly. It is degrading because it is a tangible and constant reminder of the theory upon which it is based – biological racial inferiority. It is inconvenient because it means long trips to work, exclusion from certain cultural and recreational facilities, lack of access to conveniently located restaurants and hotels, and, frequently, relegation to grossly inferior accommodations. Sometimes it spells denial of a job; often it prevents upgrading based on ability.

*(Robert C. Weaver, speech praised by Herald-Journal)*

## A SUMMARY OF THE HOUSING PROBLEM IN SYRACUSE

CORE, as early as June, 1963, attempted to constructively bring the human element into the Syracuse urban renewal program.

On June 27, 1963, two CORE representatives, Everett Makinen and Dr. George Wiley met with Mayor Walsh. They displayed a map, prepared from Relocation Office statistics, which illustrated that 97 percent of relocation of Negroes had been in the Ghetto or adjacent areas, mostly in sub-standard neighborhoods. The CORE representatives presented a nine-point program to suggest to the Mayor how to improve relocation and implement true neighborhood integration in Syracuse. The representatives said civil rights groups would be looking for a positive program, not just a power-less commission, and that direct action would be used if the Mayor did not respond. CORE turned to "the private sector:"

During July 1963, CORE sent letters to the major real estate firms and banks, asking that the Real Estate Board formulate an anti-discrimination program. Real estate firms were presented with specific suggestions for non-discrimination. A few of the firms answered this letter; some firms pledged non-discrimination; the over-whelming majority denied discrimination existed. The same cycle was experienced with banks.

The result, in short, was frustration and almost no response to discrimination suffered by Negroes in Syracuse. Clearly, leadership from the "public" sector was needed.

On August 26, 1963, a march on the County Courthouse by CORE, NAACP, IUE Civil Rights Committee and the Women's International League for Peace and Freedom was staged. The Mayor mentioned his proposed civil rights commission, but did not suggest any action program, nor did he offer any program to implement the commission's goals or respond to CORE'S nine-point program.

On August 28, 1963, direct action against the urban renewal demolition sites began, and a letter was sent to the Mayor asking him to stop demolition until the serious relocation problems were attacked with a positive program.

In response to the direct action, the Mayor, for the first time since June 27, publicly acknowledged receiving the nine-point program. After sitting on the proposal for three months the Mayor rejected it as an "ultimatum." In his "answer" he touched on each of the nine points, but he inadequately covered most of the issues and problems raised by the points. Any reading of the nine-point program, along with the Mayor's letter, will reveal this.

Again in response to continued picketing and sit-ins, the Mayor agreed to negotiate with the three civil rights groups. At this time, and not before, he began drafting his own "action program." It was released along with a copy of a proposed ordinance for a civil rights commission on September 19 for publication on September 20. It came closer to adoption of CORE'S nine points.

On September 22, CORE announced that the Mayor's new promises, which followed weeks of demonstrations and arrest, formed "a skeleton which could provide a fruitful basis for the satisfaction of the needs recognized by all reasonable people." CORE said the Mayor's proposed Human Rights Commission – with proper subpoena, injunctive and enforcement powers – could be effective in combating discrimination.

There was no response from the Mayor.

On September 30, the Common Council established the Mayor's proposed Commission on Human Rights without any powers.

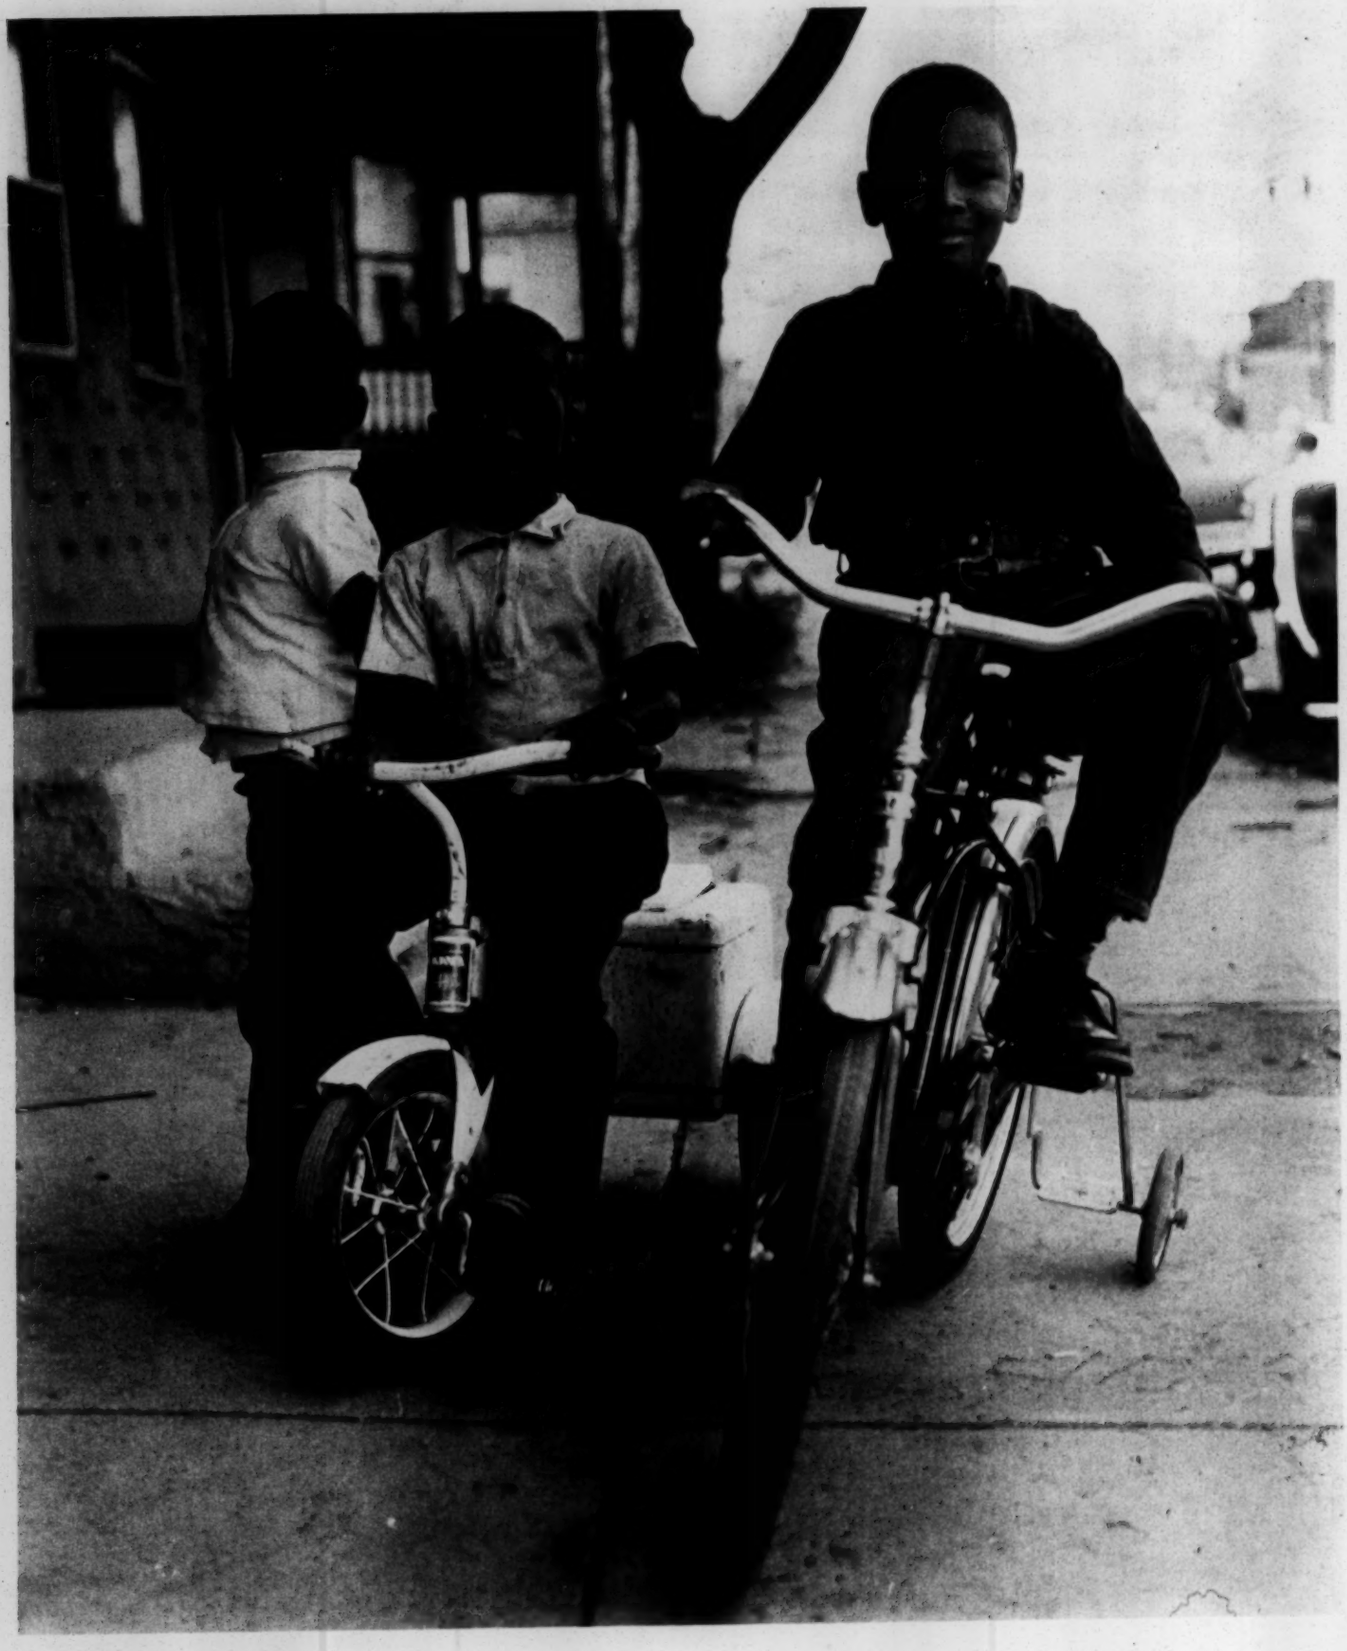
When the Commission was formed, Mayor Walsh said: "The formation of the City Commission on Human Rights represents the accomplishment of a goal . . . . . I am personally convinced this type of commission represents the best vehicle and the best approach to the solution of discrimination at the local level. (*Post-Standard*, October 4).

What did the Mayor mean? He was hoping the establishment of the commission would quell protest and alleviate him of any responsibility.

On November 4, CORE presented 27 cases of housing discrimination which came out of the testing of 44 apartments listed in the local newspapers. Robert Hale, executive officer of the Mayor's commission, turned down the complaints. He said the commission had no power to act on the cases. He advised CORE to file the cases to the New York Commission on Human Rights.

At a meeting on October 30, the Mayor's Commission ruled it had no power to accept housing complaints, then the commission endorsed observance of International Human Rights Day, December 10.

Then it adjourned.



# Statement by New York *CORE* Chapters on School Integration

## January 16, 1964

CORE is devoted to the fight for an integrated society through nonviolent direct action, and for a basic social and economic change in the condition of minority groups—in housing, employment and education. The 1954 Supreme Court decision, *Brown* vs. *the Board of Education of Topeka*, pointed out the necessity for integration in education. The Supreme Court held that segregated schools are inherently inferior and that the education a student receives in the segregated school has a negative effect on his personality. There can be no doubt that the segregated school cannot, even under the best circumstances, overcome the destructive effects which the society outside the classrom inflicts on the individual. The white student in the artificial atmosphere of the segregated classroom is led to think that he is superior because he goes to a separate school; he does not learn how to live with the other people with whom he must share this world.

New York State Commissioner of Education Allen this summer called for local school boards across the state who have a racial imbalance in their schools to attempt to get a 50/50 racial balance. In order to accomplish this and to meet the needs of New York City students, the Board of Education must make integration top-priority, and come up with a positive program for integrating now.

On September 5, 1963 the Board of Education, the City-Wide Committee for Integrated Education and the City Commission for Human Rights, in the presence of Stanley Lowell (chairman of the Commission), signed a written agreement with the Board of Education that the Board would submit a tentative report and plan for integration by December 1, 1963, and that a final plan for integration of the New York City schools would be available by February 1964. The plans, with a timetable for integration, were to be worked out in consultation with the Civil Rights organizations and were to "include provisions for a substantial, realistic and working program of integration in every school district in September 1964." The Board has failed to live up to this agreement.

Even a quick look at the state of education in New York City will show why parents are so angry. It is a dreary picture of a system that handicaps our children and then discharges them into the city streets with little preparation for meeting the harsh reality that they quickly come up against when they try to get a job.

New York City schools are segregated and understaffed; they are overcrowded and under-equipped. Thousands of classrooms are greatly overcrowded. Many of the school buildings are ancient and deteriorated; many are unsafe. Many teachers are inadequately trained and methods are outdated; they are still underpaid and burdened with non-classroom chores. Many teachers are demoralized and fail to understand the problems that children have in the 1960's. Curricula, particularly in social studies and history, do not satisfy the needs of our multi-ethnic group city population.

*CORE is deeply concerned that:*

**30% of all teachers and 50% of those in minority group schools are substitutes.**

**that in just the last six years the number of almost completely segregated elementary and junior high schools has more than doubled, from 77 in 1958 to 165 presently.**

**that 239 school buildings currently in use were built before 1910.**

**that over 70% of junior high school mathematics teaching positions are filled by substitutes and teachers trained in other fields.**

**that the class size in New York City is the largest in the country, the size of classes in elementary and high schools has continued to rise over the last ten years.**

There is every reason for New Yorkers to be dissatisfied with this second-rate educational system.

With Negro and Puerto Rican children constituting 41% of public school enrollment, we might expect to find about that percentage in each school. But there are 320 of 581 elementary schools 90% or more segregated and 70 of 136 junior high schools which are 85% or more segregated. Even on the junior high level where children travel to school, 55% of minority children attend schools which are 75% or more segregated.

The effect of segregated schools on Negro and Puerto Rican children can no longer be disputed. The Public Education Association in their 1956 study found that the arithmetic and reading achievement levels of minority group sixth graders were two years behind their white contemporaries; eighth graders were three years behind. More recent studies by Harlem Youth Opportunities Unlimited, the Brooklyn Parents Worshop for Equality in New York City Schools, and the Urban League of Greater New York found that the achievement gap has widened.

In the last six years there has been a 102% increase of almost completely Negro and Puerto Rican schools in relation to the total number of schools. This increase can be only partly attributed to the 34.4% increase in the ratio of Negro and Puerto Rican children to the entire school population. The City administration through the City Planning Commission's placement of public housing in segregated areas is also to blame. But foremost responsible is the Board of Education, for:

1) **Allowing the City Planning Commission to select the sites for construction which, since June, 1959, produced 38 segregated schools out of a total of 45. Twenty of the 26 schools presently under construction are in segregated neighborhoods. Thirty of the 51 schools included in the 1963-64 Capital Budget for Advanced Planning and/or Site Selection will be in segregated neighborhoods.**

2) **Allowing gerrymandered school district lines which prevent integration.**

3) **Failing to come up with a positive plan for integration.**

CORE insists that the education of children in this city be greatly improved, that the basic underlying problems be attacked, and that every child be provided with a decent classroom situation so that he can get the maximum benefits from his education. We believe that this can be accomplished for the children of New York City (black and white) only if the kind of classroom situation is created where all children are integrated without regard to ability-level (as established by artificial tests), and where Negro, White, Puerto Rican, and other minority children begin going to school together in the early grades. To do this the class size must be significantly reduced so that each child can get the personal attention that he or she needs in order to make the educational experience most profitable to him. These programs must be begun immediately on the lower grade levals and where they can be implemented on the higher grades they should also be started this year.

To achieve quality, integrated education in our public schools the Board must develop and implement a dynamic, comprehensive program. The following points should be included in the overall plan:

I. *Timetable:* In an agreement between the Board of Education and the City-Wide Committee for Integrated Schools in the presence of the City Commission on Human Rights, the Board of Education obligated itself to submit a plan for the integration of public schools in New York. This plan must provide substantial integration in every district beginning with the school year of September, 1964. Until the Board presents this timetable as evidence that it is immediately and specifically confronting the task of integration, the civil rights groups of this city must continue to prepare for a boycott on February 3, 1964.

We firmly believe the basic responsibility for implementation rests with the Board of Education, not with local school boards. As a basis for consultation and in order to make clear to the public our position we are submitting what we consider to be the basic ingredients of an effective timetable, the details of which should be developed and approved jointly by the Board and representatives of the City-Wide Committee for Integrated Schools with periodic progress reports presented to the Committee.

II. *Class Size:* In the last seven years average class sizes have increased in elementary and high schools. Integrated, heterogeneous classes of no more than 15 children aid in the full development of each child. If 1 master teacher and 2 assistants are used, then the maximum class size should not be over 30.

The number of classroom teacher's aides and clerical workers must be increased so that trained teachers can be freed and provide personal instruction and guidance.

Full utilization of available classroom space is necessary. Bussing may be necessary to insure proper use of existing facilities, so that every child will have a seat to sit in and so that class size can be reduced in highly populated areas.

III. *School Zones:* The present school zones must be withdrawn to maximize integration. A substantial number of schools can be integrated immediately by redrawing zone lines. The Princeton Plan must be used whenever possible to begin integration among the young children. (A Princeton Plan pairs two neighboring elementary schools so that all the Kindergatren to third grade teachers and children are in one school and all the 4th to 6th grade teachers and children are in the other.)

Junior high schools and high schools can be better integrated by changing the feeder patterns that determine which elementary schools send their students to the high schools. Most high school students and many of our junior high students already travel long distances. These students should be immediately integrated.

New school sites should be selected by the Board of Education (not the City Planning Commission) to provide for the maximum possible integration. Also, a less bureaucratic and less time consuming method for getting approval for construction of new schools must be worked out by the mayor. Many new schools are needed now.

In working out the details of all these proposals the Board of Education should work in cooperation with the City-Wide Committee for Integration to insure that the plan for Integration truly reflects the needs of the minority community.

IV. *Staff:* There should be significant improvements in the training, selection and promotion processes for teachers and supervisors.

The Board of Education should work closely with the Board of Higher Education to guarantee that there will be thousands of additional licensed teachers to effectuate a significant reduction in class size. Many of them should be Negro and Puerto Rican.

The Board should insure that the Board of Examiners no longer uses southern drawls or Spanish accents to exclude otherwise capable teachers.

There should be a significant increase in salary in order to provide the incentive for many more people to become teachers.

The Board should actively recruit teachers from every walk of life and ethnic grouping. This is most important at the level of promotion and selection of supervisors.

The Board should offer courses for those willing to become supervisors.

There should be in-service credit courses in Negro history, sociology and in the effects of discrimination on children in order to give teachers a better understanding of the role of minority groups in American life.

Courses in Spanish should be required for teachers in training and should be provided for regular teachers for in-service credit.

V. *Special Services and Staff:* At the present time there must be a significant increase in the number of specialized personnel: remedial reading teachers, guidance counselors, psychologists, etc. They should be assigned in sufficient numbers to meet the needs of the students of each school.

Some special services will also be required such as after-school study centers for those children who do not have the space at home to study in.

Guidance counselors should be required to acquaint minority students with the present needs and openings in the school system, and should encourage exploration of new openings and opportunities. They should also be required to take courses in Negro history, sociology and the effects of segregation on the personality. Specialist groups should be integrated with qualified personnel from minority groups.

VI. *Curriculum and Texts:* The Board of Education must keep its promise to revise curriculum and texts so as to accurately show the minority community in its current and historic role in American life.

VII. *Remedial Programs:* Generations of students have passed through the school system and were hindered in their full development by the bad quality of the education which they received. In order to correct these bad effects, there should be a full scale remedial program. This program should provide courses in all basic subjects and skills where needed. These classes should be conducted during the school day and should have special funds set aside for them. Teachers can be provided by training those who are available now. The students who are allowed to take the courses should be chosen on the basis of need and not on the basis of first come first serve.

VIII. *Scholarships:* Scholarships are badly needed and should be provided to children who are potential dropouts because of economic need. We must provide a real alternative for the student who wants to leave school to contribute to the family income.

IX. *School Board Representation:* The Board of Education is supposed to reflect the community it represents, therefore the need is felt for greater participation by Negro, Puerto Rican and other minority group leaders and for those who represent points of view other than the prevailing one. There should be membership on the Board of Education by those who believe in integration of the school system.

X. *Monetary Commitment:* We call upon the Mayor and Governor to cease avoiding their responsibilities to provide the Board of Education with funds ample to carry out the above programs.

Education

# STATE OF NEW YORK

No. 1226

# IN CONVENTION

June 12, 1967

Introduced by Mr. NORTON—read once and ordered printed and when printed, referred to the Committee on Education

A PROPOSITION

To amend article eleven of the constitution by adding thereto a new section, in relation to creating a temporary school district to provide more effective educational upgrading within economically deprived urban areas of more than four hundred thousand population

*The Delegates of the People of the State of New York, in Convention assembled, do propose as follows:*

Section 1. Article eleven of the constitution is hereby amended by adding thereto a new section, to be section four, to read as follows:

*§ 4. Within a territory containing one hundred thousand residents within a municipality of more than four hundred thousand residents, upon the petition of twenty-five hundred residents, the commissioner of education shall create a temporary school district as a part of the free education system of the state of New York.*

EXPLANATION — Matter in *italics* is new; matter in brackets [ ] is old Constitution to be omitted.

*This temporary district shall be autonomous and have the same status as the then existing public school system of the affected municipality except that the school board for the temporary school district shall be elected by residents of the affected territory and the staff shall be appointed by that school board.*

*As this section is legislative in nature and to correct a temporary social dilemma, this section shall be effective for ten years. Within two years after the adoption of this section the temporary school district shall be immune from consolidation, annexation, or the like. After two years until the expiration of this section the commissioner, without referendum, may consolidate, annex, or the like, the school district to any other adjoining school district in the event that the commissioner deems that the social problems of the temporary school district have not been substantially corrected by the temporary school district. After ten years from the date of adoption of this section, the constitutional protection of this section shall cease, and the commissioner may at will annex, consolidate, or the like, the temporary school district with any adjoining school district. The legislature may enact legislation to carry out the intent of this section, however, in the event the legislature shall not act, the rules of the education department shall be binding except that certification of teachers may be waived by the temporary board of education as a requirement for hiring teachers.*

TO: VELMA HILL OR ALLAN HOFFMAN

A situation has developed at the Bronx High School of Science where some of the parents of the students at the High School re are refusing to sign absenses for their children as to the reason they were out last monday 2/3/64. Apparently, many of the parents did not want their children to participate in the boycott. Many of the students at Bronx High School of Science are wee worried that some of their fellow students will be expelled fr or suspended from school because the parents are either not writing the absense excuse or writing that they did not want their children to participate in the boycott.

A student from Bronx H.S. of Science called for Mrs. Isiah Robinson (AU 1-6333) and wants either of you to call her to state your opinion on tye the matter. If you receive any mis-direction from her you should contact a member of the Board of Education to see that these children are not suspended from school.

JoAnn Zimet

P.S. See me if this is not clear.

## Syracuse School Board Is Picketed
## CORE Charges De Facto Segregation

Syracuse, N.Y., Aug 30: An issue that many Northerners have preferred to consider the particular headache of the South is being raised as a problem Syracusans must solve.

The Syracuse chapter of the Congress of Racial Equality (CORE) began picketing the Syracuse Board of Education over the issue of de facto segregation alleged by CORE to exist in the city school district. 19 Negroes and whites picketed the Board building. CORE chairman George Wiley announced that direct action, partially in the form of picketing will continue until responsible parties initiate decisive corrective action for ending school segregation.

### Picket Rockefeller

CORE also picketed a meeting of the Republican County Committee which was addressed by Governor Nelson Rockefeller. All members of the School Board are Republicans.

CORE decided to picket after the Board over a four-month period brushed aside repeated requests that it acknowledge its responsibility for the racial integration of the schools in its charge. During negotiations CORE asked the Board to recognize that de facto segregation may exist in Syracuse and establish a committee to study the school system and recommend possible action to achieve racial balance.

The Board has declined any action other than a resolution passed August 20 declaring willingness to cooperate with a "responsible committee to study the problems of community interrelation and tensions" if the Mayor should establish one.

Floyd --

This is article we were discussing the other nite. As a practical matter, the big program that Joe Alsop advocates here is in conflict with his continued hawkish advocacy of the war in Vietnam.

Well, we're all sobering up these days. Even the hawks. Fissures are developing in the ice cap. Etc. I hope it is not too late.

# No More Nonsense About Ghetto Education!

*by Joseph Alsop*

It is time to stop talking nonsense about Negro education. It is time to start dealing with the hard, cruel facts of the problem of the ghetto schools, which is in turn the very core of the race problem in the United States. Above all it is time to cease repeating, "End *de facto* segregation!" as though this virtuous incantation were a magical spell. For school desegregation must always be a central and essential goal; but sad experience has proved that desegregation is very far from being an instant remedy.

For any practical-minded man, who holds that putting an end to racial injustice is the highest and most urgent task of this country at this time, the foregoing are the only possible comments on Judge James Skelly Wright's much-publicized decision concerning the District of Columbia's schools. The school system of the capital is sordid and shameful, and Judge Wright's moral indignation is only too well founded, as *The New Republic's* Alexander M. Bickel pointed out in these pages two weeks ago. Yet this decision can even be described as wicked; for it is always wicked to hold out false hopes and offer fake panaceas to those in desperate need of hope and help. And that, in essence, is precisely what Judge Wright's decision has done to the people of Washington – a city which has gradually become no more than a gigantic Negro ghetto thinly concealed behind a pompous white federal façade.

In justice to Judge Wright, it must be said at once that his evident good intentions were by no means the only good features of his decision. His condemnation of the discriminatory "track system" was fully justified. His comparison between the District's school expenditure – near to the lowest per pupil of any big city in this country – and the District's police expenditure – the nation's highest *per capita* – was both pointed and valuable. It was useful to emphasize, too, that per-pupil outlays in the District's few remaining white and quasi-white schools exceed the outlays in the deep ghetto schools by over a third. But it must be noted also, in this connection, that Judge Wright was here unknowingly putting his finger on one of the greatest deficiences in the extremely deficient Coleman report (which seems to have influenced him greatly). For the Coleman report, as Samuel Bowles and Henry M. Levin have noted in an important paper, never tested its conclusions about "equal" education by exploring the widespread existence of differential, per pupil outlays *within* school districts, as here in Washington.

But all this sinks into insignificance, as compared with the main thrust of Judge Wright's decision, which was to put forward more desegregation as the solution for the ghetto school problem in Washington, and presumably, as the solution in all the other American big cities where the same problem is festering and growing more inflamed with every passing year. In Washington, to begin with, serious school desegregation is such an obvious impossibility that it is plain silly to talk about it. Officially, any school that is more than half Negro is defined as segregated. But in the District of Columbia, the primary and elementary schools are 93 percent Negro, and even the high schools are pushing up toward 90 percent. Therefore, total, forcible homogenization of the entire school system would still leave Washington with overwhelmingly segregated schools. Indeed, this kind of forcible homogenization would quite certainly result in even greater segregation; for the predictable consequence would be an increase in the Negro percentage in the primary and elementary schools from 93 percent to 98 or 99 percent.

*Unprepared* desegregation in a grossly underfinanced school system has in fact been one of the two main causes of this city's transformation into an urban super-ghetto – a kind of near-Watts on a metropolitan scale. Since the war, every one of the great urban centers above the Mason-Dixon line has received countless thousands of Negro immigrants from the South. From this cause alone, Washington's Negro population has grown very greatly; but Negro immigration has been only one aspect of the two-sided demographic movement that has now produced a city two-thirds Negro and one-third white. The other aspect, equally important, has been white emigration to the affluent suburbs. And the crucial role of the schools in this white emigration can in turn be clearly seen, if you merely look at those who have fled and those who have stayed behind. Those who have stayed behind num-

ber close to 250,000; yet this white population of about a quarter of a million includes only 13,000 children of school age! Of the District's 13,000 white children of school age, furthermore, rather more than 5,000 attend parochial or other private schools. The conclusion is inescapable that Washington's remaining white population is almost exclusively composed of (a) old people, (b) single people, (c) couples without children of school age, and (d) couples who can afford to send their children to parochial or private schools or who live in the few neighborhoods where the schools are still mainly white. No such demographic result as that shown above could conceivably have been produced in the normal course of events. It means, beyond question, that just about every white couple outside the above-listed categories has moved to the suburbs, at least as soon as it came time to send the children to school.

The available statistics are grossly inadequate, but enough is known to show that precisely the same kind of two-sided demographic movement is tending to produce much the same sort of result in a good many other American urban centers. Washington, which has been treated as an exceptional case, is merely an *advanced* case. The best figures I have got thus far are for last year. Taking the percentages of Negro children in the primary and elementary schools as the gauge, one can then show how far six other major cities have traveled to date, along the road that has made the nation's capital into a concealed super-ghetto. Here is the picture:

Baltimore, schools 64 percent Negro, equals Washington in 1954-55.

Chicago, schools 56 percent Negro, equals Washington in 1952-53.

Cleveland, schools 53 percent Negro, equals Washington in 1951-52.

Detroit, schools 57 percent Negro, equals Washington in 1953-54.

Philadelphia, schools 60 percent Negro, nearly equals Washington in 1954-55.

St. Louis, schools 64 percent Negro, equals Washington in 1954-55.

Two fundamental problems are revealed by these figures. The first is what may be called the progressive ghettoization of a whole series of America's great urban conglomerations. In the fairly near future, this phenomenon can too easily produce social and economic consequences that hardly bear thinking about. Ghetto city centers, from which even commerce, banking and industry will have fled to the fatly affluent white suburbs, are not an attractive prospect, either for the wretched ghetto-denizens, or for anyone else. But this is not the problem to which I have been trying to address myself. I have been trying to show, rather, that in almost all cases, the practical result of *unprepared* desegregation is *an enlarged ghetto with a greater number of segregated schools than there were in the first instance.* This has in truth been the experience in every major Northern city known to me. Furthermore, it has been the experience in a good many cases in which the ugly influence of racial prejudice can be effectively ruled out. In the first flush of civil rights enthusiasm, for example, the parents of a liberal-Jewish neighborhood in Brooklyn voted all but unanimously to pair their school with a nearby ghetto school. The New York Board of Education promised special support (which took the ludicrously inadequate form of a general patch-up of the school buildings). PS 7 and PS 8 were then merged, wholly on the motion of the white parents. But within a very short time, two segregated schools had come into being where there had been one before. The pairing caused school quality to go to Hell in a hack; and the white parents, seeing their children's education in jeopardy, either sent them to private schools or moved to the suburbs. And these were the very same parents, mind you, who had sponsored the pairing.

### *When the Burden Becomes Too Much*

This is only one item of evidence – there is a mass of it, for instance, in the supporting studies behind the Watts report – to show that school quality is a far more important factor than racial feeling, in this white flight from desegregated schools that has made such a mockery of the good intentions of people like Judge Wright. When a middle-class school receives a massive infusion of children of extremely deprived background – whether Puerto Rican, or Mexican-American, or Appalachian white, or Negro – there are only two possible results. Either the added burden of the disadvantaged, educationally retarded children becomes too much for the teaching staff, whereupon school quality promptly and shockingly deteriorates and middle-class emigration quickly begins. Or the local school authorities take all the special measures that are needed to maintain school quality, in which case – thus far an almost unheard-of case – there is an excellent chance that most of the emigration can be averted.

Nor is this the end of the grim story. If we are honest with ourselves, the overwhelming majority of the children of the ghettos are going to be educated exclusively in ghetto schools; and this is going to go on happening for many years to come, no matter how much poulticing and patching and court-ordering we

---

JOSEPH ALSOP *is a syndicated columnist who lives in Washington, D. C. His most recent book is* From the Silent Earth.

may do. Free busing can and should be offered. Gerrymandered white school districts can and should be condemned (while due preparation is also made to maintain school quality). More integrated housing patterns can and should be promoted by every means possible. But these measures (strengthened, if you please, by every other measure you may happen to fancy) can never do more than fray the fringes of the ghetto school problem in cities with school populations 50 percent Negro and above. It is scandalous – it is indeed a bitter indictment of the large group in the American intellectual community that has concerned itself with the matter – that so few have been willing to face the distasteful, inescapable truth, which has been glaringly visible for years. The truth is that whatever else we may do, the problem of the ghetto schools must be mainly solved *inside the ghetto schools*, at any rate for a long time to come.

### *The Unique Non-Remedy*

As an example of the scandal, consider the recent Civil Rights Commission report on "Racial Isolation in the Public Schools." It shows that America's schools are just about as segregated as they ever were, despite all the court orders that have been issued since 1954, and all the attempts, more or less sincere, to comply with those court orders. It says nothing of the white emigration that has played such a huge role in making a nonsense of the court orders. Using evidence chosen with suspicious selectivity (and misusing it gravely at that, if the Philadelphia data are any guide), the report further seeks to discredit school improvement inside the ghettos. By implication, it takes the shocking though fashionable liberal educators' view once so bitterly but accurately summarized by Floyd McKissick in this journal's pages, that if you "put Negro with Negro, you get stupidity." And having established school desegregation as the unique remedy, the report finally proposes busing on a massive scale as the best means to secure desegregation. Yet the report is datelined Washington, where no amount of busing would make the school system anything but segregated – short of a constitutional amendment permitting forcible imposition of wholly different living and schooling patterns in the District, Maryland and Virginia. Are we then to conclude that more than 90,000 Negro schoolchildren in Washington are to be forever condemned to defeat and despair? Or are we to conclude that this report, like so many other very similar documents, is the product of the kind of self-serving reasoning that must too often be expected, alas, from virtuous academics with a personal vested interest in a badly researched theory?

The answer is, of course, that it is not only viciously heartless and socially disastrous, but also wholly needless, to accept the viewpoint of the Civil Rights Commission and Judge Wright. There is something arrogant, there is even something disgusting, in this strange view that ghetto children can never be rescued, can never be educated, unless they are subjected to the benign classroom influence of white middle-class children. Ghetto children have all the potential of any other children; but in their background of poverty and deprivation, they have a heavy handicap. What is needed, therefore, is to overcome the handicap, by those special measures I have already mentioned as useful and needful to prepare for school desegregation, wherever desegregation is feasible. This means taking a series of steps of the most ABC simplicity. First, the children's school experience must begin early, at least in pre-kindergarten. For the inability to speak common English, which afflicts so many children of the ghettos, can only be overcome by catching them very young. Second, they must be taught in small classes – not more than 15 in pre-kindergarten and kindergarten, and not more than 22 or so in grades one through six. Otherwise, *teaching* will cease and keeping order will become the sole aim. For ghetto children mainly come from homes wholly unoriented to learning and to books. Gaining and holding their learning-attention (which is the right way to maintain sound discipline) is therefore the most difficult feat for every teacher in every ghetto school. And only reduced classes permit good, average teachers to accomplish this feat. Third, a certain number of backup teachers are needed – one extra for each three or four classes – so that when Billy and Sally, Victor and Jane begin to fall behind, these laggards can be promptly gathered into still smaller classes, for more concentrated work until they catch up again. Fourth, all the obvious extras in the way of remedial reading, health care, psychiatric care, etc., also have to be provided. These are, in fact, the principal features of the More Effective Schools program, that has been under way in New York City for three years. One wonders why this program was not chosen for study by the authors of the Civil Rights Commission's report. Perhaps the answer is that in the More Effective Schools, all children have shown a very great average improvement, and those children who have begun in pre-kindergarten and continued on from there are actually performing, on average, *at grade level or above*. If this program had been chosen for analysis, it would have sadly undermined the thesis of the authors of the Civil Rights Commission report; but it is nonetheless quite wonderful news, which should be published in Mao-style Big Character Posters in the corridors of every university where educational theorists flourish.

That it should be news at all, is a considerable showup of the ways of thinking and working and dealing

with facts of all too many American white liberal intellectuals. In this instance, it goes without saying that properly prepared school desegregation is the ideal solution of the educational problem of America's Negro minority. It goes without saying, too, that wherever desegregation can be successfully accomplished, the moral and social duty to accomplish it must never be dodged or ducked, even if the needed preparations for successful desegregation are difficult, time-consuming and costly. But a good many of our liberal intellectuals never appear to have heard the rule, *"Le mieux est l'ennemi du bien"*; it never appears to occur to them, in fact, that exclusive pursuit of the ideal solution can prevent the practical solution; and few of them seem to have bothered to do the tedious homework, on urban demographic patterns, for instance, that would have shown them how far the ideal solution is out of reach for most ghetto children at present. Their performance would be less unadmirable, I must add, if they had been content to urge their ideal solution, despite its unreality for all but a small minority of ghetto children. But they have not been content. A good many of the liberal educators and sociologists have done everything possible to discredit and to block the practical solution of the educational problem of our Negro minority, which is radical school improvement inside the ghetto. These people seem to have taken the attitude, in fact, that if they could not get desegregation, nothing else would do – and to hell with the millions of Negro children who have little hope of entering integrated schools!

### *Quality on the Cheap*

This has been a main reason, one suspects, for the extraordinary belatedness and extreme paucity of the serious attempts to help these children, and for the almost universal failure to defend and support those attempts when they have been made. In New York in 1957, for instance, the Demonstration School Project produced excellent results at the high school level, at a cost of about $200 per pupil above the normal outlay. Whereupon the New York Board of Education, by an automatic reflex, tried to get the same results at about one-third the extra cost, in the Higher Horizons program, which was a flat bust. But did anyone protest the debasement of the Demonstration School Project into Higher Horizons? Almost no one did; and meanwhile a chorus of progressive educators has ever since been heard, proclaiming that Higher Horizons' wholly predictable failure was final proof of the uselessness of improved education in ghetto schools. In the same fashion, the More Effective Schools program, which has an extra per-pupil cost of about $430 a year, is beginning to be nibbled to death by the economy-ducks on the Board of Education; but no one has sprung to its defense except this writer and, far more importantly, the United Federation of Teachers, whose leaders largely devised the program. And this program, launched in 1964-65, is literally the first to produce clear test results showing that ghetto children can be given a fully adequate education in ghetto schools. For when the testers say that the children who were caught young enough by the More Effective Schools are performing, on average, *at grade level and above*, they merely mean that these children are performing just as well as white middle-class children. And this is the first case of complete victory over that terrible educational lag that is the curse of America's Negro minority.

For economic and social reasons, because of injustice and discrimination, above all, because of the circumstances in which this heedless, ruthless society condemns them to live, Negro children normally enter the first grade considerably behind white children; and worse still, they generally fall further and further behind, the longer they stay in school. On average, those who stay through high school are by then three and a half years below grade level, which means that the *average Negro high school graduate only has a slightly better than eighth grade education.* "Stay through high school" is in fact the right phrase, rather than "go through high school." Since the average is at the level of eighth-grade-plus, it is not surprising that the military draft tests have revealed a shockingly high proportion of functional illiterates, even among Negro high school graduates. Add the two-thirds and more of Negro boys and girls who drop out before finishing high school, and you have a frightening result.

Briefly, 400,000-plus eighteen-year-old Negroes are annually injected into this country's socio-economic bloodstream; but of these 400,000-plus, hardly 10 percent have the true equivalent of a normal white middle-class high-school education – which means no more than an ordinary *blue-collar education!* In other words, we annually add to the American body politic no less than 360,000 Negroes of both sexes who are wholly

COMING: *The no-longer silent welfare poor – by Richard Cloward & Frances Fox Piven*

unequipped to get or hold any job in which grossly deficient schooling is a handicap – and that means, more and more with every passing year, just about any job at all! If a malevolent and astute racist were asked to design a system guaranteed to prevent Negro achievement, to promote bitterness, frustration and violence, to perpetuate and even to intensify discrimination, this is the system that he would surely come up with. To reform this system, any outlay, any sacrifice, any effort, however great and however painful, is not merely a moral imperative; it is also a political and social imperative of the most pressing and urgent character. And the system is not going to be reformed, alas, by more desegregation orders.

### *What Will It All Cost?*

The outlays for adequate reform will be enormous indeed, when and if we make up our minds to pursue desegregation by all means possible, but also, and above all at this stage, to insure quality education in the ghetto schools that are beyond practical reach of early desegregation. The job can only be done by the federal government, for the cities and states are already overstrained; and it will cost billions – how many billions, no one has figured out, but certainly quite a number.

There are two points to make in this connection. First of all, anyone who discovered a reasonably reliable cancer cure, and then withheld it because of its expense, would be treated as a monster. And in effect, we are talking, here, about a social-political-economic cancer that is approaching the terminal stage. Secondly, however, the proof by the More Effective Schools that improved schools really can cure the cancer is by no means a proof that the MES program is the ideal cure. There may be other, better, perhaps cheaper ways to get comparable results. Since what is required is positive discrimination – by which I mean very much heavier investment per pupil in ghetto and other deprived neighborhoods – it is obvious that the discrimination should be no greater than is absolutely necessary. (In New York there is already resentment of the MES program, even within the ghettos, among parents of children whose neighborhood schools have not been included in the program – and since there are only 21 More Effective Schools, and expansion of the program has been halted by the duck-nibblers, that means, potentially, resentment by something like nine-tenths of the ghetto parents in New York.) Thus a systematic and unbiased effort should be inaugurated, to see whether comparable results can be attained in more economical ways. Such an effort should center in New York City, for the test-background of MES, though so brief, is unique and therefore essential for comparative purposes. Instead of unsystematic nibbling, such as the Board of Education has now begun, expansion of the MES program should clearly be resumed. A follow-on program should equally clearly be adopted, in particular in the relevant junior high schools. Otherwise many of the MES children will experience the kind of disheartening setback on entering jungle-junior-high, that the Head Start children have experienced when they have entered unimproved primary schools. But these supportive measures should also be combined with experiments to discover whether altering this or that expensive feature – using one back-up teacher for every four classes, instead of one for every three as at present, for example – will produce satisfactory results.

The only point on which there should be no compromise is the schoolchildren performing *at grade level.* And if even larger investments are shown to be required – for example, in recreational and para-education activities after normal schools hours, in the schools of the very most tragic neighborhoods – then there should be no nasty nonsense about this being "too expensive," to quote the mole-sighted new chairman of the New York Board of Education, Albert Giardino. When you are talking about cancer cures, "too expensive" is an impermissible phrase. And of course, in this systematic experimental effort, due attention should also be given to the other efforts of school improvement much more recently launched under Title I of the Education Act, which will surely be remembered as the greatest domestic achievement of the Johnson Administration. If one or another of these show, when the tests have all been made, that there is another, cheaper or better way to get the ghetto children to perform *at grade level,* that will be the system to back wholeheartedly.

In this business, there are only three rules. First, face the facts as they are, and deal with them as they are. Second, spend no more than is needed for the children to perform, on average, at grade level; for this is the outside limit of positive discrimination that other people are likely to tolerate. But, third, invest until it hurts cruelly, if need be, so that the average performance of the children of the ghettos reaches grade level or above; for there is no other cure for the cancer that threatens American urban life.

I am not so foolish as to suppose that the hoary, furtive vice of racial prejudice can be abruptly overcome by this long-range cure, any more than I suppose that *prepared* school desegregation can do more than greatly soften the effects of racial prejudice. But I submit, the white people of goodwill in America, and above all our well-intended liberal intellectuals, have been almost inconceivably unrealistic, flabbly-minded and lazy about learning the facts concerning this cardinal American problem. Take a minority differentiated

by skin color. Tolerate a national school system that gives nine-tenths of this minority an education very widely inferior to the normal education of blue collar workers, let alone persons of higher achievement. How, then, can you expect or hope for an end to discrimination and racial prejudice?

Or if you want the other side of the medal, look at the few areas in American life, in which prejudice and discrimination have been, if not absolutely banished, at least minimized in recent years to the point where there is no grave problem. Too few people recall that in the lifetimes of a good many of us, Marian Anderson and Joe Lewis were, in some sense, nine day wonders as well as precursors. And too few people are even aware that real integration of the armed services only began in the line in Korea. (I can still remember AWOL Negro soldiers from the segregated logistical units, and even from the unhappy 24th Regiment, coming up to the hottest parts of the line – one or two, or three or four, or even 10 or 12 a day – to ask whether there was any place for them in battalions in combat; and I remember, too, how they were warmly welcomed, though the battalion commanders always knew they were AWOL, simply because the line was stretched so thin in those first months of the war!) Yet in the arts – not just jazz, but all the arts and throughout show business – and sports and the armed services, discrimination has now been so largely overcome. And what has so largely overcome discrimination in these tragically few departments of our national life? Brilliant Negro achievements is the answer. And what has permitted this achievement in these special areas? Again, the answer is the relative easiness of achievement in these few areas, despite deficient schooling, for those with aptitude and ambition and courage.

*Moral Cart Before the Practical Horse*

Once again, I am not so foolish as to suppose that high achievement in every area of national life would be immediately guaranteed, even if every one of the 400,000-plus Negroes who become 18 each year were assured of a first-rate high school education, with the university to follow, of course, for the abler boys and girls. Prejudice is an ugly reality. The tentacles of custom, born of prejudice, are also ugly realities. Yet those same tentacles had the armed forces in their grip less than two decades ago, and had the world of sports in their grip hardly more than three decades ago. And what has lopped off the tentacles? Negro achievement, and nothing but Negro achievement. For no amount of enforced desegregation would have ended discrimination in the hard-bitten army and harder-bitten professional sports teams, if Negroes had not pegged even, and often much better than even, with their white fellow soldiers and fellow athletes. Yet in most areas of our national life, conspicuous Negro achievement is all but impossible, simply because so few American Negroes as yet receive normally decent schooling. Give them the needed education. At the outset, it may be, only seven in 20 will break through the barriers of prejudice and custom. But those few will surely inspire the next generation to say, "If *they* could do it, *we* can do it." And by the same token, white prejudice will surely be eroded, in every area where Negroes are enabled to achieve highly.

The truth is that in our approach to almost every aspect of the race problem – whether segregation, or discrimination, or Negro poverty, or whatever it may be – we have persistently been placing the moral cart before the practical horse. Education is the key to the whole problem, because education leads to jobs; jobs lead to achievement; and achievement reduces discrimination. That is the common-sense formula, which puts the horse ahead of the cart. And if we do not get the moral cart moving at long last – if we cannot provide good education and decent jobs for our Negro fellow citizens, and if these first steps do not begin to erode discrimination and open ever wider doors of opportunity – then this country can too soon become a place in which none will wish to live, who still care much about the things that America is supposed to stand for.

Some may say: "But if many white Americans have always cared so much about these things America is supposed to stand for, why this belated sense of urgency? Why did not Franklin Roosevelt, for instance, begin pressing for serious civil rights legislation nearly 40 years ago?" In the abstract, those who say this will be dead right. But the sad truth is that any national problem that is highly controversial, very difficult, yet possible to shove under the rug, invariably ends by getting shoved under the rug with extreme firmness. While the race problem in America was mainly a rural Southern problem, it could still be shoved under the rug. But in the last two decades and more, our race problem has more and more become a Northern urban problem, as well as a more and more urban problem even in the South, where the major cities show the same pattern of demographic change already traced above. In this new guise, the race problem cannot any longer be shoved under the rug. Justice must be done at last, or we must expect a gradual decline toward the sort of country that will choose a new President Verwoerd. Those are, literally, the choices before us. For my own part, I am confident that justice can and will be done, at no matter what cost to the budget and the taxpayer, if only we can manage to look at the problem in common-sense terms.

# Boston School Boycott Is Huge Success

## *20,000 Stay Out; Tutees, Tutors Protest; NSM Staffer Calls It "Stimulating"*

Over 400 NSM tutees were among the 20,000 Boston school children who supported the school boycott on February 26. There are 90,000 students in the Boston school system.

Mrs. Sarah Ann Shaw, director of the NSM project and a member of the boycott coordinating committee, termed the protest "a stimulating success."

"The thirty-five freedom schools set up for the boycott were all filled to excess. We could have used another 10 or 15 schools.

In preparation for the boycott more than 70 NSM tutors from Harvard, Radcliffe, Simmons, Boston University, Brandeis, and Tufts canvassed the ghetto areas, selling freedom booklets and boycott buttons. Money raised through these efforts were contributed to the support of the boycott.

A week before the demonstration NSM and other campus civil rights groups staged a rally at Boston University to raise additional funds for the boycott. Featured at the rally were two of the Roxbury Freedom Choirs, whose membership includes many NSM tutees.

The boycott was called to protest against the school board's refusal to acknowledge or correct alleged de facto school segregation.

One of the leaflets used in the boycott, prepared by Father John Harmon and Packard Manse, said, "Racially segregated education is a moral evil."

It also stated that "If the white man continues to resist integration, he is accepting his own moral suicide."

One member of the Boston school board is presently urging that the board take action against the leadership of the boycott.

# DEP Worker Arrested On Charges Resulting From Boycott Activities

A Detroit Education Project field secretary, Barry Kalish, was arrested on the complaint of the father of a high school girl who participated in a Barbour Community Student Movement (BCSM) picket line called against a Detroit supermarket.

The warrant specifically charges that Kalish had induced the girl to participate against the wishes of her father in the NAACP inagurated demonstration.

On Tuesday, February 4, a picket line was thrown up around an East Side Detroit Market, under the auspices of the NAACP. The demonstration was called to protest the refusal of the supermarket to stop selling Wilson's milk.

On the first day of picketing at the market a BCSM member was arrested after he threatened to file a complaint against a policeman who had struck him in the face. Nine other BCSM members were arrested after they sat in front of the police car to protest this first arrest. One of these students was adaughter of the complainant.

The students, ranging in age from 12 to 15, were first taken to the local precinct and later transfered to the Juvenile Detention Home where they were illegally detained

# *BAYOU Working With Action Group To Develop East Baltimore Leadership*

The Baltimore NSM Project has stepped up its program of community organization in the last two months, according to Eric Craven, Director of Baltimore Area Youth Opportunities Unlimited (BAYOU).

The program is centered in the Shutter Street area of the East Baltimore ghetto. It is designed both to test methods of community mobilization and to stimulate the growth of radical leadership in this depressed community.

Since BAYOU was founded last summer, it has concentrated on two phases of community development -- the first, a vigorous tutorial, ten curricular seminars, and clubs. This was designed to supplement the deficient city sponsored educational and recreational facilities. The second was to familiarize the community with the existence of BAYOU and gain acceptance.

### Organizing Protest in Four Block Area Over Garbage

Last summer, there was an attempt to organize the people around the "chicken water" issue. "Chicken water" was the foul-smelling accumulation of a poultry by-product around a processing plant in the neighborhood. The residents carried jars of "chicken water" into the Mayor's office to protest the Sanitation Department's failure to remedy this health hazard.

While the protest was successful, the lack of a continuing and militant local leadership prevented the application of effective pressure on the city to meet other needs of the neighborhood.

BAYOU began its program to nurture community leadership prepared to make real demands on the public and private interest groups by surveying the resources of the neighborhood around the Monument--Aisquith Street a-

They passed out leaflets and spoke to tenants about specific grievances. Two blocks on Shutter Street, comprising about 60 buildings with perhaps 800 tenants, were the first to respond. According to Eric Craven, these blocks were already partially organized under the auspices of the Shutter Street Block Association.

The East Baltimore Action Group, composed of tenants, block association leaders, and organizers from BAYOU have been mobilizing the community to protest the dumping of garbage into the alley behind Madison Street and the back yards of Shutter Street homes. EBAG demanded that landlords and the city government erect fences in the alley and yards to prevent the dumping. They are circulating a petition which so far has reached over 200 people.

EBAG hopes that the community will become militant enough to reach a state of permanent political awareness. EBAG believes that only when the East Baltimore movement becomes self-sustaining, will the ghetto be assured effective participation in the democratic process.

# *Baltimore Ghetto Students Demand Improved School, Hold Lunchroom Boycott*

One-third of the 2400 member student body of Dunbar High School in Baltimore, Maryland refused to eat in the school cafeteria last Monday (March 1st) in protest over the quality of the food. The boycott was led by members of a group called BENY (Better Education for Negro Youth).

On the same day a delegation of ten students from BENY presented a list of demands to Dunbar principal, Robert Diggs. The group asked for better books, better heating system, better food, new typewriters for business classes, more and better teachers, and improved curricula.

They were told by the principal that the main problem was lack of money to provide new facilities and supplies. Two new high schools have been built in white areas in Baltimore within the last year.

The membership of BENY has threatened to take further action if the principal does not show a responsiveness to their demands.

During the previous week Mr. Diggs had forbidden members of BENY to distribute literature in the schools, critizing conditions.

BENY was formed a month ago by NSM tutees at Dunbar who were concerned with improving the conditions.

# A Vehicle For Freedom?

**William Strickland**
**Executive Director**

This cannot, claim to be an editorial. It is more a collection of personal musings. Musings on the school boycotts, and what they seem to mean, and the kind of reaction they have engendered.

What I want to suggest is that Negroes have been excluded for so long from the American society, that their most natural impulse is to seek to be let in. People, black and white alike, have come to feel that freedom is synonymous with the joining together of their estranged worlds. Consequently, one of the demands of the boycotts has been to integrate the schools.

But does integrating the schools per se really create the desired effect of improving the schools? How in fact are the schools to be integrated? In New York City, only 1% of white parents have so far availed themselves of the open transfer school policy. This means that the anticipated integration is, in reality, going only one way. And all those buses thought to be the vehicles for academic freedom are only transporting black children out of Harlem -- and not very many black children at that- into white schools. The school situation of Harlem, however, remains the same, as does the plight of all those kids who are now left behind.

Bussing, then is largely a ceremonial remedy. The problem of Harlem cannot be dealt with by diverting our attention outside of Harlem.

The absence of a white child in a classroom means essentially one thing: that classroom is probably located in a segregated school. And that segregated school is probably located in a segregated neighborhood. And segregated neighborhoods are usually gerrymandered, but are always powerless in the sense of their ability, relative to other neighborhoods, to have their needs met. It is because democracy does not extend into the ghetto that the ghetto must scream in order to be heard.

Let us be honest with one another. As soon as we begin talking about a total solution for slum schools, we are talking about money. Large sums of money. We can then begin to see why boycotts are necessary. They are necessary to overcome the combination of traditions and fears and vested interests that have permitted the schools in Harlem and the South Side and Roxbury to endure in their current inadequacy. Most of the controversies about boycotts are diversionary. All of the hue and cry about personalities is a reductio ad hominem which ought not engage the attention of reasonable men. For the issue is not the pros and cons of boycotts, not the personalities involved, but why there was a need for a boycott in the first place.

One other reason is also, tacitly, put forth for integrating the schools: that if white children are brought into the inferior schools of the inner city, then their parents will demand that those schools be brought up to standard. This seems to me to reveal a paradox. It is seen as permissible for white parents to protest conditions affecting their children --and it is further implied that their protesting will be successful -- while it is seen as presumptuous or "radical" for black parents to indulge in similar behavior. What is unfortunate about this view is that it is not concerned with introducing into the ghetto, the kinds of assistances that would lead to an awareness of one's rights which would forever preclude the need for outsiders

The NSM News-Observer is a publication of the Northern Student Movement, 73 Morningside Drive, New York, New York.
The editors are Charles Turner, Rust Gilbert, and Sam Leiken(college news).

Sure I'd like to play ball after school, but my bus leaves at 3:10.

to speak for the aggrieved.

Boycotts then have the possibility of fulfilling two functions. They can shake up the existing structure so that it is possible to effect change, and they can also provide the opportunity for organizing people so that their sense of civil responsibility will last beyond one single issue -- will, hopefully, last their entire life.

One cannot transport people to freedom. In the final analysis freedom must be achieved in the areas of need, themselves, in the areas where it has never been realized. By this measure, busing fails.

## Across the Nation

Feb. 3--Jackson, Miss.: Four youths hit by police gunfire at SNCC rally. The demonstration was called to protest police brutality.

Feb. 8--Chapel Hill, N.C.: Ninety-five demonstrators arrested during protests over segregated facilities. The arrests bring the number arrested in civil rights demonstrations to 350 in the last three months.

Feb. 10--Selma, Ala.: Two leaders of of the Selma voter registration drive have qualified as candidates for the March 17 Democratic primary. They are the first colored to seek public office in Selma since Reconstruction.

Feb. 25--Chicago, Ill.: 175,000 Chicago students stayed out of school during Chicago's second school boycott during the last six months.

Feb. 26-- Princess Anne, Md.: Fifty-Seven Maryland State College students required hospitilization after they were attacked by police during demonstrations against segregated facilities in the college town.

# A Basis for Change

By Elsie Chandler

Since graduating from Wisconsin in January, I've been working as research director for the Harlem Action Group, an NSM affiliate.

HAG is currently working with the rent strikes, and beginning the initiation of a self-sustaining, community based organization, geared to political action.

My time has been spent mainly in compiling background material to help organizers know what persons and groups they can rely on for support and against which interest groups to direct their attacks.

Through this experience research has lost the sterile, academic quality which it had in college. I no longer feel as if I am thinking and reading in a vacuum, or gathering knowledge for its own sake. The information collected is not directed toward papers which are soon forgotten but rather toward programs that can bring change in lives and living condition. And in the process, I am changing too

I am learning much more from the people I work with and from walking the streets of Harlem, than I will ever learn from my specific job.

I have not been intellectually surprised by anything I've seen. I have read and known for a long time about economic exploitation and its manifestations. But reading about it and being surrounded by it are different. So different that I am still suffering from the emotional shock.

Yesterday, for example, I sat in our apartment-office (with the rat hole in the middle of the floor, and roaches, and no heat, and cracks in

cont. on page 4

The New Student

# Stayed on Freedom

**Peter Countryman**

In the last few years, American students have forged for themselves an increasingly significant role in the movement towards democracy and freedom. The development of this role can be seen clearly in the participation of students in the "civil rights" movement in both the North and South.

One of the most surprising elements of this commitment is that it represents a deviation from traditional student activism and implies a rejection of the concept "student" as this society has defined it. We are not interested in what social change students as students can bring about; we are not interested in mobilizing great masses of students to demand as students that certain social changes occur. We are interested in how students as citizens can be effective in working with other citizens to realize the depth and breadth of positive social change we all need. This is not because we have, it seems, forever lost our student identities; we are now "citizens who study".

Why is this? Why have students committed themselves to fulltime political activities which do not even focus on the student world as the center for social change.

I would point to three elements within the university which lead to the roaming of her students. First, the university is paternalistic: it refused young people the dignity and growth inherent in the taking of responsibility for the major decisions in one's life and the life of one's community. The result is a thwarting of the democratic desire to participate in the shaping of one's social environment. Though he has few material discomforts, the similarity between the college student's position and that of the ghetto residents is still there.

Related to this is the university's failure to present the student with the stimulus and opportunity to be creative in his personal and political life. He is equipped to work within the existing structures and to utilize conventional methods in his work. He is taught to understand what is, but not to develop what could or should be; therefore, the potential of the human mind to discover new means to new ways of life becomes drowned in the pressure to absorb old analyses of existing institutions.

Finally, and perhaps most important, is the illusory quality of the student's live. Within the university he has little interpersonal responsibility, he deals with other people in almost totally intellectual terms, he is not faced with the need to respond to rapid change; in short, he is perpetually engaged in either experimentation or preparation. Analysis per se, in this world, becomes an end, rather than a means used to implement personal responsibility and a commitment to values.

These three deficiencies present the individual with a vague but fundamental decision: either he must submit to the lethargy of an uncreative privatism or he must grab onto an alternative situation within which he as an individual has power bears responsibility and deals with the coarse fiber of human life--and thus begins to sense his value as a human being. It is as such an alternative that NSM's program and that of SNCC have taken on extreme importance for the American students.

# NSM Views the New York School Boycott

## Boycott, Movement from Below

By Andrea Cousins -Harlem Education Project

February third marked the biggest civil rights demonstration in this nation's history. More than half-a-million school children and eight per cent of the city's teaching force boycotted more than 400 of the city's schools. Their demand was "integrated quality education for all."

Although the boycott was a success, there are several misconceptions that the public media helped to perpetuate up to and even after the boycott.

The first of these was that the crowds that participated in the demonstrations in front of the Board of Education and the parents who kept their children out of school were "whipped up"by the angry,"irresponsible" civil rights leadership. This observer, after attending half-a-dozen meetings in the Harlem public schools, is convinced that the parents themselves supported by teachers and members of the local school board, were those most indignant about the school experience of their children. The Harlem Parents Committee, one of several groups which coordinated protest activity, is itself made up of local Harlem citizens.

At one PTA meeting of an integrated school on the fringe of Harlem, a white member of the local school board discussed the need for quality smaller classes, better teacher training and curricula which would recognize the multi-racial character of the American population as well as the physical integration of white and non-white students. She shared the platform with the superintendent of Harlem schools, who was unsuccessful in assuring the assemblage of parents that Harlem schools were "inadequate" but not "inferior."

At this particular meeting one mother stood up to say to the superintendent-"I work from 9 to 5. From 7 to 9 every night I help my little girl with reading. She does O.K.with me, but school doesn't seem to help her any. I'm going to break my back to see that she doesn't fall years behind in reading like the rest of the kids. She comes home. and says to me, "Mama, why am I in school? What am I supposed to tell her." The audience murmured warmly, and another woman stood up to say "My child never even learned how to write and now he's in the third grade."

A white mother added "One day a Negro substitute teacher spent the day teaching my son's class. When he camw home, he said, "Mrs. Wilson was absent, so she sent her maid instead." She then turned to the audience and said "Is this the way we want our children to grow up looking at the world." The audience sat in stunned silence. The superintendent did not reply.

No elected politician, including Adam Clayton Powell, came forward to support the boycott until after its completion. Neither did any political or economic institution give substantial aid of any kind. The boycott organization was made up primarily of laymen and was self-supporting.

The second and more pervasive misconception, fostered largely by the press, was that the civil rights groups were pressing merely for integration through cross busing. The New York Times, for example, editorialized on the misdirected nature of the boycott demands. Funds should be spent on teachers, it argued not bus-drivers.

Thelma Johnson, a spolesman from the Harlem Parents Committee, would be the first to agree.The primary aim of the boycott, she stated, would not be the dislocation of children from their own neighborhoods. Cross-busing was in fact the primary solution offered by the Board of Education, rather than by civil rights groups.

It was precisely this type of solution which brought the latter to refuse,the "desegregation plan" which the Board had offered. The plan,described by the Committee as "design with proposals" rather than a genuine program for thorough integration, dealt with only 30 of 144 NewYork schools in question. It did not substantially confront the need to rezone school districts, to build new schools accessible to a number of different communities, or to broadly alter the"feeder pattern"of school populations,eg, have all children attend first through third grades in one neighborhood,and fourth through sixth in another.

In short the Board of Education did not meet its own stated objectives: that of attacking the problems logistically, with definite application to all those students now attending segregated schools.

The City-Wide Committee for Integrated Schools is well-aware that its alternatives to the present educational system will only be realized when the State Legislature and the Board

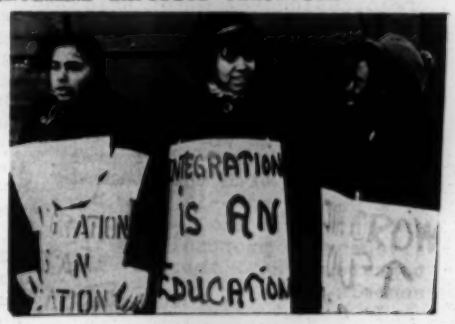
## *Boycott, A Prod*

By Dan Schechter
Former NSM Communications Director

The boycott was not the act of a few wilful extremists. All of the civil rights organizations in New York, including the Urban League and NAACP, both hardly noted for their radicalism, participated in the effort. Why? Did they want to---as some New York papers suggest--- seek publicity for themselves while showing callous disregard for the education of New York's children? I think not. The boycott was the culmination of years of attempts to get the Board of Education committed to a real program for integration and better education for Negro and Pueto Rican Youth.

Last spring and summer, the civil rights groups demanded to sit down to talk about integration and educational improvement, but the "enlightened" Board of Education had little time for such meetings. Demonstrators went to jail this summer in an effort to dramatize the Board's apparent lack of programatic concern with their demands. Finally -- and only when a September boycott was proposed -- did the Board sit down with civil rights leaders and agree, in writing to submit a timetable for integration on Dec.1. The Board then broke its pledge. In the meantime, Board President Donovan (nationally known for his concern about freedom-- in Cuba) was making inflammatory statements against the leaders of the City-wide Committee. In this climate, a new boycott was planned to dramatize the dissatisfaction of New York's Negro and Puerto Rican community with separate AND inferior education



Yielding to this pressure in mid-January,the Board,with great fanfare, attempted to put the brakes on the growing boycott movement by announcing its program for integrating New York City.

While the Board's program might appear "reasonable" to some,it is inadequate. The Board's plan is to "Princeton Plan" some 30 city schools [There are over 165 schools in New York with more than a 90 percent non-white student body.]Not only does this plan not even pretend to deal with the problem of hard core slum-segregated schools, it is silent about increasing the number of Negro and Puer-

# NSM, SDS, to Sponsor Conference In April on Community Organization

The Northern Student Movement and the Economic Research and Action Project of the Students for a Democratic Society will co-sponsor a conference at Ann Arbor, Michigan on April 10,11,and 12. The conference will be entitled "Community Organizing for Economic Issues"

The purpose of the conference is to bring together people who are involved or potentially involved in organizing efforts. Discussion will center around the need and methods of organizing around ecomic issues.

Participants in the conference, primarily, students and young adults, will come from NSM, SDS, CORE, SNCC, peace groups, reform and liberal groups within the Democratic Party, and other community organization groups

Conference sessions will deal both with the development of economic programs national and local in scope and with the methodology necessary for the implementation of such programs.

The latter will be dealt with through case studies and their discussion in workshops. There will also be workshop discussion of possible future programs by those people who are working in a particular area.

It is hoped that people interested in working on summer projects with the sponsoring organization will attend.

## *Harpur Sends NSM $225.00, Assists HAG*

The Harpur College Civil Rights Club has raised $225 to aid the NSM field secretaries working on the rent strike.

In the short period of two days over 300 rent strike buttons were sold by Harpur students at tables set up in the cafeteria.

Late in February thirty Harpur students spent their semester break working with NSM in New York. While some of the group worked with the national staff, the majority participated in field work with the Harlem Action Group.

The initial phase of their activity was to leaflet the west Harlem area both to publicize the March on Albany and to gain familiarity with the area.

The students then undertook a survey of the entire HAG district, using the knowledge they gained from the previous work, to compile a comprehensive map detailing the physical condition of the HAG area.

cont. from page 3

to Rican teachers in the system (the board doesn't hire teachers with Spanish or Southern accents), revising textbools which write the Negro out of history, or selecting construction sites so as to further school integration. The board's plan has been attacked by many organizations--many of which advanced plans of their own. The American Jewish Congress, for example, by applying the board's own criteria, found some 83 schools could be paired for integration purposes. Only now--after the boycott and with the threat of a second one--is the board showing a real responsiveness to proposals to integrate and improve the schools.

I do not like the prospect of busing children across New York. Although paired schools are no more than 1+1/2 to 2±1/2 miles apart. Yet, housing segregation is so institutionalized (and profitable) that one can't expect the ghetto resident to wait for the ghetto to whither away. As Prof. Paul Breines pointed out: "Busing of white children is not really the issue. However, let the white parent who quite justifiably does not wish to send his child to a miserable Harlem school ask if the Negro parent whose child presently attends this school wants his child to be there."

While teaching in a Freedom School during the boycott--a most educational experience for both myself and the children--several Harlem youths told me that they had seen rats and roaches in their classrooms. Perhaps all parents ought to demand an immediate expenditure in whatever amounts (quality) education should not be "prohibitive" in this, the wealchiest nation in the world to improve all the schools, especially those in blighted areas.

Nearly 400,000 school children and 3,000 teachers stayed out of school on Feb. 3rd. The strategy underlying the boycott was that a real expenditure of funds and a meaningful and substantive program for better schools would only be forthcoming if enough people made the demand.

White people and their institutions don't seem to act until threatened and pressured.

Official New York reacted to the boycott in fear. More anxious to preserve order than to insure justice, concerned more with stability than with change, official New York, through its press and "responsible" organizations, sought first to institutionalize the conflict and in failing to do so, to discredit the boycott. What to Board of Education President Donovan was a "fizzle" proved to be the largest demonstration in New York's history.

Bayard Rustin, to whom its success is largely owed, said "The boycott and the rent strikes give fair warning that the civil rights revolution has reached out of the South and is now at our own doors....I think we are on the threshold of a new political movement--and I dont mean in the party sense-that is going to change the face of New York in housing, in jobs, and in schools." As the coalition of progressive forces begins to solidify its sizable grass roots constituency around a militant and fundamental program, the governmental establishment will be forced to become more responsive to human needs.

## From Below

cont. from page 3

of Education have no choice but to enact them. It is a fact that the Legislature itself does not consider New York City Schools to be one of its prime interests. But a protest like the February 3rd boycott has claried the issue and revealed the broad base of its support.

The highest percentages of school absences occurred in Puerto Rican and Negro neighborhoods--a fact which suggests new possibilities of alignment on other issues, in addition to that of education. In this case Harlem was the spearhead of a protest which drew the self interest and support of whites. Long-range demands and programs would involve a broadening of this interest and support. The day that half-a-million children "stayed out for freedom" was no simple day of protest; it was a sharp indication of a new political awareness, one in which the lines are drawn with clarity and power

### Basis for Change

cont. from page 2

the walls) listening to some men from the neighborhood who had come in to volunteer as organizers. They were talking about this so-called free country.

"I'm a contradiction in the system," one said, and went on to explain that when people talk about freedom and democracy, he knows that it doesn't apply to him.

Good "campus radical" that I am, I smiled and nodded my head. But then he turned to me and said "You college kids who mean right, you're going to have a hard time here. You mean right, but people are going to look at you like you're the enemy. And you are the enemy. But you mean right?"

I mean right. What is that? It makes me angry to see rat holes. I don't feel very altruistic; most of the time I feel excited, frightened, happy, anxious, and tired.

I am an alien in Harlem. But because I come from the outside, I can offer different skills and insights which can be useful in fighting a common battle. And it is a common battle, for I feel my freedom is contingent upon fighting against conditions that allow landlords to charge $34.00 per week for a rat ridden, tenement apartment. While we are fighting together against our common enemy, we are learning from each other, and in the process, our respect and knowledge of each other and ourselves is deepening.

## *DEP Arrest*

cont. from page 1

until 3:00 a.m. the following morning. They were not fed, nor were their parents informed of their arrest by police or court authorities.

Kalish was arrested two days later. The police had gone to the parents of making accusations that Kalish had "brainwashed" the students in the civil rights section. They also implied that Kalish was a Communist and that he had sexual motivations for his involvement with the movement.

Concerned community parents are trying to persuade the complainant to withdraw his charges.

A further development has been the formation of a group of Barbour Community adult into their own organization. They will take political action toward the resolution of school and police problems in additon to providing support for BCMS.

BCMS began originally as a school club while Kalish was a teacher at Barbour Junior High School. It later developed into an outside activity and has expanded to include students from other Detroit high and junior high schools. The group has been involved in a successful direct action campaign against a local barber shop in addition to picketing.

The students have now started weekly Sunday night workshops on police brutality, school problems (textbooks, teacher attitudes, etc.) and job discrimination.

The DEP coordinator, Frank Joyce, expressed great concern that Kalish's conviction, should it occur, would set an extremely dangerous precedent, perhaps, severely curtailing DEP's work with young people. The matter is scheduled to go to trial on March 17.

SUBJECT - THE CLEVELAND SCHOOL CRISIS

The agreement seemingly reached this week (I'll explain the "seemingly" later) between the Cleveland School Board and the various protesting groups provides an opportunity for a review of the explosive recent events here, while they are still fresh.

It's been quite a shocker to us. We have bragged (at least our public relations fellows have) that we were "The best location in the nation" in human relations or (I did) that a pervasive blandness in our civic life explained the absence of overt friction. Now, in the reaction to the sudden violence, some lamenters bracket us with Birmingham and Hattiesburg. Both the brags and the laments are patently wrong and this review is an attempt in the midst of the events to begin to assess what took place, why it occurred, the role various groups played, the degree to which our experience is peculiar to Cleveland and the degree to which it is universal, and the meaning for our work in the future.

Some assignment!

First, the facts:

For years, the Cleveland public school system has transported students by bus from overcrowded schools to schools where classrooms were available. In all such cases, the rule has been to preserve such "transported" classes as units, members of the sending schools, who simply occupied space in the receiving school. In this way, numerous administrative difficulties were avoided. And in any event, all these arrangements were temporary and were ended as soon as new schools were erected in the crowded areas.

It is important to note that this policy was established long before there was any problem of race. Many of the arrangements involved all white students, at both the sending and the receiving schools - the whole problem was one of physical accommodation.

The present crisis really began with the formation a year ago of the

United Freedom Movement, a loosely organized structure called into being originally by the N.A.A.C.P. to coordinate the efforts of all those seeking freedom of opportunity. Events have moved so fast that there has been no time to adopt a constitution, by-laws or even a statement of purpose, so it is difficult to state exactly who belongs and who does not belong to the U.F.M. Technically, its ultimate body is a (completely undefined) membership, which varies from a handful when things are calm to huge mass gatherings of thousands when the heat is on.

The decisions are usually taken, however, in a Steering Committee made up of two representatives designated by a variety of organizations, most of them colored, but including also the Catholic Interracial Council, the Church Federation (Protestant), the Community Relations Committee of the Jewish Community Federation, the ACLU, and similar groups.

The power, however, has increasingly been assumed by the more militant groups and the "respectable" organizations have either stopped attending at all or have played an unimportant role and have directed their efforts to other channels.

Even in the Negro community, only those organizations and individuals ready to lay it on the line for direct action of increasing intensity retain standing and influence. The point has now been reached where your credentials are demanded ("Were you on the picket line?" "Were you arrested?" "Did you get slugged?") if your position is to carry weight. The old guard, respected Negro leadership are out of the play - both the ministers and the political leaders. (There are 11 Negro city councilmen out of 33, numerous judges, one federal district attorney, and a good sprinkling of others.) CORE representatives, a number of local newly emergent groups, and hitherto unknown individuals (most of them quite young) have in large part taken over, although NAACP, which has grown vastly more militant, remains the leader. Inner-city white Protestant ministers, intellectuals from the universities and selected intergroup professionals were also deeply involved in the inner group. Meetings are sprawling, free swinging, intensely emotional and spontaneous.

During the summer, the U.F.M. Commission on Education expressed to the Cleveland School Board its unhappiness with the de facto segregation of the transported classes at the receiving schools. A lengthy series of conferences ensued, on a fairly friendly basis.

The U.F.M. position was clear and simple: Segregation is segregation; end it.

The School Board's position was, and remains, unclear. They not only had their traditional policy on transportation, but Cleveland's demography raised a new difficulty. The most serious overcrowding was in Hazeldell school, a neighborhood into which Negroes had only recently moved in great numbers. The three schools with empty classrooms (two to three miles away) were all in overwhelmingly Italian neighborhoods. They have been tight little nationality islands for decades, proud of their traditions, suspicious of all outsiders (and certainly Negroes), highly resistant to any kind of change. (Two years ago, one

of these neighborhoods had successfully and almost violently beaten back efforts by the Universities, their neighbors, to expand into "their" territory.)

A highly placed administrator of the school system, in the summer of 1961, aware of this history, had assured the receiving schools, in advance of the first "transportation", that classroom space was sought, not integration. Perhaps most important, five of the seven School Board members were at that time West Siders. (Now, six are). Clevelanders know what this means. All but one per cent of Cleveland's Negroes live on the East Side, and the West Side has been traditionally hostile to them. The direct political pressures on the Board members from their constituencies (as well as in most cases their own attitudes) are certainly not in the direction of integration.

Nevertheless, after prolonged negotiation, with a crisis brewing and pickets on the march outside the Administration Building, the School Board and the U.F.M. reached a seven point agreement on October 1, 1963, that averted trouble at that time.

The crucial point in the agreement was a School Board statement that "fullest possible incorporation consistent with sound educational procedures" would be instituted in the second semester, starting January, 1964. The superintendent further recommended that "diffusion" of students from the sending schools would be undertaken at once, providing various limited kinds of mixing of classes and students: some combined reading classes, classes combined for television lessons, some band and choir groups, etc.

Incidents occurred, and dissatisfaction grew that far less diffusion was being accomplished than had been promised, but both sides were awaiting the second semester, to find out what "fullest possible incorporation" meant, and how much of a block was implied in the "consistent with sound educational procedures" phrase. (Highly reminiscent of the double face of the Balfour Declaration, looking with favor on a Jewish homeland but promising nothing would be done to prejudice the rights of the Arabs. Compromises of this kind, designed to break an impasse by promising both sides what they want, have built-in trouble for the future.)

The most significant event of the period from September to January was the School Board election in November. At that time, the outstanding proponent (almost the symbol) of the drive for integration, was defeated, the only incumbent to fail of re-election. He is a white East Sider. Even worse, an analysis of the vote showed clearly that he had done no better in the Negro wards, despite his fine record, than hostile West Side candidates. The Negro vote went overwhelmingly, on a "plunking" basis, for the lone Negro candidate, just appointed to fill a vacancy, and with no time to establish a record. He won - and so did two West Siders.

There is no doubt that the majority of the School Board interpreted this result to mean "go slow on integration" - a policy highly attractive to them anyway. The superintendent (a first-rate, decent fellow; Jewish) was obviously given instructions to make haste slowly.

In mid January the new semester began, a "diffusion" plan was announced, providing for what the schools claimed was about 50% of total integration, with some contacts for all kids. The U.F.M. claimed it was more like 10% integration. They therefore rejected the plan as a reneging on the October promise.

By this time, the receiving school parents were equally aroused. Their newly established organization, the Collinwood Improvement Association, claimed the School Board had broken its promise to them. They had welcomed, they said, the bussed-in classes, they would accept any kid - colored or white - who lived in the area, (and a few have lived there) but resented being singled out for "experimentation" and were fearful that the incorporation of a number of pupils as large or larger than their whole school population would lower the educational standards for their kids. (This was the respectable line, the unofficial expression was hardly that understanding. It consisted of bitter references to all kinds of turmoil and incidents that "they" had brought into their formerly peaceful schools.)

At least as articulate was the Hazeldell Parents Association, with an indignation born of a list of abuses and exclusions their children had suffered, and a conviction that the stigma of any kind of separation, for whatever reason, had to be ended. And they particularly resented, as did much of the community, the remarks of the School Board president in a telecast, strongly implying the inferiority of Negro students.

The fat was now deep in the fire. An adamant and highly conservative school board feeling justified by the election results; aroused parents and communities on both sides; an unhappy school administration caught in the middle and trying desperately to mediate its way out of the crisis by suggesting progressively more but still limited diffusion that satisfied no one.

The fateful week of January 27 arrived. On Monday afternoon, the School Board at its weekly meeting reaffirmed its policy of progressive diffusion and reiterated it would not yield to "pressure".

On Tuesday, the Hazeldell parents (Negro) and the U.F.M. picketed the School Administration Building, while Collinwood mothers descended en masse on Brett school (white) to protest against the menaced diffusion.

On Wednesday, the U.F.M. instituted a picket line at Brett school. They were joined by a large group of Protestant ministers, many prominent, led by the Presbyterian office of Religion and Race. Disorders spread throughout the day. The pickets were jostled and pushed off the sidewalk, insulted and threatened. The police department tried to control events largely through plain clothesmen, on the announced assumption that uniforms would heighten tension. The diocese refused to join the picketing at the schools, and a rabbinical conference also declined. Both felt that picketing should take place at the Administration Building, and not at neighborhood schools, where children were directly involved in the tension and where no decision would in any case be forthcoming.

Thursday brought a far worse situation. The U.F.M. announced, as part

of its program of escalating direct action, that it would switch its picketing to Murray Hill school, in the very heart of Little Italy, the most isolated and "roughest" section of the city as far as integration is concerned.

The police shifted tactics, partly because Murray Hill spelled violence and partly because of the outpouring of criticism of the Mayor and the Police Department for not controlling the situation the previous day.

Uniformed police were on hand in quantity. But they were totally unable (some felt unwilling) to handle the situation. Numerous hoodlums were on hand early in the morning to "receive" the pickets. Murder would almost certainly have ensued had they arrived.

They had assembled at a nearby lot, awaiting instructions to proceed, pending the outcome of another one of the unending conferences that were being held. In early afternoon, at the exhortation of their leaders, they disbanded, just before a gang arrived looking for them.

The Murray Hill gang vented its frustration on any likely object - Negroes who happened to drive through the neighborhood, a few parents who came to the school worried about the trouble, newsmen, even the police. Car windows were smashed, photographers and Negroes were pummeled as the riff-raff of the community raged all day long. The mood was so ugly that even the priests of the neighborhood, greatly respected there, were ignored and reviled when they went into the crowd pleading for order. Not a single arrest was made and the only two rioters carted off to the police station were released.

The police Commissioner's explanation was that their first duty was to protect life. He pointed to the fact no one was seriously hurt. Arrests would only have raised feelings, he claimed. The Mayor, now feeling the full force of outraged criticism at the chaos, angrily turned on the ministers and others for precipitating the crisis by picketing at schools.

Friday, a sit-in at Schools Headquarters was begun, continuing through the weekend.

The whole city was in turmoil. Nothing but the school crisis was in the papers or on radio and TV. There was a deluge of statements, suggestions, offers to mediate, conferences, more conferences, petitions, calls for federal intervention, unending negotiations. But there was no single leader around whom all this fragmented activity could cluster.

Perhaps the action which came closest was a simple three point program developed by a high status organization called PACE (Plan for Action by Citizens in Education), an educational, not a civil rights organization. From the standpoint of education it declared:

1. Any kind of segregation is bad education.
2. The Board should so declare and announce absolute integration by September.

3. This semester, it should seek to achieve full integration except where the educational process might clearly be impaired because of certain technical and administrative difficulties.

All three religious groups swung vigorously behind the statement. So did NAIRO, the NASW, Kiwanis, The Citizens League, labor, and many other groups. The papers hailed it. A settlement seemed at hand.

But at its weekly meeting Monday, the Board worked out a different and confusing (and once again, "final") statement after hours of conference. It was rejected by the U.F.M. and the sit ins recommenced.

But this time with a difference. The CORE group was clearly in the ascendance and on Tuesday morning they moved to an "active" type of sit in. They refused to allow the School Superintendent and other administrators into their offices, locked a cleaning woman into a rest room, deliberately violated the fire ordinance, and prevented all elevator movement. They were seeking to be arrested and to test the police, they later stated. (Matters were not helped by the discovery that a number of old line, well known Communists had joined their ranks.)

The police ordered them to leave. They refused. One policeman, confronted by a solid barricade of prone bodies, stepped on one of them, his foot was "removed" and he fell. The reaction was immediate. The sit ins were roughly dragged down three flights of stairs, some violence certainly took place, and 22 were arrested and charged.

The Community Relations Board called a meeting that afternoon (Tuesday, February 4) at which all sides were present and after eight hours came up with the following formulation accepted by the representatives (not the membership) of all groups. It is this formulation that represents the basis for the present uneasy truce. It reads in full:

> "We, the members of the Cleveland Board of Education, hereby affirm our policy of establishing and maintaining a full and uniform standard of education for all children in the city of Cleveland.
>
> Every child will be entitled to participate in every student activity offered by the school he attends.
>
> The board will terminate the transportation classes as soon as possible, with whatever means the board has available and deems advisable.
>
> We hereby direct the superintendent forthwith that all pupils being transported from schools due to overcrowding shall be incorporated in the school organization as though they were in the local school district, and the pupils records and other necessary data will be forwarded to the receiving schools.
>
> The administration is hereby charged to use all appropriate possible techniques to achieve this end forthwith."

On Wednesday night, before a jam-packed, hymn singing, wildly excited throng, the U.F.M. won approval of the Board action and called off its program of escalating boycotts of the school, scheduled to begin immediately. It was not easy, however, since in the Steering Committee there was great reluctance to accept paragraph three. Approval was won only by coupling it with a letter, announcing that any kind of resegregation would be considered an abrogation of the understanding, and demanding a continuing review by U.F.M. of progress made, to start in two weeks.

The Collinwood Association met in a "no reporters" session and neither approved nor rejected the plan. Trouble can certainly break out again at any moment. Rumors and reports of schoolboy race fights in half a dozen schools came on Thursday and the entire town remains in seething tension.

- - - - - - - - - - - - - - - - - -

This report has attempted no detailed description of the role of the Jewish community or its professional staff. Bear in mind that Cleveland, as I have so often reported, is almost literally a city without Jews; we do not know of a single Jewish youngster who graduated from a Cleveland public school last June, so complete is the movement to the suburbs.

There was nevertheless a good deal of Jewish involvement. On the formal level, the American Jewish Committee, American Jewish Congress, and the Jewish Community Federation (our CRC) made public statements at various stages of events, a number of the rabbis were actively involved in public debates (particularly a brilliant television presentation by Rabbi Arthur Lelyveld on a City Club key telecast.)

Far more took place behind the scenes. Irving Levine of the American Jewish Committee has from its formation been a key figure in the U.F.M. and as chairman of the local NAIRO chapter. Alan Kandel and I took responsibility for the work with the religious groups, with PACE (where I serve as chairman of the Intergroup Relations Committee) and with the Community Relations Board, whose Jewish members were decisive in finally winning the truce. These were certainly the groups whose efforts together finally secured an agreement. Indeed, I think the total but largely unpublicized Jewish involvement was indispensable to whatever progress was made.

Nevertheless, the Jewish "presence" in the whole explosive issue was not publicly prominent and our CRC will at its next meeting assess the role we played.

- - - - - - - - - - - - - - - -

Here are some other observations:

1. Efficient and unbiased police operation is crucial, and its lack was largely responsible for protest turning into disorder.

2. The lack of leadership by a weak mayor deprived the city of

a rallying point. His defense was that in Ohio, school districts are completely independent from the city, but when the battle moved to the streets, that defense totally disappeared.

3. Political action is crucial, and the failure of the Negro community to exert itself intelligently on School Board elections was a disaster.

4. The withdrawal from the city not only of Jews but of an overwhelming number of other leaders deprives the School Board (and many other Cleveland institutions) of desperately needed responsible candidates for public office, and makes for the election of mediocrites. It also tends to neutralize the pressure that can be exerted by many liberal, but suburban groups.

5. The role of the papers and the TV was helpful on the editorial page and harmful on the news pages. Their positions were on the whole intelligent and constructive in their editorial comment, but the enormous playing up of the conflict added to the fever, particularly as the heady taste of publicity encouraged everyone to try to get into the act.

6, The business community (and almost the entire "power structure") remained totally silent, despite repeated attempts to enlist their aid. Its suburban orientation certainly helped produce this negative role. The vacuum left by their lack of leadership is another key to understanding the situation.

7. The Catholic church, recently emerging vigorously from its traditional isolation, increasingly withdrew from the struggle as an ally of the U.F.M. as the thrust for direct action moved toward defiance of the law. To some extent, the same observation holds for the other two religious groups.

8. Within the Negro community, almost all the old line leaders faded into the background and were severely critized by the activists. Particularly inept were the Negro ministers, who played almost no role, seemed out of date when they spoke, and at the last moment tried desperately to recapture some leadership. With one exception, the leaders were laymen and there was very little of the "Christian" in this movement.

9. The activists were in substantial measure unknowns, some of whom have displayed real leadership ability. The role of the Negro parents was real "grass roots" with a healthy emphasis on good education. There is some talk of the emergence of a "Negro community", which has certainly not existed heretofore. I would doubt this; the strongly disparate elements in the U.F.M. are held together only in crisis, when external pressures are at their peak. It remains to be seen whether in the showdown at election time, the new element can successfully challenge the traditional leadership.

10. Racism is rising. Even the most faithful white members of CORE, who were literally ready to give their lives, were made to feel at times of greatest tension that no white man can be trusted.

11. Significant sections of the U.F.M. consciously desire trouble and unrest. They have in effect quit on the normal process of negotiation and view turmoil as a necessary condition to smash the smugness that engulfs our Northern cities. Their followers are not so sophisticated; they are stirred into wild joy at anything that upsets the white man.

12. Although responsible (and even brilliant) leaders of the U.F.M. were able to retain, with difficulty, the fundamental decision making power, they did it only within limits prescribed by the militants. No voice of moderation could be effectively raised. No question could be raised as to where all this action was headed, or how great a price should be paid or what the relationship to the total good of the community might be, or the wisdom or lack of it of lawlessness. Questions could only be effectively raised as to how much could be gained by one course as opposed to another, with a prevading bias in the direction of militance.

13. The community as a whole comes out of the experience favorably disposed toward the fundamental U.F.M. case (integration of the transported school children), unsympathetic to the school picketing, outraged at the final lawlessness of the militant groups, but highly critical of police ineptness.

14. A case could be made that some progress has been made in dispelling the cloud of "good will" that has characterized this city, thus making necessary a confrontation of real issues. But there can be no doubt that militance on all fronts has dangerously escalated. The blood of the Negro community is up and so is that of substantial sections of the white community. Both groups now talk in terms of a coming showdown and it will be a job of the first order to prevent it -- in Cleveland or anywhere else.

MEMO

TO: NATIONAL OFFICE STAFF
FROM: ALLAN HOFFMAN
RE: CLEVELAND CORE SITUATION

This morning I received a call from Ruth Turner of Cleveland CORE. She gave me the following information regarding the Cleveland, Ohio, Board of Education agreement with Cleveland CORE.

1. In Spetember, there was an agreement reached that this semester (beginning 2/3) the "transportation classes" would be integrated. These "transportation classes" were whole classes of Negroes who were bussed from overcrowded schools to white under-utilized ones. These children are segregated by class from the rest of the school:
   a) they go to lunch at a different time;
   b) they go to the rest rooms at a different time;
   c) they leave school for home at a different time.

2. A campaign was started last week with the following incidents:
   Tues. 1/28: picketing at the offices of the Board of Education.
   Wed. 1/29: picketing of 2 schools. There were 250-300 people involved with no police protection despite a violent mob.
   Thurs. 1/30: there were pickets in an Italian neighborhood, again there was a violent mob, breaking windows and turning over cars.
   Fri. - Sun. 1/31-2/2: a sit-in was held at the Board of Education. 60 people were involved originally with 16 staying through the whole time. A mass rally on Sunday night.
   Mon. 2/3: a meeting of the Board was held. 500 pickets from the Negro community were present and tried to attend the meeting. A sit-in was held outside and the Board denied that any promises had been made following the September talks, and blamed the demonstrators for the outbreaks of violence.
   After the Board meeting, they offered to integrate in September (1963) and to stop "transportation classes." 60 sat in overnight.
   Tues. 2/4: The sit-ins became obstructive -- stopped elevators, blocked doors, stairways. There was police brutality with the demonstrators being kicked around and thrown down stairs.
   Wed. 2/5 a.m.: Demonstration was held at Police Headquarters. A mass rally was held the same night with an executive meeting being held to evaluate the new agreement or statement. The decision was to be made last night. The statement said that "We will integrate transportation classes now." There will also be consideration of a Board statement to the effect that "every attempt will be made to end transportation classes," the group fears this means that the Negro kids will be distributed back into ghetto school.

Ruth Turner can be reached at #216 791-4998 (Cleveland CORE office)

Mr. Louis Smith, Chairman
Philadelphia CORE
3530 North 23rd Street
Philadelphia, Pennsylvania

Dear Lou:

Beryl Collins called our office this past weekend asking if we had any information about progress in integration of New York City public schools and he mentioned that you were having a meeting soon with the Philadelphia Board of Education.

Enclosed is the following material which I hope will be of some help in your situation. Please keep us informed. We are very interested in the progress our chapters make in this area.

Sincerely,

Norman Hill
Assistant to the Director

# CORE Charges Midtown Realtor With Bias, Stages Sit-In

## Soldier Barred From Renting Juniper St. Apt.

### Protestors Claim They've Gotten The 'Run-Around'

By C. LESTER FULLER and HENRY T. BENJAMIN

The Philadelphia Chapter of the Congress of Racial Equality (CORE) staged a one and one-half hour "sit-in" Wednesday at the Allen Brothers real estate office, 16th and Lombard sts., to rotest alleged bias on the part of the realtor to lease an apartment to a soldier stationed at the Frankford Arsenal here.

Staging the protest were CORE members Edward Hollander, Lillian Mirmak and John Curran, Jo-Ann Lessner, Joseph Smith, and Benjamin Jones. Lou Smith, chairman of Philadelphia's CORE, was not present.

**FOUR HOUR SIT-IN**

The demonstration, which followed a four-hour sit-in Tuesday night at the apartment, 317 s. Juniper st., brought a number of Policemen to the scene, including Police Inspector Frank Rizzo. Also present was Terry Chisholm, supervisor of housing, Commission on Human Relations.

Said CORE member JoAnn Lesser "We came here to have a negotiating session with Mr. Allen (James Allen, Jr.), but we have been given the 'run-around.' Three times he denied he was Mr. Allen."

The realtor refused comment when approached by Tribune reporters. "You will have to see the boss and he's out," Allen said.

**SOLDIER IS OBJECT**

Object of the protest is Randolph Crossfield, an Army specialist stationed at the Frankford Arsenal who has been attempting to rent the Juniper st. apartment. Crossfield's references are reported to be "excellent." He wants the apartment because he is getting married within a few weeks.

According to Chisholm, three people formerly lived in the Juniper st. apartment, including Crossfield. The lease, Chisholm explained, was terminated after Crossfield had lived in the apartment for awhile.

The two white tenants left and Crossfield sought to have the lease changed over in his name," Chisholm said. Crossfield was told to vacate the premises which he did. He came back and applied for the apartment with no apparent success. The filing of a complaint with the Commission on Human Relations followed.

**WIN FAIR JOB POLICY AT PHILADELPHIA HOTELS**

**By Louis Smith**

As a result of threatened CORE action, Philadelphia's hotels have adopted a fair employment policy.

For this policy to be a success, qualified Negroes must apply to the hotels and then report to the Employment Division of the Commission on Human Relations, so that accurate tabulations of progress can be made. The Employment Division has informed CORE that the hotels are currently requesting personnel to fill the categories of waiter, waitress, clerk and elevator operator.

Previously, the hotels hired whites only in these categories. The Commission so stated in its April, 1961 report. As a consequence an initial agreement was reached between the Commission and the Hotel Association but many of the hotels declined to observe it.

One violator of the agreement was the Bellevue-Stratford Hotel. The Philadelphia Fellowship Commission was planning to hold its annual banquet there at which its civil rights award would be presented to Attorney General Robert Kennedy. Our CORE group protested to the Fellowship Commission, to Robert Kennedy and to Gustav Amsterdam, chairman of the Board of Bankers Security Corporation and a leading influence in the Hotel Association. The protest made clear that we would have to picket if the banquet were held at a hotel with a discriminatory job policy.

Amsterdam responded by promising negotiation of a new and more effective agreement on job policy between the Commission on Human Relations and the Hotel Association. This was confirmed by the Commission and the new job policy resulted.

THE PHILADELPHIA INQUIRER,
THURSDAY MORNING, OCTOBER 11, 1962

# CORE Asks Total School Integration

## But Wetter Calls Policy 'Positive'

The Board of Education has no "well-defined plan" for total integration of the public school system, Stanley C. Diamond, a member of the executive committee of the Philadelphia Chapter, Congress on Racial Equality (CORE), charged before the board Wednesday.

Diamond made the allegation as the board held public hearing on its $38 million capital improvement program. The CORE representative was one of two speakers appearing before the board.

**DEFENDED BY WETTER**

The position of the board on integration was defended by Dr. Allen H. Wetter, superintendent of schools and newly proclaimed chief executive officer of the school system. Dr. Wetter said the board has had a "positive integration program for years."

Diamond said that during a previous discussion with Dr. Wetter, his group formed the opinion that the "school board does not fully accept the integration of our school system as a desirable, civic and educational goal. . .and declines to accept responsibility for the situation at hand."

**PROGRESS POLICY GOAL**

"We urge the board to adopt as an active and important aim of its endeavor a policy of deliberate and planned integration in the school system," Diamond said. "We wish the board to recognize that a segregated education is one in which democratic principles cannot be effectively taught to members of either the minority or majority groups. . ."

Dr. Wetter, in answering Diamond, said that CORE "had certified no specific steps for integration but merely called for integration in general."

The other speaker, George Hutt, of 1241 N. Conestoga st., urged the alleviation of overcrowding in schools in the area of 52d st. and Haverford, Columbia and Girard aves. Hutt did not represent any specific organization, but rather the residents of the area.

CONGRESS OF RACIAL EQUALITY

PHILADELPHIA CORE
3649 LANCASTER AVE.
PHILADELPHIA 4, PENNA.

Schools

OCT 17 1962

TESTIMONY GIVEN TO THE PHILADELPHIA BOARD OF EDUCATION
ON SUBJECT OF SCHOOL BUILDING PROPOSALS
WEDNESDAY, OCTOBER 10, 1962
BY STANLEY C. DIAMOND ON BEHALF OF
PHILADELPHIA CHAPTER OF THE CONGRESS ON RACIAL EQUALITY

The Congress of Racial Equality, represented at this hearing by its Philadelphia Chapter, has, as its basic goal, the securing of complete equality of opportunity for people of all races and creeds in this country. Because we are concerned lest inequities exist or shall come to exist in the educational opportunities in Philadelphia schools for the children of Negroes or other national minority groups, we appear today to express our desire to cooperate with the Board of Education and offer long term assistance to you in helping to fulfill this goal, and to propose several items which we feel would make a contribution to the realization of such a goal in our city. Insofar as the school building plan, now under consideration as the subject of this hearing, effects the question of racial composition of our schools and has implications for the quality of the education given to Negroes and other minorities, as well as the white children in Philadelphia, we are interested in its design.

The members of our chapter of CORE do not have the background which would enable us to put forth specific suggestions as to the location of a given school. Even though among our several hundred members, there are many teachers, none of these claims to have the comprehensive view of the city's educational structure to be able to make proposals of this nature, and even were they to attempt this, they should be sorely limited by the lack of facilities at their disposal and the lack of sources of information necessary to fulfill such a task. We are not here to tell you what we think

you should do. We are here to indicate to you our concerns and to urge you to share them with us in thought and action.

If we seem awkward in our appearance before you today, it is primarily because we did not anticipate this kind of hearing when we indicated our desire to express ourselves to the Board. We expected, instead, that the several groups which desired to testify would do so in concert; that we would have the opportunity to hear what other groups with the same concerns but with greater experience and resources in this area would say, and possibly participate in the give and take of an open discussion. This would have enabled us to become more aware of the problems that exist, both from the Board's point of view and that of the groups testifying. We would then have been better prepared to contribute toward positive developments in respect to our goal. This setting does not provide that opportunity. Our first recommendation to the Board, then, is that just such a hearing be arranged before the building plan becomes a fait accompli. We would willingly and happily return to this room to participate in an open discussion involving those groups which have and are going to testify before you during these weeks. We believe that this would be to our mutual advantage.

We should like to elaborate on the matter of limitation of facilities and resources. We are certain that this is something which most, if not all, of the groups which have represented themselves before you face as a problem. Even close cooperation among them is not likely to answer this difficulty. It is hard to evaluate and contribute to something which is not fully understood, about which details as well as overviews are certainly

missing, about which even its designers may be occasionally uncertain as to the effect and results of their design. The kind of information which is necessary to do a proper job in evaluating a school system is indeed complex, varied and often subjectively deduced (for statistics are not the only kind of data required). We realize that it would necessitate a team of skilled men in every field of education, with a generous endowment of time and finances, to accomplish such a task. Even if there were the possibility of assembling such a group in our city, possibly even from our own public school system, it is unlikely that the requisite objectivity would be present. We feel that no group in this city is in a position to make definitive statements about our school system without the type of information we describe; we feel that the School Board is severely handicapped in making decisions or reaching conclusions in the absence of such a study. We, therefore, urge that the School Board seek out and assemble such a group of learned, capable, and objective men, support them with cooperation and provide them with necessary finances to do this job. Only then are we likely to know where we are.

Such a study is only a means to knowing where we are, however. It is up to us to decide where we are going. Philadelphia CORE hopes that the School Board wishes to move in the direction of a successfully integrated and educationally rich school system in our city. In our one contact with a representative of the Board this year, we were not satisfied that integration was in fact a goal of the school system. To the contrary, Dr. Wetter indicated to us that the schools were becoming desegregated in faculty and

student body ( a matter which we found somewhat debatable), but that this was a product of circumstance rather than intent. If we interpreted the essence of our discussion with Dr. Wetter correctly, the School Board does not fully accept the integration of our school system as a desirable civic and educational goal, has no well defined plan to cause it to progress, and declines to accept responsibility for the situation at hand. If this be a incorrect inference from the interview which we had, we would be most happy to have Board inform us accordingly and instruct its school officials as to the real policy. If we were not mistaken, however, we would like to urge the Board to reconsider its position. We feel most strongly that no large city in today's America can any longer remain color blind in the field of education. The housing patterns and the employment patterns are such that this posture is no longer the appropriate one to provide the most beneficial results where integrated education is concerned. A lasse faire approach to this problem can result only in the solidification of an already undesirable pattern which is forming. We urge the Board to <u>adopt, as an active and important aim of its endeavors, the policy of deliberate and planned integration in the school system. We wish the Board to recognize that a segregated education is one in which democratic principles cannot be effectively taught to the members of either the minority or majority groups represented in it</u>. In accordance with this, we would like to see the Board direct the men in charge of the school system to carry out policies forwarding integration in a vigorous and forthright manner and consider these as imperatives in any comprehensive plan which may be designed.

Since there are already groups in the city which are concerned with racial questions both in the school system and otherwise, we would like to make one further recommendation. It is our feeling that there should be a close liaison between the School Board and other public and independent agencies in the city. We think specifically of the City Planning Commission and the Commission on Human Relations. The latter is rather well equipped to evaluate, at least tentatively, the implications of School Board proposals where they might have an effect on minority groups in the city. The City Planning Commission and the School Board should most certainly be in close contact at even the preliminary stages of any building plans the Board designs. We would like to see the Board make greater use of these two agencies as consultative agents than seems to have been the case in past years. Even more direct aid of this nature could be provided to the Board of Education by the formation of a citizen's advisory group on questions of race and religion in the schools. Such a group could be easily formed of representatives of various public and independent agencies in the city. The citizens of Philadelphia who care about these matters would always be kept informed and, reciprocally, the Board would be continually apprised of the feelings and wishes of these citizens. If there were promise of formal consultation on the part of the Board, civic agencies would be only too happy to take the responsibility for the formation of such an advisory group.

In summary then, the Philadelphia Chapter of CORE comes to you to express its interest in what you are doing, to offer its help and advice in any way that it can, and to urge that you undertake actively the difficult task of adding integration to the many worthwhile goals of the Philadelphia School System.

Schools

MONDAY, JANUARY 21, 1963 FOR IMMEDIATE RELEASE JAN 21 1963

CORE LABELS TATE'S EMANCIPATION STATUE "EMPTY GESTURE" - CALLS FOR "DEEDS NOT WORDS"

In a letter to Mayor Tate, the Chairman of Philadelphia CORE (Congress of Racial Equality) denounced the plans for a statue to commemorate the Emancipation Proclamation as an "empty gesture in a futile attempt to win Negro votes." Louis S. Smith said the statue will do "absolutely nothing to advance equal rights for Negroes and other minority groups." Smith called on the Mayor to take "positive steps toward ending racial discrimination and segregation.

In announcing his plans for the statue, Tate proposed that it be financed with the pennies of school children. CORE demanded to know how he could "possibly ask the school children to contribute to such a statue when the Board of Education and the Superintendent of Schools consistently maintain that they have no obligation to promote integration in Philadelphia's segregated school system"

The civil rights group said that it had expected the Mayor to assume some responsibility and exert some effort "to assist in the struggle to achieve equal opportunities for Negroes." CORE challenged Tate to take meaningful measures "to combat the rampant discrimination in housing and employment."

The direct action organization maintained that the statue to Emancipation is meaningless to the half million Negroes in Philadelphia who "remain, in fact, second class citizens." CORE urged Tate to drop the plans for the statue and offered to meet with him to help "achieve full equality for all citizens of Philadelphia."

Copies of the letter were sent to George Schermer, Executive Director of the Commission on Human Relations and Dr. Alan Wetter, Superintendent of Schools, who recently announced plans to collect the pupils' pennies in the schools.

CONGRESS OF RACIAL EQUALITY

PHILADELPHIA CORE • 3649 LANCASTER AVE. • PHILADELPHIA 4, PENNA.

E-Rem.

Memorandum to
The President

Subject:

**A Plan of Action**

**For Remedial Education**

(A follow-up on my memorandum
of October 16, 1964.)

From James Farmer
November 21, 1964

In my previous memo to you (October 16, 1964) I suggested that CORE believes that it is possible, working with other organizations and private citizens, to provide literacy skills for a million Americans in an eighteen month period with an investment of $30,000,000. I stressed the fact that CORE is an organization of volunteers, who are accepted and trusted within the communities most in need. Further, I stated that it is possible to perform this task in whatever buildings and facilities are available, using non-teachers to instruct with the Accelerated Progressive Choice Reading Program, developed by Dr. Myron Woolman of the Institute of Educational Research in Washington.

The fact that millions of Americans see the fruits of our rich, productive society and yet cannot taste those fruits is a violation of the right of all citizens to equal opportunity. Moreover, these millions of economically and socially disfranchised Americans represent an unstable and potentially explosive force within our society. From the point of view of simple justice, economic growth, and social stability, we must attack this problem with all available resources. The social advances made possible by the Civil Rights Act and the promise in the Economic Opportunities Act are like a menu presented to long-hungry diners. These legislative acts must be followed by something tangible or the very hopes they raise will stimulate further disillusionment and resentment. The problem infects every American community and action must be taken wherever the problem exists.

In considering the issue, I am convinced that CORE has only begun to make its contribution. We must help the disadvantaged develop literacy and job skills and a concommitant confidence in their future as Americans.

I have a deep conviction that CORE must participate actively at the community level, lending support to these important programs as they begin to function within our deprived communities. The dropouts, illiterates and the unemployed cannot be helped by law, buildings, money or good intentions. They distrust officials and schools, in whatever guise they appear, and they can only be brought into full and active participation in our society by people they trust using methods of training which are suited to their needs. Above all, there must be mutual confidence between the people who operate the programs and those to whom the training is given.

The prime fact of the war on poverty is that the trainee must not only enlist but actively participate if he is to learn. Learning, as you know, is a personal matter and requires both confidence in the teacher and a willingness to invest oneself in the process sufficiently to succeed. I am convinced that the next step is for organizations such as CORE to move forward into the national arena and if this important step is to succeed, to act as a catalyst for simplifying and accelerating the process of education and training.

Further, it is necessary for organizations such as CORE not only to participate in community education, but also to assist in developing the new educational methods and techniques required for community-action education, as contrasted with public education, which, to date, has been ineffective in coping with the problems rampant in our deprived communities.

While it is the responsibility of the schools to educate, it is our obligation to supplement that education where necessary and to reach those who have failed to respond to the schools. No one can reach the youth on the streets in quite the same manner as another youth or an adult who has come from the same background and environment. CORE feels strongly that the Negro protest organizations along with individual churches, local unions, social clubs and community groups have a unique role to play in motivating and educating those Americans who remain functionally illiterate. Our record shows that we have had astonishing success in motivating and training the very population that is most in need of inspiration, most in need of enrichment, most in need of literacy skills, most in need of jobs. We do not propose a program for non-whites alone. We propose to begin a campaign in which volunteers of all ages, backgrounds and races will be able to offer a unique learning experience to hundreds of thousands and even millions of disadvantaged and underprivileged persons.

We have in the field the structure for putting into effect a large scale literacy program. We have the methodology. With the proper funding we will be in a position to effect substantial literacy programs throughout the rural South and in hundreds of cities and towns. Through coordination of the efforts of private agencies and with the assistance of the federal government we believe we can make great strides toward the elimination of illiteracy in this great nation.

Our objective is to teach people to read and thus provide them with the underpinning required to go on to further educational and employment levels. But we have an even greater objective. Negroes and other members of depressed minority groups have been taught to reject their own potential. Those on the bottom have for their own self-protection become apathetic and lethargic: to try to advance is to be beaten down. Thus, millions of Americans have chosen to accept their inferior status. The militant civil rights campaigns of the past decade have awakened the sleeping aspirations of many of these sullen millions. For the first time we have brought the spark of

life into whole communities. While we have provided the awakening, we must now shift our programs so that we may provide the tools to translate these new-found aspirations into reality.

The ingredients necessary for the successful implementation of a literacy program which can provide reading skills and motivation for further growth are:

1. A population receptive to the idea of learning and self-advancement.
2. A technology which can provide the ability to advance reading skills at a substantial rate and which also has built-in self-motivating factors.
3. A large group of persons able to act as instructors.
4. A structure able to administer and supervise the program.
5. Community facilities available for implementing the program over a long period of time.
6. Funds.

Population

There is no need to dwell on the need or the receptivity of a large population. The statistical evidence is overwhelming. This has also been dealt with here and in the earlier memorandum.

Technology

The method developed by Dr. Myron Woolman appears to hold the best possibility for success. It is a programmed approach which has been designed for use by relatively untrained personnel. It incorporates the learning by teaching approach. The content of the reading material can be tailored to meet the peculiar requirements of the southern Negro child and adult, the ghettoized high school dropout or the Appalachian white, and it allows the student to advance as rapidly as his own capabilities permit. CORE has observed the method in operation in the field. Our staff was amazed at the interest, involvement, discipline

and motivation of both instructors and students.

Others who have studied Progressive Choice in practice attest to its striking ability to stimulate and hold the learner. Students almost unanimously ask to spend longer hours on the program than time permits. They take tremendous pride in their accomplishments and in their successes. We are thoroughly convinced that Accelerated Progressive Choice offers the best opportunity for non-teachers to reach and teach the educationally and socially deprived.

Instructors

Many volunteer Literacy Instructors will be drawn from the dropout or potential dropout population itself. Retired teachers, housewives, student volunteers, church members and workers can also become volunteer Literacy Instructors.

The initial cadre of instructors will come from the active membership of the Congress of Racial Equality, the National Association for the Advancement of Colored People, the Student Nonviolent Coordinating Committee, the Southern Christian Leadership Conference, and the churches. In many cases the instructors will recruit their own students. As students progress in the method they themselves will instruct others just entering the program. With CORE's extensive experience in the utilization of volunteers we will be able to recruit an ever-expanding number of instructors who will have wider and wider outreach.

We have observed student helpers on the junior high school level giving instruction in this method in a public school in North Carolina. It was startling to see that the student helpers were as effective in teaching as were the teachers. If 8th graders are able to teach reading to other 8th graders it becomes obvious that the number of potential teachers is limitless and that the demands of the Woolman method on the instructor do not preclude using youngsters themselves under supervision to teach others. A number of CORE chapters in New York are somewhat acquainted with the literacy program and many of our high school members have come to us asking when they can begin to implement the program in their schools and through their chapters. With the small amount of publicity there has been on the literacy program my office has been flooded with offers of professional assistance, with volunteers who want to become instructors and with inquiries from communities wanting to know when they can begin the program.

Structure

I propose that a Center for Research in Community-Action Education be established in an appropriate university setting. Preliminary discussions have already been carried on with two universities and this proposal has met with initial positive responses. The university would receive and account for funds from all sources, public and private. The Center's sole initial function would be to research, develop and execute the literacy program on a national scale. This aspect of the Center's work shall be referred to as Phase 1.

The Center will require four operational arms: Research, Development, Planning and Community Action. Under Phase 1 the functions of these departments would be:

a. Research Arm: To develop theory and perform experimentation directed to improving the efficiency of the processes of human learning, with emphasis on narrowing the gap between human potential and performance.

b. Development Arm: To design and produce educational materials specific to the requirements for Community-Action Education Programs.

c. Planning Arm: To coordinate the professional, educational governmental, and organizational resources to facilitate work done in the field. Further it would operate as a resource for the other three arms in the Center.

d. The Community Action Arm: This arm would do the work of going out into the communities to carry out the plan of action and use the materials developed through the research and development arms. It would also evaluate and make recommendations for change in the methods of implementation employed by the cooperating agencies.

I further propose, however, that the scope of the University Center eventually be expanded into Phase II. In this second phase the Center should broaden its program to include all aspects of quality, integrated education. For example, Phase II should be concerned with sharply reducing the proportion of dropouts and increasing the ability of students to learn.

The functions of the four departments under Phase II would be expanded to include the following:

a. Research Arm: Research in the whole area of school integration, and other research appropriate to developing quality education within the public schools.

b. Development Arm: Development of proposals at the request of school systems and local organizations for achievment of quality, integrated education, and development of materials and textbooks toward this end.

c. Planning Arm: Communication and coordination of the work being done by community action groups, boards of education, governmental agencies, and various experimental projects. Planning and expediting the transition from community-action education to public school education inasmuch as the success of Phase II will progressively render Phase I unnecessary.

d. Community Action Arm: Act in a consultative capacity to school boards, school supervisors and community groups to assist in the solution of educational and training problems arising from intergroup tensions or desegregation.

It should be pointed out that the expanded scope (Phase II) of the Center is independent of and not a requisite for the national reading program (Phase I). A financial commitment to Phase I implies no such commitment or endorsement of the projected second phase.

Community Facilities

In addition to the University Center which would serve as the research administrative, and supervisory headquarters for the literacy development program, certain community resources will be required. It has been indicated that the body of instructors will be a prime resource provided by the community. Places in which to teach also will be necessary. Church basements, lodges, clubrooms, union halls, plant facilities and community centers will be ideal. In fact, the logic of the program indicates that the more the quarters are unlike a typical school setting, the better.

Funds

The educational crisis facing America requires a massive effort on the part of volunteer agencies. Only the federal government can support such an effort on the scale which is imperative. However, on a large scale the average cost of developing an eighth grade reading level in students beginning near point zero can be less than $50. This low cost will be possible due to the use of volunteer instructors and free facilities.

In most cases the cost to a community or agency desiring to undertake the literacy program should consist solely of the investment of time and energy. The materials, research and supervisory staff would be paid for by the funds made available by the federal government. I am in the process of preparing a budget which will be available shortly.

THE PROGRAM OF ACTION

I would suggest that we begin implementation of the literacy program in Philadelphia or Washington, D.C. We should move next to Pittsburgh and New York City. After that we should expand into the South and as rapidly as possible spread to cities across the nation.

At the beginning we would use the network of CORE chapters, NAACP, Urban League, SNCC and SCLC units and Freedom Schools which already have expressed an interest in the project as the nucleus for implementation. These groups are uniquely equipped to move into this type of community program rapidly and effectively and without necessitating new and elaborate community machinery. But we shall by no means limit participation to civil rights organizations. Already, one of America's major industries has approached CORE about the possibilities of putting the reading method into effect among the workers in its plants.

The Center at the outset will develop facilities to train Literacy Instructors both on its own premises and in the field. In any given city we would start with a cadre of between twenty and fifty Literacy Instructor Trainees. They can be trained as Literacy Instructors in from twenty-five to forty hours of instruction depending upon the number of hours they have available and on their own motivational and educational level. At the end of their training period they will be fully equipped to: 1) instruct in the Accelerated Progressive Choice method, 2) recruit their own students, 3) secure their own facilities in which to carry on their instruction if necessary, and 4) maintain all appropriate records.

As Literacy Instructors they will work largely within their own neighborhoods with students of compatible backgrounds with whom they readily can establish rapport. Each Instructor will be able to teach up to twelve persons in a group. Depending upon their initial level the students can become student-Instructors within a period of 30 to 150 hours of instruction and many of them are expected, at the end of 250 to 300 hours of instruction, to be fully qualified as literacy instructors without having gone through cadre training.

The Community Action arm of the University Center will also develop a large staff of Community Reading Program Consultants whose function will be to investigate, develop and supervise new agencies which can serve as fruitful local instruments for this aspect of the War Against Poverty. Working under the Program Consultants will be teams of paid staff members drawn from the ranks of the Literacy Instructors, who will check on each local Instructor and provide him with methods for continually improving his effectiveness.

Coordinated and planned from the Center, largely utilizing the already existing structures of national and regional organizations, and drawing upon local initiative, the nation-wide literacy program can be functional in a surprisingly short period of time and with an extremely low per capita expense.

I believe that this welding of research, development, and planning to community action represents a major new force in the War on Poverty and the struggle for equality in our nation. This program is, as you know, very much a part of my deepest convictions and I would participate personally and actively in the Center to insure its viability. I intend to seek, and am confident of gaining, the support of all civil rights groups, as well as unions, churches, the business community, and the general public in this task.

Within the framework of a Research Center such as the one outlined, a target on the order of one million literacy trainees appears both practical and feasible. This Center is a vehicle which has not existed to this time, because there was no public requirement to combine research, development and community action. Now, it seems to me, it is a necessary development to help insure the success of the War on Poverty. It utilizes many forces and combines them into a synchronous and functional system.

This new kind of war demands its own special weapons. The Center for Research in Community-Action Education will be a vital addition to our nation's arsenal in prosecuting this war - against poverty and for social justice.

George

Meeting of the Research Advisory Committee, October 14, 1965. Present: Mike Miller, Frank Riessman, Mr. Berhrstock, Mrs. Freedman, Henry Schwartzchild, Herbert Gans, Eric Polisar, Ray Brown, Faith Seidenberg, and from CORE Dr. George Wiley, Robert Curvin, Mike Lesser, and Alan Gartner

Wiley reported on a meeting he had earlier in the day with Carl Holman of the Civil Rights Commission. Holman indicated that there had been a recent(within the previous 48 hours) shuffling of responsibilities re. the Novemebr White House Conference. Holman, Beryl Bernhard, Hy Lewis, Norman Hill, Hal Fleming and Ed Bailey,and others have been pulled in from various agencies to work on the Conference. Major policy are being cleared through Lee White. At present the plan is to have the November conference be a "planning conference", with the major formal conference in the spring. Exactly what was meant by a "planning conference" was not clear, and apparently the whole thing is "up for grabs". Whitney Young and Bayard Rustin have already sent memos on proposed format for the November conference; John Morsell is expected to send one too. Holman invited CORE to do likewise. (Later in the meeting Gartner was assignes to prepare a draft of such a memo for CORE.) There has been considerable "flak" about the conference in general and about focusing on the "Moynihan" Report in particular.

Turning attention to the "Moynihan " Report, Miller suggested three levels of analysis: 1) a critique of the date-- to what extent is the Negro family in fact "strained"?
2) what are the effects of family "strain" ?
3) what · program of action is appropriate?
There were a number of comments about level 1: Miller noted that when one holds income constant, whites are worse off then Negroes for many social dislocation indices. Also, it was pointed out that it was dishonest to graph ADC cases with unemployment rate without controlling for population; Mrs. Freedman indicated that she was getting figures with a recalculation of this information. ( After the meeting Curvin suggested that the thought new ADC cases among whites were at a higher rate than among Negroes. Also, he will prepare a paper on welfare practices.) Also, Gans reported that at a meeting at COMMONWEAL last night Moynihan was backing-off from that table. Mrs. Freedman, who has made an item analysis of the material presented in the Report, noted that there were 34 major items in the Report which are related to 22 tables. Of these, unemployment is seen as a variable four times, and income classes three times. The bulk of the data, she indicated, used white: non-white comparisons, and comparison within the Negro population. Riessman noted that some indicies of social pathology (e.g. sucide rate) were lower for Negroes.

Riessman and others (Gan's COMMONWEAL article was read by many during the course of the meeting and generally concurred with) criticized the Moynihan emphasis on the family, noting that rather than being a determining casual factor it was an "adaptive" reaction.

Berhrstock suggested that Moynihan's data led to conclusions opposite from those he reached and he characterized Moynihan's movement away from his conclusions as an instance of "coitus interruptus". He also pointed out the bias of the so-called "normal" family concept.

Gans, in a generally agreed upon point, said that the family was an "adaptive mechanism", an adaption to economic conditions. He also pointed out that there was no real data on the impact of a matriarchal family. Riessman referred to a Howard University study of 10(now 70) hard-core" youngsters who when given jobs immediately, with training built into the job, have remained on the program; this was contrasted with high drop-out rates for various training programs with the possibility of jobs held over into the future.

It was also agreed that while the Moynihan emphasis on the pathology of the Negro family was a seductive analysis which was to be rejected, the problem was more than economic, with certain social and psychological issues remaining. Wiley indicated CORE's assent to the analysis of the Moynihan Report, and noted CORE's criticism of various administration programs (viz. the anti-poverty program) also shared the charge of dealing with surface problems without treatment of the structural issues. The question, he said, was how one both exposed the error of the analysis and forced a change of course.

Riessman urged that we concern ourselves with new programs, making specific proposals. He suggested the CORE's position paper "engage" the psychology of the Moynihan Report and the emphasis on pre-school programs, and then go on with new program suggestions. He noted that there will be an unanticipated $8 billion tax gain (presumably for the fiscal year?) and this money could employ approximately 2 million persons in non-professional service jobs. Several people pointed out the emphasis on symtomatic treatment in administration proposals, and Mrs. Freedman emphasized the pattern of establishing parallel institutions(viz "Project Headstart") rather than seeking to change present institutions. The Gans incorporation of Riessman's non-professional jobs as a course of action, along with decent income guarantees, the elimination of discrimination, and an increase of social services(especially housing) was generally accepted.

Advantages of non-professional jobs are:

1) direct impact of money spent, as a higher percentage of the money goes into salaries for the poor than is case in other programs;

2) more exciting jobs;

3) affect a higher percentages of Negroes;

4) not raise problems with unions such as would be true with public works programs;

5) increases in public service occupations are the wave of the future.

The need for jobs as the critical variable was summarized by Gans with the mot, "The family that works together, stays together."

In addition to the emphasis on non-professeional jobs, some discussion was held around the need for training as a component of the job experience, rather than separating first training then jobs. This latter has been the practice in the anti-poverty program and has left many people with training but no new job. We need to push for increased emphasis on on-the-job training programs.

It was the general consensus that we seek to make the November conference a serious matter, and then see what, if anything, happens re. a future conference in the Spring. The CORE paper should, it was suggested, discuss both problems of enforcement of present laws, and new directions. Polisar dissentented from the emphasis on "flashy" new programs, and stressed the need to devote energy and pressure to getting present laws, whose passage was hard fought for, implemented. In expressing the need for new directions, Mrs. Freedman characterized the present anti-poverty programs as "counter-revolutionary, "following a "cool-it" strategy.

In regards to suggestions for the November conference, we will seek to make a real conference, not with single set speeches but with panels and workshops, as a wasy to compel administration persons to remain for more than their own presentation. A theme could well be the Johnsonian, "To fulfill these rights." The CORE paper, in light of the fact that the November conference is being called a planning one, should be suggestive rather than inclusive; the presentation of papers and the holding of discussions at the November conference should then be followed by the assignment to staff persons of research and the development of more formulated papers for the spring conference. The question of invitees to the November conference was raised but not discussed. (Subsequent to the meeting, Wiley stated CORE"s concern in this area as: 1) that CORE representatives be there, along with representatives of the other civil rights groups; 2) that people from the academic community such as those present at the meeting be invited; and 3) that "grass-roots" people be invited, both those who have gained public stature such as Mrs. Hamer and those less well known.)

The next meeting was scheduled for 6 p.m., October 28, at the CORE office. Prior to that meeting Gartner will distribute to the participants a draft of a paper pulling together the discussion and other materials which will be sent to him. All present were also invited to a meeting specifically on the anti-poverty program, to be held at the CORE office at 6 p.m., October 21.

Meeting of the Research Advisory Committee, 21 October 1965
Present: Brown, Berg, Freedman, Miller, Kurland, Riessman, Jewett, Shrank, Rosen, and from CORE Farmer, Wiley, Haley, Dennis, Rachlin, Gartner.

Mr. Farmer informed the group that at a meeting held that afternoon of the Committee of United Civil Rights Leaders (CUCRL) with the staff for the White House Conference, the November conference would be a planning session, with no substantive matters to be discussed nor with position papers presented. The meeting, to be limited to 50 participants, would be to identify and raise the issues and develop the program for the spring meeting. CORE was to nominate three representatives for the November meeting.

The rest of the meeting was devoted to the anti-poverty program. Mrs. Freedman sought to express what she suggested might be a group consensus about the present anti-poverty program by describing it as one which is essentially limited to the rehabilitation or manipulation of individuals, seeking to make them fit better into a (adequately) functioning social system. This being so, there was relatively little if any concern in the program with such matters as the creation of new jobs.

Some tangential discussion indicated no major disagreement with Mr. Freedman's statement but Mr. Kurland (sitting in for Mr. Boggs) emphasized the flexibility of the statute, viz. the CAP allows almost any of the activities provided by all other federal statutes except for general education. The problem, he suggested, was the limited construction given to the statute by the OEO.

A discussion of the Job Corps indicated a general feeling that it was a program which essentially "creamed off" a group of kids who could survive a year in a camp. Mr. Berg suggested that the major achievement was that it removed the youth from the unemployment statistics for a year. There was general agreement about the failure of the Job Corps programs to provide for employment generation following the training; as yet, there has been no group which has completed the entire year's training. It was noted that the Job Corps was one of the anti-poverty programs most remote from CORE, and therefore one which ought not be of major concern to the group at this point.

A continuation of the Jobs Corps discussion along with some tangential discussion of the Neighborhood Youth Corps emphasized the groups concern that job provision was a critical factor. This was roughly formulated as no training without jobs -- it is best to provide jobs with training built in. And no jobs without training -- every effort should be made to assure that jobs were not of the "dead-end" variety.

At several points in the meeting there was discussion of the development of non-professional jobs as an important area of expansion for the anti-poverty program. Mrs. Freedman related a St. Louis incident where a number of women were trained as non-professionals only to find that the Civil Service board stated that there was no job category for "community aides." Mr. Riessman emphasized the very considerable potentialities for increased non-professional jobs with the implementation of the Medicare bill. Mr. Haley emphasized the importance of jobs for men. This was generally agreed upon, and it was noted by Mr. Riessman that in his program in New York they were able to attract men having decided to do so. There were three components of such a decision to attract men: how one structured the demands of the job; the building in of advancement potential into the position; adequate wages.

Mr. Kurland noted that the pressure from Mayors in regard to the anti-poverty program had produced increased timidity in OEO. He also suggested the reduced effectiveness of pressure on OEO for change and indicated that it had better be applied to the White House. Several persons indicated that the anti-poverty program grew out of a response to the civil rights movement and that that movement ought to have jurisdiction over the program but it had not exerted itself to make that claim. Mr. Farmer indicated a general sense that the civil rights groups ought to make such a claim, while noting, at least initially, that the civil rights groups had some concern about being coopted by the anti-poverty program and staffs.

It was agreed that two items would be given major attention at the next meeting: first, the issue of control -- as stated in item 4 of Mike Miller's memo to the group; and second, the issue of job creation both in regard to non-professionals and public works. Frank Riessman agreed to develop a "check-list" to be used by chapters in assessing the need for non-professionals in their community as well as some proposals for strategy in getting such a program accepted. Ray Brown agreed to make some assessment of the impact of a public works program on job creation for Negroes. Mike Miller agreed to work up a fuller explanation of the control models (Cloward, Alinsky, Organization of the poor, and board representation). The next meeting of the anti-poverty group is scheduled for Wednesday, 11 November, 6 pm, at the CORE office.

The next meeting of the group working on the White House conference paper is Thursday, 28 November, 6 pm, at the CORE office. It was suggested that following the work on the White House conference, the next task for that group might be the development of material for a CORE presentation at the Joint Economic hearing on the President's Economic Report in January.

Dear Dr. Wiley:

I will not be in New York on the 21st, but I would like to help CORE. I am in New York irregularly, but almost always on weekends and I hope you'll call on me if you can think of ways that I might help out.

You can reach my wife (Patricia) on Ext. 3841, SP 7-2000 and she generally knows my schedule.

Sincerely,

Brendan Sexton

Dr. George A. Wiley
Research Advisory Committee
CORE
38 Park Row
New York, N. Y. 10038

Dear Dr. Wiley:

I am awfully sorry that I have been unable to attend the meetings of this committee, particularly as they relate to the plans for the White House Conference. I have read the minutes which you have been sending me.

I am dismayed that Frank Reissman's non-professional career line is seemingly becoming a panacea. I am dismayed that CORE seems willing to participate in a conference dealing with the Negro without first insisting that the Negro community set the agenda. I am further dismayed that the Negro family - private and ethnic - has become a matter for public action.

I have read Bill Ryan's, Herb Gans, and Mr. Payton's (Protestant Council) analyses of the Moynihan Report and find it unthinkable that a document with that kind of philosophy will be allowed to become the focal piece for discussion. Gans, Ryan and Payton have ably questioned the validity of the Moynihan Report. I am further concerned that the conference is being called, not at the wishes of the Negro community, but at the behest of the President.

What I am saying is that I am tired of coalitions of imbalance, delineation of the problems and identification of the cracks while the Negro leadership fails to focus on the development and proliferation of its own communal institutions. If the White House Conference is being called to establish machinery to give parity to the Negro for a historical inequity by insisting ~~that~~ enabling the Negro community to develop and run its own organizations, then it will have served a good purpose. Unless the White House Conference ~~runs~~ runs out of philosophy of cultural pluralism, it predestines the Negro to continue to chase integration tokenism and to await a change in the hearts of whites.

Finally, with the kind of grass root upheaval that the anti-poverty prpgram has unleashed (San Francisco, Newark, etc.) I can't imagine the legitimate leaders of the black ghetto every knowing that the Conference took place - or feeling that the White House Conference speaks for them - concrete proposals or not. In the last analysis, if the Negro is denied the right to participate in his own uplift, then, he will continue to be obligated to others for his salvation to an unusual degree.

I'll try to make the first meeting that I can. Please keep me on the mailing list.

Sincerely,

Preston R. Wilcox
Assistant Professor of Social Work

PRW/aws

Minutes of the Research Advisory Committee. November 4, 1965

Present: Miller, Brown, Reissman, Rosen, and from CORE Lombard, Wiley and Gartner.

The meeting was spent going over the latest draft of the CORE paper for the White House Conference. Some discussion was held on the matter of whether the opening, with the emphasis on the old work "tokenism" was good. It was proposed that some of the material used in the Farmer press conference on the November 2nd election on Negro political independence could well be "plugged-into" the opening.

Simner Rosen raised the relevancy of the later sections on housing, schools, etc., to the earlier economic analysis. It was pointed out that CORE did not wholly subscribe to the economic analysis and felt that concern with the other matters was necessary. Suggestions were made to make the pivot of the presentation the lack of significant success with the various governmental programs. Also, it was suggested that the cross-class and cross-race benefits of the programs be stressed.

A point was made as to the inefficiency of present programs, wherein little investment was made which brought even less return. On the other hand, if greater investment were made in social programs, then even more significant gains could be made and there would not be less future bills to pay.

There was some consensus around making the main thrust of the paper issue of participation and legal rights, talking about the alienation of the Negro community, its sense of powerlessness and lack of representation.

No further meeting was called of this committee. The next meeting of the group working on the anti-poverty program will be on Tuesday, November 9th, 6 p.m. at the CORE office.

PRELIMINARY DRAFT

# A COMPARISON OF TWO SOCIAL ACTION APPROACHES: SAUL ALINSKY AND THE NEW STUDENT LEFT*

by

Frank Riessman, Ph.D., Associate Professor
Department of Psychiatry
Albert Einstein College of Medicine

Co-Director, Neighborhood Service Center Program
(Sponsored by Lincoln Hospital Mental Health Services)

September 1965

Currently, social action has a high place on the national agenda. The notion of organizing the poor in their own behalf has support both within the system, in federally supported community action anti-poverty programs; and outside the system, in the militant conflict-centered approach of Saul Alinsky and the new neighborhood based models of the Students for Democratic Society.

This article has two purposes: the first is to highlight some comparisons between the two major social action approaches being developed "outside of the system". The second goal is to indicate some lines of possible relationship between developments taking place outside the system and those occuring within the governmental system. Our underlying hypothesis is that both the intra-government and extra-government developments may profit from conscious consideration of each other.

---

* The student left includes: SDS (The Students for Democratic Society), NSM (The Northern Students Movement) and SNCC (Student Non-Violent Coordinating Committee). See "The Student Left - Revolt Without Dogma" by Jack Newfield, Nation, May 10, 1965.

| THE NEW LEFT | THE ALINSKY MODEL* |
|---|---|
| **Target Groups** | |
| The manifest target includes all of the poor; operationally, this is likely to be the alienated poor and those that have a militant potential. | The organization of poor communities including all classes and religious groups within these communities; operationally, this is likely to consist mainly of the poor with the militant potential and the activist clergy. |
| **Goals** | |
| "participatory democracy - the notion that everyone must have a voice in all the decisions that affect his life...community organization of the very poor so that they may have a chance to participate...the humanistic concept that you organize to change individual values rather than the institutions of society. Together they are summarized in the button, the student organizer where in Newark: Let the people decide." (Jack Newfield in the Village Voice, August 5, 1965) | The emphasis is on local gains whether in relation to housing violations, consumer fraud, etc. The second objective is to develop the power of the poor and associated dignity (some sociotherapeutic overtones). |
| The goals are broad, including an emphasis on citizen's rights, overcoming of the impotence of the poor, developing new kinds of human relationships through participatory democracy (including a strong accent on sociotherapeutic benefits) and an ethical unity of means and ends. More specifically, there is concern for carrying through, at a local level, the national civil rights legislative gains. | |
| **Methods** | |
| Beginning with neighborhood based organization moving toward consolidation (community becoming movement). | The emphasis is on organization, carefully selected tactics oriented toward achieving local victories by stressing conflict (rub raw the sores of discontent). The issues that are selected are based upon the possibility of victory and a wide range of tactics are utilized (e.g. boycotts, sit-downs, picketing landlords). Voter registration campaigns stress "vote for power", rather than traditional citizen appeals. |
| Participatory democracy as a means (a new style of organization) as well as an end. The emphasis is on moral rightness not feasibility (But under some circumstances this moral emphasis is strategically effective). | |
| "Counter-community" groups or | |

* See Frank Riessman's, "The Alinsky Model of Social Action: Tactics Without Strategy", Trans-action, September 1965.

| THE NEW LEFT | THE ALINSKY MODEL |
|---|---|

## Methods (Cont'd)

| | |
|---|---|
| "parallel structures" such as the Mississippi Freedom Democratic Party, the Freedom Schools, cooperatives representing "new styles of organization stressing...local self-determination...working out coherent, alternative social mores and organizations and an alternative radical politics (hopefully and eventually including a confederation of independent parties..." (Norman Fruchter, in Studies on the Left)<br><br>There are different emphases and new developments occuring among the New Left ranging from non-violent revolution to coalition politics. (See Max and Ireland, New York Viewpoint, Summer 1965) | Ruthless, tough posture; ethical means debunked. Concern for building long-term local organization but no long run strategy or ideology. No plan to consolidate local groups with national movement. |

## Philosophic Roots

| | |
|---|---|
| Camus, Paul Goodman, Democratic Socialism (League for Industrial Democracy is the sponsor of SDS); American grass roots participation themes, anti-big leaders, strongly idealistic, ethical and humanistic. Romantic, extremely "positive" view of the poor. Strongly anti-middle class and anti-people over thirty. Opposed to traditional left ideological disputes. | Influenced by old CIO organizing days and left tactics; Machiavielli for the poor, anti-idealist, strong pragmatic emphasis, anti-intellectualism, radical posture, Alinsky cult -- hardly any reference to writers, ideologists other than Alinsky. Emphasis on getting the job done; lack of concern for ethical means. The involvement of the church has brought none of the religious precepts. There is no idealization of the poor (poor slobs without power) who require the outside organizer. Non-communist, non-socialist. |

Differences Between Alinsky and the New Left

There are a number of specific differences with regard to different emphases on tactics, groups appealed to, traditions and philosophic roots. But the major difference relates to the powerful, moral, principled, non-compromising orientation of the New Left. This is in marked contrast to the far more pragmatic, ruthless, tactics-oriented focus of Alinsky. To some extent, as sections of the New Left move toward coalition politics, this difference is reduced. But the basic ethos of SNCC, SDS, the Northern Student Movement is essentially focused on idealistic principles and positions which are supported even when this is not tactically or organizationally wise. Thus the New Left will take a strong position on peace in Viet Nam even when this position has little national appeal. Alinsky eschews international policy questions and sticks to issues and grievances that can be utilized in mounting a successful local campaign. He is much more concerned with local success and stable organization and will rarely, if ever, espouse a position which is unpopular with the people he wants to organize and influence. The New Left supported by youthful zeal and positive idealism has no such limitations in the causes it espouses. Surprisingly under certain circumstances, principledness becomes pragmatically successful (the tactics of principledness) and many of the objectives of the New Left have been won. The unrelenting, uncompromising, dedicated, vivid demands of the New Left even in the peace area have received surprising national attention and the Berkeley rebellion has provided a model for college youth to imitate throughout the nation as evidenced by the recent vote of the National Student Assembly.

Another difference relates to Alinsky's stress on power and organization in contrast to the New Left which repudiates power and instead emphasizes acting together reciprocally.*

---

* Differences within the New Left regarding the role of traditional organization are reflected in the exchange between Victor Rabinowitz and Norman Fruchter in "An Exchange on SNCC", Studies on the Left

Similarities and Implications

Both Alinsky and the New Left have much in common. They both function outside of the governmental and professional systems. They both appeal to the alienated poor, stress citizen's rights. Both have a "now" emphasis, begin from below, are neighborhood based. They stress American grass roots traditions, feel that the poor require an outside organizational force to organize them, stress militant appeals and direct action. Both have been stimulated by the effectiveness of the civil rights movement and the new anti-poverty trend of the federal government with its concern for the involvement of the poor. Both approaches have received a very positive press and have captured the imagination of increasing numbers of people across the land. Neither has a well developed long range strategy nor any analysis of new developments taking place in the society. Neither has any significant program on a national scale with regard to housing, employment, welfare, drug addiction.

Both emphasize the value of conflict in developing movement in the society. Both completely deprecate developments taking place within the system such as the anti-poverty movement. Both reject movements from "above" and have strong anti-authority and anti-leadership biases, frequently identifying all leadership with irrational leadership and authoritarianism. Both serve a valuable role as critics of dangers associated with new developments taking place within the system.* Alinsky as the "gadfly" of the anti-poverty war raises fundamental criticisms regarding the use of "a green wave of dollars to kill those militant independent leaders of the poor, buying them off." (Newsweek, September 13, 1965) He notes that "the new federal charter will not foster what its mainstream critics most fear: an authentic social revolution." (The question is, has Alinsky been fostering a similar social revolution in the thirty years of his existence?)

Both the students and Alinsky are essentially anti-ideological, although each has developed some primitive new ideology. Both want the poor to have a say, a voice in the things that affect them. Neither program has developed much thinking or strategy for the emergence of a movement — although SDS is planning to consolidate the local neighborhood groups at some later point. Recently Alinsky by dint of his developing national reputation and press, has developed a wave of imitation, so that in cities throughout the United States that believe themselves to be riot prone (Rochester, Detroit, and St. Louis) there are arising new Alinsky programs. Both seem to have a zero sum concept of power; that is, they believe there is a limited pool of power. For there to be an increase in power among the poor there must be a decrease in power among other groups. This is more explicitly formulated in the Alinsky model.

---

* Alinsky and sections of the Student Left are supporting the demand put forth by Richard Cloward in New York for an increased distribution of poverty funds to local anti-poverty groups rather than through the various city halls. This is an important demand because as Cloward notes (Nation, July 1965), these local groups can develop new sources of power through the distribution of funds and services and new ethnic poor constituencies can be developed. To some degree the Office of Economic Opportunity may be responsive to some of these demands.

Neither approach seems to have much perspective regarding the forces that have brought each to national attention. (The tools of the sociology of knowledge have not been utilized by them). Hence Alinsky rarely discusses the significance of the anti-poverty movement in powering his present development. Nor does he appear to fully recognize the significance of the civil rights movement in developing his present national image. In a larger context, neither recognizes the significant context of a highly affluent society that is apparently able to tolerate considerably more "radicalism". Why radicals should receive such a good press is a question that does not seem to have arisen for the new radicals.*

Perhaps even more important is the failure to consider the potential relevance for radical social action of major trends in the larger society: automation and the new role of education; urbanism and the decline of the local political club; the new acceptance in the business community of Keynsian approaches and the growth of the gross national product; the impact of increased centralization and the important counter-bureaucratic trends among the populace; the failure of traditional psychotherapeutic approaches for the alienated low income populations and the concomitant interest in new forms of sociotherapy for the poor; the many significant cleavages within the establishment and the fact that there are many establishments; the increased role of the federal government in dealing with manifold urban problems and the new potential alliance of the federal government and the cities; the decline of the cold war and the possibility of rapid completion of the New Deal (through the alliance and support of the Administration by a Congress that supports its policies far beyond the support Roosevelt and Truman ever received). And finally, the new possibilities opened up on the domestic scene by actual and potential programs in education, civil rights, recreation, anti-poverty, mental health, health and housing. Actually both Alinsky and the New Left are unconsciously moving into the openings provided by the civil rights success and its reflection in the widespread federal legislation which may go considerably beyond the civil rights impetus. (This legislation is only the beginning and suggests that large scale national programs may be achievable by demands from below but these demands need not necessarily be neighborhood based).**

Both approaches seem to have lingering leftovers from psychology and radicalism of the thirties (most surprising for the young Left!). Thus the notion that all gains for the have-nots must be achieved at the expense of the haves and that these gains must be achieved by making the haves uncomfortable. There is little understanding of how developments within the system (see above) can be utilized by movements functioning outside of the system. The fact that the anti-poverty community action programs may be organizing segments of the poor that neither Alinsky nor the Student Left reaches is not looked upon favorably, even though these segments of less militant, less

---

* Alinsky in particular has received glowing praise in Harper's, Look, the New York Times, the Saturday Evening Post, Fortune, etc.

** The Civil Rights movement did not really start from the neighborhood, although it may have eventually spread into local areas.

active, less vocal poor may provide a later source of support for Alinsky and the student movement. Nor is there realization that the nonprofessional human service jobs being modeled by the anti-poverty program can be utilized as a wedge for demanding millions of these jobs and careers for the poor rather than the old style public works (which still remains a major demand among sections of the Left). The possibility that affluent 20th Century American capitalism might be able to produce millions of such careers for the poor is not envisioned by the Student Left nor by Alinsky. The new federal anti-poverty focus on providing more adequate services to the poor and expediting service delivery through employing large numbers of new nonprofessional manpower, recruited from among the poor, provides the possibility of important anti-bureaucratic breakthroughs in service delivery. Significant potential alliances with the outside groups such as Alinsky and the New Left are possible here, particularly with the latter prodding the former to achieve their avowed objectives more effectively. There is actually a great concern both within the system and outside it for a humanizing of bureaucracy, limiting bureaucratic discretion, and guaranteeing the voice of the recipients of service, guarding their dignity and rights; moreover, the improved service for the poor does not seem to come at the expense of taking anything away from the rich. This will perhaps be most striking in the field of education where the whole current trend indicates greatly increased funding for so-called "slum" school areas.

Other hangovers from the thirties are reflected in Alinsky's radical posturing (I am a professional radical), his tough guy, smart alecky imitations of John L. Lewis (this is war) and the vague socialism of the New Left in which the socialist principles are not particularly attuned to new developments in American society. Their theoretic armamentarium relies on fairly vague traditional socialism in the economic and political areas. It is in the action arena where non-violent revolution concepts have emerged that the New Left is truly new.

Finally, both programs are fundamentally concerned with what might be called citizen's rights, vis-a-vis non-humane bureaucracy. A citizen's rights party could incorporate many of the demands of both the Alinsky group and the New Left and probably could bring in developments taking place among Welfare Rights' groups throughout the country, groups such as Jobs and Income Now, the Organization for Black Power, the civil rights groups, the local independent anti-poverty groups such as MEND and HARYOU in New York. All these groups are concerned with a new type of social justice: citizen's rights in relation to increasingly centralized bureaucratic structures in welfare, education and protection (police).

## The Relationship of the Inside and the Outside

There are many potentially fruitful lines of relationship between those forces working within the governmental structure and the outside social activists. Each group has its own focus and its own blinders, but certain overall goals which may be held in common may provide a source of unity or at least interchange of ideas and perspective. Thus professionals concerned with involving the poor in the anti-poverty programs have much to learn from the participatory

democracy concepts of the New Left -- even though these concepts cannot be fully applied within the system. Moreover, the uncompromising principledness of the student movement provides a valuable object lesson for those of us who live more pragmatically within the system.

Professionals also have much to learn from the brilliant tactics of Alinsky. His approach to voter registration campaigns "vote for power", rather than citizen "duty" appeals is likely to be much more effective with large sections of the poor and the minority groups.

To the extent that the outsiders are effective in their demands for the poor, they move the center of gravity further to the "left" and thus provide the insiders with more leverage in mediating the demands of the poor with the traditional agencies and power structures. This is most evident in the example of the rent strike which has recently become completely legal in New York State, whereas at one time it was a special militant tactic principally available to groups outside the system. The outsider's success with the rent strike had much to do with the current legitimation of this tactic. The present effectiveness of the Civil Rights movement in San Francisco in gaining considerable control on the city-wide anti-poverty board in that city will undoubtedly provide greater flexibility for groups committed to the poor and working within the system. As we indicated above, the criticisms of Cloward, Alinsky and Adam Clayton Powell have been highly influential in raising questions regarding the representatives of the poor in the anti-poverty programs in the large urban centers.

The groups outside of the system also can deal with much more touchy areas in their criticism of the bureaucracies. Thus Welfare Rights associations can be formed, and groups concerned with police protection and police brutality can be developed more fully outside of the system. Since the insiders need to mediate between agencies such as the police and the Welfare Department and the poor, they cannot adopt as militant a stance with regard to these agencies. Moreover, the outside groups can pay much more attention to having the large number of people who have a legal right to public assistance, receive it.

Perhaps more important, groups outside the system can provide the clout necessary for winning the programs that might be developed in housing, jobs (new careers for the poor), education, urban development and citizen's rights.

The militant social actionists can also begin to organize the poor that had previously been unavailable to them; that is, those sections of the poor who are at present far removed from militant direct action appeals. As community action programs within the system organize this more inactive poor and move them along to more advanced forms of organization, they provide a new recruitment pool for the groups functioning outside the system.

People working within the system are probably more alert to and cognizant about developments taking place within the society that provide new openings for demands by the activists functioning on the outside. Thus the possibility of a demand for millions of

nonprofessional new careers for the poor (rather than public works) should provide an important arena of cooperation for the two forces, the insiders and the outsiders. Similarly, in education, where the President supported by federal monies is providing the ground for major new changes in the educational system.

In education, the significant program developed by CORE for a national literacy campaign is highly relevant to the educational breakthrough and the new monies available for educating the poor. The program represents an attempt to integrate groups functioning outside the system, such as CORE and the forces it represents, with legislative changes developing within the system through the anti-poverty act and the new education laws.

Only through communication by at least some segments of the forces operating outside and inside can new vital programs and demands be developed and social action strategy combined with other strategies of change, such as neighborhood law firms; anti-poverty community action programs; legislation, e.g. the community mental health act; ideology, e.g. Harrington's The Other America, etc. There is a real need to think through the relationship of different types of strategy of change. These include social action from below, legislation which may reflect the demands of the social action and provide new openings for further demands, the use of new types of manpower such as the poor themselves (nonprofessionals), the new role of negotiators, conciliators and expediters.

In conclusion then, it would seem that the social actionists functioning outside of the system and the various social planners functioning within the system have much to gain from mutual contact and exploration. From this union a much more rounded meaningful strategy of change may emerge together with the necessary theoretic base. It is in this context that the analysis of the two most significant developments in the social action area outside the system have been presented and compared.

New York 21, New York

LEhigh 5-8448
*cable address:* STUDYMAN New York

I don't want to go.

OCT - 9 1965

October 11, 1965

Dear Mr. Farmer:

We are inviting you to participate in a small working conference co-sponsored by the National Institutes of Mental Health, and the American Orthopsychiatric Association. The conference is designed to bring together a selected group of experts and community leaders to explore how existing knowledge of group process can be used effectively to facilitate essential interracial communication in our communities. A two day working session has been planned at the Holiday House, in Yonkers, New York, starting with dinner on Friday evening, December 9th, 1965, with a closing luncheon session on Sunday, December 11th.

The conference has been called in the recognition that many kinds of action, educational as well as economic, psychological as well as political, are necessary to carry out integration at the community level. We are especially concerned with rapidly changing patterns of interracial relationships following in the wake of the civil rights movement. There is a clear need to evolve methods for initiating and improving communications among groups which have been socially and psychologically separated, a need to get people talking to each other, as people. The conference will focus upon ways and means of establishing such dialogue, based on the following premises:

1) Some of the psychological problems of integration can be overcome by actual integration at the grass roots level through face to face communication.

2) This process can be facilitated by group discussion techniques, to help understand the way men look at each other.

3) Where there is readiness for social interaction, professional resources can be drawn upon to assist in removing the barriers of "they" and "we" and in establishing relationships based on personal attributes rather than stereotypes.

RESEARCH INSTITUTE FOR THE STUDY OF MAN

October 11, 1965

4) Discussion groups can be developed by community organizations, such as P.T.A.'s, Trade Unions, Industry, Neighborhood Houses, civic clubs, religious groups, and the like. Some local discussion groups are already in existence in a few areas and can contribute their experience.

5) The need exists for a national program to develop and encourage interracial communications at the community level, drawing on existing knowledge of community organization and of group process.

We hope that you will find it possible to accept our invitation to participate in the conference and contribute your background knowledge and ideas to the sessions. Conference funds are available for accommodations for the participants and the reporting and distribution of materials. Travel funds are limited, however, and we would consequently appreciate it very much if it is at all possible for your organization to provide your travel to the conference.

Please indicate your acceptance on the enclosed card. We will appreciate any suggestions you may have about the conference and look forward to your active participation.

Thank you for your cooperation.

Sincerely,

Vera Rubin

# IT'S TIME FOR A MOON-SHOT IN EDUCATION

A proposal for a revolution in the education of the disadvantaged child....and all children.

by

Frank Riessman, Ph.D.
Associate Professor,
Department of Psychiatry*
Albert Einstein College of Medicine

October 1965

* Address: Lincoln Hospital Mental Health Services
333 Southern Boulevard
Bronx, New York 10454

In the past several years, enormous interest has been expressed concerning the education of the disadvantaged, inner-city child. Programs developing in various cities throughout the United States have met with varying success:

.... In Flint, Michigan disadvantaged sixth grade youngsters with reading difficulties helped fourth grade children who had reading problems and amazingly, the performance of both groups went up!

.... The employment of the poor themselves as assistant teachers and parent education coordinators appears to be successful in Philadelphia and Pittsburgh.

.... Negro Assistant Superintendent of Schools, Sam Sheppard has quickly brought youngsters up to grade level in St. Louis with special motivational appeals to parents and youngsters and a new "listening" approach to teachers.

.... Special teacher preparation developed at Hunter College in New York appears to aid teachers in "slum" areas.

.... New approaches have overcome illiteracy in adults with surprising speed in the Army.

.... Programmed learning has had some marked effects on dropouts in New York and prisoners in Alabama whose level of intellectual functioning was quite low.*

.... Montessorian techniques have achieved results in Los Angeles and Mount Vernon; imaginative hip lessons combined with role playing have proved exciting in Syracuse; team teaching has worked in Pittsburgh; new readers have improved reading levels of educationally deprived youngsters in Detroit.

---

* Non-graded classes, multiple periods, use of imaginative game-like techniques, to name just a few other approaches, have also shown considerable potential. Even New York's pioneering Higher Horizons was effective with low income youngsters until it became badly watered down as it was diffused throughout the New York school system.

But in spite of all this, the goals for the disadvantaged child still remain surprisingly low. In essence, most of the programs still talk about bringing the deprived child up to grade level as though this were some lofty, marvelous objective. Actually, a subtle pessimism runs through much of the discussion of the education of the poor. Perhaps it is time to consider not the piecemeal use of this technique here and that technique there, but the combination of a variety of approaches that seem to work on both a practical and theoretic basis. The present pessimism, whether unconscious or not, is really based upon the failure to produce consistent dramatic improvements in adolescents, dropouts and adults on a large, well-publicized scale. Thus there has been a retreat from this potentially exciting objective and all the eggs are being put in the pre-school basket.

For over two years, I have been predicting that whatever good results are achieved in the pre-school programs, will come to naught unless the schools themselves are changed to respond to the disadvantaged youngsters. It is easy enough to get pre-school improvement. Deutsch, Strodbeck, Grey and others have all rather readily produced this improvement. The problem is keeping this improvement -- preventing "fall-back". Martin Deutsch, the extremely honest and thoughtful advocate of pre-school approaches, has recently stated that these improvements drop away quite rapidly when the children are returned to the traditional school program in the traditional school. He has actually observed this in the children from his program. Similarly, in Ypsilanti, Michigan Dr. David Weikart produced sharp rises in the average IQ's of deprived children through special pre-school experimental programs. But when these children entered the traditional kindergarten, their scores declined.*

---

* In light of Deutsch's and Weikart's findings with regard to the non-lasting effects of pre-school stimulation in the traditional framework, the present hoopla over Operation Headstart and its supposed success is highly questionable. It has been said that improvements have been achieved through Operation Headstart and that the evaluation studies being conducted will show this. I do not doubt it; but it is far too early to determine how enduring these improvements will be. As S. M. Miller states:

> "Pre-school programs should not be used as a substitute for interventions at later stages of the school life-cycle. The best guess today is that interventions at the later stages can be effective without interventions at the early, but that interventions at the early stages without intervention at the later will have very limited payoff." (See S. M. Miller, "Educational Strategies", Syracuse University, unpublished.)

Thus the pre-school panacea may be a distraction from the main arena which must be the schools themselves and must develop a rounded, intensive program combining what we have been learning in many areas of the country, aiming for the moon; that is, aiming, not to bring children up to grade level, but for dramatic powerful improvement in large numbers of disadvantaged youngsters. If such a program were to bring youngsters up to grade level, it should be considered a failure.

The present period combines strong demands of the Civil Rights movement for quality integrated education, with tremendous financial support from the Federal Government plus a "Great Education President". In this climate it would seem that a revolutionary breakthrough in the education of the poor can now be planned, as a first step in revitalizing our public schools and winning back the middle classes who have fled to the private schools. It is truly time to aim for the moon and not accept improvement up to grade level.

What, then, should be the ingredients for our projected revolution in education? Should we combine all the various features that have worked in a kind of potpourri? Or should we rather selectively choose approaches based on a meaningful theoretic analysis which offers an explanation in a coherent fashion of why they have worked. Obviously, I prefer the latter approach; not only because it may be less expensive, but because it is more scientifically enonomical and meaningful.

I would now like to propose the outlines of such a program, but I hasten to add that there are a great many other equally good rounded plans that might be experimented with simultaneously.

The teaching personnel for the program should be drawn from the ranks of young new teachers. We do not want to rob the many excellent experienced teachers currently functioning in the system from their much needed roles and the newer teachers might be more open to experimenting with the innovative teaching technology that would be a central feature of the program. Some of the approaches developed in Hunter College's Teacher Training Program might be adapted.

The new program could be placed within the framework of the developing educational parks or educational complexes which would allow for economic utilization of a great variety of new techniques and facilities (educational TV, programmed learning, team teaching, etc.) under one roof. While this may be a good idea, it is not a necessary one for our moonshot.

## The New Manpower

Perhaps the major complaint in the schools today is the large classes that each teacher must manage. The ratio of students to teachers is frequently greater than thirty to one. New manpower to assist the badly overworked teacher is the paramount need of the day. Where can it be found?

The utilization of large numbers of people drawn from the ranks of the poor themselves, so called nonprofessionals, to serve as teacher assistants, teacher aides, parent-teacher coordinators and the like may be the answer.

Currently in the classroom there is but one designated role -- teacher. Incorporated in that role are a great number of diverse functions -- the teacher is an educator, but he is also a clerk, a custodian, an operator of audio-visual equipment, and an audio-version of a printed book. In many slum schools the impression gained is that the teacher is part lion tamer and part warehouseman. The latter roles must be eliminated and many of the others can be assumed by less qualified personnel.

The use of this new kind of nonprofessional manpower would serve a number of positive functions:

1) it would free teachers from the many nonprofessional tasks they now perform, e.g. taking attendance, helping children on with their boots, tying children's shoelaces, running moving picture projectors, taking youngsters on trips, etc. The new Teacher Aides would take over many of these tasks freeing teachers for their basic professional assignment, teaching and teaching creatively.

2) The nonprofessionals (especially males), drawn from the ranks of the poor, would serve as excellent role models for the disadvantaged youngsters in the schools; the youngsters would see that it is possible that people like themselves drawn from their own neighborhood can "make it" in the system.

3) Communication between the trained nonprofessional and the disadvantaged youngster would probably be good because the nonprofessional drawn from the neighborhood speaks the language of the poor and understands his peers. Many of the advantages of peer learning or learning from people at the same level would be utilized.

4) The atmosphere of the school will be quite different and many of the management problems that are anticipated in the urban, newly integrated schools, might be dissipated.*

---

* The tremendous shortage of school personnel, predicted for the next decade, might be drastically reduced through the employment of one million nonprofessionals in the schools. For a more detailed description of how nonprofessionals could serve the school, see New Careers for the Poor, by Arthur Pearl and Frank Riessman, Free Press, 1965, Chapter 4. It is axiomatic that teachers would have to be trained and assisted in utilizing the nonprofessionals.

It goes without saying that the use of aides would not be imposed upon teachers. In fact, teachers' associations and unions should participate in the entire planning for the use of nonprofessionals, and guarantees should be introduced to insure that no aide infringes on professional domain by engaging in actual teaching or other professional functions.

Probably the best way to introduce nonprofessionals into the system, is to ask teachers to volunteer to accept an aide to assist them. The teachers who select themselves can then define the tasks on which they would like nonprofessional assistance. (They may also receive consultation on this from the program planners.) It is quite likely that if the aides are really helpful, the program will contagiously spread and other teachers will request nonprofessional assistants for their classrooms. In this way the idea can be institutionalized with the full cooperation of the professional staff and the new professional-nonprofessional team can be built on a solid foundation.

Teachers not only need new manpower to assist them in the classroom; they need a new approach as well.

Too often nowadays, teachers are being asked to act like psychologists (understand the underlying emotional conflicts of the child); like sociologists (appreciate the environment and culture of the deprived); like prison guards (keep order and prevent violence); like substitute parents (love the children); like ministers (impart the right values).

It is time that teachers concentrated on teaching and develop and apply that art and science to the utmost. It is toward this objective that the following techniques are directed.

But before turning to the techniques themselves, a word about basic classroom strategy.

## Basic Classroom Strategy

Everything the teacher says and does in the classroom should be related to learning. He should repeat over and over and over again: "I am here to teach and you are here to learn". This should be expressed in the teacher's every action and should be related to every rule and value.

Thus all rules related to punctuality, aggression, etc. should be strictly oriented toward their usefulness in relation to learning. (e.g. "We can't conduct a class if children fight, come late, walk around, etc!") This is not a minister informing children about values -- that fighting is "bad". It is rather a teacher conducting a class.

## Techniques and Goals

The emphasis on teaching technology is very important in the entire effort. Teachers cannot be expected to become sociologists or psychologists and acquire an intensive understanding of the psychology vs culture of the poor. Rather, they must come to simply understand something about how the techniques they are utilizing are related to the style and strength of the poor but the emphasis must be on the techniques themselves. As teachers successfully utilize these techniques, their confidence will improve and their motivation will be enhanced. Our accent, therefore, is on giving the teachers what they want, namely know-how.

The techniques to be employed should be based fundamentally on the goals one is striving for with the disadvantaged. I do not have the goal of simply producing a carbon copy of the middle-class child.* To aim for this middle-class replica is not only inappropriate in principle but actually not easily achievable in practice. The disadvantaged child will probably resist this objective and to the extent that he acquieses, will become a poor edition of the middle-class youngster -- a very faded carbon copy. My objective, therefore, is to build on the strengths of the inner-city child, not to deny them or suppress them, but rather to utilize them as the key to developing, for example, language and interest in language. But my concern for building on the strengths of the disadvantaged child is not simply so that he can be more efficiently brought into the mainstream of American life; rather I want also to have him bring into this mainstream some of his characteristics: his style, his pep, his vitality, his demand that the school not be boring and dull, his rich feeling for metaphor and colorful language.

In another area one group of disadvantaged people in America, the Negro people, have made an enormous contribution to the mainstream of American life through their articulate non-compromising demands for integration "now". These people have brought a new morality to American life as a whole. To the extent that we are beginning to move toward integration through law and practice we are beginning to hold our heads up high and feel again like democratic, ethical, human Americans. This is what one minority disadvantaged group has given us in another area of life. In education, likewise, the mainstream of American life can profit from what the various groups among the poor can bring to the school system both in terms of the demands made upon the system that it be peppier, livelier, more vital, more down-to-earth, more real and in the style and interests brought to the school. This style will enable the school to become far less bookish and will enable it to utilize a great variety of styles -- an action style, a physical style, a visual style -- far more than the over-utilized and over-emphasized reading-lecture styles traditionally in vogue.

The techniques that I will discuss are uniquely related to these goals and to the belief that there is a positive style in the disadvantaged which can be utilized to the great benefit of all classes. But if this goal is not accepted, the techniques can still be utilized with varying degrees of effectiveness. Thus the reader can go on even if he does not accept the overall objective.

## The Dialect Game

The best way to illustrate the relationship of the teaching technology I am advocating and the goals being put forth is to take a look at one very simple technique which I learned from a teacher who evolved it out of her own practice. I call it the dialect game.

---

* The real question for those who want to "middle classize" the disadvantaged child, relates to which middle class and which middle class goals and values -- the professional upper middle class; the anti-intellectual lower middle class; the new hip class that has adopted much of the speech and some of the manners of various disadvantaged subcultures; the progressive student left, etc. Furthermore, isn't it possible that the disadvantaged youngster will selectively choose those middle class characteristics that at least articulate with some of his own traditions and feelings?

One day a youngster said to this teacher, "Do you hear that boid outside the window?" and the teacher responded, "That's not a boid, it's a bird." Following the old joke, the youngster replied, "He choips just like a boid." It is fairly clear that this way of teaching the youngster the standard pronunciations of words might not only be unsuccessful in its avowed objective, but might, in addition, produce cognitive confusion about the object itself.

The teacher thereupon decided that it would be very easy to teach youngsters the standard pronunciations if they would not be required to reject their own dialects, their slang, their hip language. So she decided to play a game taking any word at random and asking the youngsters how it would be said in their language and how it should be said in the standard language. The youngsters, as well as the teacher, found this game very exciting and both learned a great deal. They now were learning the new words as they might learn a foreign language and they were discovering that their own language was perfectly acceptable and merely had to be used in the proper circumstances — in their discussions with friends, family, and on the street. While for formal purposes, another language was appropriate and was being taught in the school. But something else happened in this situation. The youngsters began to become very much interested in language as such; e.g. in discussing the hip word "cool", it was decided that words like "calm" and "collected" and the advanced word "nonchalant" were fairly appropriate synonyms. However, it was also noted that these words were not perfect equivalents of "cool" and thus, indirectly, language nuances were taught. Youngsters began to understand why we use certain foreign words that are not completely translatable, i.e. "coup d'etat", because they have special connotations or overtones in their original language which our language could not duplicate.

They learned something else, too. They learned that their own language was not something negative to be denied or suppressed, but that actually many of their words had nuances and meanings which had not been fully acquired in the standard language and that therefore the slang and hip words had been adopted by the larger culture. So today "jazz", "cooling it", "copping out" and many, many other rich colorful words are in accepted usage in the English language in conversation, etc. This is building on their positives, not rejecting them and bringing their strengths and interests into the mainstream of our life.

There are a number of other simple adaptations of this dialect game. Recently in tutoring a disadvantaged high school student in English, I employed a hiptionary in a completely systematic and formal fashion. The first and rather immediate result was that the student learned a great many new English word definitions for the "hip" words with which she was long familiar:

| Hip Word* | Definition |
|---|---|
| "bug" | to disturb, bother, annoy |
| "cop out" | to avoid conflict by running away, not considered admirable or honorably accepted |

* The words in this list were taken from a hiptionary entitled, "The Other Language" developed by Anthony Romeo at Mobilization for Youth, January 1962, unpublished.

| Hip Word | Definition |
|---|---|
| "cool it" | to be quiet, peaceful, tranquil |
| "far out" | not comprehendable |
| "weak" | inadequate, inappropriate |

Words such as "tranquil", "inappropriate", etc. were not known by this youngster, but through use of the hip "word game" she quickly became familiar with them and derived great pleasure from a new found use of various "big" words.

Another interesting illustration is furnished by the problem of teaching English to Puerto Rican and Mexican children entering our school systems in New York, California and other parts of the country. The typical tendency is to force these youngsters not to speak any of their mother tongue, namely Spanish, but rather to insist that they speak only English, on the supposition that this would be the best way of their acquiring the English language. While this may be a perfectly acceptable way of teaching language to an adult in certain contexts, when it is associated in the child with rejection of his minority culture (something he experiences quite frequently), he is not likely to be an apt pupil in the new language. Furthermore, he is constantly in the inferior position of having to acquire this language while the remainder of the youngsters in the class already know it. The dialect game can be utilized beautifully to reverse the whole procedure. Instead of emphasizing the need for the Spanish children to learn English, the situation can be reversed for part of the day; and the Spanish children can be instructed to teach Spanish to the American children. In other words, both languages become important in the class. The English children have an apportunity to learn a foreign language, presumably a positive benefit when that language is French or Latin, and the Spanish children can be placed temporarily in the position of some superiority through helping others. In addition, of course, in order for the Puerto Rican youngster to teach Spanish to the American child, the Puerto Rican child must be able to communicate to some extent in English and in the very process of teaching the foreign language, he must acquire more English in order to communicate (unless he arbitrarily insists that only Spanish be spoken when he is instructing!).

Thus the dialect game which can be utilized by anyone as a gimmick or an auxiliary technique in teaching, takes on considerable depth when seen in the context of two cultures, two languages functioning alongside of each other, both being respected, both affecting each other with no conde scension toward the minority culture.

## The Helper Principle: Learning Through Teaching

Another fascinating approach to the expansion of classroom learning is to be found in Lippitt's intriguing "peer learning" experiments which demonstrate that youngsters in the sixth grade can be helpful in teaching younger children -- and can benefit themselves from playing the teacher role.

At the recent White House Conference on Education, Professor Jerrold Zaccharias proposed that we have students teach as a major avenue for improving their own learning and Montessorians have long utilized children to help other children learn in the classroom.

Mobilization For Youth has used homework helpers with a fair amount of success, in that the recipients of the help showed some measurable academic improvement. It may be that even more significant changes are taking place in the high school youngsters who are being used as tutors. Not only is it possible that their school performance is improving, but as a result of their new role these youngsters may begin to perceive the possibility of embarking on a teaching career.

A connected issue worthy of mention is that in the new situations in the schools, where (hopefully) integration will be taking place, youngsters coming from segregated backgrounds will need help in catching up, in terms of reading skills and the like. It is generally argued that the white middle-class children who do not need this extra assistance will suffer. Their parents want these youngsters to be in a class with advanced pupils and not to be "held back" by youngsters who are behind.

However, in terms of the helper principle, it may very well be that the more advanced youngsters can benefit in new ways from playing a teaching role. Not all fast, bright youngster like to be in a class with similar children. We have been led to believe that if one is fast and bright he will want to be with others who are fast and bright and this will act as a stimulus to his growth. It does for some people, but for others it most certainly does not. Some people find they do better in a group in which there is a great range of ability, in which they can stand out more, and, finally -- and this is the point of the helper principle -- in situations in which they can help other youngsters in the classroom. In other words, some children develop intellectually not by being challenged by someone ahead of them, but by helping somebody behind them, by being put into the tutor-helper role.

As any teacher can report, there is nothing like learning through teaching. By having to explain something to someone else, one's attention is focused more sharply.

The helper principle may be especially valuable for disadvantaged youngsters because in their informal out-of-school learning, they tend to learn much more from each other, from their brothers and sisters, than from their parents reading them a book or answering their questions. They are essentially peer learners by style and experience.

## Capturing the Action Style Through Role Playing

Role playing can be used, as Professor Senesch observes, to teach arithmetic and economics (by "playing" store); to teach history by acting out, for example, George Washington signing the Constitution; even language can be taught by acting out words (in fact, the game "In the Manner of the Adverb" consists of "doing" the adverb -- e.g. walking quickly, writing quickly, etc.

Role playing has long been popular with disadvantaged youngsters. This appears to be so because the technique is very congenial with the low income person's style: physical (action oriented, doing rather than only talking); down to earth, concrete, problem directed; externally oriented rather than introspective; group centered; game-like rather than test oriented; easy, informal in tempo. In essence, disadvantaged youngsters tend to work out mental problems best when they can do things physically (whether it be through role playing, dance, taking a trip, etc.).

A Route to Verbalization. In role playing sessions it has been observed that the verbal performance of deprived children is markedly improved in the discussion period following the session. When talking about some action they have seen, deprived children are apparently able to verbalize much more fully. Typically, they do not verbalize well in response to words alone. They express themselves more readily when reacting to things they can see and do. Words as stimuli are not sufficient for them as a rule. Ask a youngster who comes from a disadvantaged background what he doesn't like about school or the teacher and you will get an abbreviated, inarticulate reply. But have a group of these youngsters act out a school scene in which someone plays the teacher and you will discover a stream of verbal consciousness that is almost impossible to shut off.*

We cannot detail here all the various techniques and approaches that might be utilized in our moon directed program of education for the poor. Scope magazine presents a great variety of games and approaches suited to the "action" style of these yonngsters.

Any of the following might be important "extras" to be added depending upon the style, interests and abilities of the teachers involved in the program:

1. The "organics" approach of Sylvia Ashton Warner (The Teacher). This should be especially valuable in utilizing the interests and strengths of the youngsters, and guard against their being "acted upon" (the current trend in many of the "compensatory" programs designed for disadvantaged who are supposedly "deficit" ridden).

---

* Role playing has been utilized to some extent in the schools but there has been little awareness of its special potential for connecting with the style of the disadvantaged and as a crucial avenue for developing their verbalization. Its use may serve a very different function for middle class children; it may force them to be more concrete and reduce some of their over intellectualization tendencies. Teachers should be aware of these different potential uses of role playing.

2. A "modified" curriculum, developed by Gail Donovan in Boston, which stimulated vastly increased interest in literature among poor youngsters.

3. Use of the dance as a method for developing concepts and language as developed by Claire Schmais in Washington, D.C.

4. Jensen's techniques for developing "verbal mediators" (silent speech, so to speak) in problem solving.

## Blueprint for a Revolution

Piecemeal approaches to the improvement of the education of the poor have provided many exciting experiments and some definite gains in learning. The time is now ripe for an all out attack, integrating our best knowledge in an effort to produce truly large, enduring improvements in the learning of disadvantaged youngsters at all ages. This requires leadership, new techniques and new manpower.

In order to fly to the moon in educating the poor the following are proposed:

1. Nonprofessional teacher aides, recruited from among the poor themselves, to assist teachers so that they can more fully play their professional roles as teachers. This auxiliary manpower can also provide excellent male role models for educationally deprived youngsters.

2. Young teachers who would be trained in the use of teaching techniques (e.g. the dialect game, the helper principle, role playing, etc.) attuned to the styles and strengths of disadvantaged children. The positives must come first and around these positives we can begin to correct the limitations of the child in relation to reading, school know-how, language skills, etc. If the teacher expects more, he will get more if his positive expectations are built on an understanding of why he is using the exciting new technologies.

3. In-service Teacher Institutes using trained Master Teachers to introduce knowledge and techniques related to immediate classroom problems. An attempt should be made to have teachers use techniques that fit not only the style of the children, but their own style and interests as well (style match).

   Full participation of the trainees should be intensively solicited with regard to encouraging them to formulate their needs, how they see their problems, and their suggestions for meeting these problems. Hence, small teacher meetings should be organized to discuss (and role play practice) ways of meeting classroom difficulties. In this context, the trainers would offer for discussion, techniques that have evolved elsewhere. A group or team approach would be a central feature in the training with a strong emphasis on building esprit de corps.

4. New urban readers and other appropriate curriculum materials and especially the new teaching machines (programmed learning). Readers that have been developed in Detroit by Follett Publishing Company and in New York by Bank Street College, and published

by MacMillan should be included in the program. These readers incorporate disadvantaged people and themes in a more representative view of urban life and the research in Detroit indicates that all youngsters read better with these readers, not only disadvantaged children -- that they laugh more and feel that the stories are more interesting and lively.

The new literacy techniques, Words in Color published by the Encyclopedia Britannica and Woolman's Progressive Accelerated Technique are achieving dramatic rapid results with non-literate adults and we would suggest that they become integrated in the proposed program.

5. New administrative arrangements such as team teaching, multiple periods, nongraded classes, educational parks, intensive extra school programs (during summers, weekends, and after school hours). These extra school programs can introduce specialists into the school, such as artists, dancers, musicians to develop the artistic talents of the youngsters. Tutors could be brought in here also and special uses of programmed learning and educational TV could be planned.

6. Special parent-teacher groups, led by nonprofessional parent education coordinators, directed toward developing full, genuine two-way communication between the parents and the schools. Parents could be involved as important supportive elements in the program. They should be used to back up the role of a school that really wants to teach the child and they should be listened to attentively by the school and by the nonprofessional parent-education coordinators who mediate between them and the school. They should not be asked, however, to read to the children or to do homework with them or any tasks which the find essentially uncongenial. They can function to check-up on the homework as Sheppard has had them do in St. Louis and to work in a unified way with the school encouraging the child to learn, to attend punctually, to do his homework, etc.

7. Finally, what is needed for our moonshot is an astronaut -- an exciting committed educational leader. Fortunately there are a number of such qualified individuals potentially availabel: George Brain, who did such a fine job in the Baltimore school system; Daniel Schreiber, whose charismatic leadership first brought Higher Horizons to national attention; Samuel Sheppard whose experiment in St. Louis has been perhaps the most outstanding in the United States -- just to name a few possibilities. This type of leader will "expect more" and he will get more. He must be flexible enough to permit and encourage the needed innovative classroom arrangements.

The essence of the proposal is directed toward the teacher and what he wants and needs -- namely, assistance in the classroom. He will get this from the nonprofessional manpower and from techniques that work. Through his improved functioning -- from success -- will come the heightening of the teacher's motivation and the teacher is the key to the disadvantaged child and the revolution in education.

#

THE THIRD YEAR:
PROGRAM OF THE INSTITUTE FOR POLICY STUDIES 1965-1966

The research, project and seminar program for the academic year 1965-1966 will continue to include high government officials, judges, diplomats, students and Fellows of the Institute. It will attempt to fulfill a number of purposes:

1. Individual research and social invention of the Fellows
2. Analyzing of the policy process
3. Presentation of new ideas to the government and other policy-shaping institutions of the society, and showing how they can be implemented
4. Setting forth to the academic, governmental, and policy-shaping communities problems and remedies for study in statecraft and public policy

1. FOREIGN POLICY AND INTERNATIONAL RELATIONS

Arthur Waskow is engaged in a study of the problems of achieving and preserving a disarmed world despite the persistence of intense international conflict. His study will consider various conceptions of national interest and methods for achieving it in a warless world. Richard Barnet is studying the evolution of the American postwar ideology of "responsibility": i.e., how the U.S. policy of intervention developed and what its implications are for the future.

In connection with these projects, a seminar will be held on "U.S. Relations with the Developing Countries" which will consider what alternative policies the U.S. might take with respect to revolution, civil war, subversion, etc. Arthur Lall, formerly Indian Ambassador to the Geneva Disarmament Conference and a principal participant in the Laos Conference of 1961 and presently Professor of Public Law at Columbia University and Visiting Fellow of the Institute will direct the seminar with the assistance of Barnet and Waskow. The seminar will meet in the Fall as a discussion group among Fellows of the Institute, members of the State Department and White House, and representatives of foreign embassies to discuss aspects of their problem. In January the Seminar will be run primarily for Congressmen and their assistants. Experts on aspects of the AID, military assistance and other programs relevant to U.S. relations with the "developing world," both governmental and non-governmental, will be invited to address the seminar.

The Institute will also conduct four additional seminars on particular aspects of foreign policy. It will continue for the third year a seminar for Congressional Assistants on Defense and Disarmament. Various experts in and out of government will again discuss the problems and possibilities of disarmament and arms control as an alternative basis of national security.

Arthur Lall will also conduct a Seminar on International Negotiations. This seminar will consider the possibilities of using various machinery of diplomacy and international organization to deal with specific international disputes. The seminar, which will include diplomats and former diplomats, will evaluate some hypotheses on negotiation developed by Professor Lall in his forthcoming book. Professor Kenneth Boulding and Marcus Raskin will also assist in the direction of the seminar.

Professor Boulding, Professor of Economics and co-director of the Center for Research on Conflict Resolution at the University of Michigan, has also been appointed a Visiting Fellow for 1965-66. He will lead a seminar devoted to conflict theory. These discussions, which will be held monthly, are designed to acquaint Fellows of the Institute and invited participants from the government with the work on conflict theory now being carried on in the universities and to determine what applicability such theory may have for the solution of practical problems in international relations.

Harvey Perloff, Associate Fellow of the Institute and Director of Resources for the Future, Inc., will lead the seminar on Economic Development in Latin America with the assistance of Jack Heller, Associate Fellow. The seminar, which has met over the past year from time to time, will meet regularly to discuss conceptions of regional integration politics and economic planning developed by Dr. Perloff. Members of the OAS, AID, Congressmen and non-governmental observors of Latin American politics will participate.

The Military Establishment. (Bernard Fall, Marcus Raskin, Don Michael, Arthur Waskow, et. al.) Although there are several people at the Institute who have worked closely with the military establishment on strategic problems of arms control and the budget, the military establishment as a political and sociological phenomena has not been analyzed critically or with clarity. The Institute during 1965-66 intends to take advantage of the number of groups in Washington who can help in describing how the military views the American society, what its views its functions as being, and how it sets the limit of debate and policy in the national security area. This seminar will take up the question of accountability of the military structure and whether or not the last twenty years has seen the rise of a National Security State in which basic policy decisions of the society are made outside the political arena.

2. EDUCATION

Christopher Jencks is completing a study (with David Riesman) of changes in higher education in the United States during the past generation, The Academic Revolution. Marcus Raskin is working on a study of possible ways to broaden the meaning of "education" in American society, including the possibility of "sabbati-

cals" to enable citizens to return to school or other educational opportunities once every seven years. Some of these ideas will be discussed in a seminar on Education to be run by Congressman John Brademas, Jencks and Raskin. This seminar will be comprised of members of the House Education and Labor Committee and the Bureau of the Budget and will consider possible new directions for federal education policy.

In cooperation with the School of Criminology of the University of California and the California Department of Corrections, the Institute (principally Kotler, Jencks and Raskin) will continue its planning of a Prison College. The College, which will be located outside the prison walls, will be part of the California university system. The Institute will help plan the curriculum and structure of the proposed institution and will convene a panel of educators and correction specialists to advise on the project and to consider its possible application to other parts of the country.

Christopher Jencks and Marcus Raskin will continue their work with the Antioch College study of the Future of the Liberal Arts College. They are preparing papers on the public policy aspects of the liberal arts college to society.

The Institute will hold a conference which will bring together leading university deans and college presidents to consider changing the standards of admission to universities and colleges for individuals from deprived and segregated areas. This conference will examine present standards undergirding American university and college admission requirements which may be either unrealistic or unfair to particular groups and will recommend possible changes.

3. <u>COMMUNITY ORGANIZATION</u>

Milton Kotler is continuing to develop the theory of neighborhood foundations--incorporated, self-governing legal entities established in cities to undertake local projects. He will be developing the theory of the relationship between such self-governing units, outside professionals, and government, and will assist in the implementation of the neighborhood foundation concept in several cities. A Conference on Charters for neighborhood foundations is planned for the Fall. This conference of lawyers, persons interested in community organization, representatives of the Internal Revenue Service and the Office of Economic Opportunity, sociologists, church organizations will consider model charters from several viewpoints. Kotler is working on a study of the basic concept and its possible application to a series of specific projects such as a Neighborhood Zoo, a Neighborhood Academy, and a Neighborhood Ombudsman.

Donald Michael will be continuing his analysis of organizations responsible for planning and implementing the Poverty Program. In particular, he will continue to assist the United Plan-

ning Organization to plan its planning program. This activity provides a laboratory for studying the processes of institutional change and decision making under the pressures of social change. He is also conducting a seminar-game at UPO for UPO field and in-house personnel, aimed at improving field programs and at delineating research, evaluation, and long-range planning areas. In addition, he is working on the general problem of the nature of and criteria for humanistic decision making in an increasingly complex, technologized, and rationalized society.

4. THE FEDERAL ROLE IN THE NEW SOUTH

The South, including Southern Appalachia, is the most underdeveloped region of the nation. Robb Burlage, Visiting Fellow of the Institute, will undertake a social and economic analysis of the problems of the New South. He will examine some of the new forces in the South, including the Democratic Coalition in Texas, the Mississippi Freedom Democratic Party, and the Republican Party. This study of political forces will relate to rural reconstruction and the impact of federal programs in the South. In connection with this project, he will lead a seminar of assistants to Southern Senators and Congressmen, which will discuss a series of specific problems dealing with the administration of present federal programs and the possibility of new programs.

5. RURAL REDEVELOPMENT AND RECONSTRUCTION (Robb Burlage, Visiting Fellow)

General trends of American population have been toward the cities. This, as is argued, has led to overcrowding, slums, etc., while the towns and farms of the United States have become ghostly and impoverished. This seminar will attempt to see whether there are ways to rebuild small towns in the U.S. and whether subsistence farming can be put forth as a useful alternative to working in industry or in the service occupations.

6. LAW AND SOCIAL CONFLICT WORKSHOP

The Institute has begun a study of the state of the law in critical areas of social conflict to determine what the possibilities are for developing the law to deal with major social crises. Richard Barnet is undertaking a study of the law of housing, particularly with regard to the rights of tenants. This study will deal not only with the common law and the way landlord and tenant relations are actually dealt with in the courts, but also the possible approaches to legislative reform. In connection with this project the Institute will hold a seminar of Washington lawyers and social scientists concerned with housing conditions to consider various legal and political strategies for dealing with the major problems in landlord and tenant law. The seminar will support and assist action groups interested in making test cases in the area of housing on the basis of various legal theories considered in the seminar. New legal theories about property, damages, and other legal relationships as they relate to critical social problems will be considered. Princeton University Press has requested a book on the papers of the seminar.

7. YOUTH AND POLITICS

Arthur Waskow is engaged in a study of youth in American politics. In connection with his study, a seminar will be held to discuss the impact of generational differences on American politics, the relationship of new political forces to older ideologies, and particularly, the role of political action in the academic community. Jencks, Waskow, Raskin, Burlage, and Kotler will participate.

8. THE ADMINISTRATION OF MEDICAL CARE

Robb Burlage will complete his preliminary study of the administration of hospital care, with particular reference to the Trussell Plan in New York. He will continue his analysis of the role of the federal government in developing medical care through an intensive study of the Appalachian Hospital system. In this connection, he and Dr. Richard Kissick of the Office of the Secretary of the Department of Health, Education and Welfare will conduct a seminar on federal policy towards hospital development, which will include Washington hospital administrators and federal officials concerned with hospital care. The seminar will evaluate various parts of the country and will consider the possible role of the federal government in their planning and implementation.

OTHER SEMINARS, CONFERENCES, AND PROGRAMS

In addition to seminars related to the principal research interests of the Fellows some additional seminars may be given by Associate Fellows. Robert Eichholz has been appointed Senior Associate Fellow of the Institute. He will undertake to integrate the Associate Fellows' work more closely with that of the other Fellows of the Institute. Paul Goodman is planning a seminar on the use of language and rhetoric by the government in the national security area. He will analyze some of the problems of meaning in official documents and consider some of the reasons why modes of communication have developed as they have. The Institute will invite Charles Osgood, Professor of Psyche-linguistics at the University of Illinois and a group of his students to participate in the seminar-study.

The Institute has been discussing with the Jewish Theological Seminary the possibility of holding a joint conference on Ethics and Foreign Policy. The purpose of the conference is to consider how it might be possible to make the administration of foreign policy more responsive to ethical norms. It would consider whether it is possible to obtain agreement on a hierarchy of values in foreign policy, and if so, what is the interrelationship of morality and politics in the conduct of statecraft.

The Institute is also considering holding expert hearings on critical public policy problems. We are considering the

feasibility of constituting a board of experts in a particular area, and calling witnesses which will involve scholars from associated universities.

UNIVERSITY ASSOCIATIONS

Antioch College, the University of California at Berkeley, Cornell University, the University of Illinois, and Reed College are now Associated Universities. We hope to have students from these institutions during the next academic year. It is hoped that students would work part-time in government offices related to their research interest and spend the rest of the time in a tutorial relationship with one of the Fellows of the Institute. The Fellows will also be lecturing at the Associated Universities. In addition, the Institute and the Universities will be cooperating on projects as we are now doing with the University of California (Prison College) and with Antioch (Future of the Liberal Arts College Project).

STUDENTS

During 1965-1966 the Institute hopes to meet its needs and those of the society by developing its student program. On a full-time basis there will be 20 students from Associated Universities and other universities at the Institute. The Institute has embarked on a program to receive scholarship aid for its students. In the past, students received pay for half-time work in a government or policy-shaping organization. During the 1965-1966 year the Institute intends to place most of the students in Congressional offices but to be able to provide funds for them so that the Congressman or Senator will not have to pay. This program will cost approximately $30,000, based on 20 students. If the money cannot be raised, the students will find their own jobs with Institute help.

STUDENT SEMINARS

Students of the Institute will be required to attend a seminar once a week which will meet for two hours. Problems of their work and research will be discussed. Lectures from time to time will also be given at these seminars by Fellows of the Institute and papers will be presented by the students to the seminar. If the Institute has more than 15 students the seminar will be divided into two sessions.

INSTITUTE FOR POLICY STUDIES

Seminar on "The United States and Revolution in the Non-Industrial World

For the past 20 years, the event or the possibility of "revolution" has been a major political reality to the wretched and the comfortable of the earth. The reality has been no less real because its meaning has been unclear: for the term "revolution" has been applied to processes and events of widely varying intensities and depths, occurring under various auspices and with various forms and goals. On the one hand, in the non-industrial world--stretching from China eastward across South Asia and the Middle East into Africa and across to Latin America --there have been many "revolutions" and revolutionary movements--violent and nonviolent, political and social, anti-colonial and anti-oligarchic, military and civilian, libertarian and authoritarian--and many different responses to them from various local groups and institutions. Many of these revolutions were sparked by changes that were caused by changes in American society and policy; and many of the revolutions either drew inspiration from America or were built upon opposition to America. Not only was the United States thus a major issue in the origin and purpose of these revolutions, but from the United States there came a constantly changing, seemingly ambivalent, and even by its own standards, highly unsatisfactory, set of responses to these various efforts at revolution in the non-industrial world.

In order, therefore, to understand the complex ways in which the event and the possibility of revolutions in the non-industrial countries have changed those nations and their relations with America, the Institute for Policy Studies proposes to examine, first, the origins, assumptions, goals, and frameworks of various cases of past or impending revolutions and the ways in which they changed the lives of the peoples involved, or failed to; and then the origins, assumptions, goals and frameworks of the various actual and possible American responses.

I. The Study of Revolution

During the last twenty years, in the non-industrial world there have occurred revolutions based on nationalist Communism, as in China and Viet-Nam; on non-Communist, anti-colonial nationalism, as in Ghana and Algeria; and on anti-oligarchic populism, as in Bolivia and Egypt. The revolutionary movements have used or have tried to use violence, as in Malaya; non-violence, as in India and South Africa; and more traditional political pressures and legislation, as in Brazil and Iran. There have been middle-class revolutions, peasant revolutions, proletarian revolutions, military revolutions, revolutions for independence only, revolutions for radical social change. Some attempted revolutions have been crushed or smothered, others have "succeeded" only to bog down once the revolutionaries had taken power, and others seem still to be moving to transform their societies, though sometimes in ways their originators least expected.

In order to understand the ideologies, social bases, choices of techniques, and social effects of the various efforts at revolution, the Institute will bring together in seminar spokesmen for, participants in, and expert students of the revolutionary movements in several countries that have undergone revolution or where revolution appears likely over the next few years. Algeria, Ghana, South Africa, Brazil, Bolivia, Cuba, the Philippines, Indonesia and Iran will be the countries given intensive examination. The seminar will attempt to ascertain the ways in which major participants in revolutions or revolutionary movements have interpreted these events. A major purpose of the study will be to identify the political, social and economic goals and accomplishments of revolutionaries in these countries. Special attention will be given to the views of the participants in revolutions as to the involvement or non-involvement, through public and private agencies, of the United States: both in the past, as regards the social and political development of their countries over a fairly long period, and more recently during the revolutionary process itself. In other words, how do they assess the impact of American diplomacy, ideology, military assistance, economic and technical aid, private business, and education, on shaping the state of society out of which the revolution grew, the assumptions and goals of the revolution, and its results? Their attitude toward the communist world will also be considered, but the focus will be on their view of the relationship of the United States. The Institute hopes in this way to develop some case histories of the attitudes of the leaders of revolutionary governments and movements towards what the U.S. has done and what, in their view, the U.S. should have done or should now do in relation to their revolution. The seminar will also explore what concepts like "neo-colonialism," "imperialism," "modernization," "self-determination," "neutralism," and indeed, "revolution" itself mean to the revolutionaries.

Participants in this seminar will include from the Institute, Resident Fellows Richard Barnet, Marcus Raskin, and Arthur Waskow; Visiting Fellows Kenneth Boulding and Arthur Lall; Associate Fellows Bernard Fall, Robert Parris, and Harvey Perloff; and several students. From the various countries in the non-industrial world, ambassadors and unofficial spokesmen (possibly correspondents, officials of international organizations, and members of revolutionary movements) will be invited to the seminar, as will particular scholars and experts from various American academic or journalistic institutions who are in close touch with revolutionary currents in the non-industrial world. Associate Fellow Robert Parris will bring back for the seminar a series of interviews with leaders of revolutionary governments and movements, to be made and tape-recorded at the Algiers conference of Asian, African, and Latin American states.

The Seminar will take up in successive sessions (meeting every other week) each of the nine countries to be examined in detail. Before each session, a paper by an expert on that country (frequently a participant in revolutionary activity there) will be circulated to all members of the seminar. The session will then be able to discuss the paper in depth, isolating issues requiring further research and analysis. A summary of the discussion will be distributed to all members of the seminar, and the Institute members will take responsibility for seeing that for each country, the task of further research and analysis is taken on. After the

initial series of nine sessions is completed, the seminar will be able to take up papers that have been prepared in the meantime, to deal with those issues for further research and analysis that have been isolated in the first set of meetings. After the second set of sessions focusing on revolutionary case studies has been completed, the seminar will proceed to Phase II.

II. The Study of American Responses

Various public and private American groups and institutions have responded to the possibility or actuality of revolutions in the non-industrial world in at least as many different ways as there have been different sorts of revolution, and often have responded differently to revolutions of similar type or similarly to revolutions of different types. To note only the official activities of one or another branch of the United States government, these have included:

(a) military aid to governments threatened by revolution or fearful of revolution, as in China, Greece, and a number of Latin American states.

(b) military intervention against a revolution, as in Viet-Nam and the Dominican Republic.

(c) the use of subversionary techniques on behalf of revolution, as in the encouragement of the overthrow of Trujillo in the Dominican Republic.

(d) the use of subversionary techniques to bring down a revolutionary government, as in the encouragement of the overthrow of Mossadegh in Iran, and Arbenz in Guatemala.

(e) assistance to revolutions by diplomatic means, as in the struggles of India, Indonesia, and Algeria for national independence and the stuggle of black South Africans to end apartheid.

(f) opposition to revolutions by diplomatic means, as in Malaya.

(g) attempts to make revolution unnecessary by using economic aid to encourage major social change, as in the Alliance for Progress.

(h) attempts to use economic pressures against revolution, as in Cuba.

None of these ways of relating to revolution has proved wholly satisfactory, either to the United States or to the revolutionary movements. Nor is it clear whether Americans in general or any major group of them (including their government) have had any agreed standard by which to judge what kind of relationship between the United States and revolutionary movements would be a satisfactory one. On occasion different branches of government have carried out what at least on the surface seemed to be contradictory policies toward a particular revolution. If one looks beyond the government to the various "private" foreign policies of groups ranging from banks to churches to oil companies to labor unions

to universities to the civil rights movement, one finds an even greater range in directions, intensities, and techniques of the response of such private groups to actual or potential revolution.

In short, both the ends that ought to be pursued and the means that ought to be used by the United States in confronting revolution need to be explored. Among the questions that should be raised are these:

Is there or has there been any American "national interest" in the issue of revolution in the non-industrial world, one way or the other? If so, what is it, and what would be the most effective means of pursuing it?

Has there been any coherent shift over time, during the last twenty years, in the government's responses to revolution in general, or to revolution in particular parts of the world?

Is there any present ideology or definable set of interests underlying the various, and seemingly contradictory, responses of parts of the United States government to revolution; and if so, what are they?

What have been the processes of decision by which the government has shaped its responses to revolution, to what extent have these responses been based upon public understanding and choice, and what institutional changes might be made in these processes?

What interests and ideologies underlie the various responses of different American private groups and institutions to revolution?

What have been and what would be the effects on American domestic life and policy of pursuing various policies toward revolution in the non-industrial world?

What political interests and groups inside the United States are or might become interested in shaping and changing American policy toward revolutionary movements, and in what direction?

Do American policies on such issues as unilateral and multilateral economic development, international peacekeeping machinery, military strategy and disarmament, international trade and balance of payments, relations with NATO and the Soviet Union, and the international protection of human rights have any appreciable effects on the possibility or the form of revolutions in the non-industrial world?

What effects, if any, do the forms, auspices, techniques, and goals of revolutionary movements have upon the American response to them? (e.g., violent as against non-violent? Communist as against non-Communist? Military as against civilian? Middle-class as against peasant or proletarian? etc.)

What roles have international law and international institutions played in regulating the relationship between the United States and revolutionary movements in the under-developed world, and what roles might they play? How might international law and institutions change as a result of the rise of revolutionary movements?

* * *

As the Institute moves into Phase II of this study, it will add to the kinds of participants sketched above, additional representatives and leaders of some of the revolutionary currents in the non-industrial world; some Administration officials, Members of Congress, and their assistants who are particularly interested in or concerned by American policy toward revolution; and persons from the Washington offices of non-governmental organizations with a special concern about American military, political, or economic policy in the non-industrial world.

# THE NEGLECTED DROPOUT:

# THE RETURNEE

Syracuse 10, New York

July, 1963

# THE NEGLECTED DROPOUT: THE RETURNEE[1]

In recent years there has been a great deal of literature dealing with young people who leave school before graduation from high school.[2] Assumptions in this literature are that "stay-in-school" pressures and propaganda affect only those who have not yet left school and that a youth's education is terminated once he has dropped out. Neglected are those young people who drop out but later seek more education.

The major concern of this paper is to see if those who return to school are a group or groups of dropouts unique in terms of school performance, social background or personal characteristics. The decision to return might be easier for a youth who comes from a middle class environment where the individuals he respects are likely to support his return to school. It might be easier, also, if he had been relatively successful, academically and socially, in the school setting, and if his return were welcomed, rather than decried by students and teachers. He would be rewarded for conforming to the educational norms rather than put on the defensive for changing his mind.

We are concerned to see if the "returnees" can be identified in advance, for then the schools might be able to pay special attention to them as they leave and re enter. Returning to school does not necessarily lead to graduation, but a better understanding of the returnees and their motives could lead to programs which would increase the number of returnees who do graduate. Furthermore, if it is known what conditions prompt re entry, some similar conditions might be simulated to encourage more dropouts to complete their education. It may be, on the other hand, that those who return are not unique in any way and that the return to school is based on less systematic factors. In either case, the returnee should not be neglected; his school

career is different from that of the permanent dropout and that of the student who has an uninterrupted school life.

There are few, if any, studies of youth who end and then resume their education. In a recent bibliography on dropouts,[3] it was noted that only a few of the studies recognized that some dropouts do return to school; most researchers do not even specify whether or not their samples of dropouts include returnees.

Although the present report does not meet the criteria of a rigorous study, it provides some interesting data on a population which has been neglected by school systems and researchers.

Methods of Research and Study Groups

The Youth Development Center of Syracuse University, with the cooperation of the New York State Division for Youth, undertook a study of school dropouts in the spring of 1962. The subjects of the study were all the students who left junior or senior public high schools in Syracuse, New York, during the 1959-60 school year without completing graduation requirements, excluding those who had transferred to other schools. The method of research was a survey of existing records; the school records of these dropouts were checked, as were the records of the New York State Employment Service, the Central Registry of Juvenile Offenders, the Syracuse Police Department, the Armed Forces Examination Station and the Onondaga County Welfare Drpartment. The Syracuse City Directories of 1958, 1959, and 1960 were consulted for information regarding residence and parents' occupations.[4]

There were 625 dropouts from the Syracuse schools during the 1959 60 school year. During the survey it was learned that 60 of these dropouts had returned to school and that some had actually graduated. These 60 youths

were classified as "returnees"; the remaining 565 were classified as permanent dropouts and studied in an earlier publication.[5] In the present report the 565 permanent dropouts and 60 returnees will be compared in an effort to ascertain any differences between them that might lead to predictability of which dropouts would eventually return.[6]

The information on "return to school" was gained by chance; there was no systematic check of night school or summer school records. It is very likely, therefore, that some of the 565 dropouts also received further training.[7] Some youth may have been eliminated from the study entirely because they had dropped out and returned during the same year; thus they were not included as dropouts nor as returnees.

"Returning to school" does not necessarily indicate a final acceptance of school and eventual graduation; rather, it is an omnibus term referring to several types of educational experience. Some of the returnees in this study attended night school or summer school almost immediately after leaving day school and soon completed the requirements for graduation. Others are still working toward their diplomas by taking a few credits at night school each semester or through a correspondence course. A few finished in a shorter time by returning to day school full time. Four girls sought some further training in a business school. They are included as returnees since they could have received that training in a regular high school. Far from all of the returnees graduated from high school; some remained in school only two or three months. Some students may leave school and return several times before leaving the final time. For some of the permanent dropouts in this study the 1959 or 1960 leaving was a second dropout; they had left earlier, perhaps in 1958, decided to return, and then left again in 1959-60.

Because the two groups, returnees and permanent dropouts, do overlap somewhat and because there is not a complete accounting of all returnees, it was not feasible to calculate returnee rates.[8] Also, interpretation of the data must be very cautious. Despite the unsystematic and incomplete procedure af distinguishing returnees from dropouts, statistically significant differences between the two groups appeared on certain variables. These differences are worth considering as possible indications that returnees are a particular type or types of dropouts and may provide an initial step in identifying which dropouts are likely to seek further education. The most impressing result may be, however, the limited range of differences between dropouts and returnees, suggesting that for many returnees situational factors may be important.

Sex Ratios

It would be expected that boys would be under greater pressure than girls to complete high school because of future obligations to support a family. This study, however, did not reveal a large sex difference in the propensity to return. Boys left school more frequently than girls (55 per cent of the dropouts were males, 45 per cent females), and they also returned to school more frequently, and in approximately the same proportions (60 per cent of the returnees were males, 40 per cent females).

Table 1

The failure of boy dropouts to return in significantly greater proportions than girl dropouts may be explained by three possible factors. First, girls as well as boys, are audience to the stay-in school propaganda. Second, girls may experience at least as much discrimination as boys in the job market due to their lack of a high school diploma. Third, girls usually

do better than boys in school and therefore might be more willing to return, even though a diploma is not necessary to be a housewife. In fact, it will be shown that girl returnees had reached higher grade levels than boy returnees and were less retarded academically.

Because of the sex differences in school performance and in family and social background, sex will be controlled in all comparisons of dropouts and returnees.

The Dropout and the Returnee in the School Setting

1. Age at time of leaving school

The age at which a young person leaves school may be a factor in whether or not he feels enough at home in the school setting to return to it after a dropout experience. Also, by the time a boy or girl is 17 or 18 years old he may feel he should be earning his own living rather than continuing to be a dependent on his parents. To ascertain whether or not age did make a difference, the age reached by each youth at his last birthday before dropping out was calculated.

Table 2-

The age distributions for dropouts and returnees were almost identical. In both groups the modal age for leaving was 16, the minimum legal school-leaving age in New York State. The mean age in both cases was approximately 17.

With sex held constant, some differences appeared, but they were not statistically significant. Among the boys, returnees were less likely than dropouts (50 per cent and 56 per cent respectively) to have left school after reaching age 17. Among the girls, the trend was in the opposite direction; returnee girls were more likely than dropout girls (54 per cent

and 45 per cent respectively) to have left school after their seventeenth birthday. Perhaps it is more important for boys than for girls not to be "too old" to return to school

On the whole, however, it seems that age at dropout did not make a difference in whether or not the dropout would seek further training. More important, as shown below, was the age of a dropout in relation to his grade attainment; that is, grade retardation.

2. Grade level achieved

One of the factors most clearly separating the returnees from the permanent dropouts was the grade level reached but not completed by a youth before he left school.[9] Approximately four-fifths of the returnees and only three-fifths of the dropouts had reached grades 10, 11 or 12. This difference was statistically significant[10] at the .01 level; that is, it could have occurred by chance only once in 100 times. (See Table 4.) With sex controlled, the difference remained significant, but at the .05 level of significance; that is, it could have occurred by chance only 5 in 100 times. (See Tables 5 and 6.)

Tables 3, 4, 5, 6 and 7.

Although there were statistically significant differences between the dropouts and returnees, it must be pointed out that more than 45 per cent of both groups were in grades 10 or 11 when they left school. In spite of the differences, there was much overlap in grade achievement.

While returnees had reached higher grade levels than had dropouts, this was more true of girls than of boys. Girl returnees were more likely than boy returnees (or dropouts) to have reached the two highest grades, 11 or 12. This difference was significant at the .05 level. (See Table 7.) Thus, among

girls, the majority (71 per cent) of the returnees were in grades 11 or 12, as compared with 42 per cent of dropouts. Among boys, the majority (64 per cent) of returnees were in grades 10 or 11, as compared with 45 per cent of dropouts. (See Table 3.)

Table 8 gives the percentage of all dropouts (returnees and permanent dropouts) at each grade level, who returned to school.[11] As the grade level increased, the percentage of returnees increased without exception. Only 3.6 per cent of those who were in grade 7 or 8 when they left school returned for further education, while 15.1 per cent of those in grade 12 did so. Similar relationships existed with sex controlled.

-Table 8-

This table revealed the same sex difference as that implied by Tables 2 and 7-- that nearness to graduation was less important for boys than for girls. Boys were as likely to return in grades 10 or 11 as in grade 12 (13 to 14 per cent in each of the three grades were returnees), while girls were much more likely to return in grade 12 (17 per cent) than in any other grade

3. Grade Retardation

Grade retardation was calculated by comparing the grade level achieved by each youth when he left with the grade level normal for his age group. For example, a person who was 16 when he entered the tenth grade was one year retarded, since most youth begin the tenth grade at age 15.

-Tables 9, 10, 11, 12 and 13-

Returnees were significantly more likely than dropouts (68 per cent and 45 per cent respectively) to be at their normal grade level or only one year behind. (See Table 10.) The difference remained significant with

sex controlled. (See Tables 11 and 12.) For either sex, however, the greatest difference between returnees and dropouts was in the "0 years retarded" category. Of the returnees, 33 per cent were not retarded, as compared with only 17 per cent of the dropouts; this difference was statistically significant ($X^2 = 8.64$; df = 1; P .01).

The percentage of all dropouts (permanent and returning) who returned at each degree of retardation was calculated, and an inverse relationship appeared: the less the retardation, the greater the propensity to return. This relationship held for both boys and girls. The importance of the factor of retardation can be seen by the fact that although 17.1 per cent of those who were not retarded when they left school returned, only 6.3 per cent returned of those who were four or more years retarded.

Table 14

The school is a severely age graded culture. Anyone much older or younger than his classmates is made to feel out of place, and a scholastically retarded dropout might be unlikely to return to such an uncomfortable situation, especially since the dropout period would increase the degree of retardation.

Tables 3 and 7 showed that girl returnees reached higher grade levels than did boy returnees; they were also more likely to be at their normal grade level or only minimally retarded. Of the girls, 87 per cent were at the grade level normal for their age or only one year retarded, as compared with only 56 per cent of the boys. This difference was statistically significant. (See Table 13.) Almost half (46 per cent) of the girl returnees were not retarded at all, as shown in Table 9. Almost half (45 per cent) of the boy returnees, on the other hand, were 2 or more years retarded, as compared with only 12 per cent of the girl returnees. Thus, girl returnees

probably had performed much better in school than boy returnees or any of the permanent dropouts. This may have been a major factor in their return. Since a large number of boy returnees were quite retarded scholastically, it may be that factors other than relative success in school prompted their return.

4. Intelligence Quotient

Intelligence test scores were reported for only one half of the returnees (13 girls and 17 boys) and for fewer than one-half of the dropouts (42 per cent). This is one reason for exercising extreme caution in the interpretation of the I. Q. data. Other limitations were that the tests were given at diverse age levels and that various I. Q. tests were used, with no adjustment made to correct for the varying means and standard deviations of the tests. The majority of the scores were, however, from the California Test of Mental Maturity. Of the 30 scores for returnees, 24 were determined by this test as were 162 of the 236 scores (68 persons) for dropouts.

-Tables 15 and 16-

From the limited data available it seems that returnees did score higher on intelligence tests than did the dropouts. The mean I. Q. of the returnees was 97.5 and of dropouts 92.8. The girls were the main contributor to this difference, however; there was only one percentage difference between male dropouts and male returnees. While the groups did not differ on the percentage in the very low I. Q. range (60-79), returnees were more likely than dropouts to fall in the high category (100-122); more than one-half of the returnees and only slightly more than one-quarter of the dropouts had scores of 100 or above. This latter

difference was statistically significant at the .01 level. (See Table 16.)

In the dropout group there was little difference between boys and girls. Among the returnees, however, the girls had a mean I. Q. of 101.5, whereas the boys' mean I. Q. was 94.4. Girls were more likely than boys to fall in the 100 or above range; 9 of the 13 girls and only 7 of the 17 boys had scores of at least 100. This difference was not statistically significant. The intelligence quotients again indicate the relative academic superiority of the girl returnees as compared with boy returnees and all dropouts. For the boys, intelligence seemed to be less of a factor in their return than for girls, since more than a third (36 per cent) of them had low I. Q.'s of 89 or below, and another quarter fell in the 90-99 I. Q. range.

Perhaps the higher grade achievement of the returnees, especially the girls, was reflected in the I. Q. scores; perhaps they gained more from their school careers, or perhaps they were of higher intelligence. In any case, they probably did have a better chance of succeeding when they returned to schoolthan the dropouts would have had.

5. Type of Further Education Received by Returnees

A majority of the returnees (66 per cent) continued their education in night school, rather than in day school (10 per cent). This was more true of boys (75 per cent) than of girls (54 per cent). By attending night school the young people, especially the boys, could maintain full-time jobs as well as work toward their diplomas. Another contributing factor might be that by going to night school they did not have to return to the school culture they had left, perhaps as misfits or failures; neither were they placed in a class of youth much younger than they. In night school they were more likely to be with people like themselves.

difference was statistically significant at the .01 level. (See Table 16.)

In the dropout group there was little difference between boys and girls. Among the returnees, however, the girls had a mean I. Q. of 101.5, whereas the boys' mean I. Q. was 94.4. Girls were more likely than boys to fall in the 100 or above range; 9 of the 13 girls and only 7 of the 17 boys had scores of at least 100. This difference was not statistically significant. The intelligence quotients again indicate the relative academic superiority of the girl returnees as compared with boy returnees and all dropouts. For the boys, intelligence seemed to be less of a factor in their return than for girls, since more than a third (36 per cent) of them had low I. Q.'s of 89 or below, and another quarter fell in the 90-99 I. Q. range.

Perhaps the higher grade achievement of the returnees, especially the girls, was reflected in the I. Q. scores; perhaps they gained more from their school careers, or perhaps they were of higher intelligence. In any case, they probably did have a better chance of succeeding when they returned to schoolthan the dropouts would have had.

5. Type of Further Education Received by Returnees

A majority of the returnees (66 per cent) continued their education in night school, rather than in day school (10 per cent). This was more true of boys (75 per cent) than of girls (54 per cent). By attending night school the young people, especially the boys, could maintain full-time jobs as well as work toward their diplomas. Another contributing factor might be that by going to night school they did not have to return to the school culture they had left, perhaps as misfits or failures; neither were they placed in a class of youth much younger than they. In night school they were more likely to be with people like themselves.

Table 17-

6. Summary of Scholastic Situation

Returnees seemed to be a slightly higher level of dropout in terms of grade achievement, grade retardation and intelligence quotient. There was considerable overlap between the two groups, however, on all of these variables. Furthermore, not all of the returnees were higher level dropouts. Two of them were 19 years old when they left school, four were in grades 7 or 8, two were 4 or 5 years retarded, and four had I.Q.'s of 79 or below. At least in terms of academic performance, there are probably different types of returnees, just as there are different types of dropouts.

Girl returnees seemed to do even better in school than did the boy returnees. The large majority of the girl returnees were in grades 11 or 12, none or one year retarded, and had I.Q.'s of 100 or above. While boys were more likely to return if these characteristics applied, many of them were in grade 10 or below, 2 or 3 years retarded and had I.Q.'s of 70 to 99. Academic achievement in school was not so much a determining factor for boys as it was for girls; this finding probably reflects the greater pressur on all boys, whatever their school performance, to finish high school.

Family and Social Background of Dropouts and Returnees

1. Father's Occupation

An effort was made to determine whether or not returnees were of a higher socio-economic level than permanent dropouts. Three indicators were available: (1) socio-economic area of residence; (2) whether or not a family had received public welfare; and (3) father's occupation, as classified according to the U.S. census code groupings in the Alphabetical Index.[12] The latter indicator revealed no differences between dropouts and

returnees. The fathers of 23 per cent of the dropouts and 20 per cent of the returnees had white collar jobs. Approximately two-thirds of the fathers in both groups (64 per cent of dropouts' and 66 per cent of returnees' fathers) had blue collar jobs such as craftsmen, foremen and operatives.

Table 18-

There were sex differences consistent with other indicators showing that the girls in the returnee group came from less economically stable families than did the boys. A total of 26 per cent of the boys and only 11 per cent of the girls had fathers in white-collar occupations. Furthermore, fewer girls had fathers who were craftsmen or foremen. More than two-thirds of the girl's fathers (69 per cent) and only one-third of the boys' fathers were operatives, laborers, or in the private household and service occupations. Approximately equal proportions of boys' and girls' fathers in the dropout group fell in each occupational classification.

2. Social Welfare

Although returnees did not seem to have a better economic position than dropouts in terms of occupational level of father, the former did have the advantage of more economically stable families, if receipt of public welfare assistance is any indication. Although 42 per cent of the families of permanent dropouts had received welfare at some time since 1936, only 30 per cent of the returnees' families had; this only approached statistical significance. (See Table 20.) This difference held with sex controlled, but was still not statistically significant.

Tables 19 and 20-

In both groups, more girls than boys had families with county welfare

histories; among the returnees 22 per cent of the boys' families and 39 per cent of the girls' families had received welfare. Of those returnees' families which were listed at the County Welfare Department, most had received financial aid more than once.

3. Socio-economic Area of Residence

The somewhat better socio-economic position of the returnees is further shown by the residential patterns of the youth. The census tract in which the youth lived at the time of dropout was given a socio-economic rating of I(high) to VI(low). This rating was based on several variables and a composite index score was calculated for each tract. The information was obtained from 1950 census data. The variables involved were: (1) mean monthly rent for tenant occupied dwellings; (2) median market value for single-family owned homes; (3) percentage of single family dwellings; (4) median school year completed by adult residents 20 years old and over; and (5) percentage of all employed who were laborers, service workers and operatives. On the basis of these index scores the census tracts were grouped into the six ranked socio-economic areas.[13]

-Tables 21, 22, 23 and 24-

Only a few more returnees (21 per cent) than dropouts (14 per cent) lived in the three best areas I, II, and III. Returnees, however, were more likely to live in areas IV and V (59 per cent of returnees to 44 per cent of dropouts) and less likely to live in the worst area of the city, VI (20 per cent of returnees to 38 per cent of dropouts). Returnees, then, tended to live in slightly better areas than did dropouts.

By combining categories I through V and comparing the number of dropouts and returnees in these areas with those in area VI, a difference

appeared that was statistically significant at the .01 level. Excluding those for whom residence was not ascertained, 40 per cent of the dropouts and only 20 per cent of the returnees were living in area VI. (See Table 22.) The difference remained significant or nearly significant with sex controlled. (See Tables 23 and 24.)

Returnee boys were much better off than returnee girls; 31 per cent of the boys lived in areas I, II and III and only 8 per cent of the girls lived in these areas. The girl returnees were more likely than boy returnees (46 per cent and 22 per cent) to live in area V. Approximately equal proportions of each sex lived in areas IV and VI. Among the dropouts, however, the greatest boy-girl difference was in area VI; 43 per cent of girl dropouts and 35 per cent of boy dropouts lived in this worst area.

-Table 25-

The importance of socio-economic area of residence is further shown by Table 25. Of all those who left school in 1959-60, 30.0 per cent of those living in area I returned and only 5.2 percent of those living in area VI did so. The returnee rate was fairly consistent for areas II through V (11 to 14.5 per cent for each area.)

4. Family Situation

The type of family situation in which a youth lived when he left school might be a factor determining his success in school, his attitude toward school, and the possibility that he might return. A statistically significant difference was found in the proportion of each group living with both of their parents, that is, in an unbroken home. Excluding those for whom family situation was not ascertained, 76 per cent of

returnees and only 61 per cent of dropouts lived in an unbroken home (Table 27). When sex was controlled, only the difference between dropout and returnee girls approached significance (Table 29). More dropouts (20 per cent) than returnees (13 per cent) lived in one-parent families (Table 26).

Tables 26, 27, 28 and 29.

Although the sex differences in each group were not great, more girl returnees than boy returnees (79 per cent and 72 per cent respectively) lived with both parents; in the dropout groups the opposite tendency occurred with more boys than girls (58 per cent and 53 per cent respectively) living with both parents.

It is important to note that the majority of both returnees and dropouts lived in a home not broken by death, divorce, separation or the like. Although more returnees than dropouts came from visibly stable families, a quarter of all returnees came from broken homes and more than half of those who did not return came from unbroken homes; therefore, this factor cannot account for all or even nearly all returnees.

5. Delinquency of Dropouts and Returnees

All youth who are involved with law enforcing agencies before they reach their sixteenth birthday are listed in the Syracuse Central Registry of Juvenile Offenders.[14] After a youth is 16 his offenses are recorded in the Syracuse Police Department. According to both the Central Registry and the Police records, dropouts and returnees did not differ in the extent of their delinquencies.

Tables 30 and 31.

The large majority of both groups (80 per cent) were <u>not</u> listed at the

Central Registry, and approximately nine-tenths of both groups (88 per cent of dropouts and 90 per cent of returnees) were not listed at the Police Department. In both groups, more boys than girls were listed at each agency, but the differences were not significant. Most of the offenses of the returnees were not serious, although they ranged from malicious mischief to grand larceny. In summary, permanent dropouts were no more likely than returnees to become involved with a law enforcing agency.

6. Summary of Background Factors

Three factors were investigated in this section on family and social background: (1) economic stability (measured in terms of father's occupation, socio-economic area of residence and social welfare history of the family); (2) family stability (as indicated by the type of family situation in which a youth lived); and (3) delinquency. The latter factor showed no differences between returnees and dropouts. Father's occupation did not differentiate, but perhaps this was due to the gross occupational classifications used or to the partial character of the data.

All the other measures, however, consistently revealed that boys in each group came from more stable families than their girl counterparts. More boys in each group lived in the better socio-economic areas and had families without records of public welfare assistance. The only exception was that fewer girl than boy returnees had lived in broken homes.

The other important finding was that on each of these measures, without exception, fewer returnee boys than dropout boys and fewer returnee girls than dropout girls had experienced the unstable situation. It appears that in terms of family and social background as well as academic achievement, some returnees were somewhat higher level dropouts. This was true of both

boys and girls. Although girl returnees were "worse off" than boy returnees, they were "better off" than girl dropouts.

The differences between dropouts and returnees, while consistent, were never large, and some returnees came from unstable backgrounds. Furthermore, returnees were only slightly "better off". For example, returnees were more likely than dropouts to live in socio-economic areas IV and V, but they were not much more likely to live in areas I, II or III. In other words, there were indications that some returnees came from slightly more stable backgrounds than dropouts.

Analysis of Combined Characteristics

As shown in tables 8, 14, and 25, 15 per cent of those in grade 12 at the time of school leaving were returnees, as were 17 per cent of those who were not retarded in grade level and 30 per cent of those who lived in the highest socio-economic area. An analysis was made to determine whether or not a certain combination of characteristics would yield an even higher proportion of youth returning to school. The analysis was done separately for boys and girls. Father's occupation and intelligence quotient were available for only a portion of each group and therefore could not be used profitably in the analysis.

The fact that a family had not received public welfare did not contribute to the proportion returning. If anything, among youth with the three characteristics of living in the better socio-economic areas, higher grade levels and lower school retardation levels, receipt of welfare by the family may have increased, rather than decreased their chances of returning, although the numbers involved were too small to yield conclusive results. (See k and l of Table 32 and q or Table 33.,

Table 32

Of the boys who lived in the highest socio-economic area, 33 per cent were returnees (line b of Table 32); since the total N in this area was only 6, however, it is not a reliable measure. Of the boys in areas I through IV who were not scholastically retarded, 28 per cent returned (N = 18; see line g). As great a proportion of boys returned (28 per cent) in the group that lived in areas I through IV, were in grades 10 through 12 and were no more than one year retarded (N = 43; see line i). The combination of these three factors yielded the highest reliable proportion of returnee boys.

Table 33

Among girls a high proportion of returnees was found in each of several combinations of factors (lines i, j, k, m, and q of Table 33). In each case, however, the numbers were too small to yield conclusive evidence. It does seem that being in grade 12, not retarded, living in areas I through IV, and coming from an unbroken home all contribute to the propensity to return for girls.

The combination of factors yielding the highest reliable proportion of girls returning was that of living in socio-economic areas I through V, not more than one year retarded, in grades 11 or 12 at the time of leaving, and coming from an unbroken home (line p, Table 33). Of the girls exhibiting these four characteristics, 29 per cent (N = 35) returned to school.

If data were available for the entire sample on all variables and the total number in the sample were larger, a more inclusive analysis could be made. This limited analysis seems to indicate, however, that youth who rank "high" on several academic and social variables (e.g. in grade 12,

unbroken rather than broken home, etc.) are more likely than others to return.

Conclusions

At present there is a good deal of emphasis being placed on graduation from high school and on discouraging youngsters from dropping out of school. At least 60 of the 625 students who dropped out of the Syracuse, New York, schools in 1959-60 later returned to school (mostly to night school), and many of these graduated. Who did return? What kinds of youngsters were most influenced by advice to finish high school, and what kinds had the most pressure put on them to return? Unfortunately, in this survey these two factors could not be separated, but some characteristics of those who returned were determined by comparing the returnees with the dropouts who did not return.

It was found that returnees were generally better academically than dropouts, using grade attained, grade retardation and intelligence quotient as indicators, but this was more true of girls than of boys. On each dimension, the girl returnees were of a higher level than boy returnees, and the differences between girl returnees and dropouts were greater than the differences between boy returnees and dropouts.

Returnees were also "better off" than dropouts in terms of economic and family stability; this was true of both boys and girls. In both groups, the boys more frequently than girls came from the better socio-economic areas and less frequently came from families receiving social welfare. Among returnees, girls less frequently came from broken homes.

These data seem to indicate that academic achievement or ability and an unbroken home are more important factors for girls in returning to school

than for boys. Economic stability of the family, however, is a more important factor for boys than for girls in inducing a return to school

It should not be assumed that the factors of academic ability or social class operated independently on the decision to return to school. It may be that the few who had been relatively successful in school or those who were from the higher social classes or more stable families were subjected to more pressures to return than were others, not only by their parents, but also by teachers, the New York State Employment Service, and the like. It may be, too, that the greater economic security of some returnees made it possible for them to return to school, or that their lesser school retardation meant that a return would be less of a challenge.

In spite of the observed differences, the data most strongly indicate that returnees are not clearly distinguishable from dropouts. The two groups overlap considerably. Not all of the returnees were from intact homes, for example, and more than half of the dropouts (56 per cent) were living with both parents. Furthermore, whenever returnees were "better off" socially or academically, they were only slightly "better off". More returnees than dropouts came from socio-economic areas IV and V, for example, but approximately equal proportions came from the best areas, I, II and III.

The limited systematic differences indicate that situational and idiosyncratic factors may be of great importance in whether or not a youth returns to school after leaving it. It is probably those youth who have been led to believe that the school and teachers would be receptive to their return who are most likely to make the plunge back into the school setting. An employer or an adult may encourage them to return. They may come into contact with the school in some way or another.

The likely significance of such factors suggests that the building of roads back to school could be effective. It might be well to escape from the lock-step interpretation of school that everyone must move through broadly the same material at the same pace and for the same length of time. There may be those who can move effectively through school in the usual manner of 12 consecutive years; others may need a period of being a dropout -- the lower-class equivalent of the traditional upper-class Wanderjahr or two -- before they are ready to complete high school or begin specialized training. They should not be considered renegades from school, reluctantly admitted only if they show firm signs of "good behavior." Rather, we should institutionalize second, third and fourth chances and roads to education.

Without any real effort, the school system studied had at least 10 per cent and possibly as many as 25 per cent of its 1959-60 dropouts seek further training after leaving. With a deliberate aim to help these youth, many more early school leavers would return to the educational path. Obviously, school dropout programs aimed at encouraging return to school might gain some early successes by concentrating on the dropouts who ranked high on variables such as higher school grade, unbroken home, etc. The wide distribution of returnee characteristics underlies, however, the likely effectiveness of systematic attempts to encourage further education among a broad range of the dropout population.

Failing in the primary prevention of premature school leaving, increasing attention should be paid to the secondary prevention stage of reducing the period during which the individual suffers the handicap of limited education.

Footnotes

1. The collection of much of the data utilized in this report was made possible by the financial support of the New York State Division for Youth. The analysis was supported in part by a research grant from the Social Security Administration, Department of Health, Education, and Welfare, Washington, D.C.
2. We find it useful to distinguish various gross patterns of dropouts: "push-outs," who are overtly or covertly ejected by the school; "fall-outs," who dislike school but not strongly and leave early; and "run-outs," who extremely dislike school and exit as soon as they can.
3. Miller, S. M., Saleem, Betty and Bryce, Herrington. School Dropouts: A Commentary and Annotated Bibliography. Syracuse, New York: Syracuse University Youth Development Center, 1963 (forthcoming). A study that does deal directly with the post-dropout educational experiences of school dropouts is Bert I. Greene, "Continuing Education and the High School Drop-out," Adult Education, XII, 2 (Winter, 1962), 76-83. This study reported that 18 of 48 dropouts had received education or training of some type since leaving school approximately 11 years earlier: 5 had attended a trade school; 8 had taken a correspondence course; 4 had taken some adult education course; and 4 had an apprenticeship. About half as many dropouts as graduates participated in each form of further education. Although 18 dropouts had taken some course, only 12(25 per cent of all dropouts) completed some course.
4 Syracuse, a city with a mixed industrial base, had a population of 216,038, according to the 1960 census. The racial distribution was 94.3 per cent white, 5.2 per cent Negro and .5 per cent "other." The median grade level completed for all persons 25 years old and over was 11.1; 44 per cent had graduated from high school, and 11 per cent

had graduated from college. The median family income was $6,247; 33.5 per cent of all families had an annual income of less than $5,000; 48.4 per cent, $5,000-$9,999; and 18.0 per cent, $10,000 or more. Of all persons in the labor force, 14 years old and over, 5.1 per cent of the males were unemployed in 1960, and 3.8 per cent of the females were unemployed. Of all employed males and females, 49 per cent were white collar workers, and 51 per cent were blue collar workers. Of the employed males, 13.7 per cent were professional, technical and kindred workers; 10.4 per cent were managers, officers and proprietors; 17.7 per cent were clerical or sales workers; 18.8 per cent were craftsmen or foremen; 19.2 per cent were operatives; 7.9 per cent were service workers; 6.0 per cent were laborers, and for 6.4 per cent the occupation was not ascertained. Of all employed males and females, one-third (31.3 per cent) worked in manufacturing industries. (U. S. Bureau of the Census. U. S. Censuses of Population and Housing: 1960. Census Tracts. Final Report PHC (1)-154. Washington, D. C.: U. S. Government Printing Office, 1962, pp. 15, 42.)

5. Miller, S. M., Comings, Carolyn and Saleem, Betty. The School Dropout Problem: Syracuse, New York State Division for Youth and Syracuse University Youth Development Center; 1963

6. There were two other permanent dropouts (making a total of 567) who are eliminated from this report. They were mistakenly classified as returnees and omitted from the previous report on dropouts. In such a large study group (565) an additional two would not change the calculations greatly, and it seemed preferable to keep the data in the present report comparable to that in the earlier report.

7. In 1962, interviews were held with 98 of the 625 dropouts and returnees. Most of the interviews were conducted by members of a research class of the School of Social Work at Syracuse University, conducted by Maurice Connery. The results were reported in Baldwin, Kenneth, et al. "The Syracuse Drop-Out---Two Years Later," unpublished group Master's Thesis, School of Social Work, Syracuse University, 1962. Of the 98 interviewed, 13 were returnees and 85 were permanent dropouts. The new information in the interviews revealed, however, that of the 85 permanent dropouts, 12 (or 14 per cent) had also received further education. Thus, it is possible that of the 565 here classified as permanent dropouts, more than one-seventh may also be returnees.

   Additional information obtained from the interviews will not be used in this report since it is available for only a small sample of dropouts and returnees.

8. Of the 98 who were interviewed, a total of 25 dropouts (13 returnees and 12 of those classified as permanent dropouts) had returned to school. This indicates that perhaps one-quarter of all the 1959-60 dropouts returned for further education.

9. A youth who dropped out during the summer vacation was credited with the grade level he would have been in had he continued that fall.

10. $X^2$ was used to determine statistical significance. Statisticians frequently suggest that Yates' correction of $X^2$ be used when a 2 x 2 contingency table is used. Therefore, where $X^2$ is reported, $Xy^2$ (Yates' correction) is also reported. In only a few cases did the use of Yates' correction make a difference in whether or not there was statistical significance.

11. Because of the incomplete accounting of returnees and the overlap of the two groups, these figures should not be taken as representing actual returnee rates; they are presented here for analytical purposes only.

| One case | 43 | 14 | 36 | 14 | 79 | 14 | 1 | 3 | 2 | 9 | 3 | 5 |
| 2 or more cases | 71 | 23 | 88 | 35 | 159 | 28 | 7 | 19 | 7 | 30 | 14 | 24 |
| TOTAL*** | 313 | 100 | 252 | 100 | 565 | 100 | 36 | 100 | 23 | 100 | 59 | 100 |

*Only aid received through the Onondaga County Department of Social Welfare was included. Some families received such aid as early as 1936.

**"Case" refers to one type of assistance, e. g. aid to dependent children at one period of time. In its history a family may receive aid to dependent children three times and would, therefore, have three cases on its record. Also, a family may receive several types of aid.

***Total excludes 1 returnee girl whose family received assistance but number of cases was not ascertained.

Dropouts

– Revised version in Trans-Action, October, 1968.

S. M. Miller
Syracuse University
Youth Development Center

# STRATEGY, STRUCTURE AND VALUES IN SCHOOL PROGRAMS

The growing disadvantages of dropouts in the labor market has brought them increased attention. The low-educated youth of today is relatively worse off than was his counterpart, even a generation ago. Obviously, the adaptation of schools to deal more effectively with dropouts---in both preventive and remedial activities---is only one mode of attack on the problem. Basic economic and social issues are involved in the attempts to deal adequately with the issues raised by early school leaving. In the following remarks, the perspective is narrowed, however, to the role of the school in reducing dropouts and we shall deal with selected aspects of the tactics, strategy, structure and values of the various action programs involving school change.

## Two Neglected Groups

"High aspiring" dropouts have been neglected. Many low-income families, especially Negro, have very high educational and occupational aspirations for their children. Many low-income children report high aspirations. A number of studies of Negroes show their generally high aspirations, their generally high regard for education and their high occupational aims. Nevertheless, many of them will be dropouts. Frequently they have been characterized as possessing "unrealistic" aspirations, regarded as rather silly or unknowing and no special attention has been paid to the "unrealistic high aspirer."

At the same time, many low-income groups have been charged with having little interest in education and low educational and occupational aspirations. "Unrealistic" high aspirations and low aspirations are lumped together into interpreting

low-income attitudes. But individuals with extremely high aspirations are likely to be different in at least some ways from individuals with low aspirations, even if both groups have high dropout rates.

High aspirers are likely to have a more positive view of schools and education than low aspirers. The high rate of early school leaving among high aspirers is indicative of the school's failure to take hold of the special characteristics of this group. Special strategies are probably needed to be effective with high aspiring individuals of low-income backgrounds. This is not the place to suggest the strategies but to point out the nglect of an important group which apparently has some accessible potential for staying in school compared to groups which have low career aspirations and negative evaluations of education.

A second neglected group are the returnees--dropouts who go on to some form of further education after leaving school. Returnees may be as much as 25% of all dropouts.[1] A much more systematic way of reacting and responding to these dropouts is needed since they have great potential for the maintenance of their school careers if encouraged. Many more dropouts might return if more effort were directed to them.

Many students build up a momentum toward leaving school. Counseling, guidance, attention during this outwardly spiraling period tend to be ineffective--the youth is propelled along in the dropout direction and intervention is ineffective, exit interviews becoming formalities. After dropping out, however, it may be possible "to get to" these youth, encourage them to return to school and provide flexible school procedures which facilitate re-entry. Providing "aggressive",

---

1. See Betty L. Saleem and S. M. Miller, "The Neglected Dropout: The Returnee", Syracuse University Youth Development Center, 1963.

"reaching out" counseling aid when the youth is in the labor market may be more important in many cases than its availability prior to leaving school.

The high aspirers and the returnees are only two types of dropouts. Available material on dropouts[2] indicates how varied they are; we should not be thinking of the dropout but of different types of dropouts, needing different environments and aid at various times. Obviously, then, various kinds and types of teachers are needed.

Pluralism in Teaching Perfection

Unfortunately, an implicit model of an ideal teacher frequently prevails. Teachers are expected to, or believe that they should, fashion themselves after the model. The existence of many different kinds of successful teachers has been inadequately recognized. In observing schools we have been struck by the great variety of successful teachers, some of whom have quite antithetical styles. An enormous range of styles seem to be effective with low-income youngsters. A model, even implicit, of the ideal teacher encourages teachers into a mold. The emphasis rather should be on each teacher developing a style which fits with her interests, personality and orientation as they relate to the particular students she has at a particular time. To provide confidence for teachers of the low-income it may be necessary to provide some concrete teaching tactics about what can be done in a classroom. The emphasis, however, should be on how the teacher can relate her own abilities and inclinations to the problems. The orientation

---

2. For a discussion of different types of dropouts, see S. M. Miller "Dropouts-A Political Problem" in Daniel Schreiber, ed., and S. M. Miller and Ira Harrison, "Types of Dropouts: 'The Unemployables' ", Syracuse University Youth Development Center, 1963

should not be towards specific techniques which are thought to have all-powerful consequences, but upon the uniqueness of teachers and their differentiated abilities. It is important for teachers and training programs to accept the diversity of teachers and to try to develop the kinds of strategy that would be most effective for a teacher, given her personality, interests and aptitudes (although these can be developed and channeled).

In this connection, inadequate attention has been devoted to effective teachers. In every school, no matter what its general character, some teachers are successful with children. We need better understanding of what these effective teachers do. An important research project could be developed around close study of and interviews with such teachers so that it would be possible to develop inductively a scheme of effective teaching processes. We are not referring to the use of clipbooks or other tactics that may be employed by an effective teacher, but to the underlying and frequently implicit strategy that is involved. Frequently, the tactics of effective teachers are picked up and distributed to a wider group of teachers but the teaching strategies which give rise to or utilize these techniques are ignored. The job of research is to sift through tactics, seeing which have transfer value of themselves, and to uncover the basic strategies which could be adapted in many ways by other teachers.

Structural Change

School systems generally have not developed the qualities of flexibility and adaptiveness necessary for the problems of today. The great expansion of education in this century and the unevenness of its quality has led quite naturally to regulations and procedures aimed at maintaining standards and insuring common

practices over a large educational enterprise. At this stage--at least of large city schools--flexibility and experimentation become important.

One strategy is to have the schools operate as do some modern mental hospitals which, once a person has been a patient in them, feel a recurring responsibility to him. He can live in the hospital at night and work in the community; he can utilize the facilities of the hospital during the day and live in the community at night. He can sign himself into and out of the hospital at will--his stays can be short or long. The social service department will provide aid in the community to former patients and their families. The hospital attitude is to help provide what is needed to aid the individual at different points in his life. The general aim is to facilitate the individual's functioning in the larger community by using the hospital in a variety of ways.

The dropout is not a mental patient. But his needs, his recognition of them, his ability and preparedness to do something about them, differ at various points (as do the needs of mental patients and all of us). Schools should be willing, for example, to re-admit at anytime a youth who has left school rather than insisting that September and February are the entry points. Extending counseling and guidance to drop-outs until perhaps these activities might be the continuing responsibility of schools might be important; with the diversification of services and agencies one problem can become "multi-problems" as many agencies become involved. Courses in the early years of high school might be those which particularly interest non-verbally oriented students, and some of the required courses (e.g., English and History) might be concentrated in the later years when motivation or understanding is higher.

These suggestions are illustrative of structural changes in schools which could have ramifying effects. These types of changes have to go hand in hand with the general improvement in teaching youth of low-economic families. The current emphasis seems to be much more on pedagogic innovation and up-grading than on structural innovation. The latter, we feel, has considerable importance.

Large city school systems have, in some ways, more possibility of structural flexibility than smaller systems. Because of the great school population, there is likely to be a sizable number of youth who have common needs at a particular time; consequently, the per capita cost of a program can be less than when only a few youth need "adaptive school arrangements" at a moment of time.

Organizational Style

We have been impressed in observations of schools with the imprint of the principal and/or the superintendent on what takes place. In some schools it seems possible in an half-hour to develop a fairly adequate idea of how the principal operates. For the organizational style affects a great deal of what takes place inside and outside the school building.

Consequently, a major emphasis should be upon encouraging new and deepened outlooks among school principals and superintendents. Our experience in a variety of settings is that training is usually beamed at the foot-soldier: the teacher in the classroom, the social worker in the clinic, the foremen and shop steward in the plant. But much of what these practitioners can do is conditioned by the organizational environment in which they operate. Many come back from training programs imbued with zeal for change and new pursuits only to find an uninterested or negative administration.

Our conlcusion is that training and change at the teacher level is most effective when it is coupled with change at the administrative level.

Frequently, the most important changes are in how the school administration relates to teachers and students.

Changes at the administrative level make possible and encourage possibilities at the teacher level (and in the office and janitorial roles which are frequently overlooked in their impact upon students). Obviously, teachers can do much to improve their teaching without administrative change and the absence of administrative change should not be used as an excuse for individual teachers to avoid rethinking their role. But the crucial importance of organizational form and style has been largely ignored. Retraining cannot be sprinkled through an organization with the expectation of big changes unless the organization as an entity changes.

We suspect that the success of many low-income school projects rests with organizational change rather than in the adoption of specific packages of programs. School administrations demonstrating a heightened interest and belief in the educability of low-income youth are most likely to be able to engender positive action among the students. The importance of the Hawthorne effects, deriving from concern and interest rather than from specific activities, may be underplayed in our understanding and interpretation of successful programs.[3] Programs can be easily copied; concern can not. It is this situation which underlines the importance of administrative orientation and stance.

Some proposed school innovations are techniques; almost all assume or are directed at organizational and classroom climate changes. Evaluation, therefore, should not be mechanically statistical, indicating the planned input and what

---

3. Cf. Frank Riessman, The Culturally Deprived Child, pp. 103-104

appears to be the educational output. A clinical view of the organizational process is important and neglected--How does successful introduction of new and effective practices in schools, especially those in slum areas, occur? What are the activities which are most easily changed? What are the important resistances to change? How have they been met? To what extent and in what ways can teachers' behavior be changed without overall organizational change?

Attitudes and Values

What is crucial about organizational style is the climate it creates; what is effective about the successful teacher is the attitude she conveys to the students. Tactics, strategy, structure are important; also important are the attitudes and values of the teachers, administrator and auxiliary staff for they affect the atmosphere in which things happen or do not happen.

An interesting example from mental hospitals: Ward attendants were told that patients were now receiving tranquilizers. The attendants later reported that patients were more tractable and much easier to handle. In fact, patients had been given placebos, tablets with no medicinal effects! That patients had not changed; the ward attendants had. They now thought that patients would not be difficult, acted on this basis and found or produced less difficulty. The implication of this incident for school personal is that the attitude of personnel is crucial in what takes place.

Changes in tactics, strategy and structure can founder if the attitudes of school personnel do not change. Confidence and hope that students can develop competences and be interested in school contribute to the achievement of such results. Changed values and attitudes may usually have to be buttressed with new tactics, strategy and structure. But it is important to recognize that values

and attitudes permeate the complex human interactions of schools.

In this connection it is important to avoid placing the responsibility for solutions on the client, the student. A professional takes responsibility upon himself. If his job is to teach and if students have problems limiting their effective response to the classroom, then the professional has to define the problem as how can a professional deal with these difficulties. It may be that the student can be better prepared but the essential thrust is always towards the professional and his responsibility for action to improve the situation.

The use of the term "culturally deprived" raises a number of questions that bear on this problem. The term impliss a standard set of items which (a) most Americans have, (b) are desirable in and of themselves and (c) provide the basic reasons for school failure. All three suppositions are doubtful but the most important aspect is that the use of the term puts the burden on the student rather than on the schools' responsibility to deal with children of diverse background or experience.

Schools and Society

The effective school programs in low-income areas seem to involve (1) a direct and a concerted attempt at building the competences of students, especially in reading; (2) changing organizational structure and climate so that students (and parents) develop a more favorable attitude towards school, (3) teachers can work more effectively (reduced class size), and (4) additional school programs can be undertaken (trips out of the neighborhood); (5) the utilization of specialized personnel (counselors, psychologists, teacher helpers) to permit the teacher to concentrate on the teaching relationship and to provide aid to handle special

problems ( psychological treatment of disturhed youth); (6) the building of favorable attitudes and behavior among the school personnel to the programs and towards their students; (7) the development through training of the competences of school personnel in dealing with the school problems of low-income youth.

But decreasing the number of dropouts is only one way of dealing with the growing problem of youth and employment--and it may be a very inadequate one if decent jobs are not available in sufficient numbers for high school graduates. In this century many community problems have been thrust upon the schools; it may be important for school personnel to point out constantly the responsibility of the polity generally for the functioning of the economy and for its impact upon youth. Schools cannot solve the problems of slow economic growth, anarchic labor markets and the like. They can serve to improve, to some extent, the quality of labor but the demand for labor would still be a prime problem. The efforts of American schools to improve the prospects of low-income youth can be only one mode af attack on the problems. In each community, schools may have to play the important role of pointing out the varied and extensive programs and actions that are needed.

# SCHOOL DROPOUTS AND AMERICAN SOCIETY*

# SCHOOL DROPOUTS AND AMERICAN SOCIETY

Dropouts--those who do not obtain high school certificates by completing the 12 years of education which start at age 6--are receiving great attention in the United States. Yet, the percentage of dropouts in the United States is declining. The reason for this quickened interest in a smaller percentage is produced by two factors. One is that the school age population is increasing rapidly so that in absolute numbers more are likely to drop out. More important is the growing disadvantage of not having a high school (and college) certificate. The development of new technology demanding new skills, the decline of industries requiring high labor inputs, the destruction of unskilled jobs, and the increased demand for high educational credentials regardless of actual need, have led to the concern about dropouts. Unemployment, now a chronic problem of a sizable plateau level, is greatest among the unskilled and the low-educated.

The issue of dropouts also gains great attention because it intersects the problems of the rising Negro population in the United States. One characteristic response to growing Negro demands for "progress--now" is that Negroes can only obtain it through education which will open new higher-paying jobs to them. (That higher income does not automatically open up housing is ignored in this contention.) The Negro rate of dropouts from schools is high for a variety of reasons and some of the campaign to do something about dropouts is primarily aimed at Negroes.

Controversy is strong among economists on whether unemployment is primarily due to the inadequate growth of the economy or to structural forces which are changing the demand for various occupational skills. In this latter line of reasoning, the stress is that the current supply of labor is inadequate for the demands of today and that the emphasis should be on training and retraining labor so that they can function to perform needed jobs. In the economic growth view, the emphasis is on the inadequate demand for labor; retraining by itself will not solve the problems. Obviously, the concern with dropouts is basically in line with the conservative emphasis on structural changes and training rather than with the more "liberal" concern with the character and growth of the economy.

In either case, the "dropout problem" is part of basic economic and political as well as social issues in the United States. It is frequently seen, however, as a technical or communications problem of convincing youth to stay in school. Discussions are consequently inadequate and frequently misleading.

First, to some basic data. Hundreds of studies have been written about dropouts. It has been one of the most disappointing experiences of my professional life to wade through them, for so few have any merit. We do not even have good basic figures on the number who are leaving school before graduation. The best informed guess is that the percentage of early school leavers is between one-third and two-fifths of all youth. The Southern states have a disproportionate percentage of dropouts, as they do of all signs of economic stress. While more boys than girls leave school before graduation, the percentage difference is probably of the order--55% boys, 45% girls.

While the overwhelming majority of dropouts are from working-class and farm families, it has been widely ignored that white-collar families make a contibution to the number of dropouts. In Syracuse, New York, a city of 225,000, my associates and I estimate that perhaps one-quarter of dropouts come from white-collar families, particularly those which are in marginal occupational positions. This group is usually ignored in speaking of dropouts and this article will maintain that practice.

Schools within a city vary markedly in dropout rates. A crucial factor, of course, is the socio-economic-ethnic character of the area. The dropout rate can vary from 70% in one low-income district to less than 10% in others. Some schools in low socio-economic areas have much lower rates than others, depending on the nature of the school climate promoted by the school authorities or the traditions of the ethnic group in the area. The fact that many Jewish low-income areas had high graduation rates has been used to criticize Negroes as unwilling to do those things that they can do to help themselves. Criticism of this kind, which is frequently strident and patronizing--implying that "you" should show "us" that you are worthy of help--ignores the historical basis of literacy among Jews and Jewish business experience in the "old country" shtekls. Further, more education is needed today to do well. I have been surprised in looking at data on lowest socio-economic neighborhoods to discover how high a percentage of the Negroes in these areas were high-school graduates.

It is widely asserted that the prospective dropout cannot learn and is alienated from school. Our studies in Syracuse and investigations elsewhere show that the overwhelming majority of those who drop out are capable of doing high school work ( as measured by the notoriously class-bound IQ tests ). In a study of "presently unemployable" dropouts, an elastic term used to refer to those who were not considered placeable by the state employment service, we found that almost all these boys did not have a negative attitude towards school. Indeed, many felt that teachers were fair although they frequently recounted how one teacher "bugged" them, continually questioning their behavior until an accident occurred which served the teacher as a self-reinforcing prophesy. In other studies, it is clear that students did not come in with a rejection of school even though, as one of our boys stated, "school and I just aren't friends."

My belief is that many youth are bewildered by school and unable to mesh with it. Nor have teachers and administrators been able to learn how to deal with youth who do not neatly fit themselves into the prescribed lock-step of school life. Let me illustrate what I have in mind by recounting an incident that has happened to me a number of times in talking to school personnel. It is a common article of faith among teachers and others that low-income families and their offspring, especially the Negro poor, have little concern with education. Frank Riessman in his important book, The Culturally Deprived Child, has tried to counter this view, but with only limited success. When I point out that Negroes have a very high educational and occupational aspirations, that, indeed, study after study show an extraordinary belief in education among Negroes, the reply invariably is that these aspirations are "unrealistic," that Negroes are jumping from "porters to neurosurgeons." When I declare that this criticism of lack of realism may be true, but that it is different from the complaint that there is no interest in education, I am greeted by puzzled silence. What I think is involved is that many low-income families are unable

to translate their interest in education into effective school behavior by their children. In turn, school personnel do not know how to capitalize on the interest in education among their students, because they have not been willing to reset their procedures so that they work with what exists. Frequently, what is the problem to be dealt with, namely that parents do not know how to help their children in school, is used as an explanation of why school personnel fail to do an adequate job.

One of the elements in the strife is a terrible stereotyping of low-income youngsters. What is believed to be characteristic of the most difficult low-income families and youngsters is generalized to all the poor. The difficulties of the so-called "hard-core," "multi-problem," welfare families are thought to be typical of all the poor. This view is false because of the diversity of the American poor. Of the 20% who are currently described as living below the poverty line, only one-fifth of them receive welfare aid and of this one-fifth only a small group has the characteristics imputed to the "hard-core."

Remedial Programs

Much attention is now being paid to dropouts after a long period of neglect when the "creativity" of the "gifted child" was the ascendant issue. James Conant, former president of Harvard University, former ambassador to Germany, and currently the most influential writer on education in the States, sharpened the issue when he referred to the problems of the dropout as "social dynamite." In his Slums and Suburbs, an eloquent plea for attention to dropouts as well as a defense of educational segregation of Negroes and their training for minor occupational niches in society, Conant reported that in some Negro neighborhoods of large cities, as many as 70% of out-of-school youth were unemployed. Delinquency, crime, economic dependency, familial instability, violence flowed from this situation.

Some programs had begun before this, primarily to improve the programs of schools in low-income areas, but since then more direct attention has been devoted to dropouts.

It is difficult to isolate special programs beamed at dropouts because many programs, frequently aided by Ford Foundation grants, aimed at the "educationally disadvantaged," at those attending schools in the "gray areas" of large cities, primarily benefit prospective dropouts.

(1) President Kennedy in August initiated a program to convince recent dropouts to return to school when it opened in September. In general, a heavy propaganda campaign is underweigh to exhort youth to stay in school. I am not impressed with its great success and sometimes fear that it boomerangs. Dropout youth may be convinced that it is not worthwhile to try very much to improve their circumstances since possibilities are said to be so slight. In any case, persuasion has to be accomplished by a change in school that facilitates learning.

(2) Reading deficiencies are a leading factor in school failure; school retardation in turn is common, though not universal, among dropouts. Consequently, many schools are paying special attention to improving reading achievement among students. Unfortunately, there seems to be more attention

paid to remedial reading than to learning how to teach reading effectively the first time around. I am constantly amazed at how little is really known about the process of reading. There are investigations, especially by Martin Deutsch's Institute of Developmental Studies, of how social class factors in family environment and cognitive style limit the reading ability of low-income youth. At the same time, others feel that this emphasis, which has been affected by Basil Bernstein's work, exaggerates the deficiencies of low-income youth and places the burden on them rather than making their cognitive style the problematic for the school.

(3) One way of dealing with different cognitive styles is to bring low-income youngsters to school at an earlier age in pre-kindergarten and kindergarten situations so that they can be prepared for school. Of course, this policy meets the problem of dropouts by making sure they have the standard 12 years of education by tacking the years that are lost by early school leaving on to the beginning period! The inadequacy of nurseries and other facilities for low-income families in the United States is shocking and the desirability of bringing children into the orbit of the schools at an earlier age is defendable on those grounds alone.

(4) Many schools in low-income areas are beginning to attempt closer relationships with the families of youth. The school-community relationship is seen as important. In the Banneker district of St. Louis, a Negro ghetto, associate superintendent Samuel Sheppard has families sign pledge cards that they will provide study opportunities for their youth. In some situations, unfortunately, much of the school-community relationship is only front and little serious and sincere concern for the family is manifested. In my more cynical moments, I have the feeling that many programs aimed at the low-income areas are primarily Potemkin villages, constructed to permit school personnel to grind out publicity releases on their mimeograph machines in order to advance their own careers. But this is unduly pessimistic since many of the professionals are dedicated people.

(5) Most programs involve additional expenditures to reduce classroom size and to add specialized personnel (counselors, psychologists, teacher helpers). Slum schools have traditionally been understaffed resulting in overcrowded classes. Smaller classes are undoubtedly necessary where learning difficulties are compounded by language barriers (as with Spanish-background children) and school adjustment problems. The independent contribution of reduced classroom size and specialized personnel have not been, however, adequately measured.

The most publicized kind of activity has been that of "Higher Horizons", initiated by genial Daniel Schreiber and now copied elsewhere. The aim is to provide new kinds of "cultural" experiences to low-income youth who have frequently had little contact outside of their ghettos.

Patterns of residential segregation along racial lines in the United States raise special difficulties. Efforts to upgrade long-neglected schools in low-income areas often maintain existing segregation patterns. Some school systems have been criticized for paying inadequate attention to de facto segregation and trying to stifle criticism by providing separate but equal schools in ghetto areas.

(6) More important in my opinion than specific programs is the effort to change the attitudes and behavior of teachers and personnel so that they are dedicated to working effectively with low-income youth. The climate of a school affects much of what takes place in it; in a visit to a school one soon senses how the staff feel towards the students for this orientation permeates the school. Teachers are increasingly involved in training programs to improve their competences in educating the "educationally disadvantaged." Unfortunately, much of the social science and education literature is inadequate and frequently misleading in regard to working-class populations.

(7) Just beginning are efforts to revamp vocational education, which is a broad term covering school efforts to increase direct occupation competences of students. Vocational education has been stultified for more than a generation and the funds in this field are still primarily spent for preparation for agricultural occupations and home economics. The Federal government and the Ford Foundation are trying to break through the bureaucratic encrustations in the field but it is difficult to be hopeful. In many communities, technical education has been emphasized but the selection policy has been strict so that less adequate students are barred from these programs. Where no alternative of less technical program exists, as is frequently the case, the slow learner has no opportunity to pick up marketable skills.

(8) Schools are just beginning to pay attention to the possibility that many dropouts may return to school. Our studies in Syracuse indicate that from 10% to 25% of dropouts go on for further training. Unfortunately, no special efforts are made to facilitate further training. A great necessity is for a new view of the educational process--that many may leave school for a year or more and then return, that experience and performance may qualify individuals for high school diplomas and for college scholarships, etc. This kind of flexibility does not now exist in American schools, although some glimmer of the importance of flexibility and alternative routes and schedules of educational progress is beginning to emerge. For example, the Ford Foundation, which has been at the center of educational experimentation, particularly for low-income groups, has recently given funds to support a program at the University of Toledo to permit older dropouts of ability to enter college directly without first obtaining high-school certificates.

(9) A variety of programs are now aimed at the out-of-school youth. Many communities, especially those which have received grants from the President's Committee on Juvenile Delinquency for comprehensive planning of youth services, have developed training programs for unemployed dropouts. The programs have some diversity and it is too early to be sure of their impact. My impression is, however, that many if not most of them are beamed at the most disadvantaged youth and do not develop technical competence. Rather, the aim is to encourage "good work habits." I have strong doubts that in the present labor market situation of the United States, "good work habits" will open up many jobs for youth, especially for Negroes. If these programs fail, continuous sheltered workshop programs providing employment for youth may be the next emphasis.

The problem of dropouts cannot be extricated from the basic changes taking place in American society. Education is increasingly the route to mobility; credentialism consequently grows. High unemployment, low economic growth and concern for racial desegregation force special attention to the education of low-income groups.

Much is already known that would help prevent dropouts or improve their situation. The push to do something in the highly decentralized American education structure is not always there. To some extent the problems are caste problems more than pedagogical ones. Education, in my opinion, will increasingly be a political issue in America as the disinherited strive to open the educational escape hatch from the marginal economy of poverty into the main economy of "the affluent society."

## INTRODUCTION

This publication describes organized programs and projects designed to provide some of the special help needed by young people so that they may continue their schooling. Issued as a service by the Bureau of Curriculum Research, Division of Curriculum Development, its purpose is to help carry on effective communication among New York City agencies.

This material was collected and prepared for publication by Abraham M. Finkelstein, Curriculum Coordinator, Bureau of Curriculum Research. Eugene Calderon, Leonard Ingraham, Charles Savitzky and David A. Abramson, Assistant Director of the Bureau, assisted in planning and development. Clarence Senior, Member of the Board of Education; Joseph O. Loretan, Deputy Superintendent for Curriculum, Research and Evaluation; Jacob H. Shack, Acting Associate Superintendent, Division of Curriculum Development; and William H. Bristow, Assistant Superintendent, Bureau of Curriculum Research, gave support and encouragement to the project.

Maurice Basseches, Editor of Curriculum Publications, collaborated in production of this publication. Simon Shulman designed the cover.

## CAREER GUIDANCE

*Division:* Junior High School
Max G. Rubinstein, Assistant Superintendent

*Date Initiated:* 1958

*Grade-Age Level:* 15 +

*Number of Students:* 1350

*Purposes:*

Instill in the pupils a hope for the future by making them conscious of their intrinsic worth and dignity by:

a. Creating positive attitudes towards self and society
b. Corrective work in the 3 r's
c. A specialty designed curriculum
d. Occupational information and part-time job placement

*Program Operation:*

*Organization.* At present there are 30 schools in the program with organized units of 3 classes. The class registers are limited to 15 children. There are more boys than girls in the program.

*Curriculum.* The pupil in a Career Guidance class needs a functional and realistic course of study based on his needs and interests, and not a "watered-down" version of the curriculum at which he has already failed so many times before. A team of subject area specialists has prepared experimental courses of study for these classes in industrial arts, group guidance and job placement, social studies, mathematics, language arts, science and speech, based on personal observations in the classroom, consultations with principals, assistant principals, Career Guidance Teachers, Career Guidance Advisors and pupils.

*Guidance.* The program is guidance oriented. Each child meets, at least once a week, with a guidance advisor assigned full-time to each school. A full-time Job Placement Supervisor at the Division finds part-time jobs for pupils to enable them to earn some money while they go to school and full-time employment for those who drop out of the program and go to work. This supervisor also helps train the guidance advisors in each junior high school in the techniques of job canvassing and follow-up activities.

*Evaluation:* The Deputy Superintendent for Curriculum, Research and Evaluation has received a planning grant from the Public Health Service of the National Institute of Health. Conferences, staff

work, school visitation and a design for evaluation of a proposed new curriculum are among the activities which will be carried on under this grant.

*Future Plans:*

a. Extension of the programs to more junior high schools
b. Increased financial aid for expansion and additional personnel (shop equipment, in-service training, social workers, follow-up service for pupils)
c. More active parent participation and community support
d. Closer cooperation with the business world (labor unions, businessmen's organizations)
e. Greater participation in extra-curricular activities
f. Nature and scope of the curriculum

## COOPERATIVE EDUCATION IN MUNICIPAL GOVERNMENT

*Division:* High School
Grace Brennan, Director, Cooperative Education

*Date Initiated:* July 1961 (29 City Departments)

*Grade-Age Level:* 16 years of age; juniors and seniors

*Number of Schools:* 37

*Number of Students:* 660 employed (June, 1963)

*Purposes:*

1. Provision for socio-economic needs
2. Retention of dropouts
3. Emphasis on placement of minority groups
4. Basic considerations, viz., that a student must be able to "produce" on the job
5. Opportunity for work experience concurrent with school work

*Program Operation:* Student trainees work in municipal government offices as typists, clerks, stenographers, office appliance operators, nurse aides, diet aides, public health aides, junior draftsmen, key punch operators, laboratory helpers, lunchroom helpers, and assistant gardeners. Schedules vary from alternate week to alternate two-week periods, according to the area of work experience. Students work 26 weeks of the full year and attend school for the balance of the year. Prevailing wages are paid, regular employee benefits are allowed pro-rata for vacations, sick leave, holi-

days, etc. Students are supervised on the job with continuing evaluation by Board of Education headquarters staff and assigned teachers acting as school coordinators. Correlation with school studies; semi-annual ratings by employers which became part of the school records. Monthly meetings with school coordinators. Periodic meetings with supervisors of civil service departments together with school personnel.

*Evaluation.* Questionnaire survey of students employed now in progress. Follow up graduates formerly employed.

*Future Plans:* Plan calls for 1000 by 1964-65.

## EARLY IDENTIFICATION AND PREVENTION PROGRAM (EIP)

*Divisions:* Elementary; Child Welfare
Rose L. Schwab, Assistant Superintendent
James N. Rinaldi, Assistant Director, BCG
Julia McBride, Borough Coordinator, EVG

*Date Initiated:* 1959

*Grade-Age Level:* K-3rd grade with some follow-up service in the higher grades

*Number of Schools:* 37

*Number of Students:* 10,469 pupils screened; 5,970 pupils served

*Purposes:*

1. Identify children's abilities, talents and problems early
2. Determine the incidence and nature of children's problems
3. Determine to what extent maladjustment is prevented through the creation of a sound mental hygiene educational climate
4. Identify individual school and community patterns which indicate probable success or failure
5. Refine techniques of identification of abilities, talents and maladjustments
6. Provide consultative assistance and interpretation of children's behavior to the school staff
7. Develop evaluative instruments for determining the effectiveness of the integrated approach
8. EIP is an outgrowth of the convictions and experience of schools officials that children must and can be identified and helped in their early grades, so that we can begin to cut down the serious incidences of later maladjustment

*Program Operation:* A specialized program of service by a guidance team; counselor, part-time social worker, part-time psychologist and psychiatric consultant. Each team within an individual school develops a pattern of implementation suitable to the needs of that school. The team attempts to identify and meet the special needs of children which require help beyond that which the teacher can provide.

At the end of the school year, teachers of the 1st grades submit uniform referral forms on those pupils whom they feel require specialized attention. These referral forms are screened along with the total 2nd grade class in the fall. The team's accessibility to the school personnel and its close and collaborative working reationships permit an early and integrated approach to meeting the specialized needs of pupils.

*Evaluation:* The Bureau of Educational Research is currently involved in an evaluation of the program.

*Future Plans:* The Bureaus of Child Guidance and of Educational and Vocational Guidance have requested additional budget positions to permit periodic expansion of the program.

## EVENING GUIDANCE CENTERS

*Division:* Child Welfare
Daisy K. Shaw, Director of Guidance

*Date Initiated:* 1951

*Grade-Age Level:* Over 17—not currently enrolled in school

*Number of Schools:* 2 (Washington Irving and William Cullen Bryant)

*Number of Students:* 800-900 per year

*Purposes:*

1. Offer educational, vocational, and personal guidance with particular emphasis on completion of high school courses, college entrance, equivalency examinations and the availability of vocational training
2. Provide individual and group testing
3. Supply career guidance and assistance in securing employment
4. Help foreign-born students in orientation to American schools and to the American labor market
5. Refer clients to community agencies where appropriate

*Program Operation:* The vast majority of those seeking help from this agency are self-directed and highly motivated. Consequently the guidance service shows a high degree of success, according to periodic surveys conducted by the staff.

The personnel of each center, headed by a coordinator, includes specialists in educational guidance, vocational information, psychological testing, psychiatric social work, community resources, and education of the handicapped. A placement counselor from the staff of the New York State Employment service is available at the Manhattan center one evening each week.

Clients are referred by school counselors, agency and community workers, evening high school personnel, and by friends and acquaintances.

*Evaluation:* Surveys by questionnaire are conducted periodically.

*Future Plans:* Expansion of these centers to other boroughs has been requested in an effort to reach the large group of high school dropouts.

## EVENING HIGH SCHOOLS

*Division:* High School
Sidney Jaffe, Frank Goldenberg

*Date Initiated:* 1915

*Grade-Age Level:* 9th to 12th year; 17 years of age and over.*

*Number of Schools:* 16

*Number of Students:* 37,000

*Purposes:* Offer courses and guidance to students and adults to complete their high school education and to motivate them to continue their education in institutions of higher learning, four-or-two-year college, vocational training schools and schools where learning is pursued for purely avocational interests.

*Program Operation:* The same high school courses leading to academic, commercial or general diplomas which are offered in day schools

---

* For further details, see "A Guide to Further Educational Opportunities in the City of New York for Students of Evening High Schools," September, 1961.

are given in all evening schools. There are two parallel sessions; one meets on Monday and Wednesday and a limited number of Friday nights; the other meets on Tuesday and Thursday and a limited number of Friday nights. Each school has a staff of guidance counselors to assist adults in planning their program. In addition to the major subject areas other subjects such as art, technical drawing, fashion design, millinery, metal shop, radio repair and theory, and dressmaking are taught. Provisions are also made for accelerated courses for veterans and qualified non-veterans, e.g., math, English, commercial law.

*Future Plans:* Additional positions have been requested.

## EVENING TRADE SCHOOLS

*Division:* High School (Vocational)
William Kraengel

*Date Initiated:* 1902

*Grade-Age Level:* 18 and over

*Number of Schools:* 21

*Number of Students:* 34,000

*Purposes:*

1. *Occupational Extension Training.* Instruction and training to supplement and upgrade the job experience of journeymen in a craft or occupation.
2. *Apprentice Training.* Related and supplementary to the job experience, determined in cooperation with joint apprenticeship committee.

*Program Operation:*

1. More than 200 courses
2. Each course open to persons employed in a trade to which the training is directly related
3. Open to those who exhibit ability to benefit from instruction

*Future Plans:* Manpower Development and Training Program—to provide unemployed or underemployed workers with skills for employment in identified jobs. Conducted in cooperation with the Division of Employment, New York State Department of Labor.

## HIGHER HORIZONS

*Divisions:* Elementary, Junior High, Senior High
Jacob Landers, Coordinator

*Date Initiated:* 1956

*Grade-Age Level:* Grades 3-10

*Number of Schools:* 52 elementary; 13 junior high; 11 senior high

*Number of Students:* 33,500 elementary; 19,500 junior high; 11,000 senior high

*Purposes:*

1. Make it possible for each child to derive maximum benefit from a sound program to educate him to his optimum potential
2. Extend services to all: bright, average, slow
3. Better identify each child's abilities, interests and needs
4. Stimulate each child to attain achievement levels commensurate with his ability
5. Assist each child in making and carrying out appropriate educational career plans
6. Enlist the assistance of parents and the community to help reach these objectives

*Program Operation:*

1. Remedial services with emphasis on improvement in reading
2. Teacher training
3. Cultural enrichment
4. Counseling services
5. Enrichment of instructional program
6. Parent and community involvement
7. Program to raise self-image of pupil

It should be mentioned here that this program is not an operational program in that there are no courses of study with fixed methodology. It is rather a service program.

*Evaluation:* Being evaluated with aid of Federal funds. Both normative and experimental control studies, in such areas as reading, arithmetic, intelligence, aspiration, discipline, attendance, work habits, personality and attitude.

*Future Plans:* Additional funds for needed expansion.

## JOINT HIGH SCHOOL PROGRAM WITH NEW YORK STATE EMPLOYMENT SERVICE

*Divisions:* High School; Child Welfare
Daisy K. Shaw, Director of Guidance
Alex Altheim, N. Y. State Employment Service

*Date Initiated:* 1950

*Grade-Age Level:* High school

*Number of Schools:* 50

*Number of Students:* 55,220

*Purposes:*

1. To help bridge the gap between schools and the world of work by assisting youngsters in making a vocational choice and by providing early job referrals by getting job pledges from employers before graduation
2. Provide employment counseling and job placement to high school seniors and potential dropouts, as well as part-time placement for school students
3. Supply information on current occupational trends and labor market opportunities

*Program Operation:*

1. Forty-three counselors serve in 50 high schools to screen, register, counsel, and refer youths to jobs.
2. Thirty-five counselors serve full-time.
3. From September 1962 to June 1963, 7200 placements were made.

*Evaluation:* New York State Employment Service supervisors evaluate the quality of service rendered in two ways: 1) regular evaluation of counseling and placement records; 2) telephone follow-ups with employers on a selective sample basis.

*Future Plans:* Future expansion is subject to New York State Employment Service budgetary provisions.

## JUNIOR GUIDANCE CLASSES

*Divisions:* Elementary, Child Welfare
Gloria Lee
Louis Hay

*Date Initiated:* 1957

*Grade-Age Level:* Seeks to develop tracks in grades 2-6

*Number of Schools:* 58 (133 classes)

*Number of Students:* 1522

*Purposes:*

1. Develop effective procedures which will identify emotionally and socially disturbed children in the earliest grades.
2. Provide a resource for disruptive children who are damaging the normal functioning of regular classes.
3. Prevent the development of serious maladjustment by helping disturbed children before their problems become deep-rooted.
4. Build a coordinated program that will include teacher selection, teacher training and a carefully planned curriculum and other built-in protections for a rehabilitative program.

*Program Operation:* This is a pioneer approach for emotionally and socially malfunctioning boys and girls. Its basic orientations include: weekly team meetings, the development of individual case histories by teachers and auxiliary professionals, and an analytical consideration of the class group process.

The therapeutic quality of the program depends upon the development of each of the following segments:

(1) JG classes with adequately trained personnel of teachers and auxiliaries that include counselors and mental health specialists.

(2) Group work with the parents of these pupils. Disturbed children are frequently symptomatic of disturbed homes.

(3) A qualitative physical examination and follow-up of each child. The mental health rewards from meeting the physical needs of emotionally disturbed children can be disproportionately great.

(4) A complementary recreational program. The impoverished experiences of these children necessitate enrichment during leisure activities or too many destructive elements intrude after school.

Class registration—Closed register, 12-15 pupils: Open register, 7-10 pupils. There are three teachers for each 2 classes.

*Evaluation:*

MacIver Report, 1961
New York State Cooperative Study, 1962
National Institute of Mental Health, Bureau of Child Guidance (2 year evaluation) a. Screening procedures; b. Rehabilitative potential

*Future Plans:* Controlled expansion to insure essential qualitative dimensions: 1963-64 – 15 units; 1964-1965 – 30 units; ultimate population – 2500.

## MOBILIZATION FOR YOUTH, INC.

*Divisions:* Elementary, Junior High School and Senior High School
James E. McCarthy, Administrator

*Date Initiated:* (Action phase, July 1962)

*Grade-Age Level:* Pre school-high school

*Number of Schools:* 16 elementary
2 "600" schools
5 junior high schools
2 high schools

*Number of Students:* All who reside in Mobilization for Youth area

*Purposes:* The prevention and control of juvenile delinquency through training and expanding opportunities

*Programs of Action:*

THE WORLD OF EDUCATION

*Teacher Training*

1. School-Community Relations Course
2. Laboratory Schools
3. Training for Improved Language Arts Instruction

*Curriculum Improvement*

4. Curriculum Planning Committee
5. Curriculum Materials Center
6. Reading Centers
7. Reading Clinics

*Parent School Relations*

8. Parent-Education Coordinators

*Other Elementary and Preschool Programs*

9. Early-Childhood Enrichment Projects
10. Ungraded Primary
11. Homework-Helper Program

*Other Guidance and Personnel Services*

12. Elementary Guidance
13. Attendance Teachers
14. Small-Group Programs
15. Exploratory Work Course

THE WORLD OF WORK

1. Urban Youth Service Corps
2. Teen-Age Industries
3. Youth Jobs Center
4. Other Programs to Overcome Occupational Barriers
5. Training Vocational Personnel

THE COMMUNITY

1. Organizing the Unaffiliated
2. Operation Assimilation
3. LENA
4. Neighborhood Councils
5. Program-Development Unit
6. Experimental Housing Program
7. New Frontiers in Service

*Specialized Services to Individuals and Families*

1. Neighborhood Service Centers
2. Visiting Homemaker Service
3. Social Reintegration of Released Juvenile Offenders
4. Experimental Narcotics Programs
5. Other Services to Individuals and Families — Casework and Psychiatric Services

*Specialized Services to Groups*

1. Coffee Shops
2. Detached-Worker Project
3. Adventure Corps
4. Pre-Adolescent Project
5. Other Services to Groups — Youth Organization

**OPERATION RETURN**

*Division:* High School
Mary E. Meade, Assistant Superintendent

*Date Initiated:* September 1962

*Grade-Age Level:* High school dropouts whose school records indicate their ability to complete graduation requirements before they reach the age of 21.

*Number of Schools:* 2 (Haaren and Washington Irving)

*Number of Students:* 135

*Purposes:* Meet the needs of young people who, after being out of school for some time, desire to return to full school attendance with a view toward achieving:

1. graduation
2. job preparation
3. possibly, further education for which high school graduation is a requirement

*Program Operation:* Regular full time school program for all students leading to graduation. At Haaren High School young men may study industrial arts, drafting, art and commercial subjects in addition to a program of academic subjects. At Washington Irving High School, classes are available for young women in commercial and distributive subjects, commercial art, dressmaking and design and academic subjects.

## SPECIAL EVENING SCHOOL PROGRAM (CONTINUATION)

*Division:* High School
Herman Slotkin

*Date Initiated:* September 1960

*Grade-Age Level:* 9th to 12th grade; 16-year-old dropouts

*Number of Schools:* 8 evening high schools

*Number of Students:* 400

*Purposes:*

1. Encourage qualified dropouts to continue their education
2. Provide opportunities for vocational training to enhance the employability of dropouts
3. Provide guidance services to help dropouts achieve a diploma and/or salable skills
4. Return dropouts to the day high school when appropriate

*Program Operation:* This program is a substitute for the day continuation school. Recommended pupils are registered in at least 2 appropriate evening high school courses. A special counselor checks on attendance and counsels each youngster at least once a month. Job placement service is provided.

*Evaluation:* Evaluation by the Bureau of Educational Research revealed that the experimental group was significantly better than the control group in school adjustment, in the attainment of clear, realistic vocational goals, in unemployment rate and in work performance and attitude. In addition the experimentals improved in school achievement significantly.

*Future Plans:* In accordance with a resolution of the Board of Education (April 24, 1963) this program is to be made a permanent part of the city's educational programs. The project is to replace the continuation schools by September, 1966.

## PROGRAM IN JOB EDUCATION

*Division:* High School
Herman Slotkin

*Date Initiated:* September 1960

*Grade-Age Level:* 9th–12th grade

*Number of Schools:* 2

*Number of Students:* 280 enrolled in the course during each year (at any one time there are 40 boys and girls in 2 clasess, one in each school)

*Purposes:*

1. Prepare students for employment
2. Help students achieve clear, realistic vocational goals
3. Assist in student's job adjustment
4. Screen students for further guidance and referral

*Program Operation:* Students attend the pre-employment course full time for 20 consecutive school days. They are then placed in employment and followed up on the job at least once a month until they reach the age of 17. Those who lose their jobs are returned to school for job placement or further instruction.

*Evaluation:* Evaluation by the Bureau of Educational Research showed that the experimental boys and girls were significantly superior to their control counterparts in school adjustment, in the attainment of clear, realistic vocational goals, and in rate of return to full-time school. Although they came to the project as near unemployables, they were more successful at work. Their unemployment rate was half that of the controls, and they were rated superior in work performance and attitude by their employers.

*Future Plans:* In accordance with a resolution of the Board of Education (April 24, 1963) this program is to be made a permanent part of the city's educational programs. The project is to replace the continuation schools by September, 1966.

## SCHOOL-TO-EMPLOYMENT PROGRAM (STEP)

*Division:* High School
Charles Savitzky

*Date Initiated:* September 1961, merged with work experience program which was initiated in September 1955.

*Grade-Age Level:* 15 years of age and over

*Number of Schools:* 17 (15 academic, 1 JHS, 1 "600")

*Number of Students:* 320

*Purposes:*

1. Motivate potential early school leavers to remain in school and be graduated.
2. Prepare them for full-time employment.
3. Introduce students to a fuller meaning of the world of work and its responsibilities, under guidance and supervision.

*Program Operation:* The basic pattern is for pupils to meet mornings with a teacher coordinator for home room and two instructional periods with emphasis on job guidance and related subjects covered in *Curriculum Resource Materials for Meeting School Retention and Pre-Employment Needs* (Curriculum Bulletin No. 8, 1960-61 Series, New York City Board of Education), and in supplementary material. Students report for work after lunch. It combines daily work experience (in private industry or in school work assignments, at a prevailing wage) with school subjects. Work experience is considered part of the school day, fully supervised, and rated for school credit. Students carry 5 subjects; 2 with the coordinator, 2 in the regular school program and 1 for job experience.

The stipend (school work-assignment) provision is especially helpful for students who need a more sheltered work situation for a temporary period prior to job referral, as well as for those who find difficulty in private industry.

*Evaluation:* Being conducted by the N.Y. State Department of Education.

*Future Plans:* The expansion of this work experience program, now called STEP, is supported jointly by the New York City Board of Education and the State Education Department.

## "400" SCHOOLS

*Division:* Child Welfare
Richard Lubell, Acting Associate Superintendent

*Date Initiated:* 1916

*Grade-Age Level:* Elementary school grades (bedside teaching may include junior and senior high school grades)

*Number of Schools:* 9 schools with 58 locations distributed as follows:

| | |
|---|---|
| Convalescent homes | 4 |
| Hospitals | 40 |
| Institutions and shelters | 14 |

*Number of Students:*

| | |
|---|---|
| Hospitals and convalescent homes | 1004 |
| Institutions and shelters | 1128 |
| | 2132 as of 5/63 |

*Purposes:*

1. Provide educational programs for dependent and neglected children in shelters and for physically handicapped children in hospitals, institutions and convalescent homes
2. Maintain continuity of education for the child, taking into account his emotional, physical and social adjustments

*Program Operation:*

1. The curriculum is basically that of the regular schools, with a high degree of curriculum adaptation and adjustment. The greatest flexibility is in the hospitals, where medical and other special needs must be considered
2. Classroom and bedside teaching in the hospitals
3. Cooperative with public service and volunteer organizations in planning and providing special services such as nursing and psychiatric help
4. Flexible grouping and regrouping so that children can get the opportunity to work with the group best suited to their needs, interests and achievement levels

*Future Plans:* "The 400 Schools Curriculum Bulletin" is now in production.

## "600" SCHOOLS

*Division:* Child Welfare
Sidney I. Lipsyte, Director, Education of Socially Maladjusted Children

*Date Initiated:* 1947

*Grade-Age Level:* 1st to 12th grades (6 years of age to 21)

*Number of Schools:* 27 schools (14 annexes in institutional settings, youth houses, foster homes, day and residential treatment centers, and psychiatric hospitals)

*Number of Students:* 5,500

*Purposes:*

1. Rehabilitate socially maladjusted and emotionally disturbed children
2. Effect changes in attitude and to upgrade achievement of these children through special programs, taking into consideration the fact that they are unable to profit from instruction in the regular setting
3. Provide a therapeutic milieu where disturbed children may function in terms of their own growth and development

*Program Operation:*

1. Flexible programs modified to meet specific needs of children
2. Terminal education programs where necessary at upper grade levels, emphasizing job orientation and basic skills
3. Experimental units of work
4. Remedial work to upgrade reading and mathematics skills
5. Individual and group counseling
6. Use of clinical staffs and guidance counselors
7. Directed toward returning the children to the mainstream of education wherever possible

*Future Plans:* Request made for 3 additional day schools. In cooperation with the Division of Vocational Rehabilitation (N. Y. State), the following are under consideration: additional classes in institutional settings and in day and residential treatment centers; expansion of the programs in art, music, industrial arts, curriculum development, development of more suitable reading techniques, STEP program, demonstration project, and CRMD – Emotionally Disturbed Classes. Continued experimentation and demonstration guidance projects (in cooperation with Division of Vocational Rehabilitation).

## THE GENERAL COURSE

An overall view of programs which deal with potential and actual dropouts would be incomplete without a look at those pupils who take the "general course" in high schools, and who receive a "general" diploma when they are graduated. The program was designed to offer a high school diploma when higher education was not among the student's future plans.

As many as 30% of New York City high school graduates receive this diploma. Most recipients of this diploma are those who have experienced difficulty in achieving success with the courses usually offered on the academic, college-bound level. The program is an extremely flexible approach to the immediate needs of these students.

The term "general" gives the implication that the student has been offered a standard general education during his stay in high school. This however, is not necessarily the case. As the student encounters failure in one subject after another, he is offered substitutes in the hope that in time, he will find a place where he can achieve success.

Individual schools have instituted many changes and innovations in their efforts to meet the special needs of these students. Most of these individual needs have tended to go in the direction of special training or special courses to enable the student to more rapidly become absorbed into the world of industry. The approach has, in actuality, been vocational in nature but has not duplicated the formal, long-term skilled trades approach of the vocational and technical high schools.

It is interesting to note that any number of students who had been following a general course track become "late bloomers" shortly before graduation. Many of them are able to meet entrance requirements for some colleges and continue to be successful in their work. Some have even been able to move back into the academic path in time to receive the academic diploma. Others, of course, have found even the general course too difficult. These are the students who leave school as soon as thay can, despite the many offerings indicated by guidance counselors and teachers.

Some courses and course adaptations which have been offered are Recordkeeping, Clerical Practice, Marketing, Woodworking, Metalworking, Machine Shop, Boat Building, Drafting, Earth Science and Practical Nursing. Many of these courses add the term "general" to differentiate them from similar courses aimed at a higher level. In process now are curriculum adaptations in Americans History and World History for non Regents students. Special courses for pre-Civil Service students have been successful in a number of schools.

Other curriculum adaptations are constantly being developed to aid the high schools in offering practical, more immediately useful courses to general students. Examples of materials which aim in this direction are: *Reading in Secondary Schools, Resource Units for Classes with Puerto Rican Pupils, Modified Development of the K-12 Science Sequence,* and *Practical Nursing for High Schools.*

# Some suggestions for Teaching the Culturally Deprived

Frank Riessman, Chairman on leave,
Department of Psychology, Bard College
Annandale-on-Hudson, New York

Teaching culturally deprived children is not all struggle; it offers an opportunity for personal gratification which few other teaching assignments can match. However, the teacher who hopes to succeed with the culturally deprived must learn to cope with certain problems of discipline and motivation which are not as acute in schools where the great majority of pupils come from middle-class homes.

Handling these and related problems requires no gimmicks or tricks. Nor is there any one right approach, although there are many wrong ones. Perhaps more important than any methods for teaching culturally deprived children are certain basic attitudes on the part of the teacher.

The teacher should be straight-forward and down-to-earth. Some teachers have considerable success with the culturally deprived because they act in a simple, dignified fashion and express a degree of physical warmth without overdoing it. They respect the children, and the children respect them. Superciliousness, toughness, and cynicism are bad, and so are naïveté, softness, and lack of confidence.

Every teacher of culturally deprived children must weather an initiation period which begins on the opening day of school. Sometimes, fear of this initiation sets in before the teacher enters the class. Pupils make a cooperative effort to break the teacher; they try to find out how smart he is, how much he will put up with, and how much they can get away with.

This is the time when the teacher should establish an unvarying routine with simple, clear, enforced rules. The rules need not be imposed on the pupils as if they were in a prison or be so strict that they arouse pupil resentment. The teacher might begin the first class with a discussion of what rules they must all live by if he is to teach and they are to learn.

Establishing rules is not as difficult as it may appear to the teacher on the first day of class. Culturally deprived children welcome limits, but these limits must be clearly defined and consistently adhered to. If the teacher says there will be no gum chewing in class one day, then he cannot allow gum chewing the following day. The teacher, moreover, must abide by the rules himself and he should not introduce changes without advance warning.

Behavior problems which spring up in the class should be handled immediately with firmness and fairness. The misbehavior should not be treated as a personal affront to the teacher but rather as an interference with the learning situation of the entire class.

If necessary, parents should be called. Research has shown that most parents of culturally deprived children want their children to do well in school and are eager to help the teacher. They depend upon the teacher, however, to establish relationships between the school and the home. The teacher should not confine himself to getting in touch with parents only when a child has misbehaved. If he

calls parents whenever the child has done something particularly well, they won't ask themselves, "What has Jimmy been up to now?" every time they get a call from the school.

During the initial testing period, one or two children in the class are likely to accept the teacher much more quickly than the rest. The danger of enlisting their support uncritically lies in the fact that these one or two children are usually not typical representatives of the class and may be rejected by the rest. If the teacher can spot and get the support of the real leaders--the ones who represent the children's own ideal norms--he is more likely to be accepted by the whole class.

The best type of teacher to win these children over to learning is a person of action who communicates in many ways and is not too dependent on words alone as a means of teaching. The leaders in the class and the rest of the children are likely to accept this type of person readily because he is close to the model after which they would like to pattern themselves.

Culturally deprived children are not accustomed to listening to long speeches, and they find it difficult to concentrate very long in a strictly verbal situation. Thus, developing the auditory attention of these children is one of the teacher's most difficult tasks.

This task requires the utmost planning. The teacher must know what question he is going to ask each level of pupil in the class, and he must find a way to involve each child. He cannot leave anything to chance, and yet he cannot plan more than two or three lessons in advance.

One teacher who has had long experience with culturally deprived children uses a simple technique for making sure his pupils are paying attention and understand what is being discussed. He asks a question like "What is twenty-four divided by six?" and has several children respond whether the first one gives the right answer or not. He makes a game out of it by keeping track of and announcing how many give the right answer. Although this techniques is too time-consuming to be continued indefinitely, it is a good starting technique for teaching children who find it difficult to listen.

Culturally deprived children also have trouble expressing themselves, and typically do not verbalize well in response to words alone. They are at their best when they talk about things they have actually seen and done. For this reason, extensive use of visual aids and of role playing is effective in improving their verbal expression.

Ask a juvenile delinquent who comes from a disadvantaged background what he doesn't like about school or the teacher and you will get an abbreviated, inarticulate reply. But have a group of these youngsters act out a school scene in which someone plays the teacher, and the result will be a stream of verbal consciousness that is almost impossible to shut off.

Role playing can be utilized in countless ways, such as acting out a history lesson (George Washington signing the Constitution) or teaching arithmetic and economics by playing "store" and "bank." Role playing itself is a marvelous stimulus for discussion, and it appeals to the child's love of action.

The teacher has to develop discussion out of role playing scenes, however, and not simply capitulate to children's enjoyment of the acting-out process. In other words, role playing should be a trigger for discussion and thinking, not a substitute for it.

In teaching a deprived primary-grade child about a cat, for example, it would be useful to have him draw a cat, "act out" a cat, write the word on the board, and handle pictures of a cat. Similarly, in discussing a musical record, the child should be encouraged to put the record on the phonograph and to take it off. Trivial as this last example may appear, it points up the need to involve the child's motor muscles in every conceivable fashion and to make him an acting participant in the learning situation.

In time, however, the teacher will not have to depend so heavily on these devices, for once the deprived child develops skill through his visual and auditory senses, he is able to deal with the world of conceptual ideas without the need for concrete stimuli at every point.

From what has been said so far, it might appear that the so-called progressive method which emphasizes "learning by doing" is the best approach to teaching the deprived child. However, experience shows this is not true. Permissiveness, accent on the self and creativity as central goals of education--all a part of the progressive approach--are alien to the deprived child's culture.

The most successful teachers in terms of the culturally deprived children seem to combine the traditional concepts of structure, order, discipline, and strong external demands for achievement with the newer methods of down-to-earth learning by doing.

Fear of failure is a big roadblock to learning for the culturally deprived child. Every inch of progress calls for genuine praise. Even making an effort must be fully appreciated for what it is--a sign of maturity, a step forward. It is difficult for these children to bring themselves to volunteer in class, and the teacher must keep that fact in mind.

But whereas they are slow in getting involved in problems, once their interest is involved, they often seem to be able to work intensely and patiently for long hours at a stretch. In fact, once they are interested in a task, they want to stay with it and dislike working in short spurts with frequent breaks.

Thus, the teacher of deprived children should aim high--expect more and work for more from these youngsters. There is an exciting challenge awaiting the teacher who realizes that these children need not simply be brought up to grade level, but rather, that they can be encouraged to develop new kinds of creativity.

If this is the teacher's goal, he can help to make the schools far more pluralistic and democratic.

Dr. Riessman is currently consultant with Mobilization for Youth, Inc., New York, and consultant with the Department of Psychiatry, Columbia University.

# DESEGREGATION OF SOUTHERN PAROCHIAL SCHOOLS

The integration of Negro students into Catholic schools in the South* has followed no announced or discernible plan. Elementary and high schools have in some cases, as early as 1952, acted at the parish level to admit Negro students to previously all-white schools. In some dioceses, explicit instructions to desegregate went out years in advance of the current order of Archbishop Rummel in New Orleans.

A summary of status, as we have been able to learn of it, in each southern diocese follows.

Diocese of Mobile-Birmingham (Alabama). There has been no parochial school integration in the state, although there is one example of desegregation in Catholic higher education: Spring Hill College in Mobile.

Diocese of Little Rock (Arkansas). In Little Rock proper Catholic High (for boys) admitted three Negroes this year for the first time. In Fort Smith, St. Scholastica, an all-girl high school, has been integrated since 1952. At present 18 Negro students are enrolled there. The pastor of St. Peter's Catholic Church in Pine Bluff has announced that when a new elementary school is ready in 1963 it will be non-racial.

Archdiocese of Atlanta (Georgia). There is no desegregation here nor in the Diocese of Savannah. (In February 1961, the Bishops of Atlanta, Charleston, and Savannah announced jointly that parochial schools in their states would be desegregated "not later than the public schools.")

Diocese of Miami (Florida). Here there has been considerable integration both in elementary and high schools. The Bishop has given explicit instructions for the admission of students "without exception" as to race and there is willingness to discuss openly. One high school received prominent local press attention because of a star Negro basketball player. Another has an enrollment approximately half white and half Negro. Elsewhere in Florida, in the Dioceses of St. Augustine and West Florida, there seem to be no integrated parochial schools.

---

* The 11 southern states of the Confederacy.

Archdiocese of New Orleans (Louisiana). In the fall of 1962, all (more than 150) Catholic schools, both grammar and high, will be integrated. The Bishop of the Diocese of Lafayette has said schools there would be desegregated eventually but not for the next school year. There has been no information that the Diocese of Alexandria has desegregated schools.

Diocese of Natchez-Jackson (Mississippi). There has been silence on school integration and no known instance. There is one example of desegregation in higher education: the seminary at Bay St. Louis.

Diocese of Raleigh (North Carolina). Segregation was ordered ended here before May 1954, and all the elementary schools of the diocese are integrated.

Diocese of Charleston (South Carolina). For six years, St. Anne's, a co-educational elementary school at Rock Hill, has admitted Negro students. This year there are 19, of whom there are five each in grades one, two, and three.

Diocese of Nashville (Tennessee). Schools in Nashville and Jackson are integrated in principle but not always in enrollment. There are at least 25 Negro students in grade schools and 40 in high schools. Father Ryan, a boys' high school in Nashville, desegregated in 1954 prior to the opening of public schools to Negroes. Cathedral High School (for girls) in Nashville is now in its third year of desegregation. In Knoxville, Immaculate Conception is reportedly open to all. Parochial schools in Memphis and Chattanooga remain segregated.

Diocese of San Antonio (Texas). Desegregation of the entire parochial school system in this diocese went into effect in the 1954-55 school year. In the Diocese of Dallas-Ft. Worth, Jesuit High School in Dallas admitted two Negro students in 1955. In other high and grammar schools there has been some desegregation since 1956. In 1961, the Diocese of Galveston-Houston integrated elementary schools. In the four other dioceses in Texas (those of Amarillo, Austin, Corpus Christi, and El Paso) there are, so far as is known, no desegregated schools.

Diocese of Richmond (Virginia). Integration was announced for schools in this area before the Supreme Court decision in May 1954, and went into effect the following September.

THE

# Robert Kennedy Praises South On Peace in Pupil Integration

## Statement Notes Lack of Incidents in Public Schools—Survey Discloses Slow Pace in Desegregation

Special to The New York Times.

WASHINGTON, Sept. 8—Attorney General Robert F. Kennedy hailed today the peaceful desegregation of many Southern schools this week.

He spoke optimistically about the outlook for the South as a whole. At the same time, however, he noted that in three states — Alabama, Mississippi and South Carolina—not a single school or college had been desegregated.

"This is the second consecutive school year in which every public school system being desegregated for the first time has made this important transition without public disorder," Mr. Kennedy said, continuing:

"This is a mark of the growing acceptance everywhere of the need for significant progress toward the realization of the constitutional rights of all American children.

"Obviously, there is a great deal more to be done. In three states there has been no school desegregation of any kind.

"But the success of many communities in meeting this difficult problem during the past thirteen months should provide an example to the people of the communities and states which are going to have to meet the same problem during the next year."

### 33 Districts Involved

The Attorney General made he statement in answer to a request for comment on the school openings.

According to Southern School News, the authoritative source on desegregation developments, thirty-three public school districts were scheduled to have Negro children in white schools for the first time this fall.

Most of these schools opened last week—in Chattanooga, Tenn., and in smaller communities of Florida, North Carolina, Texas and Virginia. Additional schools were also desegregated in the border states of Maryland, Delaware and Kentucky.

Mr. Kennedy's point about desegregation of public schools "without disorder" reflects the history of the process since the Supreme Court school decision in 1954. According to Southern School News, there was violence over desegregation somewhere in the country every year until the school year of 1961-62.

The most serious disturbance this week came over the desegregation of parochial schools in Louisiana.

Crowds of jeering white persons gathered at several of the schools opened to Negroes by order of the Roman Catholic Archbishop of New Orleans, John P. Cody. Some stones were thrown, but on the whole order was maintained and the schools were kept open.

The one school where those opposed to desegregation seemed to have prevailed was Our Lady of the Good Harbor School in Buras, La. This is in the area controlled by the arch-segregationist Leander Perez Sr.

The families of five Negroes who entered the school were seemingly persuaded to withdraw them. Whites stayed away, too, and the school was finally closed.

The Attorney General did not mention the trouble in Buras, but he is known to be deeply concerned about it. So far, however, Federal authorities have found no legal basis for intervention.

Although more public schools were opened peacefully to Negroes this week, the pace of desegration remains slow over the whole South.

Of the 2,265 school districts there which have both white and Negro pupils, only 243 have begun desegregation. And of the 2,800,000 Negro children in public schools there, fewer than 10,000 are in classes with white children.

The rural areas remain most resistant to integration. In Georgia and Louisiana, for example, only Atlanta and New Orleans have begun integration.

Mr. Kennedy gave special praise to the largest city to begin desegregation this week, Chattanooga. He said that its success was "a product of the same kind of responsible community action taken last year in Atlanta, Dallas and Memphis."

FOR IMMEDIATE RELEASE

ATTN: Marvin Rich and James Peck

Southern College Head Thanks Northern Students For Books

Birmingham, Ala., Feb. 28: The CORE group at City College of New York decided to collect a sizable number of books and ship them to Miles College here, whose students have been particularly active in the non-violent movement for civil rights.

Upon arrival of the shipment, L.H. Pitts, president of the college, wired the New York group: "Miles College accepts with great appreciation 2,000 volumes from City College of New York students for our library. We have no means of adequately expressing our thanks to you."

## DESEGREGATION OF SOUTHERN PAROCHIAL SCHOOLS

The integration of Negro students into Catholic schools in the South* has followed no announced or discernible plan. Elementary and high schools have, in some cases as early as 1952, acted at the parish level to admit Negro students to previously all-white schools. In some dioceses, explicit instructions to desegregate went out several years in advance of the 1962 order of Archbishob Rummel in New Orleans. In other dioceses, the integration order from the bishop has followed local desegregation of public schools by a year or more.

In some areas where the schools are desegregated in policy, there has been no actual integration due to lack of applications by Negro Catholics. And in many dioceses, records are not kept by race, so it is not always possible to ascertain, from official reports, how many schools are actually integrated. There remain only four southern dioceses out of the total 25 which have either not announced a policy of desegregation or have not had it in effect for some time.

A summary of desegregation in each southern diocese follows.

Diocese of Mobile-Birmingham (Alabama). There has been no parochial school integration in Alabama, although Spring Hill College in Mobile has been desegregated for several years. The Catholic schools of Pensacola (included in this diocese) will be open to all races this fall.

Diocese of Little Rock (Arkansas). In Little Rock proper, Catholic high school (for boys) admitted three Negroes and Mount St. Mary's Academy, a high school for girls, desegregated in 1962. In Fort Smith, St. Scholastica, an all-girl high school, has been integrated since 1952 and St. Anne's Academy, a co-educational high school, has integrated. New Subiaco Academy (boys high school) in Subiaco has been integrated since 1959. St. Joseph's elementary school in Paris and Sacred Heart elementary school in Charleston are integrated; St. Peter's elementary school in Pine Bluff opened on an integrated basis in early 1963.

Archdiocese of Atlanta (Georgia). Catholic high schools desegregated the eighth grade in April 1962. On June 10, 1962, the Most Reverend Paul J. Hallinan, Archbishop of Atlanta, ordered all Catholic schools in the archdiocese to admit "Catholic children regardless of race or color." In September 1962, six previously white elementary and high schools were quietly desegregated by 17 Negro Catholic students. There are 18 elementary and high schools within the archdiocese, which comprises a 71-county area in North Georgia. Of the elementary schools outside Atlanta (in Rome, Marietta, Fort Oglethorpe, Griffin, Athens, and Washington) only St. Joseph's elementary school

---

*The 11 southern states of the Confederacy.

in Athens and St. Joseph's school in Marietta in fact desegregated. No applications from Negro Catholics were received in 1962-63 in the other schools, which continue to have a policy of open enrollment. The Diocese of Savannah announced June 24, 1963 that Catholic schools in the diocese will be integrated effective September 1, 1963. The policy will apply to all grades of both elementary and high schools. Diocesan enrollment in 22 elementary schools and eight high schools is about 9,000. In Chatham County, under the present segregated system, one high school and three elementary schools are for Negroes with an enrollment of 1,000. Chatham County public schools are under court order to desegregate at least one grade in 1963.

Diocese of Miami (Florida). Here there has been integration both in elementary and high schools. The Bishop has given explicit instructions for the admission of students "without exception" as to race. One high school received prominent local press attention in 1962 because of a star Negro basketball player. Another has an enrollment approximately half white and half Negro. Elsewhere in Florida, in the Diocese of St. Augustine Negroes were admitted in September 1962 to the only Catholic high school in Jacksonville, and to Blessed Sacrament (elementary) School in Tallahassee.

Archdiocese of New Orleans (Louisiana). In the fall of 1962, all (more than 150) Catholic schools, both elementary and high, were integrated in policy. Orleans Parish integrated 26 schools with an enrollment of 154 Negro children. Outside the city of New Orleans, Jefferson Parish enrolled 33 Negro students in six schools, St. Tammany Parish enrolled two Negroes in one school, St. Charles and St. Mary Parishes each enrolled one Negro in one school. In Plaquemine Parish, Our Lady of Good Harbor School in Buras was first in the state to integrate, then closed because of disorder on the third day. The school reopened on Labor Day with approximately 18 white and four Negro children in attendance. After picketing and reports of economic and other pressure, the white and two of the Negro children withdrew. In March of 1963, it was reported that the school remained open but no pupils were in attendance. East Baton Rouge Parish will begin desegregation of four high schools in 1964, in the 11th and 12th grades. The diocese has about 165,000 members with about 9% Negro Catholics. The Lafayette and Alexandria dioceses remain segregated.

Diocese of Natchez-Jackson (Mississippi). There has been silence on school integration and no known instance. There is one example of desegregation in higher education: the seminary at Bay St. Louis.

Diocese of Raleigh (North Carolina). Segregation was ordered ended here before May 1954, and all elementary schools of the diocese are integrated.

Diocese of Charleston (South Carolina). Our Lady of Mercy Junior College in Charleston is integrated. For six years, St. Anne's

a co-educational elementary school at Rock Hill, has admitted Negro students. In 1962 there were 19, of whom there were five each in grades one, two, and three.

Diocese of Nashville (Tennessee). Schools in Nashville and Jackson are integrated in principle but not always in enrollment. There are at least 25 Negro students in grade schools and 40 in high schools. Father Ryan, a boys' high school in Nashville, desegregated in 1954 prior to the opening of public schools to Negroes. Cathedral High School (for girls) in Nashville is now in its fourth year of desegregation. In Knoxville, Immaculate Conception is reportedly open to all. In Memphis and Shelby County, all Catholic elementary schools will desegregate the first four grades in September 1963 as part of a four-step plan to extend through 1966. Two colleges, Christian Brothers and Siene, are already desegregated. Parochial schools in Chattanooga remain segregated, but there are some indications they may desegregate in 1963-64.

Diocese of San Antonio (Texas). Desegregation of the entire parochial school system in this diocese went into effect in the 1954-55 school year. In the Diocese of Dallas-Ft. Worth, Jesuit High School in Dallas admitted two Negro students in 1955. In other high and elementary schools there has been some desegregation since 1956. In 1961 the Diocese of Galveston-Houston integrated elementary schools. In the Diocese of Amarillo, all Catholic schools are theoretically integrated. Actually, there are about 40 Negro students in three Catholic schools; none have been rejected but there have been no applications to the other schools. In the Diocese of Austin, school integration is a local pastoral decision. There are known to be Negro children in St. Mary's Cathedral and Dolores Schools; enrollment forms do not show race, so there may be other Negro students in other schools. The Diocese of Corpus Christi reports that all schools in the diocese are integrated; there is no report on the number of Negro children enrolled. There is still one school, Holy Cross, which is all-Negro, but students there may enroll in any Catholic school in the city. The Diocese of El Paso has followed a policy of open schools for a considerable length of time; there was never any public announcement.

Diocese of Richmond (Virginia). Integration was announced for schools in this area before the Supreme Court decision in May, 1954 and went into effect in September, 1954.

## Segregationists Set Up Private White Schools In More Southern Cities

### Tuskegee, Ala., Students Use Converted Home; Louisiana, Virginia Get New Facilities

### How Good Is the Instruction?

By Neil Maxwell
*Staff Reporter of* The Wall Street Journal

TUSKEGEE, Ala.—In a large white frame house on Main Street here 128 white high school students study in makeshift classrooms. A block down the street in Tuskegee High School, a substantial brick building, a dozen Negro youngsters attend classes amid rows of empty seats.

This situation is a product of the continuing battle over school desegregation. The Negro teen-agers were enrolled in formerly all-white Tuskegee High this fall under a Federal court order aimed at breaching the school segregation barrier for the first time in this eastern Alabama community of 33,000, 85% of whom are Negroes. But white parents responded by withdrawing their children from the public high school and establishing Macon Academy, a private, whites-only high school.

Macon Academy—which is named for Macon County, site of Tuskegee—is by no means the first private school set up to frustrate a desegregation edict. But it's clear that the number of Southern segregationists who see such institutions as the only way to avoid integrated schools is rapidly increasing.

Besides Tuskegee, New Orleans and Baton Rouge, La., Little Plymouth and Claremont, Va., and Birmingham, Ala., have witnessed the creation of new segregated private schools in the past few weeks. In Birmingham, where a small private elementary school was rushed into operation three weeks ago, segregationist efforts to organize a large high school started too late to begin classes this term, as did a similar undertaking in Charleston, S.C. But backers of both these high schools intend to start classes as soon as possible.

# Avoiding Integration: More Private White Schools Open in South

*Continued From Page One*

private schools. In Birmingham and Charleston a lack of suitable classroom space was the main reason why segregationists were unable to open private high schools this fall. Birmingham segregationists are planning a private institution large enough to enroll some 1,200 white students now attending the recently integrated West End High School.

Here in Tuskegee the owner of a cavernous ante-bellum house donated the use of his property to the Macon County Private School Foundation. Walls were knocked out to create classrooms, shop equipment was installed in the garage and the building was rewired for fire safety.

Conversion of the fireplace-adorned bedrooms and parlors into classrooms cost less than $7,000. Many items, including lighting fixtures, paint, desks and laboratory tables, were donated. Other equipment is being purchased secondhand.

The school had obtained only about half its total budget, estimated at $54,000 to $60,000, when classes began, but backers say raising the rest will be no problem in this strongly segregationist area. Citizens contributed nearly $25,000 within a month after plans for the school were announced, and tuition payments are expected to bring in nearly $10,000 more. Last week Alabama Gov. George Wallace turned over some $8,000 in contributions by state employes to three private school foundations. Macon Academy will get a third of the money, and the rest will help support two segregationist foundations in Birmingham.

**Low Tuition**

Tuition is only $90 a year per family, far under typical private school fees of $500 to $1,000 per pupil. "We were afraid higher

The number of white southern students attending segregationist private schools is impossible to estimate accurately. That the total is rising fast is evident, however, from figures on tuition grants paid by states with "freedom of choice" laws to help parents sidestep Federal desegregation orders. In Louisiana, where a student receives up to $360 a year to leave a public school and enroll in a private one, grants are going to at least 11,000 students in the current academic year, up from 7,000 a year ago. In Virginia some 15,000 grants are being paid this year, compared with 10,000 a year ago.

Students receiving state tuition grants aren't required to attend schools set up specifically to avoid integration, but the booming growth of such institutions shows that many do. In New Orleans a segregationist school opened in December 1961 by a plumber named Armand Duvio has increased its enrolment from 458 to 860 this year, besides adding 11 new classrooms. At Powhatan, Va., Huguenot Academy expanded from four grades to 12 this fall, and enrolment jumped from 104 to well over 400.

Here in Tuskegee whites vow they will finance their venture without state aid, thereby eliminating the possibility the school's operations might be disrupted if tuition grants are eventually ruled illegal by the courts.

**Legal Questions Raised**

So far Federal courts have not ruled out "freedom of choice" grants, though some authorities question their ultimate legality. In Louisiana, for example, the state refuses grants to students attending parochial schools; while this facet of the law hasn't been tested in court, it might be held discriminatory. Since in some communities, including New Orleans, nearly a third of the students attend church schools, such a ruling "would put a tremendous burden on the state," one expert notes.

State tuition grants appear particularly vulnerable to legal attack in Alabama. Under an Alabama measure that has not yet been used, such grants may be paid only if all schools in a district are closed.

But when segregationists in Prince Edward County, Va., closed all public schools four years ago and opened a private academy for whites, they encountered strong legal resistance to the payment of state tuition grants to the academy students. For the past two years Federal court injunctions have barred payments pending a decision by the U.S. Supreme Court on several points.

Among the questions raised by opponents of Prince Edward County's action is whether a county may legally close its schools while other schools in the state are open. Prince Edward Negroes ended their lengthy education drought this fall when some 1,500 students, including four whites, started classes at a private school financed through donations.

**Negro Voting Strength**

Closing the schools in Macon County would be further complicated by the high proportion of Negro residents. While only three white schools (counting Tuskegee High as white) would be affected, 17 Negro schools would have to be shut. Such action could lead to retaliation against white local officials at the polls, since Negro voting strength in the county is nearly as great as that of whites.

Even without a general public school closing, there is a good chance Tuskegee High will have to shut in 1964. "The school is finished," says a county school official. He explains that the total white boycott has dropped enrolment to 5% of normal, which means the school will receive no funds to hire teachers next year. The state provides funds for local teachers' salaries in accordance with a formula based on attendance figures during the preceding school year. So while Tuskegee High has 12 teachers now—one for each student—its student body is too small to entitle it to funds for even one teacher next year. Two teachers have already quit, and other staff members, including the principal, are looking for positions elsewhere.

Finding adequate facilities has proved a major problem for the organizers of some new

*Please Turn to Page 22, Column 1*

tuition might force poor families to send their kids back to the public school," says a foundation official.

The academy still lacks some $20,000 of its budget for the current academic year, but additional funds are being raised by such activities as a student-run raffle of a second-hand Vauxhall and dances for parents at the Veterans of Foreign Wars hall outside town.

"We're going to get people to sign pledges like the churches do as soon as we get a ruling that contributions are tax-deductible," says postmaster John Fletcher Segrest, foundation president.

Nevertheless, some Tuskegee citizens have doubts about the chances of keeping the school operating indefinitely by such means. "It's a glamorous thing right now, backing segregation and Gov. Wallace, but I'm afraid it's going to get old fast," remarks one.

**Nearby Schools Grow**

Even strong supporters of the school concede its prospects were dimmed somewhat by parents who sent their children to nearby schools rather than wait for Macon Academy's opening, which took place a month later than the start of the fall school term in public schools. At neighboring Shorter an influx of Tuskegee students, including the entire senior class, sent enrolment soaring from a normal 75 to more than 200. As a result of such transfers, the 128 students at Macon Academy is less than half the 270 who attended Tuskegee High last year.

A few parents, too, wonder about the quality and breadth of instruction at Macon Academy. Mr. Segrest concedes the school "had some trouble getting teachers," though he says it was "mostly because of time." While salaries at Macon Academy and other private white schools are about the same as those in public schools, many public school teachers are reluctant to transfer to private institutions because it would mean the loss of benefits built up under state retirement systems.

The headmaster of Macon Academy was formerly band director at Tuskegee High. No foreign languages are offered at the academy, nor are there courses in vocational agriculture and home economics, both popular subjects in rural areas such as this. The academy has no band, football team, gymnasium or cafeteria.

The academy cannot take part in Federal milk and school lunch programs, nor can it

CHRONOLOGY OF EVENTS IN SCHOOL DESEGREGATION

NASHVILLE, TENNESSEE

## Suit Filed

September 23, 1955 - Parents and guardians of twenty-one Negro children refused admission to neighborhood public schools file suit.

December 15, 1955 - School suit amended to include two white children, also refused admission to neighborhood schools; the children, whose parents teach at Fisk University, live in a predominantly Negro neighborhood.

## Preliminary Discussion and Planning

February 6-7, 1956 - Twenty-seven community organizations sponsor Workshop on School Desegregation, with over 500 attending night sessions; participants in this second Desegregation Workshop report the community is "positively oriented toward the Supreme Court decision on desegregation of the public schools, but there is no active movement toward desegregation."

March, 1956 - School board holds open meeting to adopt desegregation plan, instead invites 80 people present to give views; representatives of various groups speak for and against desegregation.

March 21, 1956 - School board votes to postpone adopting desegregation plan until after court decision.

March 27, 1956 - School case heard by Federal three-judge court; judges grant continuance in case, at board's request give board until fall term of court to present desegregation plan.

May 30, 1956 - Nashville Community Relations Conference, newly formed bi-racial human relations organization, requests members to urge school officials to start desegregation in the fall.

October 29, 1956 - School board votes partial desegregation plan to be submitted to Federal district court; plan calls for desegregation of first grade, September, 1957, continued study of desegregation; race of students in school defined as valid condition for transfer.

## Acceptance of Plan and Support

February 20, 1957 - Federal district court accepts school board plan with one change: board is ordered to bring in complete plan for desegregation of all grades by December 31, 1957, with a time schedule for accomplishing plan.

March 14, 1957 - School board passes resolution authorizing planning for desegregation, calls on "people of good will to join in its attempt to comply with court orders. . . ."

April 2, 1957 - Nashville Council of Parent-Teachers Associations adopts motion approving the board's school desegregation plan.

## Increased Opposition

June 23, 1957 - Parents Preference Committee formed to spearhead drive to see that children go to school of parents' choice. This Plan would require three school systems - one Negro, one white and one integrated.

July 11, 1957 - Segregationist groups protest desegregation plans at school board meeting, ask board to use Tennessee 1957 public school assignment law.

July 30, 1957 - New school zones for first grade announced, new transfer system explained; Parents Preference Committee launches campaign to raise funds and secure signatures in fight for application of Tennessee's 1957 segregation laws to Nashville.

July 31, 1957 - Attorneys advise board to stick with plans for desegregation, say there is no way to skirt the order.

August 4, 1957 - White Citizens Council leader, John Kasper, and Ku Klux Klan hold rival meetings; Kasper moved from city park for not having permit, holds meeting with six other segregation figures in Croleywood on the outskirts of the city.

August 7, 1957 - Representatives of Parents Preference Committee appear at school board's instruction committee meeting, propose 5-point plan to substitute for fall desegregation.

August 8, 1957 - Segregationists, including Kasper, representatives of KKK, Tennessee Federation for Constitutional Government, appear at school board meeting to protest integration; school board authorizes instruction committee to continue studying legal opinion on Parents Preference Committee request; Nashville Community Relations Conference and sixteen affiliated organizations, plus PTA assure board of support, present petition pledging support signed by 600 citizens.

August 10, 1957 - School officials announce they are making plans to inform parents of first graders about transfer procedures.

August 11, 1957 - Kasper rally attended by about 300; future meetings announced.

August 22, 1957 - Nashville Association of Churches mails letter to 350 clergymen asking them to deliver statements supporting desegregation to their congregations.

August 23, 1957 - Kiwanis Club adopts resolution opposing desegregation, Men's Club of Monroe Street Methodist Church votes similar resolution; school board instructs its attorneys to ask Federal court whether Tennessee's school preference law conflicts with court's desegregation order.

August 25, 1957 - Kasper, Ace Carter of Birmingham and other segregationists from Knoxville and Birmingham hold rally, drawing crowd of 250; Kasper announces nightly meetings downtown on courthouse steps; 28 of 62 ministers quizzed by Tennessean appealed to their congregations to maintain a Christian spirit in dealing with school integration problems.

## Registration

August 27, 1957 - Thirteen Negro parents register children in neighborhood schools in special registration day for first-graders; forty-seven Negro parents transfer children out of assigned neighborhood zones to schools formerly designated as Negro schools; small groups of protestors gather at schools, but registration goes smoothly, with no incidents.

Parents who registered subject to threats and abusive telephone calls, also school officials and teachers.

August 28, 1957 - Group of 125 appears before Mayor to protest desegregation of schools; mayor, in first statement on school desegregation, says he must uphold the law of the land.

August 29, 1957 - Night meeting of 250 segregationists held on Buena Vista school grounds; boycott of schools urged.

September 4, 1957 - City teachers spend day in human relations workshop as part of in-service training; background on Nashville's situation presented by panel.

September 6, 1957 - Federal court rules Tennessee school preference law "unconstitutional on its face," instructs school board to proceed with desegregation as planned.

September 7, 1957 - Mayor West pledges "peace and quiet and good order;" Nashville Human Relations Conference reaffirms support of school board; segregationists hold fourth unauthorized meeting on school grounds at Fehr school.

September 8, 1957 - Police chief promises safety for all pupils, says persons causing disorder will be arrested.

School Opens

September 9, 1957 - Nineteen Negro children enter neighborhood schools, amid disorderly crowds of segregationists; in addition parents of four children attempt to revoke transfers to "Negro" schools. Three arrests made at Fehr school, where white women throw rocks and bottles. Neighborhoods in vicinity of schools where Negroes attend remain disorderly throughout day; near-riot broken up by police Monday night in Fehr school area--500 chase, throw bricks and bottles at Negroes, burn one Negro's car.

September 10, 1957 - Hattie Cotton school dynamited in early morning hours; crowds continue outside schools; police arrest 20 during day, including Kasper, in crack-down on segregationists; Negro hung in effigy in downtown area and disorder continues particularly in Fehr neighborhood; tool shed behind home of Mrs. Grace McKinley, whose daughter enrolled in Fehr, burned, rocks thrown at house.

September 11, 1957 - Schools remain under police guard with no crowds permitted to gather; Kasper put in county workhouse pending bond; city administration and U. S. court file for injunction against Kasper and other segregationists; carload of armed Negroes arrested.

September 12, 1957 - U. S. District Court issues temporary order restraining Kasper and eleven others from interfering with school desegregation; Kasper and follower John Mecurio arrested for vagrancy, loitering and disorderly conduct; cross burned in white residential area.

September 12, 1957 - State indicts Kasper for inciting to riot (earlier charges pressed by city); attendance rises and school officials announce crisis is over.

September 16, 1957 - District Judge William E. Miller issues permanent injunction ordering Kasper and nine others to refrain from interfering with school desegregation; children urged to return to school.

September 17, 1957 - Enrollment back up to 90% of total, with only eleven Negro children left in neighborhood schools; others go back to "Negro" schools.

September 18, 1957 - Kasper freed on bond, leaves city.

## Aftermath of Crisis

September 26, 1957 - School Superintendent-elect Oliver states he can see "no advantage to the colored children in being allowed to attend formerly white schools. . . ."; says Negroes prefer segregation and "we were doing a better job with our city schools (before desegregation) than we could have done with both races together."

October 3, 1957 - Three PTA officers at Glenn school resign because of integration and Glenn Men's Club disbands.

October 10, 1957 - Donald Davidson and representatives of the Tennessee Federation for Constitutional Government appear before school board to plea for adoption of "voluntary" integration plan; Kasper back, ruled vagrant by circuit court.

October 14-23, 1957 - Series of cross burnings at different points in city; one burned in front of McKinley home, where Negro child is still in neighborhood school.

Next Step?

December 4, 1957 - School board adopts Parents Preference Committee's "voluntary" integration plan to present to Federal court; says will test state school segregation laws to "clear the air."

January 20, 1958 - School board files petition to dismiss original suit on grounds that 1957 Tennessee school assignment law provides plaintiffs with adequate administrative remedy.

January 28, 1958 - Federal district Judge Miller hears arguments supporting "voluntary" integration plan presented by school board; school superintendent Oliver, sole witness at hearing, says nine Negro children remain in neighborhood schools, are satisfied and doing well.

February 13, 1958 - Parents Preference Committee files amicus curiae brief stating outright desegregation of schools would be "preferential treatment of Negro pupils."

February 18, 1958 - Judge Miller disapproves parent preference plan, orders school board to submit "suitable plan" by April 7; new hearing scheduled April 14.

March 13, 1958 - Parents Preference Committee petitions school board to refuse to submit any integration plan (which had been requested by the Federal District Court). Anna Holden presents to school board the stand of 26 Nashville organizations favoring desegregation of the entire public school system as of September 1958.

March 16, 1958 - Jewish Community Center is damaged by dynamite. Its Rabbi and Federal Judge Miller are threatened. Both the bombing and the threats thought to be protest of integration stand.

March 31, 1958 - School board votes to desegregate rest of system one grade a year, with only opposing vote cast by the lone Negro member of the board who stated that the plan violates the Supreme Court requirement for all deliberate speed. A number of organizations and churches, over and above the 26 stating their views on March 13th, ask for complete desegregation in September, 1958. The Nashville Branch of NAACP announces it would contest the legality of any one-grade-a-year plan.

April 14, 1958 - Federal District Court hearing on the school board's one-grade-a-year plan held. Judge Miller allows 24 days for the school board to file its brief in support of the plan and for the NAACP to file a brief in opposition.

## Arrest Threats In Statesville

Statesville, N.C., Three students who had participated in CORE's Freedom Highways -- Candida Lall, Jean Thompson and Rosemary Ezra were threatened with arrest for vagrancy when they entered City Hall to copy a local anti-picketing ordinance. Such ordinances have been ruled illegal by the Supreme Court.

Schools

Rev. Wilson Lee and two other Negro ministers were threatened with arrest when they attempted to enter the white high school where Governor Terry Sanford was speaking. When the Governor spoke later at the Negro school, he was met by a picket line of 100 students. They then, entered the school, unfurled their placards and walked out. Asked by newsmen why they hadn't remained, they pointed out that they were interested in action -- not words to end school segregation in Statesville.

###

CORE VOLUNTEERS BOOKS FOR MISSISSIPPI PROJECT

The CORE BOOKS FOR MISSISSIPPI PROJECT has been launched as the result of an appeal made to them recently by CORE Field Secretary David Dennis of Mississippi on a visit to the National Office. Books of social significance are requested.

An appeal for books and funds to cover mailing costs has to date netted 1400 books and $42.00. CORE urges all interested members and friends to contribute either books or funds to make this educational project a success.

Books and funds should be sent to the CORE NATIONAL OFFICE, 38 PARK ROW, NEW YORK 38, N. Y. Attention: Benjamin Brown. They should be earmarked: CORE BOOKS FOR MISSISSIPPI PROJECT.

Books may be shipped direct to: David Dennis, CORE Field Secretary, 313 Franklin Street, Canton, Miss. However, all funds should be mailed or delivered to the CORE NATIONAL OFFICE.

1 Data for 1957 are as of September 30. Data for 1966 are as of October 31.

## SUMMARY TABULATIONS OF DATA COLLECTED FROM THE SPECIAL CENSUS OF SCHOOL POPULATION - OCTOBER 31, 1966 - WITH COMPARATIVE DATA 1957-1966

Summary tabulations of data collected in the special census of school population on October 31, 1966 are reported herewith. For comparative purposes, a summary of similar data from the September 30, 1957 census are included in the second table, which presents city-wide data for Afro-American, Puerto Rican, and Other groups.

In collecting these data, schools were instructed to obtain the count of Afro American/Negro children by inspection only— Pupils were not questioned. In enumerating the numbers of Puerto Rican children, schools were instructed to include all children born in Puerto Rico as well as those born on the U. S. mainland, one or both of whose parents were Puerto Rican. All other pupils, irrespective of ethnic or national origin, were to be classified as Others.

GRADUATE SCHOOL OF PUBLIC AND INTERNATIONAL AFFAIRS

UNIVERSITY OF PITTSBURGH, PITTSBURGH, PENNSYLVANIA 15213
CABLE ADDRESS: GSPIA, PITTSBURGHPENN, USA

August 12, 1964

AUG 13 1964

Mr. James Farmer, Director
Congress of Racial Equality
(CORE)
New York City, New York

Dear Mr. Farmer:

The Special Training Division of the Graduate School of Public and International Affairs is in the process of devising a program of pre-conditioning of high level American personnel for overseas duty.

It has occurred to us that in your training program for non-violent response to hostile confrontations, you may very well have hit upon an important aspect of training which most American officials working abroad now lack. Much of your program may well be adaptable to foreign cross-cultural situations.

We would sincerely appreciate any material concerning your own training or "conditioning" program which you might be willing to share with us.

Thank you.

Sincerely yours,

Marshall Singer

Marshall A. Singer
Assistant Professor of
International Affairs

# Students and Labor

Robert Alan Haber is a former National Secretary and National President of Students for a Democratic Society.

This paper is presented as the first in a series of discussion papers for Students for a Democratic Society's program concerning economic and labor problems and their relation to the student community.

Students and Labor was originally written for Students for a Democratic Society and was distributed by the Liberal Study Group at the National Student Association Congress in Columbus, Ohio August 19-30, 1962.

Labor today is the most liberal of the main stream institutions. It is also the most harrassed by the dominant economic and political groups in the country and the most weakened by the continual post-war recession. Strangely too, it is shunned or treated as at best a distant ally by the major part of the student political community. It is well past the time for a reappraisal of the relationship between labor and the student.

The argument to be developed is that there is an alliance of interest and a basic strategic urgency that should unite the student radicals with organized labor, primarily at the local level, but also regionally and nationally.

What's so wrong? We are concerned with the separation of two institutions, with the estrangement of the student liberal from the personnel, problems and programs of organized labor, and in a parallel way with the lack of interest from labor in the university or in college students.

By way of example, in the recent three volume report by Walter Reuther to the 18th Constitutional Convention of the United Automobile Workers and the three volumes of resolutions adopted by that convention, there is barely a mention of the university or of college students, and there is no mention of the past two years of social protest and ferment centered around the campuses of the country. Similarly, in the 140 pages of resolutions of the United States National Student Association there is not one mention of organized labor and in the hundred-odd student publications geared for local, regional or national audiences in the last academic year, there appeared hardly a mention, to say nothing of an analysis, of the relations between students and the forces of organized labor.

This situation contrasts sharply with the close relation in ideology and in practice between students and labor in the 1930's and 1940's. The radicals of the campus identified with the radicals of the industrial union movement and aspired to positions in that movement. Today, one hardly finds a young radical or activist who looks expectantly to a role in the union movement. Students, once quick to join the labor picket line, organize support committees or provide personnel for organizing campaigns, now find the demands and disputes of labor distant: only in a few of the major student political centers is there a ready response to labor's immediate struggles.

Is this so strange? Perhaps we should expect the student movement, without ideology or historical roots, to be slow to approach the institutional home of their more "political" forbears; and perhaps we shouldn't wonder that the leadership of a movement embracing 13.5 million members should look slightly askance at pleas from a few thousand youngsters who have probably never worked in a shop or known the "facts of economic life" that are the daily concern of the working man. But if there is a psychological barrier, there should not be intellectual barriers to correcting the situation.

The agents of social change: There have been several groupings commonly identified as "agents of social change" in the United States. The surge of oppressed or exploited peoples has given impetus and irreversibility to the movement for a democratic social order. It lay at the base of the reforms of early capitalism in the 19th century, and provided the human substance for the organization of the American labor movement in the late 1800's and up into the 1930's and 1940's. It provides the momentum today for the movement of Negro people for a life of

decency in this land of abundance. The political party structure, and particularly the Democratic Party, has served as spokesman in the electoral and legislative processes of American democracy for these impulses to social change. If there has been a distinct contribution of the student movement, or of the "new left" of the last five or ten years, it has been to identify the university as an institution, like the labor movement, the civil rights struggle or the reform tendency in the Democratic Party, having a significant potential to initiate and guide liberal social change.

The base of the argument for the university as an agent of social change is both theoretical and practical. In theory it is an organization of resources--personnel, knowledge, equipment, and the production of skilled manpower--that are vital to the functioning of society. Consequently, influence on the internal operation of the institution, and on the control and allocation of its resources will have external implications of a considerable sort throughout the whole society. In practice, this potential of the university is in fact being realized. Its students and faculty are doing basic research in technological advance, in social theory, in economic policy and in foreign affairs that provides the intellectual underpinnings for the movement for social reform. It has been the center from which has come the most articulate criticism of the fabric of American life and institutions--providing a philosophic and political framework for the enterprize of social reconstruction. Its student bodies have provided manpower and radical impulse for growth of grass roots movements--best exemplified by the civil rights struggle of the last two and a half years and the growth of a reform movement in New York City and California Democratic Party politics. Its personnel have been serving both as candidates and as the research and work force behind candidates for public office on local, state and national levels and its faculties are called upon as consultants in allareas of public policy and, as well, by corporations and private institutions. In a very immediate way the university has been having vital, and often decisive, influence in the course of American life. Obviously, in a long term way it has determining influence in that it provides the training and political orientation for the business and professional students that it yearly graduates into positions of community influence and power.

If the university is to provide an institutional base for the liberal movement, however, its resources must be systematically evaluated and rationally connected to the other progressive forces operating in the country. In this view the connection between the university and the labor movement is matter of high priority on the theoretical and programmatic agenda of the liberal and left community. Certain immediate points of connection and ways in which the institutions need each other as well are obvious:

1) The major grouping of unorganized workers are the so-called white collar and professional employees: teachers, engineers, doctors, technicians of various kinds and liberal arts graduates occupying public or service jobs. These people are trained and have their professional standards set in the university. They are also the groupings traditionally most resistant to organization. If techniques are to be found to bring these people into the labor movement, their college training (or "apprentice period") will certainly have determining influence on the success.

2) Labor organization needs continual recruitment of radical leadership who not only have skills in dealing with the economic and organizational problems of labor but who have an orientation to the political role of labor as a force in American politics. Traditionally, universities have provided this kind of

resource to the labor movement and if the relationship has attenuated in recent years, it is doubly in need of rejuvenation now as labor must launch a new offensive if it is to survive.

3) the program of labor, to the extent that it is a social program and not simply a narrow economic concern with wages and work rules, is dependent on wide community understanding and social support. The universities are crucial to provide research dealing with such problems as automation, area development, social security and health programs, etc., to provide public broadcast of the issues and ideas of social reconstruction and to provide systematic educations for the inheritors of influence that are graduated from colleges into positions of public responsibility and decision making.

4) The developing student movement in the university designed to bring the institution's resources into the service of liberal reform programs for the society generally is without a social base of support. It is countering a repressive institutional authority structure and outmoded educational practice. It is without financial resources or a backlog of organizational experience and desperately needs a working connection with the mainstream of liberal political activity. The labor movement has the facilities and certainly the experience that can be decisive in the building of an allied movement in the universities.

If the points of connection are clear, the obstacles to cooperation, objective and subjective, remain formidable and will have conditioning effects on any relationship that can be developed:

for the student: 1) self image. The student has a professional orientation whereas labor remains identified with the"working class" and the wage system. The student does not see himself as a potential union member.

2) class background. Students remain largely drawn from middle or upper-middle class families. They have not been led through past experiences to identify their own aspirations with the trade union movement in particular or with collective action in general.

3) value bias. The focus on upward mobility, pervasive in the colleges, emphasizes competition, self-reliance, individual initiative and devalues both cooperative action and identification with group needs or problems. The "labor image" is laden with "alien" values.

4) formal and informal education. In both high schools and colleges, the labor movement is underplayed or criticised as a progressive force in American development. Students are ignorant of its history or activity and are conditioned by the generally anti-labor mass media to a critical view of labor activity.

5) past failure. Past efforts to contact or join forces with the local labor movement have led often to frustration or cynicism. Labor's locals are infrequently militant and lack an established habit of rank and file involvement beyond their immediate concerns. Too frequently local leadership reinforce membership privatism and find themselves caught up as cogs in Democratic political machines. Students don't find the friends they expected at the head tables of the union halls.

6) labor's record. In the last years labor nationally has suffered continual defeats and has failed to sieze the political offensive: the exposure of instances of corrupt or undemocratic organization buttressed by rank and file apathy, ineffectiveness and irresolution in organizing in the South or agricultural workers, racism, jurisdictional disputes and legislative defeats. Students fail to see labor as a clear champion of their causes. In some cases, such as civil rights, labor appears an enemy.

For the unions: 1) On the defensive. Labor bears the brunt of an ailing economy. It suffers from automation, the insecurity of defense employment, declining industries, oppressive legislation, foreign competition, and generally an illiberal National Labor Relations Board. It is protective of its resources and has few vittories to spur its initiative beyond its traditional frontiers.

2) Its constituency. Labor is responsible to a membership of working men having little knowledge, identification or fraternity with the student community, and demanding attention to their economic and social needs from their dues dollars and paid officials. Student and university affairs have not had programmatic connection to the immediate concerns of the men in the locals.

3) institutionalization. The primary responsibility of union organization is servicing membership, carrying on collective bargaining, maintaining greivance machinery, welfare and other similar service programs. Specialization and bureaucratic organization make a great number of the union people oblivious or unconcerned with broader issues in the labor movement or beyond.

4) issue emphasis. Labor has been comparatively inactive in the areas of most concern to students: civil rights, pea ce and educational problems. This affects both the image of the movement and the possibility for cooperation on local levels. Conversely, the progressive concerns of labor in areas of economic and fiscal policy, national planning, social welfare and development have not yet found programmatic expression in the student community.

5) political style. Labor functions within the established channels of political and social change: the elective and legislative machinery. Student activists have been largely suspicious of the potential of these mechanisms to effect change and, failing a view of a radical role within the political process, they tend to rely on forms of direct pressure and action from the outside.

While these various factors condition separation between the movement of labor and a similarly inspired movement centered in the universities, there are a number of reasons for believing that a closer relation can begin to develop:

1) With the increase in the peace and civil rights movements' activity and support of candidates for congressional and local office (almost always with pro-labor platforms), the base for cooperative activity becomes clearer. Students in the Boston area provide an apt example of this--in civil rights through EPIC and more recently in peace through TOCSIN they have taken the initiative which has brought labor into these movements in an effective and political way.

2) With the mounting crisis in financing higher education, labor is the one organized constituency with a strong interest in public federally aided education. This again provides a basis for joint political and community action. The recent (so far successful) ca mpaign against tuition in the New York City universities has brought together student and labor leadership.

3) The growing need to organize office, technical and professional workers can be expected to lead labor to a more direct interest in college curriculums and to securing at least a groundwork in professional programs to support later organizing efforts in the professional workplace. Interest already shown by the UAW and some pilot efforts in the Rubber Workers indicates the potential in this direction.

4) The imperatives for a planned economic conversion away from the war economy will bring the economic interest and experience of the labor movement into strategic relation to the research facilities of the universities. The interest of student radicals in "peace research" can play an instrumental role in catalysing this relation.

5) With the increase in labor-industrial relations institutes, (note Rutgers, Cornell, Wisconsin, Berkeley, Michigan) unionists are growing less suspicious of and closer to the university environment and there are expanding opportunities for students and labor people to meet.

The Bigger Problem: a Loss of Vision

There is a much more basic problem which supports the disinterest in labor by student leaders. The labor movement in its origins was an "opposition group". It championed the causes of the people against the starkest forms of economic and social oppression, it fought minority rule of the workplace and of community—whether by capitalist power or entrenched political machines. It put forth a set of values and a social image of "industrial democracy" challenging and counterposed to corporate society organized to produce for profit, not use, and for the advancement of property rights, not human rights.

No longer does labor have this immage. It appears not as an opposition group but as a reform club within the "establishment". It does not call for militant rank and file action, it does not basically challenge the structure of the Democratic Party, it doesn't challenge the economic privilege of corporate elites. Even more disheartening to students, its failure to banish discrimination from within its own house make s it a party to the racism that pervades almost every institution of American life. And after surrendering its possibility of independent social power in favor of the more respectable role of lobby and critic, it appears to acquiesce as well before the icon of bipartisan unity, in a tacit, if not active, support of the Cold War.

Student radicals are much less inclined to accept, either in action or in rhetoric, The System as the framework of operation. They seek basic ways to understand and to change the structure of the establishment, to blast the Dixiecrats out of the Democratic Party, to impose democratic principle on the distribution of power and privilege. Students would see that a "collective bargaining and legislative program" is hollow if not supported by an organization that can mobilize votes as a political power, that can move men into the streets in economic or social dislocation, that can march its forces to Washington as an ultimate demand for change.

Students do not see in labor this kind of movement. They are dismayed that a year after the expected labor upsurge with the merger of the AFL and CIO the Political Action Committee in the Stevenson-Eisenhower campaign could obtain solicited contributions from only one of every 24 unionists and prompt only 40% of the rank and file to vote. The record since is hardly any better. Blame can

be laid to insufficient funds for political action; insufficient attention to building political allies, either in civil rights or in universities; to a lack of focus on political targets; but whatever the specifics of explanation, the roots seem to be in the lack of intent to build a mass, politically directed movement. Even in the United Automobile Workers, which is the strongest advocate of political action, the strength of the union remains identified with the International -- not the solidarity of the locals.

This is not, however, the sole problem. Parallel to it is a failure of vision. The labor movement. at least from the perspective of the student, is preoccupied with limited issues and disinclined to speak squarely on the broad problems that in a more fundamental way corrupt the democratic quality of American life. Take as an example the issue of education. Numerous concerns are expressed in the resolutions of the AFL-CIO and of the UAW, and in the membership paper of the United Federation of Teachers. They range from adequate facilities, classroom size, expenditure per pupil, need for federal aid, loans and scholarship support. equality of opportunity, teachers' salaries and training, problems of special education, migrant education, etc. And the problem portrayed as one of tremendous magnitude ultimately is laid to a failure of "democratic conscience!

The problem of American public education however is not one of democratic conscience, it is failure to make power responsible to the public and the problem will not even be confronted until the "anti-school efforts of the National Association of Manufacturers, Chamber of Commerce, Republican-Dixiecrat coalition at the local, state and national level" are not simply mentioned but are in fact opposed by a n offensive in the PTA's, in the city councils, in the local units of the Democratic Party, in the local union halls and in the polling booths at the local, state and national level. Education will not be made a social priority until the determination of priorities and of the allocation of the society's resources is taken out of the hands of profit-oriented, private concentrations of power. Democratic conscience, unfortunately, has little to do with this.

Moreover, while the problem of facilities is acute, the more fundamental problem of education in America is barely mentioned, and that is one of quality. What is taught and what should be taught, what is the structure of the education system, what should be its function in society, what values should be at its base, which ones are now, how should it relate to the development of a democratic social order? Students do not complain with the answers given to these questions; the complaint is that the questions are not seriously asked. They see labor as a lobby without being a critic.

This view of labor, if critical, is not novel. It is adeep concern expressed by many leaders throughout the labor movement. It is combined with the recognition that if labor is to come off the economic defensive, it must go on the political offensive. This task must begin; labor must begintto construct a movement adequate to the problrmd and obstacles of the 1960's--in this it can build an alliance with students and with the university. Short of it, the relationship becomes opportunistic and shorn of the mutual respect that should bind members of the same political community.

Labor's willingness? It is no secret that labor is divided and has many factions within its house. It has not in the past seriously undertaken its task. An assumption of "working-class anti-intellectualism" seems to prevail in the rhetoric of union leadership and to operate in their relations with the university. But even more generally, the unions have not committed themselves to building a radical or a political movement in America. Their financial contributions to the liberal "causes" have been slight at best. An aggregate amount of a hundred or

two hundred thousand dollars gives subsistence (or token) aid to the ten or fifteen liberal organizations that operate nationally. But that id from the entire labor movement. Lack of resources can harldy be argued. Millions of dollars are contributed to such respectable activities as the Red Cross, Community Fund, medical research and so forth. American Labor's international operations involve tremendous outlay, not always ameliorative of Cold War tensions. The dollars and cents facts reflect where labor, at this time, is putting its priorities.

Thus, if an alliance is going to develop, students will have to do more than show their own passive willingness. They will have to convince labor that it is necessary.

Is alliance necessary? To speak of an alliance is to talk of a strategy for social change. In very broad terms, the strategy we see is realignment -- the development of political organization on the local level representing the demands of labor, the Negro and other minorities, the city poor, the small farmer and businessman, the liberal intellectual; and the extension of that organization to the national level through the expulsion of the Dixiecrats and urban machines from domination of the Democratic Party. In this we see university centers playing a crucial generating role for political ideas and program and a crucial supporting role in strategically designed research or action moves.

We see this strategy not simply as desirable but as absolutely essential if there is to be effective oppostion to reaction in American politics and if there is to be any substantial democratic reform of American domestic or foreign policy. In this lies not only the future of our universities and independent institutions of higher learning but as well the future of a free and independent trade union movement.

If students feel perhaps more attachment to the slogan and maybe a greater urgency in the situation of American politics, there is left by this time little identification in the liberal community with the Kennedy Administration as the champion of its causes and as its political leader. Thus, even without total consensus on the slogans--and realignment is little more than a slogan--it is possible to lay out several programmatic priorities for, say, the next two to six years. We see five such priorities:

1) a campaign against the Republican-Dixiecrat domination of the Congress.
2) the development of a liberal wing to the Democratic Party.
3) producing and implementing a plan for the conversion of the permanent war economy.
4) launching a campaign for fair apportionment in both state and national representative districts.
5) developing theory and a radical literature geared to the 1960's and beyond

We see these priorities as imperative directions in each of the "mass movements." They should be before the civil rights groups as that offensive is continued and intensified. They should be paramount in the peace movement and in the view of reform Democratic politics. In particular they should be before the labor and student movements and should provide the points of focus around which alliance is built.

1) The Dixiecrats. The Dixiecrats stifle the committee system of the Congress and, allying with economic conservatives of the Republican Party, are primarily responsible for the defeat of major progressive, social welfare and civil rights legislation introduced in the Congress. They represent the absence of a two-party system in the South, the domination of the southern community by an

entrenched class, not only segregationist in social philosophy, but also anti-labor and anti-welfare. This is the class that attracts industry to the South on enticement of low wages, union busting by scabs or racism or guns, and tax incentives that shift social costs from corporate profits to consumer incomes. It is the class that dominates southern justice, civil service and political machinery. An attack on the Dixiecrats, carried to the community level, is an essential accompaniment of labor organization in the South, of Negro voter registration, of building "New Frontier Democratic Clubs" and of carrying forward the direct action movement for civil rights. Needless to say, the opening of the Southern universities to genuine controversy is dependent on limiting the political authority of state and municipal officials to ride rough-shod over students. Such an attack provides the ideal possibility of connection between students and labor. It would also serve to identify the basic institutions needed to replace the Dixiecrat structure as the representative of the South in the Democratic Party.

The students have begun the assault--working both in the South and in other movements. Labor has yet to declare itself. It has been hesitant about organizing in the South, or even to support the students who are at the radical front in the civil rights effort. It acceded to Johnson as Kennedy's second man and has given no sign of launching an attack against the Dixiecrats at the next Democratic National Convention.

2) The liberals. There exists no structure connected to the Democratic Party in which political representatives as well as university people and leaders in the labor, civil rights and peace movements can plan a national strategy for political and social action and can initiate the groundwork necessary for such a program. The lack of such an identified liberal grouping in the Democratic Party leads to lack of coordinatinn and too often ineffectiveness in the efforts of the liberal and left community.

The students' role in the creation of a "liberal wing" lies in a program to fulfill the notion of the university as an agent of social change. It means getting research done on issues; it means attacking in a systematic way the problems of influence and getting ideas accepted in various communities; it means enlisting faculty people in active political life; it means in every professional curriculum carrying on a program of education and reform that will link the professional role to political responsibility; and it will mean the providing of manpower to support a program of community action.

The difficult problem, particularly with a Democratic Administration elected with wide liberal support, is to get people to identify themselves. The only organized opposition is from the Right. The liberal opposition doesn't exist or is too unsure of its status (i.e., too much under political control) to articulate a viewpoint and organize for a program to the left of the President. Students whose lack of economic and social "obligations" have been ideally suited to initiate militant action, are also free of the kinds of political entanglements that would prevent a systematic criticism of the Administration. They can thus play an important role in articulating the need for an organizational expression of political opposition to "official" policy directions.

Their effectiveness in this has already been illustrated in direct campaign work. There are some twenty congressional candidates running in the 1962 elections with platforms primarily "peace" oriented. Students and university people are playing crucial local and regional roles for many of these candidates. Notable examples are the PAX organization in Massachusetts, Voters for Peaceful Alternatives in Ithaca, New York, Californians for Liberal Representation and similar

organizations in Chicago, New York City and Baltimore. These candidates are opposition candidates: they reject deterrence as a viable basis for foreign policy. They look to challenging this policy politically at the level of the wards and precincts, and publicly through the organization of a "peace caucus" in the Congress. A platform for peace, as these campaigns show, is a liberal response to the stranglehold of military and industrial interests on the economy of the country, an attempt to revise national priorities to recognize human needs and to advance not only the welfare of our own people, but of an international community moving toward the rule of law. It is very definitely a pro-labor platform.

Student initiated plans are underway for a research center, a network of field representatives, and a coordinating operation of peace organizations that will attempt to put 75 to 100 candidates into primaries by the elections of 1964.

In every area these people have, and must continue to look for labor support. Their program must provide an economic plan for their district to deal with the consequences of disarmament. Labor should play a central role in developing such a program. In every shop peace campaigns could provide an issue for debate and indeed an issue around which labor can (in the words of the SDS Port Huron Statement), "constitute itself as a mass political force demanding not only that society recognize its rights to organize -- but also a program going beyond desired labor legislation and welfare improvements."

Seeing labor assume a crucial role in the intrusion of a peace concern into the political life of America is obviously important for its significance in the building of an identified liberal-left group connected to the Democratic Party, but doubly so, it is important because of the role "peace" can be expected to play in the politics of the next few years.

3) The War Economy. Liberals must give immediate attnetion to developing a social and economic plan for disarmament. We can expect --unless war intervenes--a disarmament agreement in the next five or ten years. (In the absence of one, war becomes a certainty, so...) Any such plan, whether liberal or reactionary, will have massive eefects on every aspect of American economic life. It will require the dismantling of the permanent war economy that brought us out of the depression and sustained us since the boom following World War II. It means an end to the continuous use of military spending as a solution to economic problems.

The impact of this can be grasped by noting the extent of the defense-based economy. Quoting from the SDS Port Huron Statement: "The Department of Defense, ironically the world's largest single organization, is worth $160 billion, owns 32 million acres of American land and employs half of the 7.5 million persons directly dependent on the military for subsistence, has an $11 billion payroll which is larger than the net annual income of all American corporations. Defense spending in the Eisenhower era totalled $350 billions and President Kennedy entered office pledged to go even beyond the present defense allocation of sixty cents from every public dollar spent. Except for a war induced boom immediately after "our side" bombed Hiroshima, American economic prosperity has coincided with a growing dependency on military outlay -- from 1941 to 1959 America's Gross National Product of $5.25 trillion included $700 billion in goods and services purchased for the defense effort, about one-seventh of the accumulated GNP. This pattern has included the steady concentration of military spending among a few corporations. In 1961, 86% of Defense Department contracts were awarded without competition. The ordnance industry of 100,000 people is completely engaged in military work; in the aircraft industry, 94% of 750,000 workers

are linked to the war economy; shipbuilding, radio and communications equipment industries commit forty percent of their work to defense; iron and steel, petroleum, metal stamping and machine shop products, motors and generators, tools and hardware, copper, aluminum and machine tools industries all devote at least 10 percent of their work to the same cause."

A disarmament program affecting this amount of the economy and work force, and which has to deal in addition with chronically depressed areas and consumer industries, idle capacity in almost all basic or heavy industry, and unemployment of nearly five million-- such a program will bring the potential for truly significant changes in the character of the American economy: in policy, priorities, planning. Changes of this magnitude are impossible to envision simply as a consequence of domestic pressure. If, however, the planning is left to the Kennedy administration, which seems to have a conservative economic policy (note the program of tax incentives to stimulate investment), or to private businees, the potential for a progressive direction to disarmament adjustment will very likely be lost.

The question is whether the profit and investment security of business elites will be the dominant criteria in restructuring economy activity, or will the problems of working people, their jobs, families, communities and futures be paramount in the reallocation of resources. Will there be a call to abolish the national debt, cut federal spending and reduce profit and other progressive taxation, or wil there be aprogram directing federal involvement in the economy to meet the genuine social priorities facing the country: to abolish squalor, terminate neglect and establish an environment for people to live with dignity and creativeness. Liberals will have to plan and organize if they wish to see the latter course reflected in legislative and administrative action.

Labor plays an absolutely essential role in this. Its economic program, developed in the post-war-- or Cold War-- period, provides the guide lines for an economic system oriented to the consumer, to the public welfare and to democratic control. What is needed is to connect this program, in a most detailed, community by community way, to a plan for disarmament.

1) A National Planning Agency. A group created to meet the goals of maximum employment, production and purchasing power. It would be charged to follow in a systemmatic way what is happening in the economy, to have access to information about technological innovation, investment plans, plant location, and be able to develop plans regarding the creation of jobs, worker retraining and relocation, use of government spending, etc. It would be particularly concerned to develop with local communities, plans dealing with changes in the economy. Its overarching concern would be to develop a coordinated plan toward the realization of national priorities: education, housing, medical care, poverty, urban living, etc.

2) A program of full employment. New jobs must be created to accomodate an expanding labor force and to absorb the displacement caused by automation. As well, a philosophy must be adopted which treats labor not as a commodity subject to the trials of a changing economy, but as the essential human material of economic life. Employment should mean the involvement of the personality, the family and the aspirations of the worker in the productive system, and the responsibility of the system for his security. Basic to this should be the end to the hourly wage discrimination against "production workers" by the universal adoption of a salary system such as now gives job security to "office workers". A flexible work period without loss of pay should put an end to short time and the full week lay-off.

3) A national unemployment compensation system. Standards must be set raise inadequate levels, eliminate discriminatory pndcompetitive variation from state to state, eliminate indefensibly restrictive eligibility requirements and disqualifacation penalti Coverage must as well be extended to all occupational catagories and and benefits expanded to deal with problems of long term unemployment or displacemet as a result of automation or major ecomonic shifts.

4) a program of job security: We should apply the principle that meeting the human problems resulting from production or product advance should be the first against the profit resulting from that advance. The social costs of a "free labor market" must be acknowledged and met. This means facilities for job retraing, relocation support and reemployment for displaced workers. It means special attention to displaced workers near retirment, to migrant workers and their families, to young workers seeking entry into the labor market and to other "marginal" groupings.

5) An end to discrimination. We must secure guarentees of equal access to apprenticeship and training facilities, to equal pay for equal work, to upgrading and entry to all job categories on the basis of merit, and to equal treatment by the agencies of public welfare. Discriminatory treatment against Negroes, Spanish Americans, Indians, new immigrants, or against women or the ageing, must be abolished-- in the employment market, and also in labor organizations, in education, housing, credit and public facilities. No federal cooperation with racism is tolerable in any way-- from the financing of schools to the development of federally supported industry.

6) A program of community development. Plans must be developed to transform our cities and towns into genuinely creative and human living places. The basic facilities of welfare must be abundant-- housing, schools, hopitals and medical care-- but, as well, there must be the facilities of leisure-- libraries and the arts, parks, adult education, etc.-- providing a creative environment beyond the workplace and a rewarding one for both the yound and the aging. This program is at the base of giving democratic quality to American life; it should be the highest priority in the reallocation of resources presently devoted to the permanent war effort.

7) A progressive fiscal policy. The tax and monetary policies of the federal government should be directed to stimulating demand and to insuring the full utilization of productive capacity and manpower resource. Tax reduction should be effected with the view of maximizing buying power of consumer units, principally low and middle income families, rather than to artificially stimulate investments which only add to already idle capacity. Nor should it be directed toward modernization aimed at reducing the workforce rather than increasing production. Ways should be found to transfer the costs of public services (70% of which are financed by state and local governments) from regressive sales, property and payroll taxes (which account for 78% of all state and local revenue) to progressive individual or corporate income taxes (now accounting for only 9 percent). Central to this must be greater federal support to State and local services. The Federal Reserve Board, as the principal regulatory agency in monetary policy should be reformed to include representatives of consumer, labor and small business interests to balance the banking and corperate powers which now dominate it.

These seven points represent the skeleton of the economic program, largely unknown to students, which has been developed and championed by the labor movement. It is a program that can provide the economic guides for planning for disarmament; it is also a program designed to meet the needs of American workers and middle income families. Hence, combined with a community program for conversion, it can be taken to the people in local elections, in educational programs, and in public media.

4) Reapportionment An overw helming problem of American political structure is the unrepresentative allocation of representatives. State legislatures are dominated by the "upstate" or "rural" counties; the cities and industrial centers are with disproportionately reduced voices in such matters as appropriation to education, state welfare services, tax policy, receipt of federal aid. The conservative interest that dominates the state legislatures in these matters is transferred to the national congress in the overrepresentation of rural population in determining congressional districts. The Supreme Court has now ruled that this representation without reference to population is in violation of the equal protection under the laws provision of the 14th Amendment. Similar decisions have been handed down and are pending in the cases of the county unit system ( common throughout the South) and of gerrymandering, the arbitrary drawing of boundaries to guarantee a certain voting composition to a district.

Unfair apportionment has forced liberals and labor people to operate in politics under extreme handicaps. Now that the legal weapons have finally been given to correct this situation, it is imperative that the campaigns be launched in every state full representation to urban and liberal population groups. This is a precondition to legislative success in enacting a liberal program to meet the needs of growing city and wage earning populations. In this initiative the combination of labor and university groups can be a powerful one. Redistrictingplans for both state legislatures and for congressional districts must be researched and formulated, put before the people and into the courts, and in many cases taken to the polls.

5) Producing new theory and new literature We need a new literature and a new initiative in social and political theory. The corporate state is different from the capitalist model of the 1930's and before. Bureaucracy, automation, mass communication, Big Business, Big Government: these are new realities. The values of democra cy and freedom take on different meanings in an institutional structure dominated by these phenomena. It does not end the matter to say that at all levels the people should have control of the decisions which affect them and the resources on which they are dependent; it barely opens the questions. These institutions affect the quality of life and of the values that impel our political action. But beyond understanding their impact, we must examine them in terms of the mechanisms necessary for change. This is not now done. The intellectual guide lines for social analysis are still those set out in the old radical and socialist literature. Yet, in fact, much of this is outmoded in its programs, sterile in its rhetoric and no longer applicable in its basic categories of analysis.

Similarly, the political action guide lines are almost non-existent. If there is a view from the left, it is "realignment". But that is more a slogan than an imperative deriving from a rigorous political analysis. There is not, for example, in the whole literature of the American left a detailed study of the Dixiecrat- Republican Coalition, its congressional operation, its operation through patronage and pork barrel on the local level, its relation to the localized structure of American politics, and the ways to ch ange it. Likewise there is no study of the "military- industrial" complex. ... New realities are capsuled in slogans and supported by theory pertinent to 20 years ago.

Labor and much of the liberal community seems to have adopted the view that the New Deal set the direction for economic reform and that the time for theory is past.The modern task is a pragmatic one of manipulation of power and influence to carry through the welfare and regulatory institutions already

initiated or projected. The academy, which might be expected to fill this void in theory, has succombed to a research and "objectivity" fetish that makes it unrespectable, and thus disadvantageous to connect values to analysis. Professional discipline requires that you simply describe the environment; if you want to criticize or change it, that mustn't be done from your university chair. Academic freedom, people are reminded, is not academic license. Graduate students surrender their vision -- and vigor -- to the research requirements of dissertation committees. The few "think centers" around the country, such as the Center for the Study of Democratic Institutions, are charged with confronting the new complexities, etc., but they find themselves, if sometimes critical, basically satisfied with the theory and solutions now public in the liberal and left community. There does not exist an intellectual current genuinely to the left of the New Deal and the Administration. This fact represents a complacency that we feel is disastrous.

We think it incredible that labor can continue to urge control of capital power by governmental regulatory institutions, that it can applaud Kennedy for slapping down Roger Blough and Big Steel, that it calls for various national welfare and planning programs that further concentrate economic decision making in government and administrative commissions, and that it can in general look at government as a mediator and as an ally against the assault of business -- without looking out for the democratic quality of the structure that is coming into being.

We see in this labor becoming but one of many petitioners for favors before the independent, bureaucratically insulated authority of government. It will lobby for its demands, but concessions will be won in a way that surrenders the decision-making to governmental authority. Labor becomes an administrative cog, subject to and exercising the will of Big Government. Government accumulates power, (shared of course with corporate and other elites) without an organized public holding its use responsible. "Leadership groups" come to represent a mythical set of countervailing "interests" -- labor, business, consumer -- but the followers, the Americans in town and cities with families and futures, remain unorganized and without access to administrative centers where the "decisions which affect them are made, and the resources on which they are dependent are allocated." And this is indeed the course that has tended to develop in labor over the last years. It maintains the vision of a democratically based movement of workers in their workplace, but in operation it has adopted more elitist patterns, implementing convention resolutions by high level machinations rather than a mass mobilization of unionists.

The alternative is to recreate the democratic public. For labor it means shifting the base of its power from the influence of its leaders to the organization of its locals. Labor will be manipulated, and generally out-manipulated, by corporate and governmental interests, until it develops the social power that resides in its membership.

But if labor has seemed unwilling to deal with this fundamental choice, its failure has been no more than that of the entire liberal community, the university included. Democratic alternatives to the present course seem random and unclear. Little more could be expected because the problems being dealt with are too roughly formulated: there is not an analysis of the power structure, behavior of elites, anti-intellectualism, privatism and estrangement as they apply (or don't apply) to workers and other population groups,

the political significance of automation, leisure, mass communication, etc. Our understanding of these matters should make much clearer -- and more resolute -- the course of democratic policy in the next years. Values must be examined in terms of social reality, the empirical present and reasonable expectation of the future. This theoretical, philosophical and pre-eminently political job of developing a new radical literature must draw heavily on the university, but it is a job on which the future of labor may well depend.

These priorities before a liberal movement in the United States should indicate the mutual imperative that alliance be formed uniting the labor movement and the university as seminal institutions in directing the course of social change. From labor, the mass base, financial resources and leverage in the economic life of the country; from the university, the direct access and influence in all class, occupational and decision making centers, the intellectual and research resources and the leverage on the production of trained personnel -- these are the resources that need to be strategically combined in the immediate tasks of the next few years: attacking the Dixiecrats, building a liberal political expression, countering the permanent war economy, seeking just representation in legislative structures, and developing a theoretical understanding of our modern circumstance.

It should also be clear that this alliance is not merely a matter of convenience; it is a matter of mutual survival. Unless the university establishes connection with real politics its role in making knowledge pertinent to the functioning of democracy will be lost in the sterile "objectivity" of academic discipline. And unless labor mounts a movement, conjoined with all its democratic allies, that places social power in the communities across the country with its membership, it will find itself stripped of independent power in a government-regulated corporate economy.

* * *

In seeking to demonstrate the necessity of this alliance, we should give particular note to a problem that has too little occupied the attention of liberal student and university community: <u>the professionals problem.</u>

Most of the programming of the liberal, left and activist community has been focused on the liberal arts college or on the liberal arts curriculum within the larger universities. It is generally a matter of comment when a Business Administration, Law or Medical student turns up on the mailing or membership lists of a liberal political group. The activist's view of citizen responsibility or of university reform do not have within their experience (and hence do not encompass) the professional schools.

Yet, the humanities and liberal arts programs are not the ones, by and large, producing the significant decision makers in society. The major groups of social influence are the lawyers, doctors, journalists, educators and teachers, scientists and engineers, business administration graduates and other"professionals." These are the titles of status, or the skills of business and finance or the channels to accumulated and inherited powet. It is of vital importance that those concerned eith the social function of the university develop an orientation to the professional schools and the professional curricula.

# STUPIDITY AND POWER: TWO COMPETING MODES OF EXPLANATION

The professional stance is to believe that intelligence will right the world: A program went bad - that was because some mistake was made or the personnel were inadequate. Develop a new program or get new people and everything will go swimmingly. Rationality will conquer all. And professions are regarded as the carriers of rationality in a rational world.

It seems to me that I have been hearing more and more lately about "mistakes"; that problems weren't "thought-through"; that "unanticipated consequences" were left unanticipated; that people were "short-sighted." This mode of explaining failure I call the "stupidity argument." Somebody goofed or didn't understand - that's why things failed.

I think we are approaching a crisis in the educational and social service fields. More and more failures are becoming uncovered. Consequently, more explanations of failures. Therefore, the stupidity argument - the failure of intelligence which can be offset by new intelligences.

I find this mode of explanation unconvincing, misleading and frequently dangerous.

The competing mode of explanation is the "power argument"; failure took place because professional, bureaucratic or economic/political interest groups were not interested in success or had different definitions of success. The preservation or expansion of existing control is the motivator of most programs or the source of absence of others. It isn't that stupid things are done as much as that groups in positions of power have goals which conflict with what appear to be the "rational," "appropriate" goals for social action.

Let me give three examples:

(a) Has city planning been ineffective because city planners are stupid people as much as because real estate interest groups frustrate certain kinds of action and promote others, over-riding the city planning professionals' objectives?

(b) President Kennedy in his Yale speech on economic policy argued that there is professional agreement on basic economic analysis and that discussion of the national debt, for example, should be on a high plane without the know-nothing flavor frequently found. But don't different economic interest groups have varying needs in regard to inflation and deflation which underlie their ideology?

Needed programs are resisted because they involve tax-dollars. Though postponement may lead to greater costs in the future, that danger is the problem of a later administration!

(c) Vocational education personnel are resisting needed deep-seated changes that would up-to-date training for today's labor market and train poorly educated youth for jobs. Are they stupid or are they protecting their power position in the field, including the control of funds, and preserving the importance of their skills, no matter how dated these skills may be?

My theme is that immediate power concerns - whether of professionals, buresucracies of economic/political interest groups-- lead to many of our failures. Professional interests are leading to much failure. Our professional rigidities which distort practice are power issues not stupidity issues.

More important than one professional contribution to irrationality and inhumanity, I suspect, are other sources of power which frustrate success, economic and political interest groups.

I want to take up only one implication of these remarks. Professionals tend to underplay the importance of power. As a result, Martin Rein points out, they are used frequently to tranquillize problems rather than to resolve them. Professionals are frequently used and abused, providing window dressing. By adopting limited perspectives, professionals frequently ignore where the real change has to be.

Professional activities are going to grow enormously in America. The professional has to forge out a new kind of role which looks beyond narrow professional expertise to the immediate and national setting and climate in which he operates. And Power is out there - not yokels.

a report on

# THE TREATMENT OF MINORITIES IN ELEMEMTARY SCHOOL TEXT BOOKS

prepared for a conference jointly sponsored by

THE BROWER PARK CLUB of the
Emma Lazarus Federation of Jewish Women's Clubs

and

THE BROOKLYN BRANCH of the
Association for the Study of Negro Life and History
P.O.Box 150, Brevoort Station, Brooklyn, N.Y.

Brooklyn, New York May, 1961

## PURPOSE

This report was prepared under the auspices of the Brower Park Emma Lazarus Club and the Brooklyn Branch of the Association for the Study of Negro Life and History for presentation at a community conference sponsored jointly by the two organizations. The purpose of the conference is to examine the treatment of the history and culture of minority groups, especially Negro and Jewish, in the text books used in our community's public elementary schools and to explore ways of improving this treatment.

## BACKGROUND

The sponsors of this report are committed to the idea that a truthful and sympathetic presentation of the life and history of the many people who make up our community is essential to developing self respect and mutual understanding among children.

This is in keeping with current disenchantment with the "melting pot" concept. More and more our institutions are recognizing that the "Americanization" of people not only fosters conformity but also disparages the cultural strains within the community.

Accordingly, the text analyzed in this report will be evaluated in these terms. Perhaps this survey will aid in the elimination of any disparities that may exist between concept and practice. This service is offered to the community and to the New York City Board of Education for the gain of the children of our culturally-diverse community.

In their book, National Myths and Morale, Kluckhon and Murray describe the role that national myths play in lifting the morale of groups. If myths and folklore can play such a vital part in morale, attitude and ambition, certainly the truths about actual contributions to American life will do much to help morale. Eli Ginzberg in The Negro Potential and Kenneth Clark in Prejudice and Your Child both found that the morale of the Nego child greatly affected his ability to learn and his willingness to face and surmount obstacles.

Failure to present a truthful and well-rounded picture of the history and culture of any one people is a deprivation to all groups. The truth of this statement is startlingly revealed in respect to distortions and ommisions in the treatment of Negro life and history. The negative effects on the Negro child are self-evident, but consider the effect on other children as well. Not only will their minds be warped by a distorted picture of their classmates, but, because of the central role of the Negro people in the history of our country, they will be deprived of knowledge and understanding of basic elements of our history. This will be discussed in more detail later.

## SCOPE

The scope of this report is limited to an examination of the social science textbooks, readers and teachers' guides used in three elementary public schools in the community: P.S. 289, P.S. 138 and P.S. 83. We have specifically excluded consideration of supplementary material such as audio-visual aids, library books and special projects, not only because of limited time but also because all students are exposed to the contents of these required texts. We have limited our inquiry to elementary schools.

because of the critical importance of this time in the child's development; attitudes and ideas acquired then are, at best, difficult to change at a later date.

The area served by these schools is in process of change as older residents of one group move out while new residents, of other groups, move in. Since 1960 figures are not available, population figures and area characteristics cannot be entirely clear. As of 1957, three separate kinds of minorities, religious, national and racial, are represented by the major groupings: Jewish, Irish and Negro. The Jewish people have come from all parts of Europe. Among the Negroes, there are families resident in Brooklyn or the metropolitan area for many generations, and recent arrivals from the South and other parts of the country; a significant number are descended from or married to people of European or American Indian ancestry. It is estimated that fifty percent of the adult Negro population here are foreign born, including speakers of many European and African languages.

The 1960 student population at P.S. 138 was 87% Negro and Puerto Rican; at P.S. 289 - 95%; and at P.S. 83 - 97%. The diversity of the population from which these schools draw their students is thus not reflected in the student body. This seeming homogeneity of student body might be accounted for by numerous reasons. Those most often suggested are: 1) The high per cent of Negro students from the Albany Houses feeding one school; 2) The aging nature of the white population; 3) The presence of many private and parochial schools within easy reach of the general neighborhood; and 4) The movement of younger child-bearing white population to the suburbs. Thus much of the cultural diversity has already been removed from the schools of the area. But the problem addressed by this report can still have a basic impact on the behavior and acceptance of majority toward all minority groups in this and other communites.

## APPROACH

The principals of the three schools kindly made available to the report committee copies of all the social studies books, readers and guides currently used in their schools. These books are listed in an appendix in the back of this report. Each book was read and reviewed by at least one member of the report committee. The social studies books dealing with historical material were read by persons having special knowledge of Negro and Jewish life and history. The readers were reviewed by teachers and parents .

Our approach has not been to act as censor, or even as critic, but rather to document from books now in use what our children are being taught (or not taught) about their own and other groups' life and history. It is hoped that this limited survey will be a useful tool in evaluating the shortcomings in the present treatment of these subjects and in working out ways to improve this treatment.

## THE CURRICULUM BULLETINS

A survey of the Board of Education Curriculum Bulletins will help to yield a broad view of the goals and means of the learning process. For still another and perhaps more cogent reason, such a perusal is logically indicated. Current classroom learnings, especially with the elementary schools, are usually approached through problems, not through textbook content; the logic of this practice dictates the use of many texts and resources. Consequently one cannot meaningfully evaluate the texts without understanding their use in the problem-centered approach.

A study of Social Studies Bulletins reveals concern with the cultures of the various ethnic and "racial" groups populating New York City. Democratic concepts of freedom and equality for all people emerge as central values. The achievement of these values is pursued through a study of the economic, social and political problems of democracy.

One suspects that these generalized curriculum goals are largely unrealized in practice. This suspicion is substantiated somewhat by a recent article in the New York City Board of Education publication, Strengthening Democracy (January, 1961), by Dr. James E. Allen, School Community Coordinator for Districts 12, 13, and 14, entitled "Aids to the Study of Minority Groups." Dr. Allen speaks of the need for improving our text and other resources pertaining to the study of minority groups. He further states that the problem exists both through a lack of material and poor diffusion of those materials already in print. Not dealt with by Dr. Allen, but cited in previous studies of minority groups treatment in New York City Public School texts, is the question of distortion and omission of facts relating to the history of minority groups, especially the Negro.

The Social Studies Bulletins are subdivided into grade groupings. The Kindergarten - Grade Two Bulletin broadly deals with the concept that the child needs to be accepted as he is, in spite of any differences from other children. The curriculum has no fixed arrangement, and its scope is as wide as children's problems, needs and interests. The Grades Three - Four Bulletin speaks of displacing prejudiced attitudes with democratic ones through the process of socialization. The multi "racial" nature of the New York City community is, of course, an excellent resource. The curriculum of this level attempts to imbue the children with the values of freedom and quality through the problem-solving method. Thus, as indicated earlier, many texts are used in pursuing class room learning. Texts are thus tools and not ends. The Grade Five-Six Bulletin deals with relatively more complex concepts of "racial" and ethnic hetrogeneity. The curriculum strives to impart an understanding of the ethnic and cultural diversity among peoples; it stresses the inherent worth and dignity of all groups and sub-cultures. The mandate of such hetrogeneity in a republican society is the developing of attitudes (through education) which, because of the social reality of the interdependence of people insists that people learn to live together with mutual respect and acceptance. Again these

concepts are developed through a method of inductive problem solving. The Grades Seven-Nine Bulletin attempts the development of the attitudes concepts and understandings discussed in the curriculum for Grades Five-Six through the experiences and on the maturation level of a pre-adolescent.

The Social Studies curriculum for grades three to nine, then, is mandated (unlike the earlier grades) in a sequence of increasing content. As it progresses it builds upon and expands the child's world. It is motivated by a concept of democratic equality; in a city of many ethnic and "racial" groups it recognizes the need to imbue children with understanding and respect for others. All this is pursued through the device of problem-solving. Thus texts and other resources are used as needed and of course result in the use of many different and diverse texts and materials.

## THE TREATMENT OF NEGRO HISTORY

We have concentrated our attention on the treatment of certain key issues in American Negro history: the African background, the Negro people during slavery, the Civil War and Reconstruction. Although we found a disturbing number of examples of inaccuracies and even slanderous statements, we feel the greatest failure of the books under discussion are the sins of ommission. Since the full documentation of such sins would require the writing of a full-length textbook, this report has been limited to merely suggesting certain areas for improvement and is not designed to be comprehensive in this respect.

To the serious student of United States history, it is apparent that the Negro people have occupied a place quite distinct from that of other minority groups. In sheer numbers they exceed all others, having constituted ten to twenty percent of the population since the founding of the colonies. Unlike others, who came seeking new opportunities, they were brought here in bondage. They were enslaved until 1865. Because of color, they have been more easily and consistently forced into ghettos. And, finally, perhaps most important of all, they have stood at the very center of our national struggles to increase freedom and democracy in many crucial tests of history, and around them have raged some of the fiercest storms of contention of our national life.

The relentless struggle of the Negro people themselves for their own freedom from bondage, in earlier years, and for full equality in later, have given a special point of emphasis to their remarkable role in our history.

For these reasons, we feel that our special emphasis on the treatment of the Negro in the textbooks under study is merited. We do not mean that treatment of other minority groups should be less well scrutinized; we do believe that the correct treatment of the Negro, once it has been gained, will be the first step in correcting the treatment of all the others.

## THE AFRICAN BACKGROUND

Scholars are still debating about the significance of the African heritage of the people from Africa in the new world. There can, however, no longer be any doubt that there was an African background. Nor can there be any doubt about the harmful effects on a child of African ancestory who learns at great length about the long and proud history of his friends of European ancestry, but never hears a word about his own heritage. The myth of Africa as a dark and uncivilized continent is so prevalent and so vicious in its affect that to counteract it calls for a major and concerted effort. Children should be taught not only about Egypt (which we must remember was an <u>African</u> civilization) but also about the ancient Empire of Ethiopia, the Kingdom of the Congo, the great trading cities of the East Coast of Africa, and, most important, the cultural, economic and political life of the great West African Empires of Ghana, Mali and Songhay which flourished during the middle Ages of European history and into the Nineteenth Century in spite of the ravages of the slave trade.

Of all the subject books, Your Country's Story alone even mentioned that Africans were among the early settlers of America, and this book virtually ignores the fact in the very next sentence by stating that "they (the early settlers) all had much the same experiences." We found no statement in any book which specifically referred to the fact that the Negro people came from Africa. Several statements omit reference to the origin and conditions of the African settlers; Your World and Mine states that the United States was founded by people from many lands who "came for adventure and some to find gold, but most of the reasons had something to do with freedom." Building Our Hemisphere, in commenting on similarities between the early settlers of North and South America, says "but they were all Europeans and had many common interests."

There was no mention in any of the books about the African heritage of Afroamericans. One book, Your World and Mine, did, however, have a section on Africa which will be discussed in more detail later on under "treatment of other cultures."

## THE NEGRO PEOPLE DURING SLAVERY

The existence of slavery in our land of freedom and democracy should be realistically dealt with even on an elementary level. Is it not important that young students learn about the part of our own country's history which resulted in the death and suffering of as many as one hundred million people both here and in Africa, a part of our history which has affected, and continues to this day to affect, virtually every part of our lives? Is it too much to ask that our children at least be taught that the existence of slavery in the United States was a moral evil, inconsistent with our national aspirations to freedom and democracy?

To imply or state, as many of the books do, that Africans were somehow inherently better able than other people to withstand long grueling hours of work in the hot sun is a bit of racist nonsense long since disproved by the facts. As long ago as 1857, the southern Abolitionist, Hinton R. Helper, cited the six-year average of deaths in Charleston, S. C. to show that the death rate among Negroes, as would be expected from their infinitely lower standard of living as compared with whites, was one in 44 to one in 58 for whites.

The very nature of slavery necessitated the total degradation and suppression of the enslaved, including the break-up of family life, prohibition of education, invasion of privacy, inadequate food and shelter, and physical abuse that included mutilation, torture and death. Without such measures the slaveholding system could not have been sustained because human beings will not work without compensation except when driven by force and fear. Under such conditions the contented person was the rare exception.

Any treatment of the history of the Negro people under slavery in the United States which emphasizes only the evils and suffering would, nevertheless, give an incomplete and negative picture of the role of the Negro people. In spite of, and in many cases because of, slavery the Negro people profoundly influenced American history. The existence of suppression by force implies resistance to force. And indeed the Negro people compiled a record rare in all history for heroic resistance to bondage and ended by supplying the edge of power necessary for the victory of Union arms in the Civil War.

More than 300 slave revolts, led by such daring men as Nat Turner, Denmark Vesey and Gabriel Prosser, kept the slaveholders in continual fear during the nearly 250 years of slavery and threatened the foundations of the system. The Underground Railroad, conducted by Negroes and whites together, sapped the power of the slaveholders and added imperishable names to the list of Americans who have fought to advance the cause of freedom - names such as Harriet Tubman, Josiah Henson, John Brown, Thomas Garrett and Levi Coffin. Among Abolitionist speakers and writers, Negroes such as Frederick Douglass, Charles Lenox Remond and J. W. C. Pennington, were of at least equal prominence with whites such as Theodore Weld, Thomas Lloyd Garrison and T. W. Higgonson.

Nothing of this appears in any of the texts under consideration. Your Country's Story alone called slavery an evil. This one statement was contradicted in all other books which mentioned slavery. Your People and Mine described the founding, growth and daily life of Virginia Colony without mentioning the presence of Negro people, although they were shown in the illustrations. Several books give an implied justification of the use of Negro slaves by repeating the myth that they were better suited to long hard work in the hot sun and by implying that they were better off under slavery than they were in Africa. Thus, Founders of Our United States tells us "They (the Negroes) were accustomed to the hot weather because they came from a hot country. They made good workers in the tobacco fields." Our America gives no indication of the horrors and suffering of slavery, but states, "Most Southern people treated their slaves kindly," and, further on, "It is true that many slaves were well cared for." In My Country's Growth we learn that the Negro people "were not useful in the northern mills and factories...(but) on the southern plantations...they worked away quite cheerfully." We are also told that "many of the slaves had snug cabins to live in, plenty to eat, and work that was not too hard for them to do. Most of the slaves seemed happy and contented."

We looked in vain for mention in any of the books of any resistance to slavery by the Negro people. We also looked in vain for mention of the Negro people in any connection other than slavery during this period. In fact, we found no indication that the word Nego meant anything other than slave, even though more than one-half million Negroes were living as freemen at the outbreak of the Civil War.

## THE CIVIL WAR

Any discussion of the Civil War must, in order to be understandable, start with the causes and origin, including the central cause: the slavery of the Negro people. That the slaves were freed as a result of the war should also be made clear. That the Negro people themselves played a major and possibly decisive role in this victory should be emphasized. Well over 200,000 Negroes saw active service in the armed forces, at least 27 of these receiving the Congressional Medal of Honor for heroism in action. Furthermore, Negroes gave invaluable aid to the Union forces throughout the war as laborers, scouts, spies, forragers and guerrilla fighters. President Lincoln himself, discussing the role of Negro troops, said: "Take two hundred thousand men from our side...and we would be compelled to abandon the war in three weeks."

We might also suggest that some moral and legal distinction should be made between the leaders of the Union forces defending the duly elected and constitutional government of the country and the leaders of the Confederacy leading an armed attack on that government and fighting for the "right" to perpetuate the institution of slavery. How can we teach our children respect and loyalty to our government when Robert E. Lee, the only citizen to actually lead an organized, armed attack on our government, is rated as a national hero in our history books?

Three of the books read did mention slavery as a cause of the Civil War, but by failing to give a realistic idea of what slavery meant make it difficu to understand why slavery should cause a war. Most of the books, but not all, mention that the abolition of slavery was a result of the war, but none mention in any way the role of the Negro people in ending slavery. Great Names in American History, gives the impression that Lincoln single handedly freed the slaves..."now, however, he was prepared to wipe out slavery all together."

All of the books treated Robert E. Lee as a hero. A biography of Lee in Heroes, Heroines, and Holidays does not once mention slavery or the Negro people although it tells at length about Lee's role as "leader of the soldiers in the South". In They Helped Make America there is a play about Lee in which he explains his decision to fight for the Confederacy by saying, "I hate slavery, too, as much as any Northerner...(but) slavery can't be done away with by law overnight. It must be done gradually."

RECONSTRUCTION

Certainly the most historically significant fact about the reconstruction period after the end of the Civil War is that in the South for the first and last time there was democratic government with the vote unconditionally guaranteed to all loyal men regardless of color. Negro and white worked side by side in the state and local government as well as in Congress to rebuild the land and to institute many far reaching reforms; most notable among them being the establishment of free public schools for all. That there were unfortunate examples of corruption, incompetence and opportunism during this period need not be denied but these practices were not unique in the Reconstruction South. They had existed and continued to exist not only in the south but in the rest of the country as well. What was far more significant was the great number of examples of sacrifice and devotion to the cause of reconstruction on the part of Negro and white from the north and south.

Just as it is important to make clear the nature of slavery and the role of the Confederacy in attempting to perpetuate that system, it is also important to make clear how this promising new democracy in the south was wiped out by armed terror and intimidation employed by secret societies such as the Ku Klux Klan against the Negro people and the established defenders of constitutional government.

Of the three books which mentioned the reconstruction period only one, Your Country's Story, referred to any positive accomplishment and that was only a brief reference to the establishment of public schools. No mention was made of any of the 22 Negroes who served in Congress or any other contribution of the Negro people during this period. On the contrary, Our America says, "The slaves had been freed, but most of them didn't know how to use their new liberty." My Country's Growth says only that "Many of the Negroes who had been given their freedom wandered about and would not work."

Your Country's Story is the only book which mentions the Ku Klux Klan at all. It is worth quoting at length to show how the terror of the Klan is actually justified and never condemned. "Southern taxpayers became impatient with the general dishonesty and bad management of their state government. Some of the white people decided to organize in societies and bring about a change...The most famous of these secret organizations was a group called The Ku Klux Klan...At first the Ku Klux Klan was used to keep the Negroes, carpetbaggers, and scalawags out of politics, Later, however, some of its members committed serious crimes (our emphasis)."

A NOTE ON MUSIC

The forms of music and dance developed by the Negro people in America, are now recognized as the most important original art form to be developed in this country. The work songs, songs of sorrow and jubilee, the blues and forms of jazz created by the Negro people can be recognized as the basis not only of virtually all of our popular music today, but also of much of the serious music by American composers. It is creating a stereoptyped image to attribute this musical contribution to some kind of inherited group aptitude. It can be adequately explained by an understanding of the highly developed and sophisticated African musical heritage combined with the social and economic subjugation in this country which demanded a cultural and social expression and at the same time virtually limited that expression to music and dance which required little equipment other than the human body. Although this art was developed by nameless folk artists, it should not be forgotten that it was the trained, professional Negro artists themselves who developed this musical heritage and presented it to the world. Prominent among these were W. C. Handy, J. Rosemond Johnson, Will Marion Cook, Harry T. Burleigh and Roland Hayes. Lest there be any doubt, we believe that the parodies of Afroamerican music by Stephen Foster, which glorify the days of slavery and ridicule the Negro people, not only have no place in this discussion, but, furthermore, have no place in the curriculum of our public schools. Yet in many books, Foster is the only American composer mentioned.

Your Country's Story does briefly but inadequately mention cultural contributions of the Negro. "Education and science were not the only field in which the Negroes became outstanding. Many became famous writers, musicians, painters, dancers, singers, and doctors. And the race's musical abilities have given the world the religious songs called spirituals and the peculiar kind of jazz called the blues (our emphasis)." We might ask who gave the world the other "non-peculiar" kinds of jazz? The only jazz musicians mentioned are George Gershwin and Paul Whiteman.

Heroes, Heroines and Holidays makes no mention of the Negro people's musical contributions but does present a biography of Stephen Foster as a great American composer of songs such as the chauvinist "Old Black Joe", "My Old Kentucky Home" and "Old Folks at Home."

A NOTE ON NAMES

Especially in the elementary grades it is important to teach children about specific people with whom they can identify rather than to talk about generalities. Aside from "Old Black Joe" and "Uncle Tom" the only Negroes from the United States mentioned specifically in any of the books were Booker T. Washington and George Washington Carver. The latter was the subject of a biography in Great Names in American History. Carver and Washington were the subject of several paragraphs each in Your Country's Story.

## TREATMENT OF JEWISH LIFE AND HISTORY

By and large the textbooks reviewed for this study are interesting, often exciting, some pulsing with our machines, inventions and material progress. The child is introduced to our world in ingenious ways. The past is often linked with the present to give a sense of continuity. But the child does not learn of the human forces that shape our world because the books do not present people as they truly exist. Children of minority groups cannot identify with the children of the families they find in the textbooks for the books give the impression that we are a homogenous people. To present textbooks which truly reflect American life, the diversity of people and culture, the many ways of working and living is, we feel the correct approach.

It would be logical after reading the elementary textbooks used in this study to conclude that Jews do not exist in this country. Except for three titles, and here the references are minor, there is no mention whatever of Jewish life in the United States. How is it possible to teach realistically about our multiracial and plural cultural society without including the Jews? Are we not perpetuating many myths by excluding Jews from elementary textbooks?

The Jews who arrived in New Amsterdam in 1654 seeking but not finding religious freedom, were among our earliest fighters for equality. It took many years of severe struggle before they won equal rights of citizenship, rights that entitled them to trade, to own property and to join the militia so that they could and did participate in the revolution. There were many heroes among the Jews fighting in the revolution but only one is mentioned in two of all the books examined. Great Names in Our Country's Story presents Haym Salomon rather well but fails to indicate that Jews made other outstanding contributions to the war effort. It also mentions Enrico Fermi, the physicist, but fails to point out that he was a Jew who fled his native Italy because of religious persecution.

In the fight for the abolition of slavery, and in the Civil War, most Jews were extremely active and again succeeded in rendering the country a fine service. Yet when we read Great Names in American History we do not find an Ernestine Rose, a Jewish woman who devoted her life to the cause of uplifting humanity and who risked her life many times in fighting to abolish slavery. We find with the exception of Dr. George Washington Carver, all the characters in this book are of Anglo-Saxon origin. This is a typical pattern for all the books devoted to heroes.

As a result of terrible persecution one and one-half million Jews, from 1900-1914, migrated to our country. They came seeking religious freedom, education and vocational opportunities. They came bringing their many skills, their cultural institutions and their great hunger for a better life. It is generally acknowledged that the contributions made by the Jews in the building of the trade unions, in the sciences, the professions, and the arts are far beyond their numbers here. In examining Working Together we found no mention of these contributions. It would require a complete change in the author's approach to make it acceptable, e.g. the chapter on

food could be utilized to demonstrate the various national foods; the section on clothing could devote space to the contributions of the Jewish people to the trade union movement in the clothing industry. The section on language could show that many languages are still used in this country, e.g. Yiddish and Hebrew illustrations of poems and songs.

The Jews have joined with especial courage, as a people, in issues concerning the treatment of minorities, questions of freedom of speech and press, and in most other areas of American life where our national aspirations to freedom and equality have needed champions. In particular, they have shown a willingness to fight for the country of their choice. In both World Wars of the twentieth century, the percentage of Jews in the United States armed services exceeded the national average. Six hundred thousand wore the uniform in the Second World War, and more than 35,000 were casualties.

In view of these facts, and in view of the fact that the Jewish people here have suffered from numerous forms of discrimination and commonly suffer from slander, it would seem logical that the text-books under study would describe the role of Jewish people in our history. However, in reading Our Country's Story the authors talk about early colonial settlements and the Revolution without mentioning the Jews. They tell about the Second World War without mentioning any contributions by Jewish people, nor do they mention what occurred to the Jewish people of Europe. The slaughter of six million European Jews by the German people under the leadership of the Nazi party is mentioned in only one of the texts, and there the mention is rather mild in form and not clearly related to the whole struggle of the people against Facism.

Today the United States has among its citizens the largest number of Jews of any country. Among the 5 million Jews living in the United States there have always been and are well known people making outstanding contributions in all walks of life. To cite a few: Judges Brandeis, Cardozo, and Frankfurter; Scientists Oppenheimer, Salk and Einstein; Musicians Heifitz and Berlin; Playwright Arthur Miller; Sport Hank Greenberg; Actor Paul Muni. But in reading Ways of Our Land we learn nothing of these or of any other Jewish people. This books lists some of the national minorities that make up the population of New York City, but fails entirely to mention three among the largest groups; Negro, Jewish and Puerto Rican.

In the treatment of Jewish life and history, we find the textbooks under study grossly inadequate to the task of preparing the young student to understand the realities of the world in which he lives, or to grasp the importance of recognizing and valuing the differences among people.

## TREATMENT OF OTHER CULTURES

The following brief comments about the treatment of minority groups other than Negro and Jewish in our community's text books indicate that the rather poor treatment given the history and culture of these two groups is by no means atypical. The following three points in particular recurred with distressing regularity in discussion of other cultures in these books.

1. The use of the discredited term "native" in referring especially to non-white inhabitants of colonial and former colonial countries.

2. The use of chauvinistic, racist stereotypes in referring to a whole people such as "happy", "carefree", "contented," etc.

3. An attempt to explain or justify the conditions of poverty under which people are forced to live by implying that they are "used to it."

LATIN AMERICA

Building Our Hemisphere deals in some detail with the life and history of each of our Latin American neighbors. The text is, however, unfortunately sprinkled with stereotype-reinforcing statements about the people of these countries: The Aztecs of Mexico are referred to as "superstitious" people who stood in awe of Cortez and his men who had "fair skin". The only mention of the original inhabitants of the Caribbean tells us that they were called "Caribs or Cannibals." Sometimes they were just called "eaters of man." There is considerable scholarly dispute over the origin and meaning of the name Carib. Whether or not the word did mean cannibal at one time, there is little evidence that cannibalism was practiced in the Caribbean at the time under discussion. The pre-Columbian Mexicans were also described as "a patient, cheerful people contented with a simple life." The people of Puerto Rico are described as "carefree, gathering to sing and to talk in a happy, light-hearted manner."

Neighbors in Latin America also gives a description of the life and history of each of the Latin American countries. The author does, however, make several distressing comments about the people of these countries. We are told, for instance, that the "Haitians have learned to be happy with what they have." Also, in several pages devoted to Haiti there is not one mention of Toussant L'Ouverture, probably the greatest hero of any of the Caribbean countries. The author apparently regards the people of Jamaica as being in the same category as the products of that island's fields and mines for he says the "second most important export of Jamaica is people." He mentions that many Africans were brought to Brazil to work in the sugar fields and that "there black people could do well the hard work in the hot, wet coast land." We are also told that the Negro people of Columbia "seem to like this warm lowland better than either white people or Indians do."

ASIANS IN AMERICA

The most significant aspect of the treatment of Asian peoples in the Americas is the almost complete silence on the topic in all of the books read. There was a brief mention of the customs and religions of the West Indian people of Trinidad and Jamaica in Building Our Hemisphere. The only other reference was a very distressing paragraph in Your Country's Story about the Chinese and Japanese immigrants to the West coast of the United States which says the "peoples of these races had, over hundreds of years, become accustomed to eating and waring less and to needing less shelter than any peoples of the Western races. They could also work longer hours and were willing to do so." (our emphasis)

AFRICA

A unit on Africa in Your World and Mine was the only discussion of this continent in any of the books reviewed, aside from several pages about ancient Egypt in the same book. Following is a brief review of this books' treatment of a subject so vitally important not only to understanding the history of the people of African descent in America but to a knowledge of today's rapidly changing world as well.

In a discussion of the earliest civilizations Your World and Mine mentions Egypt as one of the first cradles of civilization, but there is very little description of this civilization and the impression is made that this was not an African civilization; at one point reference is made to "Egypt and other Mediterranean lands." There is also the implication that there was no civilization in any other part of Africa; "Vast stretches of desert lie to the South, which kept civilized ways from spreading southward into Africa." And, again, "but this culture (Egyptian) spread southward very slowly." The implication here is that the great empires of West Africa, the Kingdom of the Congo and the prosperous trading cities of East Africa, etc. could not have developed independently of Mediterranean culture. The author also ignores the historical fact that much of what we know as Egyptian civilization actually moved from south to north from Ethiopia and the Kushite kingdoms of the Sudan up the Nile into Egypt. It is very likely that the author is completely ignorant of these sub-Sahara civilizations since no mention at all is made of them.

The author's extreme ethno-centricity is demonstrated when she asks the question "Why is it that much of Africa has been so slow to learn about Western civilization?" This question could be answered in a grim way by saying that Africa learned all too much and all too quickly about Western "civilization" during the slave trade. The author devoted a single sentence to the slave trade without any explanation or condemnation.

The author's patronizing ignorance of Africa is further revealed in a story which introduces the unit on Africa. The story is about the young son of an African chief, Mpombo, sent by his father to learn the "white man's law" at a distant missionary outpost. The missionary patronizingly says, "For you, Mpombo, as for Africa, there is a long road ahead. You will indeed need all the courage and all the strength of a chief."

The author does mention that much of Africa is "controlled and governed by Europeans mostly for their own benefit. Very little attention has been paid to the needs and desires of the natives themselves." Then goes on to repeat the usual argument of the colonialist powers: "Many Europeans and Americans feel that the native Africans are not yet ready to govern themselves." The author sees the solution to the problem of Africa to be more European education and investment. No mention is made of African nationalism or the need and desire for political and economic independence.

TREATMENT OF AMERICAN INDIANS

In our immediate community are some 800 American Indians and many persons of mixed Indian ancestry. Therefore, outside the general question of proper education for democracy, the treatment of this group has a particular immediacy for us.

We find the textbooks to treat the Indian as an exotic - a person of strange habits, who lives in quaint communities and practices unfamiliar religious customs. In none of the texts do we find the Indians of history identified with their descendents today in a clear pattern of exposition. Further, the policies of virtual destruction of the national life of the Indians pursued by the European settlers and by their descendents in the United States, the extermination of whole nations of the Indians, is lightly glossed over or never mentioned at all. Instead, "Indian fighters" are made heroes, and no true picture of the Indian can be discerned.

## THE BASIC READERS

This section is primarily devoted to the basic readers used in the elementary school. The readers fall into three categories, Primary (1st and 2nd grade), Middle or Intermediate (3rd and 4th grades) and Upper (5th and 6th grades).

The Primary group consists of a similar story form, despite the different publishers represented, as follows: White, Protestant, American from a nebulous ancestry; a family group - husband with a white collar job and briefcase, wife who is at home, three children, older boy, younger sister, and the baby, who is usually female. There are generally two pets, a dog and a cat. The setting is a quasi-suburban area, with occasional trips to the city. General appearance for all is blond hair and blue eyes, with the older males having browner looking hair.

There is little personal identification with family and children possible No attempt is made to present any relation to others - neighbors, suburban and city living, the state, nation or the world.

The Intermediate has essentially the same type of basic reader. Supplementary readers present original stories, fables, old and new, biographical and historical reports of the past and present day. The short stories seem well written, most are of Anglo, French, German caucasoid group. People from other cultures are presented in the so-called "masses" or "peasant" group, never in a group in which the children may relate. The fables, old and new, are of the Anglo-Saxon, Danish origin, there seemed to be no stories from any but European or North American sources.

The Upper basic reader presents more difficult material, in the form of collections of stories related to the particular curriculum of these grades. It is not always clear which stories are fiction or non-fiction, except perhaps those in which important historical personages are mentioned. Fiction, non-fiction fables, fairy tales and true life experiences seem to be mixed.

National, racial, cultural and ethnic differences, are <u>just not</u> presented in 99 percent of these stories, and if they are, it is in a "quanit" manner. Offensiveness exists in the complete ommission of cultural, ethnic, racial and sometimes even personal differences. Negro, Jewish, Puerto Rican, Chinese, Cuban, West Indian, Asian and American children are unmentioned, with those of Middle and Southern and Slavic European heritage. New York City children in a heterogeneous New York atmosphere, could not possibly find any sort of identification, to say nothing about learning of the world they live in.

There is a remarkable fondness of the authors to play things safe; to offend no one living in a small town, or for that matter any kind of town or city. And, if this security were not enough, to secure it and seal it off by absenting every conceivable minority group from the American scene.

CONCLUSIONS

1. That the text books on social science and the readers used in the subject schools are, in respect to the treatment of the life and history of minority groups, in a majority of cases uninformative, and, in a distressing number of cases, actually misleading and offensive. The latter is especially true in the treatment of Negro history.

2. That this failure of the school books does not reflect, and is in fact in direct opposition to, the official policy of the New York Board of Education as expressed in their official publications, specifically the Curriculum Bulletins.

3. That in view of the Board of Education's stated policy, the inter-cultural nature of the community, the special concern of the principals of the subject schools and a general knowledge of other school books, the basic practical problem is the lack of suitable books and not one of poor selection.

4. That the final solution to the problem will come only with a change in the attitude and approach of the text book publishing industry.

5. That the harmful effects of the existing text books are so great and so far reaching on the present generation of students, that it would be irresponsible to wait for an improvement in the text books without seeking ways and means to counteract those effects and to improve the teaching of the life and history of minority groups by the use of available supplementary material and resources.

APPENDIX

A list of books reviewed for this report listed by publisher

Social Studies Text Books

Allyn and Bacon, Inc.
- Our America

Charles Scribner and Sons
- Building Our Hemisphere

Follett Publishing Company
- Big City Government
- Big City Homes
- Big City Transportation
- Big City Water Supply
- Big City Workers
- Exploring Far and Near
- Working Together

Ginn and Co.
- Heroes, Heroines and Holidays
- Your Country's Story
- Your People and Mine
- Your World and Mine

Houghton Mifflin Co.
- They Helped Make America

The John C. Winston Company
- Neighbors in Latin America

Laidlaw Bros.
- Great Names in American History
- Great Names in Our Country's Story

Noble and Noble
- Founders of Our United States
- New York Past and Present

Silver Burdett Co.
- Ways of Our Land
- The World Around Us

Webster Publishing Company
- My Country's Beginnings
- My Country's Growth

SUMMARY OF COURSE – given at new school on desegr. 1962-3

Milgram came up again and again, though admittedly to get reaction from the class, that the Negroes do not avail themselves, that they are defeating themselves. Gave examples of how hard it is to rent his housing, how a man who builds interracial housing in Philly is going back to work on the conventional basis, becuase he can't do it; that Negroes don't move into integrated neighborhoods, and take advantage of the schools, etc. He may be rights, but the answer that June Shagaloff is as good as any -- then the ggencies are not doing their job.

Milgram also forgets, I think, that xx his Negro friends are part of their own power strucutre -- the Negro minister, the head of COHR, xxxx these people have important jobs, and are doing much fo forge ahead, but like all leadership, have forfeited some of their contact with the "grass roots" to get where they are. x The Negro does not want to face discrimination; life is unsure. When they look for an apartment in an integrated area, chances are betther than not that they will be refused. they need reassurance and direction, and confidence that "the Man" is not going to thwart them with every step. And there is little guarantee of this.

SAN FRANCISCO CORE (CONGRESS OF RACIAL EQUALITY)
1821 Fillmore Street
San Francisco 15, California

CORE SUBMISSION TO STATE CURRICULUM COMMISSION
AND THE STATE BOARD OF EDUCATION 10 JAN. 1964
SAN FRANCISCO 135 VAN NESS AVENUE

MR. CHAIRMAN, MEMBERS OF THE STATE BOARD OF EDUCATION, THE STATE CURRICULUM COMMISSION AND FELLOW GUESTS:

Since the task of free education is to produce adults able to function in oursociety and not merely to give them an opportunity for this, and since this would require that they be able to relate their responsibilities as citizens to a historical and socio-economic background, it is therefore necessary that the educational system take into account and correct factors which tend to prevent the children of racial and religious minorities from learning these things. For instance, it has long been generally accepted that textbooks, especially in the primary grades, should use the principle of identification, namely that children can identify more readily with other children who look, act and talk like themselves. This initial act of identification launches the child in the process of learning. However, textbooks now in use frequently do not present a fair portrayal of the contributions of minority groups and their members to the history and culture of California, the United States and the world, consequently minority group members come to feel that they have no history, no culture, no part in society and therefore do not seek to take a constructive part in it. If the schools of the State of California are to do a proper job, the following criteria for textbooks must be applied in executing the provisions of the April 3, 1962 Senate Concurrent Resolution No. 29 now in effect:

1. that all textbooks which utilize the principle of identification should include a fair treatment of minority groups not only in the illustrations but also in the story text; and

2. that all textbooks dealing with the history, geography, etc., of California, the United States and the world, should include a just representation of the contributions of members of different minority groups.

If the above criteria are used to measure the adequacy of the 4th grade social studies textbooks now under consideration for adoption by the State Board of Education, the following comments and criticisms may be found both valid and constructive:

1. Although there are several books in the social studies area dealing entirely with foreign cultural groups, namely two books on Japan (Japan by Lena Minugh and Nancy Cory, Franklin Publications, Inc., Pasadena, Calif., 1963) and one on Africa (Africa: With Focus on Nigeria by Clarence and Helen Fielstra, Franklin Publications, Inc., 1963), and although these books are to be used in an inter-cultural comparison study with that of our own American culture, it appears both ironic and unfortunate that the accompanying books dealing with California's own history with one or two exceptions, completely ignore the existence or contributions of the minority groups who have settled in California, namely the Japanes-American and the American-Negro, not to mention other minority groups.

2. One outstanding exception to this general observation is the book entitled California's Own History (by John and LaRae Caughey, the Century Schoolbook Press, San Francisco, 1963). The special attention evidently given to depict accurately and fairly the many different ethnic groups which have shaped California's history is witnessed by the inclusion of minority g oups in the development of our State. Although there may be some minor technical errors in this book, and we admit our limited qualifications to make such judgments, we feel that its positive approaches more than cancels out any small inaccuracies. Furthermore, this book should be adopted by the State Board of Education as a statewide text since it is the only one up for adoption which attempts to objectively execute the provisions set forth in the Senate Concurrent Resolution No. 29. Should any other text dealing with California's history be adopted and this particular one rejected, it would be a grave error in education policy. We hope that the caliber of this book will be kept in mind when other books are considered.

CORE is not the only group which holds these opinions. To quote the December 8, 1963 issue of the San Francisco Chronicle, the recent Los Angeles meeting of the California Teachers Association urged that textbooks and other teaching materials should be chosen "which reflect appropriately and adequately the complex heritage of American culture." In reference to the latter, the San Francisco public school system has been conduction its own educational experiment through the SCIP Program of Compensatory Education, suuported by a Ford Foundation grant. Especially praiseworthy is the high degree of positive progress made on the part of the students who were selected to use these new and experimental materials and who participated in cultural, life-enrichening trips to farms and historical sites in the Bay Area. We hope that this experimental project will be permanently adopted not only by the San Francisco Board of Education but also by all other California School Boards.

Therefore, on the basis of our previous statements and on the weight of our evaluation of several of the 4th grade social studies texts pending adoption we of the Education Committee of San Francisco CORE would advocate the following:

1. that more serious attention and speical efforts be expended by book publishers to objectively portray minority groups in textbooks;

2. that publishers be duly notified and encouraged by the State Concurrent Resolution No. 29 in their textbook materials both literally and pictorially; and

3. that the California State Boare of Education and the State Curriculum Commission do everything within their constitutional powers to initiate, direct and adopt measures for the speedy and effective achievement of these goals.

Respectfully submitted:

_____

# Erasing Textbook Bias: A Project for Catholics

By Jo-ann Price
*Of The Herald Tribune Staff*

A three-year study urging revision of Roman Catholic textbook material to erase negative images and distortions relating to Jews and Protestants was released here yesterday by the American Jewish Committee in cooperation with St. Louis University, a Jesuit institution.

The analysis, initiated by the AJC and hailed as long overdue by the St. Louis Jesuits who supervised it, will be distributed as a corrective measure among publishers of Catholic school books. The report's authors hope it will serve as a guide for future manuscripts.

The study consists of dissertations submitted for doctor of philosophy degrees by three teaching nuns supervised by the Rev. Trafford P. Mahar, S. J., director of the university's department of education. Findings were released at the close of the AJC 57th annual meeting at the New York Hilton Hotel.

The study found that Catholic religious textbooks are "overwhelmingly positive" in references to racial and ethnic groups. They also scored high on the plus side in "general" intergroup teachings alluding to "all men."

But when it came to religious references centered on the Jewish rejection of Christianity, the Crucifixion and the Pharisees, many of the authors abounded in bias, inaccuracy and distortion, the report said. They displayed negative attitudes, as well, when they attempted to describe or interpret historical conflicts with Protestants over doctrinal differences with Catholicism, the Reformation and areas of contemporary Catholic-Protestant competition.

"Some of our Catholic materials," Father Mahar said in reference to a series of Catholic Bible history textbooks published 35 to 40 years ago, "were incredibly awful, perfectly horrible, and the art was terrible. They were used in grammar schools and taught to little kids at an impressionable age."

Not infrequently, Catholic children, taught that "the Jews crucified Christ," would become prejudiced toward Jews, he said. "There was never any differentiation that some Jews, in one little moment of history, were at the Crucifixion." Father Mahar said.

Likewise, Catholic textbook references to "hard-hearted" Protestants revolting against Catholicism "never left room for good will, sound motivation and objectively moral principles of conscience."

The nuns participating in the study were Sister Rose Albert Thering, Dominican sister of Madison, Wis.; Sister Rita Mudd of Helena, Mont., and Sister Mary Linus Gleason of Dodge City, Kans.

The analysis is the second of three reports about prejudice in religious teaching. The studies are being made under the sponsorship of the A. J. C., a human relations agency.

One of the other reports is "Faith and Prejudice," a seven-year self-study of Protestant materials completed at Yale University Divinity School and published last year by Yale University Press. A Jewish self-study has been completed at Dropsie College for Hebrew and Cognate Learning, with findings soon to be released.

Rabbi Marc Tanenbaum, AJC Interreligious Affairs director, noted that the wish of religious groups to discover prejudicial teachings in their own ranks "grew out of their common experience in Europe during the Nazi holocaust."

"Christian leaders have tried to find out what it was in their education that caused millions of Christians to reject Jews," he said. Church leaders, notably Jesuits, in Europe and Latin America have spearheaded this research.

The Rev. Paul C. Reinert, president of St. Louis University, commented that while racial prejudice may be America's "most pressing concern" at present, "interreligious relationships pose more complex problems" in the preparation of religious textbooks.

## *From The Textbooks*

*Catholic school textbooks studied by researchers in a 3-year project at St. Louis University, a Jesuit institution, have been found to contain negative teachings and distortions about Jews and Protestants. Here are some examples cited in the study, which urged that Catholic authors and publishers correct such statements:*

**ON PROTESTANTISM:** "Protestantism granted concessions in an attempt to attract all who lacked courage to live up to the high standard proposed by Christ and the Church. Protestantism today is rapidly deteriorating, while the unchanging spiritual Church has grown ever stronger with the years."

**ON NON-CATHOLICS:** "Catholics should avoid all non-Catholics."

**ON MARTIN LUTHER:** "Luther's unrestrained passions led him to sin; and in his pride he refused to have his life be considered sin. He worked out, therefore, a different teaching, in which the ideas of sin and of goodness were changed to correspond to what it pleased him at the time to consider sin or virtue. His pleasure, rather than truth, was to be the standard for measuring right and wrong."

**ON REFORMATION LEADERS:** "Obstinate heretic" . . . "Self-satisfied monarch" . . . "Positively immoral" . . . "Drunken brewer" . . . "Adulterous tyrant."

**ON LATIN-AMERICAN CHURCH:** Protestantism and Communism have hindered the Catholic Church in South America. . . ."

**ON JEWS AND CHRIST:** "Why did the Jews commit the great sin of putting God Himself to death? It was because our Lord told them the Truth, because He preached a divine doctrine that displeased them, and because He told them to give up their wicked ways."

**ON BLAME FOR CHRIST'S DEATH:** "The worst deed of the Jewish people, the Murder of the Messias . . ."

**CRUCIFIXION:** "The Jews wanted to disgrace Christ by having Him die on the Cross."

**JEWISH REJECTION OF CHRISTIANITY:** "The Jews as a Nation refused to accept Christ, and since His time they have been wanderers on the earth without a temple, or a sacrifice, and without the Messias."

# CATALOGUE OF TRAINING MATERIALS

prepared by:

Parent Leadership Training Program
United Bronx Parents
791 Prospect Avenue
Bronx, New York

Evelina Antonetty
Executive Director

Ellen Lurie
Training Director

---

All training material described in this catalogue was prepared for use in the Parent Leadership Training Programs conducted by United Bronx Parents during the 1967 school year and during summer 1967.

Additional material is being written weekly. The United Bronx Parents hopes to get a private or government grant for its training programs, in which case we plan to reduce the prices listed in this catalogue.

Our bi-lingual experienced community organization and training staff is available for consultation services, and we are happy to work with any community or parent group who would like to discuss the various ways in which the enclosed material might be used, or who would like an individual training program especially designed for a specific local need.

Please use the order blank that appears on the last page of this catalogue.

September, 1967

The material listed in this catalogue is available in single copies at the rate of 10¢ per page, or in quantity (6¢ page for 2 - 10 copies); ($_4$¢ page for 11 copies or more).

** Means that both a Spanish and English version are available

Most of the material is incorporated into one of a number of kits. Each kit has a grouping of selected items, geared to cover a particular series of parent edueation workshops. The kits are available as packages and arrangements can be made for discounts to organizations wishing to purchase quantity of any particular kit.

| | | | PRICE FOR SINGLE KIT |
|---|---|---|---|
| Kit # 1: | LEADERSHIP SKILLS | 12 items plus explanation for using the material | $3.90 |
| Kit # 2: | TEACHER KIT | 15 items | $2.85 |
| Kit # 3: | CURRICULUM | 10 Items | $2.70 |
| Kit # 4: | DISCIPLINE & SUSPENSIONS | 7 Items | $1.50 |
| Kit # 5: | HOW TO EVALUATE YOUR SCHOOL | 9 Items | $3,50 |
| Kit # 6: | WHAT TO DO IF YOUR CHILD'S SCHOOL IS OVERCROWDED | | $1.00 |

A complete description of the materials in each kit, as well as a list of some miscellaneous material, follows.

KIT #1: LEADERSHIP SKILLS

| ITEM # | TITLE & DESCRIPTION | NO. OF PAGES |
|---|---|---|
| 1-1 | Suggestions for Using Material in This Kit<br>Brief description of how this material was used by United Bronx Parents | 3 |
| 1-2 | What Kind of Situation Helps Adults Learn Easily?<br>A brief list of ingredients ,suggesting some guidelines for adult discussion leaders. Includes some quotes from Dr. Spock concerning the relationship between parents and professionals. | 2 |
| 1-3 | Using Group Selection to Recruit Traininees<br>A list of very specific steps which might be followed in recruiting trainees or staff for any kind of program | 3 |
| 1-4 | How to Take a Problem Inventory<br>A simple outline of five steps community workers or parents might take if they want to find out the kinds of educational problems facing their neighbors. Includes several suggestions for taking a "resource" inventory at the same time | 1 |
| 1-5 | Checklist for Trainees and Community Workers to Help them decide what Educational Issues they Want to study during their training program<br>This is an excellent tool for a trainer or workshop chairman to use. It lists more than 35 current educational issues, and is set up like a "ballot" so that trainees can mark the 5 or 10 issues they want the training program to cover. | 2 |
| 1-6* | Sample Record Forms<br>a) Form to use when taking down a parent-complaint (simplified Spanish-English intake form; good to use for door-to-door interviews also) | 1 |
| | b) Form to help Trainees Categorize problems (Suggests format for a wall chart or newsprint record, summarizing a number of complaints) | 1 |
| | c) Form for each trainee to record weekly summary (Useful for teaching recording skills) (Spanish-English) | 1 |
| 1-7 | Steps to Take to get a Problem Solved<br>This one page chart suggests a referral procedure, showing charts listing possible resources to tap on the local, community and city-wide level. | 1 |

NOTE: It is strongly suggested that all the material in this kit require individual training sessions for each individual skill.

KIT # 1: LEADERSHIP SKILLS (con't.)

| ITEM # | TITLE & DESCRIPTION | NO. OF PAGES |
|---|---|---|
| 1-8 | The Community Speaks (Discussion Stimulator) Copy of a flyer distributed in the South Bronx community designed to stimulate discussion by parents and community workers around their role as "agency staff" and "community representatives" Which gets first priority? | 1 |
| 1-9 | Special Packet of Training Materials to Assist Parents in Preparing for a Meeting with A Board of Education Official | 16 |
| | *a) Suggested Steps to Take to Prepare for Your Meeting (Available in Spanish & English) Seven steps to take before meeting with an Official of the Board of Education | 2 |
| | *b) Role Play Activity to help groups prepare by Practicing or "role-playing" a meeting with the Board of Education. Includes 2 page detailed instructions to trainer, "script" for parents, "script" for Board of Education, and observers checklist. (Spanish and English) | 7 |
| | * c) Form to use to Record what happens in Your Meeting with Board of Education(Spanish & English) | 2 |
| | d) Guide to Board of Education Doubletalk A humorous (but helpful) listing of the kinds of terminology most often used by city "professionals" with an appropriate translation | 2 |
| | e) How To Detect Propaganda An adaptation of the classic political propagenda techniques (i.e. "Name-Calling","Glittering Generalities", etc.) with explanations using current Board of Education examples. | 3 |
| 1-10* | Checklist for Making Sure you Have Good Meetings Seven steps to take to insure a successful meeting, and some questions which probe the meaning of the word "successful"(Available in Spanish & English) | 3 |
| 1-11 | Simulated Field Problem to help trainees analyze the basic requirements for successful community action. This activity is based upon an imaginary invitation to attend a meeting in the Borough Pres! office, and a series of instructions to the trainer help to set up a competitive community situation, useful as a preliminary training session on the requirements of community organization. | 2 |

KIT # 1: LEADERSHIP SKILLS (con't)

| ITEM # | TITLE AND DESCRIPTION | NO. PAGES |
|---|---|---|
| 1-12 | Checklist of Crucial Steps to Follow for Successful Community Action | 1 |
| 1-13 | Suggested Steps for Conducting a "Feedback" Session - using an example from a Bronx session, helpful in showing parents value of evaluating training and workshops | 1 |
| ADDITIONAL RELATED MATERIAL | | |
| 1-14A | Outline of Parent Leadership Training Program, Summer 1967 | 5 |
| 1-14B | Brief Description of Summer Training Program - including weekly training topics, field assignments, structure, etc. | 9 |
| 1-15 | Referral Sources - Directory of Public and Private Agencies which might be utilized for problems such as Children with Sight problems, hearing difficulties, reading problems, etc. (Good for New York City only) | 7 |
| 1-16 | Structure of the NYC Board of Education (Prepared by EQUAL for United Bronx Parents) includes outline of Capital and Expense Budget procedures, how Board of Education selected, names and addresses of Board of Estimate, Selection Panel, City Council, City Planning Commission, Board of Examiners, etc. | 27 |

KIT # 2: TEACHER KIT

| | | |
|---|---|---|
| 2-1 | What is a Good Teacher? A Discussion Stimulator listing 6 successful teacher "types" | 2 |
| 2-2 | What Do Pupils Like and Dislike in Teachers? Discussion Stimulator which helps draw out a discussion of the kind of characteristics parents look for in teachers | 2 |
| 2-3 | Do Teachers Expect High Performance from Ghetto Kids? A Discussion Stimulator excerpt from the book"The School Children" | 1 |
| 2-4 | Copy of an Actual Letter from a NYC Principal to his teachers just before school opens (excerpt from "Pickets at the Gate) | 2 |

KIT # 2: TEACHER KIT

| ITEM # | TITLE AND DESCRIPTION | NO.OF PAGES |
|---|---|---|
| 2-5 | Is There any Difference in the Way Negro and White Teachers View Their Students? Summary of study showing that teachers' race influences their opinion of their students' ability | 2 |
| 2-6 | Copy of United Bronx Parents Press Release during United Federation of Teachers Strike, summarizing Parents' position on strike, and listing some parent demands (Useful also as a discussion stimulator in preparation for a press conference on any subject) | 2 |
| 2-7* | Copy of parent flyer during the strike (Spanish-English) (Good also as a discussion stimulator on topic: How to draw up a good flyer) | 1 |
| 2-8 | Analysis of "What the Teachers Won" | 3 |
| 2-9 | Rights Teachers have that Parents Should Have | 1 |
| 2-10* | Copy of Letter from United Bronx Parents to Parent Volunteers During the Strike (raising the question of the permanent use of parents as teacher assistants in classrooms) | 1 |
| 2-11 | Summary of the Afro-American Teachers Union Position on the UFT strike | 4 |
| 2-12 | What is Merit Pay - Another way to pay Teachers based on performance and ability | 2 |
| 2-13 | A suburban school system's philosophy (What it expects from its teachers) | 1 |
| 2-14 | What is Keeping Us from getting Quality Teachers? A list of the various obstacles | 1 |
| 2-15 | Action Steps for Parents Includes a Checklist for parents to use in evaluating teacher performance; and a questionaire for parents to use to obtain detailed information about the quality of the teaching staff in their school. Also a list of promising new programs for improving teacher performance . | 6 |

KIT # 3: CURRICULUM

| ITEM # | TITLE AND DESCRIPTION, | NO. OF PAGES |
|---|---|---|
| 3-1 * | Standard Curriculum for Grades 1-6 including promotional and homework policy for each grade, based upon NYC Board of Education regulations | 6 |
| 3-2 | Copy of NYC Board of Education Circular: Grade Placement and Promotional Policies | 5 |
| 3-3 | Suggested questions for parents to ask teachers and principals regarding promotional policy (prepared by EQUAL) | 2 |
| 3-4 | Copy of NYC Board of Education Circular: Placement in IGC Classes (Intellectually Gifted Classes) | 4 |
| 3-5 | Copy of NYC Board of Education Circular: Acceleration & Enrichment Policies in Junior High and Intermediate Schools | 3 |
| 3-6 | Copy of NYC Board of Education Circular: Homework Policy in Elementary Schools | 2 |
| 3-7 | Suggestions for Parents who have questions regarding homework policy | 2 |
| 3-8 | Copy of NYC Board of Education: Elementary School Report Card | 1 |
| 3-9 | Suggestions for Parents who have questions regarding report cards | 2 |
| 3-10 | Directory of Names , addresses, and phone numbers of Division Heads, NYC Board of Education Elementary Schools- prepared by EQUAL | 2 |

KIT # 4: DISCIPLINE AND SUSPENSIONS

| | | |
|---|---|---|
| 4-1 | Explanation and Suggested Use for Materials in this kit | 1 |
| 4-2 | Treasure Hunt for Parents who Blame Themselves An unusual group activity which helps parents who have always lived in a ghetto neighborhood compare the resources available to families in a middle income neighborhood | 2 |
| 4-3 | Role Play Activity for Parents to demonstrate how people in power put pressure on minority groups to conform | 1 |

KIT # 4: DISCIPLINE AND SUSPENSIONS (con't)

| ITEM # | TITLE AND DESCRIPTION | NO. OF PAGES |
|---|---|---|
| 4-4* | A Drop Out Speaks of School - a discussion stimulator - an excerpt from"Pickets at the Gate" | 1 |
| 4-5 | A Checklist: How do you know if your kid is bad, or if your kid has a bad teacher? | 2 |
| 4-6 | Special packet of materials on Suspensions (prepared by EQUAL) includes NYC Board of Education suspension procedures summarized, highlights of court fight to test constitutionality of these procedures, UFT original Delegate Assembly resolution on "Disruptive Child", and suggestions for parents who are faced with a suspension hearing. | 6 |
| 4-7 | Copy of provision in UFT Contract with Board of Education on the "Disruptive Child" Sept 27, 1967 | 2 |
| SUPPLEMENTARY MATERIAL | | |
| 4-8 | Complete copy of Board of Education Circular on Suspension Procedures | 6 |
| 4-9 | Highlights from the United States Crime Commission Report on Delinquency and the Schools (prepared by EQUAL) | 5 |
| 4-10 | Copy of newspaper article in NY Times, July 23, 1967: Poor Schools Called a Cause of Riots - useful as discussion stimulator on causes behind disruptive behavior in pupils; also useful in discussion of "how to read the newspaper." | 1 |
| 4-11 | Copy of newspaper article in NY Times, June 18, 1967: Schools Accused on Rise in Crime | 1 |

KIT # 5: HOW TO EVALUATE YOUR SCHOOL

| | | |
|---|---|---|
| 5-1 | Three different definitions of Education, including a page listing the NYC Board of Education official educational objectives | 2 |
| 5-2 | How to Make A School Visit--a special booklet which clearly outlines in detail the various steps to take in making a school visit: preparation in advance, what to look for outside the school, in the hallways, in the principal's office, in the classrooms. | 20 |

KIT # 5: HOW TO EVALUATE YOUR SCHOOL (con't)

| ITEM # | TITLE AND DESCRIPTION | NO. OF PAGES |
|---|---|---|
| 5-3* | Checklist for Making First Grade Visits (Particularly helpful for use by pre-school parents who want to look over the local public school before sending their kids) | 2 |
| 5-4* | Report Card for Parents (bi-lingually developed) especially designed to accompany "How to Make a School Visit"; | 2 |
| 5-5 | Elementary School Fact Sheet A form which will enable community workers and parents to ask a school principal a wide variety of statistical and factual information about the school (reading scores, ethnic breakdown of staff and pupils, age of building, etc.) | 3 |
| 5-6 | Some suggestions to help you find out how many children are learning to READ in your school | 2 |
| 5-7 | Why aren't all the children learning? A description of the various barriers which prevent children from learning, and some suggestions to parents for finding out which reasons apply in their local school | 2 |
| 5-8 | Will joining a Parent Association help to improve the quality of education in your school? Includes an excerpt from NYC Board of Education policy re parent associations, and two different opinions of their effectiveness | 2 |
| 5-9 | Copy of NYC Board of Education Policy Statement: The Right of Parents and Community to Full Access to all information | 1 |

KIT # 6: WHAT TO DO IF YOUR CHILD'S SCHOOL IS OVERCROWDED?

| | | |
|---|---|---|
| 6-0 | Includes information on short and long range solutions to overcrowding; capital budget procedures, rezoning, annexes, grade reorganization, portables, and who to go to see for further information in each instance | 11 |

MISCELLANEOUS MATERIAL

| | | |
|---|---|---|
| M-1 | Background Information on Puerto Ricans and Education in New York City | 2 |

ORDER FORM

Please fill out this order form, listing SEPARATELY each piece of material of kit which you want. Be sure to include the ITEM NO. , and the QUANTITY you desire. ## EXPLANATION OF TRAINING ACTIVITY - ROLE PLAY

**TRAINING PROBLEM:** To prepare a group of parents and citizens for a meeting with Board of Education officials. (This can be adapted to prepare for a meeting with any establishment group)

**SETTING UP THE SITUATION:**

In this design, all group members, except 4 observers participate in role playing. The training group is divided into two sub-groups ( of equal parts or the parent group may be larger than the "Board" group).
Note: Try to separate the group so that "talkers" and"non-talkers" are equally assigned to both groups.

The groups are told to go into two separate corners (if the room is large) or into two separate rooms.

Take one parent out of the parent group. Give him or her LATECOMER script - not the full parent script.

Give each of the parents a copy of the Parent script.

Give each of the Board staff a copy of the Board script.

Tell them they will have 15 minutes to plan separately and then they will come together for a meeting which will last about 15 minutes.

Assign two observers to the parent group, and two observers to the board group. Give them each an observer's checklist. They are to mark the first half during the initial meeting and the second half while the two groups meet together.

**ACTION:**

AFTER the parent group has selected its chairman and recorder, tell them to raise their hands and the trainer then gives each of these two their individual scripts.

15 minutes

Two separate Planning Meetings

AFTER the Board group has selected who will play which part, tell them to raise their hands and give each of the three special roles (Assistant Superintendent, Spanish Auxiliary Teacher, and Human Relations man) their separate scripts.

followed by

EVERYONE SHOULD PIN ON A NAME TAG TELLING WHO THEY ARE: i.e., PARENT: PARENT CHAIRMAN: PARENT RECORDER: PARENT LATECOMER: BOARD OF EDUCATION SUPERINTENDENT: BOARD STAFF PERSON, ETC.

15 minute meeting with the two groups together

The LATECOMER parent does not join the first group meeting until 5 minutes before it is to break up.

The trainer calls time after 15 minutes, and then the two groups come together for about 15 minutes around a table.

Let the 4 observers sit where they can hear and see everything.

Call time when things are pretty well played out, or after about 15 minutes.

EXPLANATION OF TRAINING ACTIVITY - ROLE PLAY (cont'd)

ANALYSIS: Let everyone take off their name-tags and push the seats back to where they sat before this role play began. (DE-ROLE)

Using a blackboard or newsprint, the trainer asks first those who played the Board and the parents to say how they felt about what happened. Who did they think"won"? Who handled the meeting to get done what they wanted to get done? How did they feel about the Latecomer parent? How did the parent recorder feel? Did she get good notes? How did the various Board people feel?

LET EACH PERSON READ THEIR VARIOUS"PARTS" NOW IF THEY HAVE NOT DONE SO ALREADY.

ALSO, LET SOMEONE FROM EACH "SIDE" READ THE MAIN SCRIPTS.

Were the parents requests clear? Did the Board "hear" everything the parents think they asked for?

Ask the observers what they noted. How did they feel about the pre-planning meeting? How well did that prepare the parents for the encounter with the board? Did they use that planning time well?

How did the Latecomer Parent feel when she arrived?

Draw implications from the discussion. List them for the REAL THING.

COMMENT: The entire training exercise takes from 1½ to 2 hours. If the group wants, it could practice the whole thing once more, switching sides this time.

Note: There are six sheets of paper needed for this exercise:

1. Parent script with enough copies for all the parents except the Latecomer.
2. Individual parent parts (trainer cuts these up and hands them out)
3. Board of Education script - enough for each member
4. Individual staff parts (trainer cuts them up and gives out)
5. Observer's checklist - one copy for each observer
6. Record Form for parent recorder to use.
   This record form has been particularly prepared for use when parents meet with any establishment group in order for them to keep track of demands and what happens.

UNITED BRONX PARENTS
PARENT LEADERSHIP TRAINING PROGRAM

You are a group of parents and community leaders meeting with some Board of Education officials about the schools in your district.

You want to get <u>action</u> from them on two big problems facing you:

1. Many parents have been complaining that the schools either label all Puerto Rican children "retarded" and teach them nothing, or push and skip the children ahead, even when they can't read at all. Several Negro parents you know have complained about the same thing, so you have brought them with you today.

2. The other big complaint coming to you at your Center is that many teachers are hitting the children and calling them names. You want to know what will be done about these abusive teachers this year.

You will have 15 minutes to plan your meeting with the Board of Education people. Decide exactly:

1. What you want to present to them;

2. Who will say what;

3. Who will chair your meeting;

4. Who will take notes at the meeting;

5. What you want the Board of Education people to do about the problems you are bringing to them.

You have promised the other trainees and the parents who came into your Center that you will have FAST ANSWERS FOR THEM AT A MEETING TWO NIGHTS FROM NOW. You must not let the Board of Education people stall you because you have to have at least some specific answers to give your people at the big meeting in two nights.

UNITED BRONX PARENTS
PARENT LEADERSHIP TRAINING PROGRAM

4-1-b
ROLE PLAY

You are all Staff working for the Board of Education. A Puerto Rican parent called the district office the other day and asked for an appointment to discuss some problems in the area. The District Superintendent is on vacation, but the parent was very insistent. So the Assistant to the District Superintendent said OK and asked several other members of the staff who were there for the summer to come to the meeting. You also called downtown to the Human Relations Division and asked them to send someone.

You are very busy right now running summer programs. You have never heard of these women, but you know about Mrs. Antonetty who is head of their program, and you know she is a troublemaker.

You want to handle these people carefully, but really there is very little you can do before the district superintendent comes back from vacation. Also, most of the school principals are away, so if they want to talk about specific schools, it would be best for them to come back in the fall.

YOU HAVE TO FIND SOME WAY TO PUT THEM OFF UNTIL THE FALL WITHOUT SEEMING TO STALL THEM.

You will have 15 minutes to plan your meeting with the parents. Decide exactly:

1/ Who will be the Assistant to the Superintendent and therefore chairman of the meeting;

2/ Who will play each of the other parts:

1. The Non-English Coordinator for the District

2. The Guidance coordinator for the district

3. The person from downtown Human Relations

3/ How you are going to handle the parents so that they will be willing to wait until September for any answers.

ROLE PLAY

## OBSERVERS CHECKLIST

Form for Observers to write down notes.

Observers are not allowed to talk during the session. They will comment later.

(USE THIS IN THE FIRST PLANNING MEETING)

1. What helps the group get started with its job? (who does what?)

2. Does anything hinder or interfere with the group doing its job? (who does what?)

3. Any comments? Do you think this group will do what it wants to do when the big meeting takes place later? (Explain)

USE THIS FOR THE SECOND MEETING BETWEEN THE PARENTS AND THE BOARD OF ED.

1. Who do you think CONTROLS this meeting?

   WHY?

2. Who do you think gets what they want out of this meeting?

   WHY?

3. What do you think was the best thing the parents did?

4. What do you think was the best thing the Bord of Education did?

COMMENTS:

UNITED BRONX PARENTS
PARENT LEADERSHIP TRAINING PROGRAM

4-1-d
ROLE PLAY

PARENT WHO WILL CHAIR PARENT MEETING:

You are going to push that you get answers today. You have promised many parents that they will not have to stand to be pushed around any more. Also you feel the Board of Education should at least re-test every child they call retarded, and retest them in Spanish with a Spanish-speaking (preferably Puerto Rican) qualified testing person. And you don't trust Mrs. Rodriguez at the District office at all. If she is at the meeting, she had better not try to interfere. She always seems to worry more about her job than about the children anyway. Your best approach, you think, is to get each parent in your committee to present a specific part of the story, and then push for action!

PARENT WHO WILL RECORD MEETING:

Your job is to pass an attendance sheet and to keep notes. At the meeting to prepare for the meeting with the Board of Education, try to put down on the form what specific problems your committee intends to discuss. Then at the meeting, put down what is done about each problem. Remember, that if the problems are not covered YOUR RECORD WILL BE INCOMPLETE, SO PUSH THE BOARD OF EDUCATION STAFF TO GIVE YOU ANSWERS!!

PARENT WHO COMES IN LATE:

You know that the committee is seeing the Board of Education today, but you could not get to the planning meeting. However, you are determined to go to the meeting at the District Office anyway, because your child Johnny (Juan) never got a chance to eat lunch last year at least 12 or more times. The teachers would punish him by taking lunch away, and he came home crying. You want to make sure that the principal in PS 92 is fired, and that you get the teacher you want for your child. You are so upset that you don't know what to do; this meeting with the Board of Education is your one chance to tell your story and get help.

4 -1-e
ROLE PLAY

UNITED BRONX PARENTS
PARENT LEADERSHIP TRAINING PROGRAM

ASSISTANT TO SUPERINTENDENT:

You are very anxious that no trouble come out of this meeting so that when your boss comes back he can be pleased that you took care of this for him. Maybe if you ask your Puerto Rican staff member, Mrs. Rodriguez and the man from downtown, Mr. Johnson, to handle these parents, it will take the pressure off you. For after all, since Mr. Johnson, and Mrs. Rodriguez come from the same background as these parents, they will know how to handle this situation.

MR. JOHNSON, FROM HUMAN RELATIONS DIVISION:

Your boss downtown told you just to come up here and observe, NOT TO TALK. These district people always want to push their problems on you, but they never take your advice about what to do. Anyway, secretly you hope these ghetto parents get more angry and tear the superintendent apart. You know how bad the schools are, but in your job you can't really take sides. But maybe if you pass the buck back to the Assistant Superintendent, at least your hands can stay clean.

MRS. RODRUGUEZ

You are delighted that the Spanish parents are getting organized, but why does this boss of yours only call you in when Spanish kids or parents are involved? He never listens to you any other time, and he won't do what you say now. If only the parents will arrange to see you privately later, maybe you could give them some tips. Right now, though, you are determined to let your boss handle this, you won't cool the parents; in fact, maybe in some way you could let them know you are on their side without letting yourself get in trouble with your boss.

## HOMEWORK POLICIES

1. ATTACHED is a copy of the New York City Elementary Division Directive on Homework Policy.

   1. Of course many teachers assign much more homework than is suggested in that policy statement, and many other teachers assign much less.

   *** For example, we know one first grade teacher who assigned 45 minutes of homework EVERY SINGLE NIGHT to her pupils ... including the responsibility of listening to a nightly TV or radio news report and picking something out to tell the rest of the class about the next day. It was also expressly forbidden in that class to ask for help from your mother or dad!

   *** We know of several schools where 5th and 6th grade teachers give heavy homework assignments all week long, and none on week-ends or holidays; however, we know of other schools where regular homework assignments are given daily, and extra heavy ones handed out week-ends and vacations under the assumption "you'll have more time then to do research."

   2. If homework is assigned, and if you agree that it should be assigned then make sure:

      1. Your child does it the best he can!
      2. Sign it daily or weekly to indicate you have seen it.
      3. Make sure the teacher corrects it regularly!

   4. It is certainly fair, if she doesn't seem to correct it, or if she asks "pupil monitors" to correct it, to ask the teacher to SIGN IT REGULARLY TO INDICATE SHE HAS SEEN IT!
   5. When you have a conference, ask to see her record of your child's homework progress, as well as his class work.

II. THERE IS A BIG CONTROVERSY ABOUT HOMEWORK.

   1. Some people (including some educators) believe that homework should be regularly assigned, in rather heavy loads.

      One part of this "Pro-homework" group says:

      a. HOMEWORK SHOULD NEVER BE PUNISHMENT AND HOMEWORK SHOULD NEVER BE DULL DRILLS OR REPETITIOUS.
      They suggest: "Good homework should include lots of reading or good homework involves children in activities they can't do in school." (like: criticize a special TV program, measure all windows and floors at home; visit older citizens in your community to find out what they know about history, etc.) Many people in this group suggest that PARENTS SHOULD PROVIDE A QUIET PLACE FOR THE HOMEWORK BUT SHOULD NOT HELP THE CHILD.

      b. The other pro-homework group takes a different approach: "DON'T DEPEND ON THE SCHOOL TO GIVE YOUR CHILD ADEQUATE DRILL IN SPELLING, HANDWRITING AND MATH. If the teacher does not assign enough homework, get workbooks and other material and drill and coach your child. Go to the school and get additional work. Insist on it. Prepare flash cards and go over and over the areas he needs help in. Teach your child study habits. Don't settle for "busy-work" but insist upon a heavy schedule each day where he can improve his basic skills. Help your child when he says he needs help. He will thrive if you show how concerned you are.

HOMEWORK POLICIES (CONT'D)

2. Other people (including some educators) do not believe that there should be any homework!

   a. "What cannot be done in school should not have to be done at home", they say.

   b. They cite studies which show that homework doesn't help a child achieve in school, but rather often starts tension at home.

   c. Some such educators feel that the parents will only confuse the children by using different methods.

   d. Others say that kids learn the most when left alone to explore in their own way the world around them.

   e. Others say that in urban areas, where many parents have not had a formal education, homework is obsolete. They remind us that many European and South American countries don't assign homework at all (of course, many others do).

III. SUGGESTIONS TO PARENTS

A. Get together and decide if you think homework is important.
B. You might want to look over some sample homework assignments in your own school (check various classes on the same grade) and maybe, if you can hold on them, compare with parochial and private schools nearby.
C. Find out what the school policy is "theoretically."
D. Debate it -- call in some "experts" of your own.
E. Develop your own policy -- and then insist that the school follow through.
   1. How much homework daily? Week-ends? Vacations?
   2. What kind of homework?
   3. Role of parents clarified: To allow help from them or not?
   4. Who should correct homework? How often?
   5. What assurance can the principal give you that this policy will be carried out? Will it be standard for every class in a grade?
   6. What record should be kept?
   7. After six months of your new system, what way could you evaluate your new policy?

NEWS

U.S. DEPARTMENT OF LABOR

W. Willard Wirtz, Secretary

RE Education

USDL--5995

FOR RELEASE: Sunday Editions
November 10, 1963

Excerpts from Remarks
by
Arthur A. Chapin
Special Assistant to the Secretary of Labor

Your chosen theme: "Education--The Negro's Tool for Economic Advancement During the Critical 60's," is very timely, and of great importance to all of us.

Like all great battle, we have to fight on many fronts and the one you selected for this program is of primary importance--to get the education we need, despite all obstacles, so that we are ready. Let us send our children into the employment arena with a chance for survival.

What a shame, what a wasted opportunity it is, when the employer finally says "Yes, I won't discriminate, I'll look for Negroes for these jobs," and none is available.

For example, only one out of 100 engineers in the United States is a Negro--we have lost a golden opportunity.

What are the basic facts that demonstrate the need for more education and better education? As we in the Department of Labor see the picture, education for today's youth cannot be overly stated, particularly for Negro boys and girls. For the man who has not completed grade school will earn
